AUTHOR INDEX TO VOLUMES 106–115

Aaltonen LA. See Sankila R
Abad A. See Martínez-López E
Abate ML. See Negro F
Abbal M. See Alric L
Abboud HE. See Marra F
Abdallaa AM, Sordillo EM, Hanzely Z, Perez-Perez GI, Blaser MJ, Holt PR, Moss SF. Insensitivity of the CLOtest for *H. pylori*, Especially in the Elderly, 115:243-c
Abe KY. See Kuo PC
Abe R. See Kimura K
Abe R, Shimosegawa T, Kimura K, Abe T, Kashimura J, Koizumi M, Toyota T. The role of endogenous glucocorticoids in rat experimental models of acute pancreatitis, 109:933
Abe T. See Abe R
Abe Y. See Sato M
Abecasis R. See Ginès A
Abedin MZ. See Moser AJ
Abei M, Nuutinen H, Kawczak P, Schwarzendrube J, Pillay SP, Holzbach RT. Identification of human biliary α_1-acid glycoprotein as a cholesterol crystallization promoter, 106:231
Abell TL. See Aggarwal A
Abiru H, Sarna SK, Condon RE. Contractile mechanisms of gallbladder filling and emptying in dogs, 106:1652
Abitbol V, Chaussade S, Roux C. Mechanisms of low bone mineral density in inflammatory bowel diseases, 112:1428-c
Abitbol V, Roux C, Chaussade S, Guillemant S, Kolta S, Dougados M, Couturier D, Amor B. Metabolic bone assessment in patients with inflammatory bowel disease, 108:417
Abithol JL. See Read NW
Abken H. See Hombach A
Abo S. See Motoyama S
Abraham A. See Frizell E
Abraham C, Scaglione-Sewell B, Skarosi SF, Qin W, Bissonnette M, Brasitus TA. Protein Kinase C α Modulates Growth and Differentiation in Caco-2 Cells, 114:503
Abraham JM. See Souza RF
Abraham R. See Geibel J
Abramovitch D. See Bar-Meir S
Abrams GA. See Fallon MB
Abrams GA, Jaffe CC, Hoffer PB, Binder HJ, Fallon MB. Diagnostic utility of contrast echocardiography and lung perfusion scan in patients with hepatopulmonary syndrome, 109:1283
Abrams GA, Nanda NC, Dubovsky EV, Krowka MJ, Fallon MB. Use of Macroaggregated Albumin Lung Perfusion Scan to Diagnose Hepatopulmonary Syndrome: A New Approach, 114:305
Abrams K. See Robinson RJ
Abramson MA. See Nikcevich D
Abreu L. See Roman LI
Abrignani S
  Cellular immune reactions against hepatitis C core in chronic hepatitis C, 108: 1957-c
  See Piazza M
Abu-Elmagd K
  See Kusne S
  See Lee RG
Accadia L. See Piepoli A
Accapezzato D. See Pensati L
Accarino A, Azpiroz F, Malagelada J-R. Attention and Distraction in Pain Experiments. Reply, 114:1352-c
Accarino AM, Azpiroz F, Malagelada JR
  Attention and distraction: effects on gut perception, 113:415
  Selective dysfunction of mechanosensitive intestinal afferents in irritable bowel syndrome, 108:636
Accatino L. See Puglielli L
Acha-Orbea H. See Claeys D
Acharya SK. See Nanda SK
Acheson DWK. *Mechanisms in the Pathogenesis of Enteric Disease*, 114:853-pmr
Achour L. See Briet F
Ackermann R. See Schuppan D
Adachi E, Maeda T, Matsumata T, Shirabe K, Kinukawa N, Sugimachi K, Tsuneyoshi M. Risk factors for intrahepatic recurrence in human small hepatocellular carcinoma, 108:768
Adachi M. See Yamamoto H
Adachi Y. See Yamamoto H
Adachi Y, Moore LE, Bradford BU, Gao W, Thurman RG. Antibiotics prevent liver injury in rats following long-term exposure to ethanol, 108:218
Adam AA. See Sartor RB
Adam JA. See Jazrawi RP
Adam R. See Dimicoli JL
Adami HO. See Pinczowski D
Adams DH. See McNab G
Adams J. See Graham MF
Adams P. See Guyader D
Adams PC, Chakrabarti S. Genotypic/Phenotypic Correlations in Genetic Hemochromatosis: Evolution of Diagnostic Criteria, 114:319
Adams PC, Gregor JC, Kertesz AE, Valberg LS. Screening blood donors for hereditary hemochromatosis: decision analysis model based on a 30-year database, 109:177
Adams S. See Braden B
Adaniya H. See Hokama A
Adato M. See Saillan-Barreau C
Adawi D. See Mao Y
Addolorato G, Gasbarrini G, Marsigli L, Stefanini GF. Irritable bowel syndrome and food allergy: an association via anxiety-depression?, 111:833-c
Adermann K. See John M
Adibi SA. The oligopeptide transporter (Pept-1) in human intestine: biology and function, 113:332-srr
Adjei PN. See Karnes WE Jr
Adkins MC. See Loftus EV Jr
Adkins RH. See Fong TL
Adler G, Schmid RM. Chronic pancreatitis: still puzzling?, 112:1762-e
Adler G
  See Bachem MG
  See Lerch MM
  See Menke A
  See Nelson DK
  See Schmid RM
  See See Wahl C
  See Wagner M
  See Eskinazi R
Adrian TE
  See Ding X
  See Vanderhoof JA
Aerts R. See Rutgeerts P
Afdahl N. See Simon DM
Afdhal NH, Ostrow JD, Koehler R, Niu N, Groen AK, Veis A, Nunes DP, Offner GD. Interaction of bovine gallbladder mucin and calcium-binding protein: effects on calcium phosphate precipitation, 109:1661
Afdhal NH. See Zijlstra AI
Afdhal NZ. See Offner GD

SUBJECT INDEX TO VOLUMES 106–115

A-23187 (calcium ionophore)
gallbladder contractility defect and (ground squirrel), 110:251
interleukin 1 and (rat), 106:1493
platelet-activating factor and, 106:1301
A-71623, CCK-A receptor in pancreatic growth and (rat), 107:1135
Abdomen
foregut duplication cysts and, 109:838
irradiation
radiation-induced microvascular dysfunction and (rat), 108:1761
and recruitment of inflammatory cells (rat), 111:981
Abdominal distention, due to intestinal gas, 115:519–tmig, 115:542
Abdominal pain
basic and clinical aspects of, 108:947–br
colonic sarcoidosis and, 108:1556–cr
eosinophilic gastroenteritis and, 106:1–tmig, 106:3
gastric toxoplasmosis in AIDS and, 110:258–cr
hepatic vein thrombosis and, 106:828–tmig, 106:1042
intestinal permeability and, 108:1576–srr
in irritable bowel syndrome, model for, 110:351
irritable bowel syndrome/dyspepsia and, 109:671
mast cell cholangiopathy and, 109:1677–cr
multiple focal nodular hyperplasia of liver and, 108:1256–cr
sphincter of Oddi dysfunction and, 108:242–cr
upper, functional dyspepsia and, 107:1258–tmig
Abdominal radiotherapy
chronic pancreatitis and, 107:632–c
Gram-negative bacilli and, 109:1078
Abdominal symptoms
due to intestinal gas, 115:519–tmig, 115:542
pseudoacute abdominal states, upper endoscopy and, 106:798–srr
Abduction, vocal cord closure during deglutition and, 109:843

Absorption
and digestion, 112:1404–aga
intestinal
FK506 (tacrolimus) effects on, 115:67
hypothermic cardiopulmonary bypass and, 106:318
paracellular transport of six-carbon sugars and (rat), 109:1207
passive, of small solutes, glucose in, 107:389
recruitment and regulation of primary transport proteins and, 109:1706–e
Absorptive cells
genetic hemochromatosis and, 108:2–tmig, 108:208
intestinal, mucin in, 107:28
microvilli in, raw kidney beans and (rat), 106:73
Absorptive hyperemia, lymphatic system and, 108:1599–ss
Abstracts, submitted to American Motility Society, 107:1218
Abuse
history of
gastrointestinal diagnosis and, 110:989, 110:1301–e, 111:1159–c
gastrointestinal symptoms and, 107:905–tmig, 107:1040
health status and, 111:1159–c
sexual
gastrointestinal disease and, 108:1945–ss
gastrointestinal symptoms and, 107:905–tmig, 107:1040
verbal, gastrointestinal symptoms and, 107:905–tmig, 107:1040
Academic medical centers, care of patients with upper GI hemorrhage, 111:385
Acetaldehyde
alcoholic, anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
alcoholic liver disease and, 106:1085–srr
Acetamido-4′-isothiocyanatostilbene-2,2′-disulfonic acid stilbene (SITS)
bicarbonate secretion from distal colon and (rat), 107:329
gastric mucosal pH_i regulation and *(Necturus)*, 108:999
hepatic glucuronidation and (rat), 108:183
Na^+ transport in proximal colon and, 106:125
Acetaminophen
hepatotoxicity, 114:1105–ss
liver failure induced by, 109:1725–tmig, 109:1907, 109:2043–ss
refractory peptic ulcers and, 109:1027–tmig
Acetate
butyrate inhibition of urokinase secretion and, 107:410
colonocyte metabolism of (rat), 106:423
gastric ethanol metabolism and (rat), 108:737
lactate-anion exchanger and (rat), 106:559
[^{13}C]Acetate breath test, for gastric emptying, 108:957–tmig, 108:1048
Acetazolamide
bicarbonate secretion from distal colon and (rat), 107:329
duodenal HCO_3 secretion and, 108:102
Na^+ transport in proximal colon and, 106:125
Acetic acid
colitis induced by
dexamethasone-β-D-glucuronide and (rat), 108:1688
experimental, 109:1344–srr

Alcoholism
anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
cytochrome P4502E1 and autoimmunity formation, 111:206
hepatic mitochondrial DNA deletion in, 108:193
intestinal permeability and, 108:1574–srr
liver transplantation and, 108:615–br
and pancreas, 113:355–e
UGT and, 108:1464

Aldehyde dehydrogenases, expression pattern and activities in alimentary tract, 112:766

Aldehydes, toxic oil syndrome and, 106:691

***ALDH2* genotype,** alcoholism and, 107:576–vidd

Aldosterone
prazosin and, 109:1257
rapid total paracentesis and, 106:558–tmig, 106:709

Alginate beads, TGF-β1 transport in (rat), 107:1319

Alimentary tract
carbonic anhydrase IX, MN/CA IX cDNA sequence and expression in (rat, human), 112:398
epithelium, CDX1 protein expression, 113:478
expression pattern and activities of stomach alcohol and aldehyde dehydrogenases, 112:766
radiology of, 109:2047–br

Alkaline phosphatase
cholangiocarcinoma in primary sclerosing cholangitis and, 107:537–cr
colchicine and, 108:1470
duodenal immunolocalization of (rat), 110:478
interferon α and, 106:686
nonalcoholic steatohepatitis and, 107:905–tmig
primary sclerosing cholangitis and, 106:286–tmig, 106:494, 108:1199
type II, mRNA, in duodenal crypts and villus cells (rat), 112:376
ursodeoxycholic acid and, 108:1470

Alkaline response, gastric, nitric oxide in (rat), 106:367

Alkaline secretion
duodenal (rat), 109:1526
duodenal mucosal
carbon dioxide and (rat), 115:680
water extract of *Helicobacter pylori* and (rat), 113:1570

Alkoxyl radicals, liver cell necrosis and, 108:257–srr

Alkylation, anti-hydroxyethyl free radicals in alcoholic cirrhosis and, 108:201

Alleles
apolipoprotein E phenotype in colon cancer and, 110:1785, 110:2007–e
deletion, colitis-associated neoplasms and, 107:420
HLA genes in Crohn's disease and, 109:1462
loss
α-fetoprotein level in HCC and, 110:184
in ulcerative colitis, 107:369

Allele-specific oligonucleotide techniques, ICAM-1 gene and, 109:440

Allergic gastric inflammation, mast cell-dependent TNF-α production in (mice), 113:1560
Allergy
intestinal permeability and, 108:1575–srr
mast cells and, 106:286–tmig
tumor necrosis factor α and, 106:1514
Allium, stomach cancer and, 110:12
Allogeneic bone marrow transplantation, Crohn's disease after, 114:427–tmig, 114:433, 114:596–e
Allografts
liver
adhesion molecules in, 107:1094
complement activation after ischemia-reperfusion in, 112:908
hepatitis C replication after transplantation and, 110:167
rejection, intestinal transplant pathology and, 110:1820
Allopeptides, MHC, primed T cells and (rat), 107:1537–rc
Allopurinol, free radicals and (cat), 106:629
Allopurinol tolerance test, heterozygous ornithine transcarbamylase deficiency and, 109:282–cr
Alopecia areata, celiac disease and, 109:1333–cr
α4β7 receptors, in malignant lymphomatous polyposis, 107:1519–cr
Alpha-subunit of glycoprotein, identification in ECL, 111:781–srr
Aluminum fluoride, gallbladder contractility defect and (ground squirrel), 110:251
Alveolar-arterial gradient, hepatopulmonary syndrome and, 109:1283
Alveolar echinococcosis (AE)
and liver fibrosis, 111:172
PCR detection of, 109:596–cr
Ambulant subjects, gastroesophageal reflux mechanisms in, 108:83
Ambulatory manometry, prolonged, late radiation enteropathy and, 109:1078
Ambulatory pH recordings, esophageal, 110:1982–aga
Amebiasis, intestinal, epithelial cell-initiated inflammation in, 115:1446
Amebic colitis, pathogenesis, 112:1432–tmig
American Cancer Society
guidelines for colorectal cancer screening, 114:1341–ss
screening flexible sigmoidoscopy recommendation and, 106:593, 106:803–e
American Digestive Health Foundation, 110:1997–aga
American Gastroenterological Association
1997 accomplishments, 113:1820–ge
AGA directions: lessons from Chancellorsville, 109:1727
AGA legislative and public policy program: advocating for the patient, the clinician, and the academician, 110:1263
AGA medical position statement
evaluation of dyspepsia, 114:579
guidelines for management of malnutrition and cachexia, chronic diarrhea, and hepatobiliary disease in patients with HIV infection, 111:1722–aga
guidelines for the use of enteral nutrition, 108:1280
irritable bowel syndrome, 112:2118
treatment of pain in chronic pancreatitis, 115:763
AGA technical review
evaluation of dyspepsia, 114:582
on irritable bowel syndrome, 112:2120
treatment of pain in chronic pancreatitis, 115:765
on tube feeding for enteral nutrition, 108:1282
The American Digestive Health Foundation: advancing digestive health through support of research and education in the cause, prevention, treatment, and cure of digestive diseases, 110:1997
The American Gastroenterological Association: the defining force in gastroenterology – for everybody!, 111:811
Centennial report to American Gastroenterological Association members, 110:1644
centennial year
development of important ideas, 112:287
the development of important ideas during the last 100 years, 113:341
A century of regulatory peptides: from discovery to function, 112:2111
Clinical esophageal pH recording: a technical review for practice guideline development, 110:1982
clinical guidelines for colorectal cancer screening, 112:594
Colorectal cancer screening: recommendations of the U.S. Preventative Services Task Force, 111:1381
Consensus conference statement: *Escherichia coli* O157:H7 infections – an emerging national health crisis, July 11–13, 108:1923, 1994
Crohn's disease, 112:1028
The enigmatic electrical slow waves: a mirror on 100 years of research in gut motility, 113:1785
evolution of endoscopy, 112:591
Federating gastrointestinal and liver societies, 110:939
and gastroenterology research, 111:1573–aga
The global mission of the American Gastroenterological Association is advancing: rising to new international challenges, 111:1141
The growth of knowledge in human digestion and absorption, 112:1404
Guidelines on the use of esophageal pH recording, 110:1981–110:1982
It's time to bring the best and the brightest back to gastroenterology!, 115:1002
liver transplantation, 112:288
Medical progress and ulcer disease: three key observations that changed the compass, 113:1031
Meeting the challenges of today and tomorrow, 110:622
mission, 111:811–aga
Nutrition and the gastroenterologist: the last 100 years, 113:675
Our new president
Donald O. Castell, M.D., 114:1091
James W. Freston, M.D., Ph.D., 108:1339
John H. Walsh, M.D., 106:1139
Tadataka Yamada, M.D., 110:1331
The pendulum of medical progress and intestinal fluid secretion: 1890-1997, 112:1748
Presentation of the Julius M. Friedenwald Medal
to David H. Alpers, M.D., 112:1744
to Eugene D. Jacobson, M.D., 114:1326
to William Silen, M.D., 111:1407–aga
Presentation of the William Beaumont Prize to Bert Vogelstein, M.D., 112:2114
A primer on outcomes research for the gastroenterologist: report of the American Gastroenterological Association on outcomes research, 109:302
Principal care physician initiative, 112:1750
report, 111:3
The science of today is the clinical practice of tomorrow, 113:1026
A strategic plan for the American Gastroenterological Association, 110:625
meeting the challenges of today and tomorrow, 110:622

Successful practice in a managed care environment: managing costs while managing care, 111:516
Training the gastroenterologist of the future: the gastroenterology core curriculum, 110:1266
American Gastrointestinal Association
Clinical Teaching Project Unit 8 of, 107:1211–br
Undergraduate Teaching Project Unit 27 of, 107:1211–br
American Motility Society, abstracts submitted to, 107:1218
Amidated species, tauroursodeoxycholate and (rat), 109:564
Amidation, colon cancer and, 109:1142
Amiloride
acute colitis and (rat), 106:1190
bicarbonate secretion from distal colon and (rat), 107:329
cryptosporidiosis and (piglet), 106:1418
eicosanoid production and (dog), 106:297
gastric mucosal pH*i* regulation and *(Necturus),* 108:999
Na^+ transport and, 106:125
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
octreotide and (prairie dog), 108:1547
propionate-induced changes in intracellular pH and (rabbit), 107:347
Amines, free, anoxic injury of hepatocytes and (rat), 106:168
Amino acid-based formula, eosinophilic esophagitis and, 109:1503
Amino acid consumption test, plasma, 106:488, 107:1910–c
Amino acids. *See also* Branched-chain amino acids
α_1-acid glycoprotein and, 106:231
anoxic injury of hepatocytes and (rat), 106:168
autoimmune gastritis and (mouse), 107:1408
in cirrhosis, and phenylalanine and leucine kinetics, 111:127
CYP2D6 antigenic sites and, 108:470
esophageal secretion and, 106:973
free, leakage, refrigerated donor livers and, 108:1337–tmig, 108:1510
genomic variations in precore/core gene of hepatitis B virus and, 108:310–tmig, 108:505
hepatic system A activity and (rat), 106:480
HLA genes in Crohn's disease and, 109:1462
intestinal, neural control of, 110:315–ss
lactase-phlorizin hydrolase active sites and (rat), 109:1234
mucin biosynthesis and, 107:1352
octreotide and, 107:328–tmig, 107:379
in proteolytic activity and CCK release, 110:567
role as substrate in oral rehydration therapy, 114:197–vidd
transport of, 108:888–srr
uptake, effects of cold perfusion and rewarming of liver cell volume regulation (rat), 112:1344
Amino acid substitutions, DNA mismatch repair and, 109:1691–srr
3-Aminobenzamide, cell death and, 109:472
γ-Aminobutyric acid (GABA)
in antrum (rat), 107:137
ileal electrolyte transport and (guinea pig), 110:498
induction of chloride secretion, 112:672
and intestinal secretion, 111:1163–c
pancreatic neuroendocrine cells and, 110:1595
Aminoglycosides, evidence against use in cirrhotic patients, 114:612–ss
Aminoguanidine
and nitric oxide in gallbladder mucosal inflammatory secretion (cat), 110:598
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
5-Aminolevulinic acid
and Barrett's esophagus, 112:2156–ss
PDT agent for mucosal ablation, 114:604–e
for photodynamic ablation of dysplasia in Barrett's esophagus, 114:448
Aminopeptidase N
biliary, 106:755
pronase resistance of cholesterol pronucleators and, 110:1926
small intestine and (fetal pig), 109:1039
Aminophylline, colonic permeation of inulin and (rat), 108:12
3-Amino-1-propanesulfonic acid, GABA-induced ileal electrolyte transport and, 110:498
Aminopyrine, and EGF effect on parietal cell function via PKC, 110:469
Amino-terminal extension, colon cancer and, 109:1385–e
Amino-terminal propeptide, type III procollagen, 108:1470
Aminotransferase
colchicine and, 108:1470
decompensated hepatitis B and, 109:908
fibrosing cholestatic hepatitis after renal transplantation and, 107:1514–cr
hepatitis C virus and, 107:1457
ursodeoxycholic acid and, 108:1470
Ammonia
brain *myo*-inositol in hepatic encephalopathy and, 107:1475
luminal
gastrin stimulatory effects of (rat), 110:801
Helicobacter pylori and (rat), 108:309–tmig, 108:320
Ammonium acetate, dietary ammonium-induced hypergastrinemia and (rat), 108:309–tmig, 108:320
Amoxicillin
distribution in gastric juice, omeprazole and, 111:358
for *Helicobacter pylori,* 108:1338–tmig, 108:1412
and pediatric *Helicobacter pylori*-associated gastric lymphoproliferative disease, 109:973–cr
resistance, in *Helicobacter pylori,* 115:1272–vidd, 115:1278–vidd
Amphiregulin, gastrointestinal pathophysiology and, 108:573–srr
Amplitude
esophageal EMG modulation and, 109:1437
swallowing and, 109:1701–e
Ampulla, distal esophagus or hiatus hernia, 109:1715–ss
Ampulla of Vater
adenoma, adult polycystic kidney disease and, 109:2007–cr
neoplasm, and sphincter of Oddi dysfunction, 108:242–cr
sphincter of Oddi dysfunction and, 108:242–cr
Ampullary carcinoma, *ras* mutations in, 107:1147
Amputation, digital, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
Amylase
acute pancreatitis and, 106:557–tmig
glucocorticoids in acute pancreatitis and (rat), 109:933
hypercalcemia-induced pancreatitis and, 109:239
IL-10 in pancreatitis and, 108:1917–rc
inhibition, carbohydrate digestion and (dog), 108:1221
inhibitors, wheat, effect on pancreaticobiliary secretions, 111:1313
insulin and (rat), 106:200
liver development and, 108:1236
pancreatic cyst fluid analysis and, 108:958–tmig, 108:1230
pancreatic hyperamylasemia and, 110:1905
pancreatitis and (rat), 108:1855
secretion, transgenic CCK-B/gastrin receptor and (mouse), 115:808–tmig, 115:988

starch resistant to, and improved efficacy of oral rehydration solutions, 115:512–c

Amylin
secretion stimulated by pancreatic cancer cells, 114:130
secretion stimulated by soluble factor in pancreatic cancer cells, 114:2–tmig

Amyloid A amyloidosis, systemic, in Crohn's disease, 112:1362–cr

Anaerobic bacteria, gut translocation and, 107:643

Anal cancer, overview of, 109:633–br

Anal fissure, causes of, 111:1154–ss

Analgesia
gastroscopy and, 109:1405–c
refractory peptic ulcers and, 109:1124

Anal sphincter
relaxation, L-citrulline recycling in (opossum), 112:1250
squeeze pressure, rectoanal inhibitory reflex and, 108:1700

Anaphylaxis
antigen challenge and (guinea pig), 109:53
and colonic disturbance (rat), 112:1996
gastric motility and (rat), 106:1505
intestinal, endothelins in (rat), 115:348

Anastomosis
ileal pouch-anal, 107:1856–vidd
ω-3 fats and (rat), 109:431
ulcerative colitis and, 109:1188, 109:1388

***Ancylostoma caninum,* eosinophilic gastroenteritis and,** 106:1–tmig, 106:3

Anemia
genetic hemochromatosis and, 108:208
in inflammatory bowel disease, erythropoietin for, 112:660–e
sulindac and, 108:1083

Anesthesia
alcoholic liver disease and, 106:1085–srr
duodenal mucus and alkali secretion and (rat), 109:1526
medullary TRH in adaptive cytoprotection and (rat), 109:861
peristalsis and, 110:419
transient LES relaxations and, 109:605–srr

Aneuploidy
achalasia-associated esophageal squamous cell carcinoma and, 108:545–cr
Barrett's adenocarcinoma and, 106:1589
colon cancer and, 108:1040
colorectal adenomas and, 109:1098
crypt-isolation technique and, 106:100
microsatellite DNA markers and, 109:1690–srr
as precancerous marker in ulcerative colitis, 115:1312–tmig, 115:1395
in ulcerative colitis, 107:369

Anger hyperreactivity, jejunal sensorimotor dysfunction in IBS and, 110:393

Angioarchitecture, gastric, in portal hypertension (rat), 106:702

Angiogenesis
bFGF-CS23 and (rat), 106:1106–rc
inhibitor, pancreatic cancer and (Syrian hamster), 108:1526

Angiography
hepatocellular carcinoma and, 107:1257–tmig, 107:1425
multiple focal nodular hyperplasia of liver and, 108:1256–cr

Angiostatin, metastatic suppression and, 108:1946–ss

Angiotensin-converting enzyme inhibition/inhibitor, colon cancer and, 108:1322–ss

Angiotensin II, response to, in aortic vascular smooth muscle cells in cirrhosis (rat), 112:2065

Aniline, toxic oil syndrome and, 106:691

bis-1,8-Anilinonaphthalene sulfonic acid (bis-ANS), calcium phosphate precipitation and (bovine), 109:1661

Animal models
of alcoholism, 107:574–vidd
Wilson's disease and, 107:1189–rc

Animals, live, *Escherichia coli* O157:H7 and, 108:1927–aga

Anions
calcium transport in colon and, 109:876
organic, hepatocyte transport, impaired uptake and secretion in endotoxemic rats (rat), 112:214
organic anion transport protein and, 109:1274

Ankle edema, prazosin and, 109:1028–tmig

Ankylosing spondylitis
gut inflammation in spondyloarthropathy and, 110:1696
HLA-B27 in, 106:557–tmig, 106:637

Anoikis, in colonic crypt cells, 110:1681–tmig, 110:1776

Anorectal function, spinal reflex control of, 108:990

Anorectal manometry, anorectal function and, 108:990

Anorectal varices, bleeding, inferior mesenteric vein ligation and, 107:1165–cr

Anorexia, colonic sarcoidosis and, 108:1556–cr

Anoxia
glycine cytoprotection against (rat), 106:168
and liver cell necrosis, 108:260–srr

ANP 1-11, ANP/VIP in cecal smooth muscle and (guinea pig), 109:1105

Antemortem diagnosis, gastric toxoplasmosis in AIDS and, 110:258–cr

Antiadhesive factor, neutrophil adhesion in cholestasis and (rat), 109:923

Anti-asialoglycoprotein receptor autoantibodies, ethnicity and, 107:799

Antibiotic resistance, in *Helicobacter pylori*
current status of, 115:1278–vidd
epidemiology and mechanism of, 115:1278–vidd
evolution of, 115:1278–vidd
therapeutic implications, 115:1272–vidd

Antibiotics
for acute necrotizing pancreatitis (rat), 110:232
cholangitis and, 109:323–ss
diarrhea and, 106:2–tmig, 106:65
gastric lymphoma and, 107:1835–cr, 109:334–c
for *Helicobacter pylori,* and gastric trap, 111:277–tmig
liver injury by alcohol blocked by (rat), 108:1–tmig, 108:218
oral, for spontaneous bacterial peritonitis, 111:843–tmig
parenteral nutrition complications and, 109:1409–c
prophylactic
in severe acute pancreatitis, 115:1513
in spontaneous bacterial peritonitis, cost analysis for, 113:1058–tmig, 113:1289

Antibodies
α_1-acid glycoprotein and, 106:231
affinity-purified, *MUC6* and Lewis antigen expression and (rabbit), 109:723
alcoholic cirrhosis and, 108:1–tmig, 108:201
anoikosis in colonic crypt cells and, 110:1776
anti-gal IgG and (rat), 110:1704
antimitochondrial
M2, in postinfantile giant cell hepatitis, 107:1162–cr
methotrexate pneumonitis and, 107:266
antineutrophil cytoplasmic. *See* Antineutrophil cytoplasmic antibody (ANCA)
antinuclear, chronic viral hepatitis and, 108:157
antral G-cell function and (rabbit), 110:147
apomucin, 107:28, 107:160
autoimmune hepatitis and, 109:2049–c
carbonic anhydrase, 108:1615–tmig, 108:1802, 110:1579

celiac disease /alopecia areata and, 109:1333–cr
CFTR (human, rat), 108:1016
chronic viral hepatitis and, 108:157
Crohn's disease and, 108:1338–tmig, 108:1396, 110:1810
cryptosporidiosis with AIDS and, 108:627
CYP2D6 antigenic sites and, 108:470
EGF receptor (rat), 107:1278
eosinophil migration and, 108:409
Escherichia coli (rat), 108:1835
familial inflammatory bowel disease and, 108:428
GOR protein, 107:1443
HBC^w, woodchuck hepatitis virus and, 106:828–tmig, 106:1006
Helicobacter pylori in gastric cancer subtypes and, 109:885
hepatitis B core antigen, 106:823–c
hepatitis B virus, 106:243–cr, 108:1810
HBeAg, 108:1–tmig, 108:165, 108:505
hepatitis C virus, 106:248–cr, 106:1048, 106:1291, 106:1596, 107:1443, 108:581–rc
hepatitis E virus, 108:1–tmig, 108:225
Hsp60 expression and, 108:75
5-hydroxytryptamine, 106:859
immunostaining for membrane attack complex of complement and, 108:309–tmig, 108:495
inhibition of liver metastases of colon cancer and (nude mice), 108:172
α_6-integrin, 108:523
interferon α-2a, 107:328–tmig, 107:479
interleukin 6, 107:993
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
kinesin (rat), 108:824
lipid islands in gastric mucosa and, 110:369
Listeria, 108:1396
long-term hemodialysis and, 109:1295
medullary TRH in adaptive cytoprotection and (rat), 109:861
methotrexate pneumonitis and, 107:266–cr
mitochondrial, 107:1162–cr
monoclonal
CD1 and (rat), 106:1143
CD18 and (rabbit), 106:1554
α-5(IV) collagen chain in fetal small intestine and, 107:957
and common peptide to colon, eye, and joint, 107:103
enterocytes and (rat), 106:49
free radicals and (cat), 106:629
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
integrin, 107:1364
mucins and, 106:285–tmig, 106:353
nitric oxide/selectin interaction and, 107:1050
pelvic ileal pouches and, 107:435
primary sclerosing cholangitis and, 106:1–tmig, 106:160, 106:185
staphylococcal enterotoxin B and (mouse), 106:450
MUC6 and Lewis antigen expression and (rabbit), 109:723
neutrophil-mediated endothelial cell injury and, 110:21
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
nuclear antigen, 107:200
platelet-derived growth factor, 107:1110
polyclonal
α-5(IV) collagen chain in fetal small intestine and, 107:957
IL-6-producing gastric carcinoma and, 107:543–cr
primary sclerosing cholangitis and, 106:185
pyruvate dehydrogenase, 108:1802
radiation-induced microvascular dysfunction and (rat), 108:1761
rat proliferating cell nuclear antigen/antibody, endothelial cell arrest and (rat), 107:818
sialosyl-Tn antigen in ulcerative colitis and, 110:694
TNF-α, 108:761
UGT, 108:1464
ulcerative colitis and, 108:423, 108:597–e
vascular adhesion protein 1 and, 110:522
ZO-1 (rat), 108:1863
Anticholinergic agents, transient LES relaxations and, 109:1704–e
α_1-Antichymotrypsin, pronase resistance of cholesterol pronucleators and, 110:1926
Antidiuretic hormone (ADH), hepatic osmoreceptors and, 106:678
Antifungal therapy
empirical, endoscopy compared to fluconazole in AIDS and, 110:1803
for esophageal candidiasis, 107:635–tmig, 107:744
Antigalactose, *Clostridium difficile* toxin A and (rat), 110:1704
Antigen challenge, long-term, and progressively diminished mucosal mast cell degranulation (rat), 111:1515
Antigens
anti-hydroxyethyl free radicals in alcoholic cirrhosis and, 108:201
bacterial, intraepithelial leukocyte response to (rat), 109:748
hepatitis C genotype in blood donors and, 110:178
hepatitis C virus, 107:1436
and replication after liver transplantation, 110:167
HLA, 107:1457
immunization against *Helicobacter mustelae* and, 110:1770
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
intestinal permeability in Crohn's disease and, 108:2–tmig, 108:132
MAGE genes in gastric carcinoma and, 109:1522
MUC6 and Lewis antigen expression and, 109:723, 109:999–e
pathogenic, in ulcerative colitis, 114:1099–e
presentation
by intestinal endothelial cells, 114:649
by sinusoidal endothelial cells and Kupffer cells, 110:1175
protein kinase C during colon tumor development and, 110:1753
rat proliferating cell nuclear antigen/antibody, endothelial cell arrest and (rat), 107:818
sialosyl-Tn, 109:339–tmig, 109:490
in ulcerative colitis, 110:694
transport, rapid transepithelial, in jejunum (rat), 113:856
Antigrowth influence, remodeling hypergastrinemia model and, 109:1407–c
Antihelminthic therapy, *Ancylostoma caninum* and, 106:1–tmig
Antihistamine effect, remodeling hypergastrinemia model and, 109:1407–c
Anti-inflammatory food, Crohn's disease and, 108:957–tmig, 108:1056
Antimicrobial therapy, for dyspepsia, 110:72
Antineutrophil cytoplasmic antibody (ANCA)
autoimmune hepatitis and, 108:1159, 109:2049–c
familial, 107:328–tmig, 107:532, 107:586–e
familial inflammatory bowel disease and, 108:428
ICAM-1 gene and, 109:440
perinuclear, assay, in pediatric inflammatory bowel disease, 115:822
in TCR-α deficiency and chronic colitis (mouse), 113:1828
ulcerative colitis and, 108:423, 108:597–e
Antioxidants
colon cancer and, 108:1322–ss
enhancement of chemotherapy in colorectal cancer cells, 114:235–gn

hydroperoxide metabolism in Caco-2 cells and, 107:80
and hydroperoxides and bile acid toxicity (rat), 109:1249
liver cell necrosis and, 108:257–srr
MnSOD induction in acute colitis and (rat), 109:801
silybin and (rat), 109:1941
Antiport, Na^+/H^+ (rat, rabbit), 109:1421
Antiproteases, neutrophil-mediated endothelial cell injury and, 110:21
Antireflux barrier, gastroesophageal junction and, 109:1703–e
Antireflux surgery, esophageal pH recording and, 110:1989–aga
Antireflux therapy
long-term, 107:1257–tmig, 107:1305, 107:1312, 107:1549–4
transient LES relaxations and, 109:608–srr
Anti-*Saccharomyces cerevisiae* antibody (ASCA) assay, in pediatric inflammatory bowel disease, 115:822
Antisecretory agents, prescription, with NSAIDS, 111:1145–e
Antisense oligonucleotides, TGF-α, Caco-2 cells and, 109:1882
Antisense RNAs
antiviral effects against hepatitis B virus, 115:520–tmig, 115:702
HBV-derived, potential applications of, 115:520–tmig, 115:702
Antithrombin III deficiency, orthotopic liver transplantation and, 109:1631
α_1-Antitrypsin
AIDS-related cryptosporidiosis and, 108:1075
bacterial overgrowth and, 106:615
deficiency
in childhood, 108:1270–srr
gene therapy and, 106:1081–srr
globules, rapid development after liver transplantation for chronic hepatitis C, 112:1372–cr
primary sclerosing cholangitis and, 108:1199
pronase resistance of cholesterol pronucleators and, 110:1926
Antiulcer drug, GGA, cytoprotective effect (guinea pig), 111:345
Antral motility index, food protein-induced anaphylaxis and (rat), 106:1505
Antral sleeve lumen, calcitonin gene-related peptide and (rat), 109:701
Antral vascular ectasia, portal hypertensive gastropathy and, 108:138
Antrectomy
gastric carcinoid tumor, prediction of outcome with octreotide suppression test, 114:817–cr
pancreastatin and (rat), 108:1445
Antroduodenal dysautonomia, acute, hyperglycemia and, 108:951–c
Antroduodenal manometry
childhood chronic intestinal pseudo-obstruction and, 108:1379
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
and nicotine effects on EGG and antral motility, 110:3
Antroduodenal motility
chronic pancreatitis and, 109:224
in diabetes, 107:403
Antropyloric modulation of transpyloric flow (pig), 107:37, 107:302–e
Antropyloroduodenal motility, postprandial, duodenal distention and, 106:583
Antrum
apical cell membrane resistance, luminal acid and (*Necturus*), 113:875
biopsy, *Helicobacter pylori* diagnostic tests and, 109:136
cytokines in G-cell function and (rabbit), 110:147
dietary ammonium-induced hypergastrinemia and (rat), 108:309–tmig, 108:320
duodenal gastric metaplasia and, 110:452
EM523 and (dog), 109:1513, 110:241
GABA and gastrin in (rat), 107:137
gastrin biosynthesis, in pernicious anemia, 112:733
gastrin secretion, vagal inhibition of, tachykinins and (pig), 111:925
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Helicobacter pylori infection, 110:1386
H_3 receptors in (dog, human rat), 109:1566
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
hypomotility, nicotine and, 110:1–tmig, 110:3
immunization against *Helicobacter mustelae* and, 110:1770
islet amyloid polypeptide and (mouse, rat), 107:712
MUC6 and Lewis antigen expression and, 109:723
nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
pancreatic secretory trypsin inhibitor and, 106:735
phospholipids and, 107:327–tmig, 107:362
spasmolytic peptide and (rat), 106:336
Anus
endoscopy of, 110:1670–br
surgery of, 108:301–br, 109:1403–br
Anxiety, relaxation training for gastroesophageal reflux disease and, 107:61
Anxiety-depression, in association of irritable bowel syndrome and food allergy, 111:833–c
Aorta
endothelin 1 and (rat), 108:1842
normalization of nitric oxide production in cirrhosis and (rat), 109:1624
Apc1638N, use mode for FAP-associated extracolonic manifestations, 114:275
Apheresis, lymphocyte, in Crohn's disease, 107:327–tmig, 107:357, 107:579–e, 108:952–c
Apical domain, vesicle targeting to (rat), 109:1600
Apical membrane
colonic, short-chain fatty acids and (rat), 108:673
esophageal, HCl and (rabbit), 108:662
transport processes, 111:135–srr
Apical membrane vesicles, colonic calcium transport in, 109:876
proximal, Na^+ transport in, 106:125
Apnea, deglutitive, 108:1357
Apobec-T overexpression, in human colon cancer, 115:1039–tmig, 115:1096
APO-1/Fas. *See* CD (cluster of differentiation), CD95
Apolipoproteins
ApoA-IV
gastric secretion in pylorus-ligated conscious rats and, 107:1861–rc
intracisternal, acid inhibition by, mechanism of (rat), 109:1583
ApoB, novel truncated form, and fatty liver in heterozygous hypobetalipoproteinemia, 111:1125–cr
ApoE
and gallstones, 111:1405–tmig, 111:1603
phenotype, colon cancer and, 110:1682–tmig, 110:1785, 110:2006–e
ApoE4, and cholesterol gallstone formation, 111:1767–e
Apomucins
in human gastrointestinal tissues, 107:160
Lewis antigen expression and, 109:723, 109:999–e
localization of, 107:28

Apoptosis
in acute graft-versus-host disease (mouse), 115:1205
anoikosis and, 110:1681–tmig, 110:1776
in autoimmune gastritis (mouse), 111:959
basic concepts of, 110:1238–vidd
cell proliferation and, 110:1323–c
in colonic epithelial cells, CD95 and, 113:150
familial adenomatous polyposis and, 109:994–rc
Fas-mediated, and intestinal immunology, 113:345–e
gastric, and *Helicobacter pylori*, 114:627–tmig
Helicobacter pylori-induced, 113:1817–tmig
and *Helicobacter pylori* regulation of gastric epithelial cell growth, 113:1836
hepatocyte
cathepsin B and bile salt induction (rat), 113:1714
germander-induced (rat), 113:1134
mitochondrial permeability transition and (rat), 115:520–tmig, 115:693, 115:783–e
in hepatoma cells, nitric oxide-induced (rat), 111:1059
increased in mice lacking secretory phospholipase A_2 and infected with *Helicobacter felis*, 114:675
intestinal, 111:567
intestinal transplant pathology and, 110:1820
liver hypoxia and hydrogen peroxide production in hepatocytes (rat), 114:153
NSAID-mediated
mechanism underlying, 115:1599–ss
ras mutations and, 113:1817–tmig
pancreatic acinar cells, effect of glucocorticoids on (rat), 114:372
pancreatic duct obstruction and (opossum, rat), 110:875
PARP inhibitors and, 109:472
peroxynitrite-induced, mesalamine and, 113:1480
phospholipids and, 108:304–c
protease-dependent, induced by inhibition of EGFR kinase in colon cancer cells, 114:930
in proximal colon, and lack of butyrate (guinea pig), 112:875
role of pancreatitis-associated protein against during oxidative stress, 114:808
sulindac-induced, enterocyte resistance to, K-*ras* and (rat), 113:1892
and survivin expression in colon and pancreatic cancers, 113:1060–gn
T cell-dependent liver injury and (mouse), 109:166
in T cells, in chronic hepatitis B, 111:156
TNF induction during hepatoxin poisoning and (mouse), 112:923
TNF mediation of in hepatocytes, 114:1035
Appendectomy
in appendicitis, 113:1415–ss
correlation with ulcerative colitis, 114:618–c
indications for, 113:1415–ss
and risk of ulcerative colitis or Crohn's disease, 106:1251, 106:1382–e, 112:1766–ss, 113:377
ulcerative colitis and (rat), 107:1570–c
Appendicitis
Ancylostoma caninum and, 106:1–tmig
appendectomy in, 113:1415–ss
computed tomography in, effects on treatment and hospital resource use, 115:1596–ss
Appendix
neoplasia, in ulcerative colitis, pathological and molecular features, 115:1566–cr
pathology, and surgical treatment, 107:1909–br
APRF/Stat3, liver regeneration and (rat), 110:1854
Aprikalim, vascular ATP-sensitive K^+ channels and (rat), 106:1016
Aprotinin, gastric mucosal blood flow and (rat), 106:440
Aquaretic effect, of RU 51599 in cirrhosis, 109:217
Aqueous paracellular pathway, jejunal, flow rate and, 108:983
Arachidonate, nucleation in postmenopausal women, 112:1278
Arachidonic acid
gut and, 109:285–srr
leukocyte adhesion and (rat), 109:1225
metabolism
cyclooxygenase and, 107:1183–rc
peritonitis and, 114:185–srr
ω-3 fats and (rat), 109:431
Architecture normalization, pelvic ileal pouch and, 109:1090
Arginase, plasma, and gut endotoxin restriction (rat), 113:1375
Arginine
chronically denervated LES in achalasia and (opossum), 109:789
colonic hypersecretion and (rat), 109:483
deficiency, in bile duct ligation (rat), 113:1375
hepatic transport of, 108:898–srr
histamine ileal vasodilatory mechanisms and (guinea pig), 108:712
hypoxia-induced intestinal injury and (rat), 106:346
immunonutrition and, 109:1713–ss
lower esophageal sphincter relaxation and, 107:1059
and nitric oxide, 106:367
in colitis (rhesus macaque), 108:705
in ethanol-induced gastric mucosal injury (rat), 108:58
in experimental alcoholic liver disease (rat), 109:899
in gallbladder mucosal inflammatory secretion (cat), 110:598
in gastric chief cells (guinea pig), 109:1214
nitric oxide/selectin interaction and, 107:1050
and nitric oxide synthase
in dorsal motor nucleus of vagus (cat), 109:1484
in opossum, 106:1444
in portal hypertension (rat), 108:1487
nutritional pharmacology and, 106:1367–vidd
pancreatic ischemia-reperfusion injury and (dog), 107:1125
pancreatitis and (rat), 108:1855
[^{14}C]Arginine, toxic megacolon and, 109:1497
Arginine/arginine dibasic residues, colon cancer and, 109:1384–e
Arginine vasopressin
effects on hepatic stellate cells, 113:615
plasma, in cirrhosis, 106:678
Argyrophil cells, hyperplasia, *Helicobacter pylori* as risk factor for, 112:707
Argyrophilic nucleolar organizer region, anomalous pancreaticobiliary duct and, 110:1614
AR42J cells
bombesin receptor gene expression in (rat), 107:208
C3 in exocrine pancreas and, 110:1919
GABA secretion from, 110:1595
Arousals, colonic motility and, 107:1372
Arousal-swallow complex, gustatory stimulation during sleep and (dog), 107:650, 107:879–e
Arrythmias, and nicotine effects on EGG and antral motility, 110:3
Arsenic treatment, incomplete septal cirrhosis and, 106:459
Arterial blood gas analysis
hepatopulmonary syndrome and, 109:1283
methotrexate pneumonitis and, 107:266–cr
Arterial blood volume, preascitic cirrhosis and, 108:1820
Arterial hypoxemia
hepatopulmonary syndrome and, 109:978
ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr

Arterial perfusion-fixation, Crohn's disease and, 108:911–srr
Arterial pressure, homeostasis of, endothelin 1 and (rat), 108:1842
Arterial supply, multiple focal nodular hyperplasia of liver and, 108:1256–cr
Arterial vasodilation, nitric oxide and (rat), 109:1414–tmig, 109:1624
Arthritis
cholestasis and (rat), 107:1469
future treatments for, 109:614–srr
methotrexate pneumonitis and, 107:266–cr
NSAID gastropathy and (rat), 109:1173
platelets and, 106:827–tmig, 106:840
primary biliary cirrhosis and, 106:193
ulcerative colitis and, 107:1–tmig
Articular complaints, gut inflammation in spondyloarthropathy and, 110:1696
Artificial high-pressure zone (AHPZ), deglutitive inhibition and, 106:827–tmig, 106:875
Asacol, Crohn's disease and, 108:1936–e
***Ascaris lumbroides,* intestinal permeability and,** 108:1574–srr
Ascending contractions, glucose effects on colonic motility and, 108:350
Ascites
cirrhosis with, 108:487, 108:1496, 108:1828, 108:1835, 108:1842
post-paracentesis circulatory dysfunction in, prevention by plasma expanders, 111:1002
hepatic vein thrombosis and, 106:828–tmig, 106:1042
and increased circulating levels of adrenomedullin, 114:336
low albumin gradient, with severe pseudomembranous colitis, 112:991–cr
massive, after liver transplantation, 109:1413–tmig, 109:1631
mast cell cholangiopathy and, 109:1677–cr
normalization of nitric oxide production in cirrhosis and (rat), 109:1624
primary biliary cirrhosis and, 106:1284
refractory, TIPS for, 110:956–ss
RU 51599 and, 109:217
tense, total tap for, 106:558–tmig, 106:709
Ascitic fluid, massive loss after liver transplantation, 111:564–c
Ashkenazim, with Crohn's disease, genetic linkage analysis in, 115:1039–tmig, 115:1056, 115:1286–e
Asia, brown pigment gallstones and, 108:1337–tmig, 108:1534
Asialoglycoprotein receptor
apical expression in intestinal cell line HT-29, 113:1501
autoantibodies, in autoimmune hepatitis, 107:799
hepatitis C virus and, 107:1436
Asialo GM1 antibody, SF-25 monoclonal antibody and (nude mice), 108:172
Aspartame, behavioral and cognitive effects of, 108:299–ss
Aspartate aminotransferase (AST)
ethanol-induced hepatotoxicity and, 109:555
antibiotics and (rat), 108:218
free radical production after cold storage and (rat), 108:1167
hepatic reperfusion injury and (rat), 108:463
hepatitis C genotype in blood donors and, 110:178
hepatocyte oxidative injury and (rat), 109:206
long-term hemodialysis and, 109:1028–tmig, 109:1295
nuclear antigen reactivity in autoimmune hepatitis and, 107:200
primary sclerosing cholangitis and, 108:1199
refrigerated donor livers and, 108:1510
serum, in noninvasive prediction of fibrosis in C282Y homozygous hemochromatosis, 115:808–tmig, 115:919
Aspartic acid
lactase-phlorizin hydrolase active sites and (rat), 109:1234
ras mutations in biliary tract tumors and, 107:1147
Aspergillosis
esophageal involvement in, 106:515–srr
pulmonary, liver failure due to hepatitis C and, 106:248–cr
Aspiration
cytology, pyogenic granuloma in Barrett's esophagus and, 108:1894–cr
deglutitive, tracheostomy and, 108:1357
pneumonia caused by, percutaneous endoscopic gastroscopy and, 106:2–tmig, 106:13
prevention, during swallowing, 113:1427–tmig
tube feeding and, 108:1290–aga
Aspirin
and colon cancer mortality, 115:514–c
and colon cancer prevention, 114:1096–e, 115:1036–c
and colon cancer risk, 108:612–ss
in ulcerative colitis, 107:2–tmig, 107:117
duodenal bicarbonate secretion, 114:428–tmig
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
gallbladder contractility and (prairie dog), 106:1662
gastric adaptation to in *Helicobacter pylori* infection, 114:233–tmig, 114:245
inhibition of duodenal bicarbonate secretion, 114:527
inhibition of Min mouse spontaneous intestinal adenomas (mouse), 114:873–rc
injury caused by, TGF-α in adaptation to (monkey, rat), 110:1446
postsurgical ulcer recurrence, 114:867–tmig, 114:883
prostaglandins and (rat), 107:1746
refractory peptic ulcers and, 109:1124
risk of colorectal adenomas, 114:441
suppression of intestinal polyposis, mechanism of, 113:1039–ss
and upper and lower gastrointestinal perforation, 112:683
Asthma, GERD-induced, 114:849–ss
Astra Pharmaceuticals, new drug company, 115:522–gn
Astrovirus
$CD4^+$ T-cell reactivity against in small intestine, 114:115
T cells in lamina propria recognizing antigens associated with, 114:214–e
Astrovirus diarrhea, after marrow transplantation, 107:1398
Aterioportal fistula, in child with biliary atresia, 114:862–c
Aterioportal fistula syndrome, clinicopathologic features, diagnosis, and therapy, 113:1390
Athymia, hypergastrinemia and (rat), 109:1415
Atony, toxic megacolon and, 109:1497
Atopic eczema, intestinal permeability and, 108:1575–srr
ATPase. *See* Adenosine triphosphatase
Atrial natriuretic peptide (ANP)
cecal smooth muscle VIP and (guinea pig), 109:1105
in cirrhosis (rat), 108:1496
as hepatic vasodilator (rat), 108:803
and ischemic liver damage (rat), 106:143
preascitic cirrhosis and, 108:1820
Atrophic gastritis
bacterial overgrowth and, 106:557–tmig, 106:615
chronic, pathogenesis of, and *Helicobacter pylori*-mediated immunity, 111:655
gastric epithelial dysplasia and, 107:1257–tmig, 107:1288

lansoprazole and *Helicobacter pylori* and, 113:2018–c
pancreatic secretory trypsin inhibitor and, 106:735
Atrophy
mucosal, gap junctions in gastric mucosa and, 109:1492
villous, pelvic ileal pouch and, 109:1090
Atropine
capsaicin in colonic activity and (conscious dog), 109:1197
chronically denervated LES in achalasia and (opossum), 109:789
colonic relaxation and (dog), 106:606
EM523 and (dog), 109:1513
food protein-induced anaphylaxis and (rat), 106:1505
GABA-induced ileal electrolyte transport and, 110:498
lower esophageal sphincter pressure and (cat), 106:381
lower esophageal sphincter relaxation and, 109:1547, 109:1703
neuronal involvement in toxin effects on ileum and (rat), 107:657
PGE_2 in NANC neurotransmission and (rabbit), 110:129
portal insulin in intestinal glucose absorption and (rat), 110:1863
reflux and, 109:1547
Attention
effect on gut perception, 113:415
in pain experiments, 114:1352–c

nucleoporin p62, 110:840
primary biliary cirrhosis and, 106:193
primary sclerosing cholangitis and, 106:1–tmig, 106:185
to tropomyosin, production of in ulcerative colitis, 114:912
Autoantigens
discovery of new ones, 114:400–e
glutathione *S*-transferase subunit proteins in autoimmune hepatitis, 114:329
hepatitis C virus and, 107:1436
hepatocellular, in APS-1, 114:324
Autocrine effect, PDGF in liver fat-storing cells and, 107:1110
Autocrine factor, endothelin 1 in liver and, 110:534
Autocrine growth factor, colon cancer and, 109:1142
Autocrine loop, TGF-α antisense oligos in Caco-2 cells and, 109:1882
Autocrine mechanisms, HB-EGF in gastric mucosa and, 109:1051
Autoimmune cholangiopathy
after consecutive primary biliary cirrhosis and autoimmune hepatitis, 107:1839–cr
carbonic anhydrase antibodies and, 108:1615–tmig, 108:1802, 112:1053–c
Autoimmune disease
genetics of, 106:1676–srr
giant cell hepatitis and, 107:1162–cr
Hsp60 expression and, 108:75
insulin autoimmune syndrome and, 109:1673–cr
Autoimmune enteropathy (AIE), tacrolimus (FK506) therapy for, 111:2–tmig
in children, 111:237–cr
Autoimmune expression, chronic viral hepatitis and, 108:157
Autoimmune gastritis
apoptosis in (mouse), 111:959
cell infiltrates and cytokines in (mouse), 110:1791
induction by neonatal injection of native proton pump antigens (mouse), 113:1136
self-superantigens and (mouse), 107:924
T-cell epitope in (mouse), 107:1408
Autoimmune hemolytic anemia, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
Autoimmune hepatitis
relapse, 110:848
remission, 110:848
Autoimmune hepatitis (AIH)
ANCA and, 108:1159
anti-asialoglycoprotein receptor autoantibodies in, 107:799
autoantigens in, 114:234–tmig
autoimmune cholangiopathy and, 107:1839–cr
azathioprine for, 110:271–cr, 110:2027–c
carbonic anhydrase antibodies and, 108:1802
cirrhosis and, 110:658–tmig, 110:848
genetics of, 106:1676–srr
glutathione *S*-transferase subunit proteins as antigens, 114:329
hepatitis C virus and, 108:1770, 108:1942–e
interferon and, 108:1770, 108:1942–e
6-mercaptopurine for, 110:271–cr, 110:2027–c
nonalcoholic steatohepatitis and, 107:905–tmig
primary sclerosing cholangitis and, 106:1–tmig, 106:161
recombinant nuclear antigens in, 107:200
TCR Cβ in, 106:1321
transaminase values in subclinical Addison's disease and, 109:1324–cr
type 1
allelic basis for HLA-encoded susceptibility to, 112:2028
ANCA in, 108:1159
type 2
Fas/APO1 mutations and autoimmune lymphoproliferative syndrome in patient with, 113:1384
hepatitis C virus genome in, 106:1603
Autoimmune lymphoproliferative syndrome, and Fas/APO1 mutations in patient with type 2 autoimmune hepatitis, 113:1384
Autoimmune polyglandular syndrome type 1 (APS-1), cytochromes P450 as hepatocellular antigens in, 114:324
Autoimmune reactions, hydroxyethyl radical-cytochrome P4502E1 adducts and, in alcoholic liver disease, 111:206
Autoimmune response target, humoral, alcohol dehydrogenase as, in liver disease, 112:483
Autoimmunity
in alcoholic liver disease, malondialdehyde-acetaldehyde protein adducts and (rat), 115:520–tmig, 115:686
in alcoholics, *CYP2E1* as major antigen in, 111:206
Helicobacter pylori-mediated, 111:571–tmig
and pathogenesis of chronic atrophic gastritis, 111:655
hepatitis C virus and, 107:1436, 107:1443, 107:1550–e

ulcerative colitis and, 109:307–e
Autologous tumor cells, irradiated, vaccination in colon cancer with (rat), 109:1414–tmig, 109:1555
Autonomic nervous system
functional gastrointestinal disease and, 106:1114–e
and gastric emptying in diabetes, 109:755
inflammatory bowel disease and, 106:828–tmig, 106:945
Sandhoff disease and, 106:775–cr
short-chain fatty acids and (rat), 106:375
Autonomic neuropathy
Cisapride and, 106:916
diabetic gastrointestinal motility and, 107:403, 107:581–e
Autophosphorylation, premalignant colon lesions and, 108:117
Autopsy, colorectal adenoma and, 108:402
Autoradiography
cholecystokinin A and B/gastrin and (dog), 107:1019
cystic fibrosis rectal mucosa and, 106:890
familial adenomatous polyposis and, 106:285–tmig, 106:362
GABA-induced ileal electrolyte transport and, 110:498
mucosal proliferation in sepsis and (rat), 107:121
neuropeptide receptors in peritumoral vessels and, 110:1719
somatostatin receptors and, 106:951
substance P receptors in IBD and, 109:850
Autoregulation
of CCK secretion (rat), 109:231
intestinal, adenosine and, 107:1172–srr
Avicel, cholesterol absorption and (hamster), 107:444
Avidin-biotin histochemistry
colorectal aberrant crypt foci and, 108:434
peanut lectin and, 106:117
Awakening, colonic motility and, 107:1372
Axons, pancreatic ductal carcinoma and, 107:219
Azathioprine (AZA, AZT)
for autoimmune hepatitis, 110:271–cr, 110:2027–c
in Crohn's disease, 108:1936–e
effects on clinical course, 111:1161–c
loading dose for, 109:1726–tmig, 109:1808
for severe recurrent ileitis, 112:1475
in pediatric inflammatory bowel disease, safety of, 115:807–tmig, 115:813
Azoxymethane
butyrate and cancer in colitis and (rat), 110:1727
ω-3 fats and (rat), 109:431
regional chemoprevention of colon cancer and (rat), 109:1167

Bacille Calmette-Guérin vaccination, in colon cancer (rat), 109:1414–tmig, 109:1555
Back-diffusion, prostaglandin E_2 in uremia and (rat), 107:1382
Backflow, antropyloric modulation of transpyloric flow and (pig), 107:37
Back-titration, duodenal mucus and alkali secretion and (rat), 109:1526
Baclofen, GABA-induced ileal electrolyte transport and, 110:498
Bacteremia, bacterial translocation and, 107:47
Bacteria
adherent, 106:35, 106:255–e
adhesion to mucosal surfaces, 109:692
alcoholic liver injury and (rat), 108:1–tmig, 108:218
cholesterol gallstones and, 108:624–tmig, 108:860, 108:934–e, 111:1617
cirrhosis and, 108:1616–tmig, 108:1828
Crohn's disease and, 108:1396
DNA mismatch repair and, 109:1685–srr
endocrine cells and (rat), 107:1259
endogenous toxins, PAF-induced intestinal injury and (rat), 109:83
enteritis caused by, Shiga-like toxin I in (rabbit), 106:306, 106:540–e
epithelial cell proliferation and (mouse), 108:1745
esophageal infections and, 106:522–srr
folate synthesis in small intestine, 110:973–tmig, 110:991
and gallstones, 109:2050–c, 111:1617
Hsp60 expression and, 108:75
infection, meat and poultry inspection and, 112:4–gn
internalization, enterotoxin and, 110:1429
irradiation of red meat to kill, 114:4–gn
lipase, in gastrointestinal contents, 107:231
mucosal B-cell response and, 109:819
and mucosal immunity of gut, 114:2–tmig
nonsteroidal anti-inflammatory drug enteropathy (rat), 112:109
overgrowth
hyperchlorhydria and, 106:557–tmig, 106:615
small bowel, 110:955–ss
sterile sampling technique and, 107:1214–c
parenteral nutrition complications and, 109:1409–c
pathogenic, host resistance to, 107:906–tmig, 107:915, 107:950, 107:1193–e
PCR in Whipple's disease and, 110:1735
pneumatosis cystoides intestinalis and, 108:1560–cr
products of and recruitment and activation of leukocytes during inflammation, 114:1066–srr
stimulation of TGF-beta-1 in intestinal fibrosis (rat), 114:519
translocation, 107:635–tmig, 107:643
in cirrhosis (rat), 108:1835
and urinary nitrate (rat), 107:47
Bacterial antigens
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
intraepithelial leukocyte response to (rat), 109:748
Bactericidal/permeability-increasing protein, mucosal, in colitis, 110:733
***Bacteroides* spp.,** dietary stimulation of Bifidobacteria and, 108:958–tmig, 108:975
***Bacteroides fragilis,* and peritonitis,** 114:185–srr
***Bacteroides fragilis* enterotoxin,** bacterial internalization and, 110:1429
***Bacteroides vulgatus,* Crohn's disease and,** 108:1396
Bafilomycin, pancreatic H^+/HCO_3^- secretion and (pig), 108:850
Balloon cytology, in Barrett's esophagus
and detection of neoplasia, 112:2138–e
and surveillance for dysplasia and cancer, 112:1781–tmig, 112:1787
Balloon distension
duodenal mechanoreceptor stimulation by, 106:583
esophageal sensitization in noncardiac pain and, 108:311
glucose effects on colon motility and, 108:309–tmig, 108:350
in irritable bowel syndrome, 108:636, 108:927–e
and jejunal sensorimotor dysfunction, 110:393
rectal (rat), 107:94
rectoanal inhibitory reflex and, 108:1700
somatic nociceptive reflex and, 107:985
Balsalazide, versus mesalamine for treatment of acute ulcerative colitis, 114:15
***Bam*HI,** *mm23-H1* gene in small hepatocellular carcinoma and, 107:486
Bannayan-Riley-Ruvalcaba syndrome gene, localization to chromosome 10q23, 113:1433–rc

Banti's syndrome, 113:2025
Barium, and vitamin B_{12} in IBD, 113: 371–tmig
Barium enema
colonic sarcoidosis and, 108:1556–cr
and colonoscopy, 112:294–e, 113:1048–c
Crohn's disease and, 108:310–tmig, 108: 345
detection of colorectal cancer, 112:17
HCl in esophageal cells and (rabbit), 108: 662
hereditary nonpolyposis colorectal cancer and, 108:1405
Barium studies, small bowel in Crohn's disease, 114:1349–c
Barium sulfate, duodenal brake and, 110:740
Barostat
colonic injection of glycerol in IBS and, 110:351
in colonic relaxation (dog), 106:606
functional dyspepsia and, 107:1345
Barostat-regulated balloons
glucose effects on colon motility and, 108: 309–tmig, 108:350
gut distension and, 108:680
Barrett's esophagus, 111:565–c
adenocarcinoma in, 106:274–c
at esophagogastric junction, 109:1541
p53 mutations and, 106:1589
5-aminolevulinic acid for photodynamic ablation of dysplasia, 114:448
cancer surveillance in, 106:275–c, 106: 1128–c
cell cycle abnormalities in, 106:553–c
diagnostic inconsistencies in, 107:945
duodenogastroesophageal reflux and, 107: 636–tmig, 107:747
dysplasia in, 106:1128–c
laser-induced fluorescence detection of, 111:1–tmig, 111:93
epithelial cultures, 114:233–tmig
genetic analysis of, 114:295
epithelium
cell origin for, 112:677–tmig
columnar, 110:615–srr
cytokeratin markers in, 112:760
esophageal pH recording and, 110: 1989–aga
eradication with 5-ALA and acid suppression, 112:2156–ss
familial aggregation of GERD in, 113: 1427–tmig, 113:1449
neoplasia in
balloon cytology detection of, 112: 2138–e
progression, *p16* gene inactivation during, 115:1311–tmig, 115:1381
p53 antibodies in, 115:19
p53 mutations and, 106:1589
p53 protein immunoreactivity and, 107: 1012
pyogenic granuloma and, 108:1894
quantitative imaging of, 108:360
screening, 114:1101–ss
short-segment, prevalence, diagnosis, and associations, 114:409–ss
Src activation in, 112:321–tmig, 112:348
surgery for, 111:1395–e
surveillance in, 106:1128–c, 112:661–ss
for dysplasia and cancer, with balloon cytology, 112:1781–tmig, 112:1787
TGF-β1 defects in, 115:521–gn
TP53 mutations and, 107:1012
Barrier function, trefoil peptides and (rat), 109:516
Basal acid output, *Helicobacter pylori* and, 109:681
Baseline performance status, tamoxifen in hepatocellular carcinoma and, 109:917
Basement membrane
colon cancer cells and (rat), 107:701, 107: 881
intraductal pancreatic neoplasms and, 107:1488
pores, lamina propria cell migration via, in active IBD mucosa, 115:807–tmig, 115:841
Schistosoma mansoni fibrosis and, 107:773
Base-pairs
deletion
CCK-A receptor abnormality and, 109: 1375
DNA mismatch repair and, 109:1691–srr
insertion, DNA mismatch repair and, 109:1691–srr
Basic fibroblast growth factor (bFGF)
epithelial cell function and, 106:1254
ulcer healing by (rat), 106:1106–rc
Basidiobolomycosis, mimicking IBD, 112:250–cr
Basolateral cell surface, bicarbonate secretion from distal colon and (rat), 107:329
Basolateral membrane
colonocyte, bicarbonate secretion from distal colon and (rat), 107:329
cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
epidermal growth factor receptor kinase and (rat), 107:1278
esophageal cell, HCl and (rabbit), 108: 662
jejunal, lactate-anion exchanger in (rat), 106:559
BAX gene, mutation in hereditary nonpolyposis colorectal cancer, 114:268
Bax induction in proximal colon, lack of butyrate and (guinea pig), 112:875
BayK 8644, calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
B cells. ***See*** **B lymphocytes (B cells)**
B7 costimulatory molecule expression, by sinusoidal endothelial cells and Kupffer cells, 110:1175
Beclomethasone dipropionate, oral, for graft-versus-host disease, 115:28, 115:220
Bedlington terriers, copper toxicosis in, 107:1788
Bedrest, anorectal variceal bleeding and, 107:1165–cr
Beef tallow, dietary, in mucosal adaptation (rat), 106:94
Beer, heartburn and, 108:125
Behavior therapy, rumination syndrome and, 108:957–tmig
BehCet's syndrome, gastrointestinal manifestations of, 115:1316–im
Belch response
lower esophageal sphincter tone and, 108: 441
rumination syndrome and, 108:957–tmig
Bench, bedside and, 108:1343–e
Benzamil, Na^+ transport in proximal colon and, 106:125
Benzenetriol, hepatocyte oxidative injury and (rat), 109:206
Benzimidazoles, *Helicobacter pylori* and (rat) (correction), 107:1573
Benzyldimethyltetradecylammonium chloride (BAC), chronically denervated LES in achalasia and (opossum), 109:789
Benzyl-GalNAc, mucin and, 106:389
β cells, pancreatic ischemia-reperfusion injury and (dog), 107:1125
Betacellulin, gastrointestinal pathophysiology and, 108:574–srr
11-Beta-hydroxysteroid dehydrogenase, downregulation in cirrhosis (rat), 114:175
Betaine, as osmolyte in liver macrophages (rat), 110:1543
β-oxidation, in Reye's syndrome (rat), 107:517
Bethanechol
apolipoprotein A-IV and (rat), 109:1583
cystic fibrosis rectal mucosa and, 106:890
gallbladder contractility defect and (ground squirrel), 110:251
glucose effects on colon motility and, 108: 350
Beverages, popular, heartburn and, 108: 2–tmig, 108:125

BFGF-CS23, ulcer healing by (rat), 106: 1106–rc
Bicarbonate
bile secretion dependent on, stimulation by neuropeptide Y in dorsal vagal complex (rat), 112:1673
Brunner's glands and (rabbit, rat), 109: 1160
butyrate uptake and (rat), 108:673
carbonic anhydrase and, 108:102
cholesterol gallstones and, 106:749
duodenal (rat), 109:1526
duodenal secretion of
acid-stimulated, and CFTR-mediated transport pathway (mouse), 113:533
and aspirin and alcohol, 114:428–tmig
cGMP in, 111:1763–e
Helicobacter pylori and, 110:658–tmig, 110:705, 110:947–e
histamine and (rabbit), 108:1676
prostaglandin E receptor subtypes and (rat), 113:1553
gastric mucosal pH and *(Necturus),* 108: 999
gastric mucosal pH and (rat), 107:1–tmig, 107:180
gastric mucosal repair and (cat), 107:149
hepatocellular DNA synthesis and (rat), 108:477
ileal transport of (rabbit), 106:1562
inhibition of duodenal secretion by ulcerogenic agents, 114:527
lactate-anion exchanger and (rat), 106:559
pancreatic H^+/HCO_3^- secretion and (pig), 108:850
salivary esophagoprotection and, 110:675
secretion of
from cholangiocytes, bombesin stimulation of (rat), 113:311
in diabetes (rat), 112:418
distal colonic (rat), 107:329
gastric, prostaglandin E receptor subtypes and (rat), 113:1553
IL-10-stimulated, in small intestine (rat), 111:936
in pancreatic ducts, β-adrenergic agonists and (rat), 115:714
Bicarbonate-rich choleresis, ursodeoxycholate and, 109:965
Bicuculline, GABA-induced ileal electrolyte transport and, 110:498
Bifidobacteria, dietary stimulation of, 108:958–tmig, 108:975
Bile
abnormalities, with microlithiasis, 115: 124
ATP-activated conductances in biliary cells and, 107:236
bad, in esophagus, 110:323–c
brown pigment gallstones and, 108:1337–tmig, 108:1534
calcium in, 109:1720–c
composition, gallbladder emptying and, 108:1615–tmig, 108:1882
duodenal brake and, 110:740
6-fluoro-ursodeoxycholic acid analogue and, 108:1204
formation of, 107:1211–br
leukotriene C_4 and (rat), 108:1793
low-density particle and, 110:1936
and MHC class II molecule expression on intestinal epithelium (rat), 113:1817–tmig, 113:1901
octreotide-associated gallstones and, 107: 1258–tmig, 107:1503
pancreatic juice
CCK-stimulated pancreatic enzyme secretion and (rat), 107:525
diversion of (rat), 109:231
pigments, deposition, fasting and (rats), 111:217
postprandial gallbladder motor function and, 109:582
pronase resistance of cholesterol nucleating proteins in, 110:1926
proteins, ursodeoxycholic acid and, 110: 1225
saturation enhanced by 7α-dehydroxylation bacteria, 111:1611
secretion of
bicarbonate-dependent, neuropeptide Y in dorsal vagal complex and (rat), 112:1673
bombesin and (rat), 113:311
neural regulation of (rat), 113:311
phosphatidylinositol 3-kinase and (rat), 113:954
ursodeoxycholate and, 109:965
Bile acids
acute necrotizing pancreatitis and (rat), 110:232
apolipoprotein E phenotype in colon cancer and, 110:1785
bacterial lipase and, 107:231
biosynthesis, maximal, in humans, 106: 273–c
calcium carbonate supplementation and, 106:1162
cholestatic, inhibition of liver kinesin (rat), 108:824
and cholesterol metabolism, 113:1818–tmig
concentrations in liver tissue and hepatocyte nuclei (rat, human), 112:226
conjugated, jejunal absorption of (guinea pig), 110:1098
duodenogastroesophageal reflux and, 107: 636–tmig, 107:747
esophageal mucosal injury and, 108:1897–srr
ethanol-induced hepatotoxicity and, 109: 555
gallstone recurrence and, 106:215
hepatic, in cholestatic liver disease, 106: 134
hydrophobic, hydroperoxides and (rat), 109:1249
inhibition of cholesterol 7α-hydroxylase (rabbit), 113:1958
inhibition of liver kinesin (rat), 108:824
interferon α and (rat), 108:1192
intestinal absorption of (rabbit), 110:459
metabolism
hepatolithiasis and, 110:963–c
pregnancy and, 106:820–c
MHC class I and (rat), 107:781
monohydroxy, cholestatic potential of (mouse), 115:1223
secretion, tauroursodeoxycholate-stimulated, in liver, mitogen-activated protein kinases and (rat), 113:1306
synthesis
hepatic reserve for, in chronic liver disease, cholestyramine loading test for, 112:1284
pathways for (rat), 113:1949
therapy
chart bowel syndrome and, 106:1369–vidd
safety and efficacy of shockwave lithotripsy of gallstones with and without, 112:1603
transport
after ileal resection in rat, molecular analysis of, 115:1040–tmig, 115: 1172, 115:1291–e
chlorambucil-taurocholate in hepatocellular carcinomas and, 113:1295
in endotoxemic rats (rat), 112:214
Bile acid transporter
apical sodium-dependent
expression in cholangiocytes (rat), 113: 1734
mRNA, induction in ileum by cholic acid (rat), 113:1599
ATP-dependent, other than Ecto-ATPase (rat), 113:249
Bile canalicular membrane, cholestasis and (rat), 107:255
Bile canaliculi
contraction, nitric oxide and, 108:841
and hepatic cytoprotection by biliary cholesterol and phospholipid (rat), 107: 244
transport of bile acids, 109:1600
Bile ducts
cancer, extrahepatic, gallstones and, 107: 1205–ss
carbonic anhydrase and, 108:1802
cells
complement-regulatory protein expression in liver and, 107:505

immune adhesion molecules and, 107:1457
epithelium, 113:1420–br
hilar intrahepatic, pancreatic enzymes and, 108:1236
low, malignant obstruction of, 109:1398–ss
obstruction
liver failure due to hepatitis C and, 106:248–cr
surgical bypass of, 109:1398–ss
paucity, tetracycline-induced, 107:1844–cr
resection
arthritis in cholestasis and (rat), 107:1469
neutrophil adhesion in cholestasis and (rat), 109:923
opioid binding in cholestasis and (rat), 108:1479
stones, 113:694–br
detection with endoscopic retrograde cholangiography versus endoscopic ultrasonography, 111:829–ss

Caco-2 cells
antisense TGF-α oligos in, 109:1882
L-carnitine uptake, 111:1534
growth and differentiation
differential activation of IGF-II P3 and P4 promoters in, 114:1221
modulated by protein kinase C-alpha, 114:503
HMG-CoA gene expression in, lysophosphatidylcholine and, 110:1068
lectins and, 106:85
lipid peroxide-induced injury of, 107:80
monocyte-chemoattractant protein 1 and, 108:40
mucin synthesis in, 106:285, 106:389–tmig
PAF acetylhydrolases and, 109:1826
peroxynitrite activation of poly(ADP-ribose) synthase in, 114:510
recombinant growth factors and, 106:1254
Cadherins
in hepatic primary epithelial tumors, 110:1137
in inflammatory bowel disease and neoplasia, 111:261–ss
Caffeine, cytochrome P4502B traffic and (rat), 108:1110
***cagA* gene**
CagA protein product, *Helicobacter pylori* strains expressing, and gastric lymphoma, 112:1482, 113:2022–c
and gastritis, effect of *Helicobacter pylori* eradication, 113:25
Helicobacter pylori, cytokine mRNA in gastric mucosa and, 110:1681–tmig, 110:1744
Calbindin, localization to ECL, 111:781–srr
Calbindin D_{28k}, neuronal coding in humen ileum and, 107:680
Calcification, pancreatitis and, 107:1481
Calcitonin gene-related peptide (CGRP)
acute colitis and (rabbit), 106:1208
antral function and (rat), 109:701
Crohn's disease and, 106:951
esophageal smooth muscle and (opossum), 113:514
gastric mucosal blood flow and (rat), 106:286–tmig, 106:440
gastrin protection and (rat), 109:89
mast cell degranulation in colonic motility and (rat), 107:976
neuronal coding in human ileum and, 107:680
protection of gastric mucosa by activation of potassium channel (rat), 114:71
secondary biliary cirrhosis and (rat), 108:1183
Calcium (Ca^{2+})
in bile and gallstones, 109:1720–c
binding, in model bile, 107:831
bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208
calpain activation during oxidative stress and (rat), 110:1897
celiac disease and, 109:122
chemotaxis of intraepithelial lymphocytes and, 109:1154
cholangiocarcinoma and, 108:1908–rc
cholecystokinin-coupled intracellular signaling and, 106:763
colon cancer and (mouse), 109:339–tmig, 109:498
colonic (mouse), 109:339–tmig, 109:498
dietary, and salmonellosis, 113:372–tmig, 113:550
EGF inhibition of parietal cell function via PKC and, 110:469
Escherichia coli and, 106:1150
glycine cytoprotection and (rat), 106:168
hepatocellular DNA synthesis and (rat), 108:477
hypercalcemia-induced pancreatitis and, 109:239
ileal crypts and (mouse), 108:1345
$InsP_3$ release of, bile canalicular contractions and, 108:841
intestinal bypass and, 106:1162
intracellular, CCK-A receptor abnormality and, 109:1375
low bone density in Crohn's disease and, 107:905–tmig
metabolism, after myenteric denervation (rat), 108:1629
mitochondrial membrane permeability transition and (rat), 110:558
nitric oxide in gastric chief cells and (guinea pig), 109:1214
nitric oxide-mediated injury to gastric mucosal cells and (rat), 111:65
nitric oxide synthase and (opossum), 106:1444
octreotide and (prairie dog), 108:1547
osteopenia and, 108:417
parietal cells and (rabbit, rat), 109:1060
platelet-activating factor and, 106:1301
P_2 purinergic receptors and (rabbit), 106:1485
receptor-operated free concentration signals, ethanol and, in cultured hepatocytes (rat), 113:641
in regulation of mucin secretion in gallbladder epithelial cells, 112:978
serum, biliary calcium and, 107:1812
somatostatin receptor subtype on ECL cells and (rat), 107:1067
taurocholate and (rat), 106:866
toxic megacolon and, 109:1497
transport, in colonic apical membrane vesicles, 109:876
Calcium-activated potassium channels, in colonic myocytes, effect of motilin and erythromycin on (rabbit), 114:748
Calcium-binding protein, calcium phosphate precipitation and (bovine), 109:1661
Calcium carbonate supplementation, after intestinal bypass, 106:1162
Calcium channel blockers
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
and gastrointestinal hemorrhage, 111:1391–e
voltage-dependent, hepatocellular DNA synthesis and (rat), 108:477
Calcium chloride, hypercalcemia-induced pancreatitis and, 109:239
Calcium currents, jejunal circular smooth muscle cells and (dog, human), 109:707
Calcium electrodes, misrepresentation of calcium binding by bile salts, 109:662–c
Calcium-mediated agonist, gastric chief cells and (guinea pig), 109:1214
Calcium-mobilizing hormones, sensitivity to, hepatocyte location in acinus and (rat), 111:1343
Calcium orange-loaded gastric glands, gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
Calcium phosphate, and treatment of Crigler-Najjar disease, 112:322–tmig, 112:455
Calcium phosphate-DNA coprecipitation, in vivo gene transfer and, 106:1077–srr
Calcium signaling
acinar cell, disruption in cerulein-induced pancreatitis (mice), 111:481

along colonic crypt axis, acetylcholine-induced (rat), 115:1131
in enterochromaffin-like (ECL) cells, galanin and, 115:330
in epithelium, 106:1349–srr
Calculated shunt fraction, hepatopulmonary syndrome and, 109:978
Calmodulin
cholecystokinin-coupled intracellular signaling and, 106:763
nitric oxide in gastric chief cells and (guinea pig), 109:1214
Calmodulin-dependent protein kinase II, Mz-ChA-1 cells and, 109:1316
Calorie intake, gastrin releasing peptide and, 106:1168
Calpain
activation, oxidative stress and (rat), 110:1897
mitochondrial membrane permeability transition and (rat), 110:558
Calpain protease, anoxic injury of hepatocytes and (rat), 106:168
Calpeptin, calpain activation during oxidative stress and (rat), 110:1897
Camostate
inhibition of pancreatic enzymes, adaptation of pancreas to, 115:388
in proteolytic activity and CCK release, 110:567
***Campylobacter jejuni,* gastric epithelium and,** 108:65

in induction of paw edema model (rat), 107:173
SF-25 monoclonal antibody and (nude mice), 108:172

Carrier-mediated transport mechanism, Ca^{2+} uptake by colonic apical membranes and, 109:876

Carrier state
hepatitis B virus, 106:1000
hepatitis C virus RNA and, 106:994

[^{14}C]β-Casein degradation assay, quantitative, transin secretion and (rat), 109:889

Casein feeding, cholecystokinin-stimulated pancreatic enzyme secretion and (rat), 107:525

Case Reports
Achalasia-associated squamous cell carcinoma of the esophagus: flow-cytometric and histological evaluation, 108:545
Acid secretion from an esophageal inlet patch demonstrated by ambulatory pH monitoring, 115:1574
Acquired intestinal aganglionosis and circulating autoantibodies without neoplasia or other neural involvement, 112:1366
Acute Budd–Chiari syndrome with fulminant hepatic failure in a pregnant women with factor V Leiden mutation, 111:1670
Acute cytomegalovirus infection in a child with Ménétrier's disease, 109:592
Acute hemoperitoneum after large-volume paracentesis, 113:978
Acute pancreatitis due to pyritinol: an immune-mediated phenomenon, 115:452
Adaptation of hepatitis C virus for persistent infection in patients with acute hepatitis, 106:1344
Adenocarcinoma in the rectal segment in familial polyposis is not prevented by sulindac therapy, 107:854
Association between pancreatic cystadenocarcinoma, malignant liver cysts, and polycystic disease of the kidney, 112:2104
Basidiobolomycosis mimicking IBD, 112:250
Biliary shunt fistula following transjugular intrahepatic portosystemic shunt placement, 111:1353
Celiac disease and alopecia areata: report of a new association, 109:1333
Central nervous system Whipple's disease: relapse during therapy with trimethoprim-sulfamethoxazole and remission with cefixime, 106:782
Cholangitis associated with paroxysmal nocturnal hemoglobinuria: another instance of ischemic cholangiopathy?, 109:1338
Cholestatic hepatitis leading to hepatic failure in a patient with organ-transmitted hepatitis C virus infection, 106:248
Chronic esophagitis evolving to verrucous squamous cell carcinoma: possible

role of exogenous chemical carcinogens, 110:904
The clinical correlates of a 3′ truncating mutations (codons 1982–1983) in the adenomatous polyposis coli gene, 113:326
Colonic ischemia reveals thromboangiitis obliterans (Buerger's disease), 110:900
Colonic obstruction secondary to sarcoidosis: nonsurgical diagnosis and management, 108:1556
Copper-induced acute rhabdomyolysis in Wilson's disease, 108:885
Cryoglobulinemia presenting after liver transplantation, 110:265
The development of a mutation in the precore region of the hepatitis B virus in a chronically infected individual, 106:243
Diagnosis of *Echinococcus multilocularis* infection by reverse-transcription polymerase chain reaction, 109:596
Diagnosis of Wilson's disease in an asymptomatic sibling by DNA linkage analysis, 109:2015
Diarrhea and autonomic dysfunction in a patient with hexosaminidase B deficiency (Sandhoff disease), 106:775
Diffuse hemorrhagic gastroenteropathy: report of a new entity, 106:500
Drug-associated acute-onset vanishing bile duct and Stevens-Johnson syndromes in a child, 115:743
Dystonia, hyperintense basal ganglia, and high whole blood manganese levels in Alagille's syndrome, 106:1068
Escherichia coli O157:H7 infection mimicking Crohn's disease, 112:995
Esophageal achalasia and coexistent upper esophageal sphincter relaxation disorder presenting with airway obstruction, 109:1328
Esophageal carcinosarcoma: a genetic analysis, 113:973
Etiology and management of toxic megacolon in patients with human immunodeficiency virus infection, 107:858
Exacerbation of chronic ulcerative colitis with mesalamine, 108:1889
Expression of the mucosal homing receptor $\alpha 4\beta 7$ in malignant lymphomatous polyposis of the intestine, 107:1519
Fas/APO1 mutations and autoimmune lymphoproliferative syndrome in a patient with type 2 autoimmune hepatitis, 113:1384
Fatal acute fulminant liver failure due to clozapine: a case report and review of clozapine-induced hepatoxicity, 112:1707
Fatal hyperammonemia following orthotopic lung transplantation, 112:236
Fatty liver in heterozygous hypobetalipoproteinenima caused by a novel truncated form of apoplipoprotein B, 111:1125–cr
Fibrosing cholestatic hepatitis in a hepatitis B surface antigen carrier after renal transplantation, 107:1514
Fraternal sisters with adult polycystic kidney disease and adenoma of the ampulla of Vater, 109:2007
Gastric adenocarcinoma and dysplasia in fundic gland polyps of a patients with attenuated adenomatous polyposis coli, 113:659
Gastric toxoplasmosis in acquired immunodeficiency syndrome: antemortem diagnosis with histopathologic characterization, 110:258
Glutaraldehyde colitis following endoscopy: clinical and pathological features and investigation of an outbreak, 108:1250
Human aberrant crypt foci with carcinoma in situ from a patient with sporadic colon cancer, 111:772
Human immunodeficiency virus 1-associated necrotizing cholangitis caused by infection with *Septata intestinalis*, 108:247
Human papillomavirus type 16-positive esophageal papilloma at an endoscopic injection sclerotherapy site, 108:550
Hyperammonemic coma due to parenteral nutrition in a woman with heterozygous ornithine transcarbamylase deficiency, 109:282
Hypercalcemia due to endogenous overproduction of 1,25-dihydroxyvitamin D in Crohn's disease, 114:1061
Hypervariable region of hepatitis C virus envelope glycoprotein (E2/NS1) in an agammaglobulinemic patient, 106:1072
Impaired ketogenesis in patients with adult-type citrullinemia, 107:1154
Insulin autoimmune syndrome as a cause of spontaneous hypoglycemia in alcoholic cirrhosis, 109:1673
Interleukin 6-producing gastric carcinoma with fever, hpergammaglobulinemia, and plasmacytosis in bone marrow, 107:543
Intestinal pneumonitis after low-dose methotrexate in primary biliary cirrhosis, 107:266
Intra-abdominal mass associated with gastrointestinal hemorrhage: a new manifestation of bacillary angiomatosis, 109:2011
Intractable bleeding from anorectal varices relieved by inferior mesenteric vein ligation, 107:1165
Ischemic hepatitis due to obstructive sleep apnea, 109:1682
Kernicterus in an adult who is heterozygous for Crigler-Najjar syndrome and homozygous for Gilbert-type genetic defect, 112:2099
Leiden factor V in four patients with small bowel infarctions, 113:322
Liver hemorrhage: recurrent episodes during pregnancy complicated by preeclampsia, 106:1668
Long-term survival in systemic amyloid A amyloidosis complicating Crohn's disease, 112:1362
Low albumin gradient ascites complicating severe pseudomembranous colitis, 112:991
Mast cell cholangiopathy: another cause of sclerosing cholangitis, 109:1677
Mesenteric venous thrombosis treated with urokinase via the superior mesenteric artery, 110:1633
Multifocal neoplasia involving the colon and the appendix in ulcerative colitis: pathological and molecular features, 115:1566
Multifocal stenosing ulcerations of the small intestine revealing vasculitis associated with C2 deficiency, 110:1628
Multiple focal nodular hyperplasia of the liver associated with hemihypertrophy and vascular malformations, 108:1256
Multiple hyperplastic polyps in the stomach: evidence to clonality and neoplastic potential, 112:561
New syndrome of Crohn's disease and pachydermoperiostosis, 112:241
A novel histological lesion in glucocorticoid-responsive chronic hepatitis, 113:659
Octreotide suppression test predicts beneficial outcome from antrectomy in a patient with gastric carcinoid tumor, 114:817
Oral hairy leukoplakia in a patient with ulcerative colitis, 106:506
Orthotopic liver transplantation for chronic hepatitis in two patients with common variable immunodeficiency, 108:879

Overexpression of an unstable intrinsic factor–cobalamin receptor in Imerslund-Gräsbeck syndrome, 115:173

The successful treatment of autoimmune hepatitis with 6-mercaptopurine after failure with azathioprine, 110:271
Successful treatment of retractile mesenteritis with oral progesterone, 114:1313
Superficial thrombophlebitis, dysplasia, and cholangiocarcinoma in primary sclersoing cholangitis, 107:537
Three brothers with progressive hepatic dysfunction and severe hepatic steatosis due to a patent ductus venosus, 110:1964
Transjugular intrahepatic portosystemic shunt as a treatment for protein-losing enteropathy caused by portal hypertension, 111:1679
Transjugular intrahepatic portosystemic shunt for bleeding angiodysplasia-like lesions in portal-hypertensive colopathy, 115:167
Transjugular intrahepatic portosystemic shunt improves oxygenation in hepatopulmonary syndrome, 109:978
Treatment of fibrosing cholestatic hepatitis with lamivudine, 115:177
Treatment of pediatric autoimmune enteropathy with tacrolimus (FK506), 111:237
Value of radiopaque markers in identifying partial small bowel obstruction, 110:1958
Vertebral compression fractures in pediatric patients with Crohn's disease, 112:1710
Widespread clonal B-cell disorder in Sjögren's syndrome predisposing to *Helicobacter pylori*-related gastric lymphoma, 110:1969

Catalase
alcoholic liver disease and, 106:1094–srr
neutrophil-mediated endothelial cell injury and, 110:21

Catecholamines
ileal crypts and (mouse), 108:1345
jejunal sodium transport and (rat), 107:675
midgut carcinoid flush and, 108:743

α-Catenin, in hepatic primary epithelial tumors, 110:1137

Catenin-E cadherin complex, abnormal immunoreactivity in gastric carcinoma and patient survival, 112:46

Cathepsin B
in acute pancreatitis, 106:1123–ss
and bile salt-induced apoptosis of hepatocytes (rat), 113:1714
lysosomal enzymes in pancreatitis and (rat), 109:573
in trypsinogen activation in pancreatic acini (rat), 113:304

Cathepsin D, lipid islands in gastric mucosa and, 110:369

Catheters/Catheterization
lateral cerebral ventricle, viscerosensitive response to rectal distension and (rat), 107:94
manometric, transient LES relaxations and, 109:1705–e
parenteral nutrition complications and, 109:1409–c
transanal, colonic Cl^- secretion in cystic fibrosis and, 107:906–tmig

Cation exchange resin, in fecal sodium and potassium excretion, 108:752

Cationic trypsinogen gene mutations, associated with recurrent pancreatitis, 113:1063–rc

Cations, aminopeptidase N in small intestine and (fetal pig), 109:1039

Cattle, *Escherichia coli* O157:H7 and, 108:1927–aga

Caucasians
autoimmune hepatitis and, 106:1321
precore mutation in hepatitis B virus and, 106:243–cr
Sandhoff disease and, 106:775–cr

Cause and effect, physiology and philosophy of, 107:1898–e

Cause-specific mortality, inflammatory bowel disease and, 110:1339

Cavitation, shock wave, in colon cancer, 106:937

CCAAT/enhancer binding protein, hepatocyte differentiation and (rat), 106:1625

CCL-64 cell growth inhibition assay, TGF-β regulation of fetal collagen and, 110:92

ccM4 antibody-targeted LAK cells, inhibit liver micrometastases (SCID mice) 1950

CD. *See* Crohn's disease

CD (cluster of differentiation)
CD1, expression of (rat), 106:1143
$CD3^+$
Crohn's disease and, 109:1029
integrins and, 107:1364
CD3
monoclonal antibody, T-cell-dependent liver injury and (mouse), 109:1–tmig, 109:166
receptors, and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
$CD4^+$ T-cell receptor $\alpha^-\beta^+$ cells, and development of IBD (mouse), 112:1876
$CD4^+$
autoimmune gastritis and (mouse), 107:1408
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748

lymphocyte migration in Peyer's patches and (rat), 109:1113
CD4$^+$CD45RO$^+$ phenotype, Crohn's disease and, 110:1008
CD4/CD8 ratio, primary sclerosing cholangitis and, 106:160
CD4, chronic diarrhea in HIV infection and, 110:30
CD4$^+$, cryptosporidiosis with AIDS and, 108:624–tmig
CD4
interleukin 2 in acute pancreatitis and (mouse), 110:583
murine autoimmune gastritis and (mouse), 110:1791
and response to *Helicobacter pylori* (mouse), 113:1848
CD8$^+$
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
lymphocyte migration in Peyer's patches and (rat), 109:1113
CD8, autoimmune gastritis and (mouse), 110:1791
CD11/CD18, neutrophil-mediated endothelial cell injury and, 110:21
CD11, eosinophil migration and, 108:409
CD11a$^+$, Crohn's disease and, 109:1029
CD11b/CD18
Helicobacter pylori infection and, 108:65
monoclonal antibodies, *Helicobacter pylori*-induced microvascular protein leakage and (rat), 107:70
CD14, in Kupffer cell sensitization to endotoxin, 115:443, 115:494–e
CD18
inflammatory diarrhea and (rabbit), 106:1403–tmig, 106:1554
NSAID gastropathy in arthritis and (rat), 109:1173
radiation-induced microvascular dysfunction and (rat), 108:1761
CD19$^+$ B cells
integrins and, 107:1364
intestinal permeability in Crohn's disease and, 108:132
CD28
in celiac disease, 115:519–tmig, 115:564
receptors, and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
CD31$^+$, Crohn's disease and, 109:1029
CD44
mRNA, in colorectal cancers and adenomas, 110:362
normal colonic epithelium and, 106:1242
CD45RA$^+$, Crohn's disease and, 109:1029
CD45RB transfer model, inflammatory bowel disease and, 109:1362–srr
CD45RO, intestinal permeability in Crohn's disease and, 108:2–tmig, 108:132
CD45RO$^+$, Crohn's disease and, 109:1029
CD54, *Helicobacter pylori* infection and, 108:65
CD68$^+$, Crohn's disease and, 109:1029
CD80, in celiac disease, 115:519–tmig, 115:564
CD86, in celiac disease, 115:519–tmig, 115:564
CD95, and apoptosis in colon epithelial cells, 113:150
c2 deficiency, vasculitis and, 110:1628–cr
CD4$^+$ T cells, in duodenal mucosa, and specific reactivity against astrovirus, 114:115
CD44 variants, abnormal expression in exfoliated cells in feces of patients with colorectal cancer, 114:1196
CD95 system, deranged in case of Churg-Strauss vasculitis, 114:1351–c
CDX1 protein, expression in alimentary tract epithelium, 113:478
Cecocolonic wall, mast cell degranulation in colonic motility and (rat), 107:976
Cecocutaneous stoma, distal, short-chain fatty acids and (rat), 106:375
Cecum
agenesis, 115:381, 115:487–e
bacterial translocation and (rat), 108:1835
circular smooth muscle cells, endothelin receptors on (guinea pig), 108:51
dexamethasone-β-D-glucuronide and (rat), 108:1688
dexamethasone in (rat), 106:35
epithelial cell proliferation and (mouse), 108:1745
fermentation in (rat), 107:637
ligation and puncture, mucosal proliferation in sepsis and (rat), 107:121
organogenesis, 115:381, 115:487–e
short-chain fatty acids and (rat), 106:375
smooth muscle, ANP/VIP interaction in (guinea pig), 109:1105
Cefixime, for Whipple's disease, 106:782–cr
Cefotaxime, intravenous, versus oral oflaxacin, in spontaneous bacterial peritonitis, 111:1011
Celiac artery flow reduction, and bicarbonate, in gastric mucosal repair (cat), 107:149
Celiac disease
alopecia areata and, 109:1333–cr
autoantibodies in, 115:1311–tmig, 115:1317–rc, 1584–e
ELISA for, 115:1311–tmig, 115:1317–rc, 115:1322, 115:1584–e
benefits of smoking and nicotine in, 112:1048–ss
bone mass and metabolism in, 109:122
bone mass gain in
pretreatment osteosynthetic activity as predictor of, 113:67
procollagen and, 113:1–tmig
in children
pancreatic impairment in growth recovery during gluten-free diet, 112:1839
rectal gluten challenge in, 111:318
diagnosis of, 115:211–vidd
diarrhea in
chronic, after treatment, 112:1782–tmig
persistent, 112:2146–e
exocrine pancreatic insufficiency, 114:621–c
gastric permeability in, 112:314–c, 112:2161–c, 114:226–c
gluten exposure in
interferon γ production with, 115:519–tmig, 115:551
interleukin production with, 115:519–tmig, 115:551
tumor necrosis factor α production with, 115:519–tmig, 115:551
unintentional, 115:243–c
gluten-free diet for
bone mass recovery after, pretreatment osteosynthetic activity as predictor of, 113:67
chronic diarrhea after, causes of, 112:1830
immune response to gliadin in, 110:1368
immunologic features of, CTLA-4 immunoglobulin and, 115:519–tmig, 115:564
intestinal permeability and, 108:1574–srr, 112:1064–tmig, 112:1129
latent, 111:571–tmig
lymphocytic gastritis and gastric permeability in, 111:73
mild gluten-sensitive enteropathy, 111:608
pathogenesis of, 115:206–vidd
screening for, 115:1311–tmig, 115:1317–rc, 115:1322, 115:1584–e
serological testing for, 108:608–ss
in elderly, 109:2053–c
T cells in, 115:519–tmig, 115:564
activation, enzyme-modified wheat gliadin and, 115:809–gn
HLA-DQ-restricted small intestinal clones, reactivity patterns of, 112:752

treated, chronic diarrhea in, 114:420–c
Celiac trunk, portal insulin in intestinal glucose absorption and (rat), 110:1863
Cell(s)
antisocial behavior, GI malignancies and, 107:881–e
contraction, platelet-activating factor receptors and (guinea pig), 108:1666
culture, growth regulation of pancreatic duct cells and (guinea pig), 109:944, 109:1005–e
differentiation
adhesion molecules and, 107:1894–e
altered in mice lacking secretory phospholipase A_2 and infected with *Helicobacter felis,* 114:675
colon cancer and, 109:1385–e
colonic crypt and, 107:1894–e
HB-EGF in gastric mucosa and, 109:1051
immortalized biliary epithelial cells and (transgenic mice), 109:1308
retinoids in pancreatic cancer and, 109:1646
triggering, 107:885–e
infiltrates
eosinophilic gastroenteritis and, 110:768
gastritis and (mouse), 110:1791
severe alcoholic hepatitis and, 110:1847
ions, altered, in cystic fibrosis jejunum, 110:411
kinetics in colonic crypts, analysis with confocal microscopy and immunofluorescence (rat), 111:1493
migration
human spasmolytic polypeptide and, 108:108
intestinal, phospholipase C activity required for EGFR-stimulation of, 114:493
nuclear antigen labeling index, small hepatocellular carcinoma and, 108:768
phenotype, and homeodomains, 113:680–e
proliferation
apoptosis and, 110:1323–c
Crohn's disease and, 110:1008
EGF and, in fetal stomach, 112:1188
familial adenomatous polyposis and, 109:994–rc
fermentable dietary fiber and (mouse), 108:1745
fish oil and, 107:1709, 107:1892–e
HB-EGF in gastric mucosa and, 109:1051
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
ω-3 fats and (rat), 109:431
pancreatic, ventromedial hypothalamic lesions and (rat), 110:885
quiescence in intestinal stem cells and (rat), 107:1319
retinoids in pancreatic cancer and (nude mice), 109:1646
sepsis and (rat), 107:121
triggering, 107:885–e
protein leakage, ethanol-induced damage in gastric mucosal cells and (rat), 107:907
response to hepatitis B virus structural proteins after DNA-based immunization (mouse), 112:1307
retinoid binding proteins, retinoids in pancreatic cancer and, 109:1646
surface antigen, in colonic adenocarcinoma (nude mice), 108:172
trafficking, cytochrome P4502B and (rat), 108:1110
volume
changes, in pancreatic acinar cells module cholecystokinin and carbochol-stimulated amylase release, 113:1756
regulation, molecular mechanisms of, 107:1906–ss
Cell-cell interactions, *Helicobacter pylori*-induced microvascular protein leakage and (rat), 107:70
Cell culture(s)
primary, transin secretion and (rat), 109:889
short-term, calcium signals in gastric endocrine cells and, 110:1835
subconfluent, HISM cell collagen increased by steroids and, 109:1457
Cell cycle
Barrett's esophagus and, 106:553–c
distribution, familial adenomatous polyposis and, 109:994–rc
p53 and, 106:1708–e
progression
APRF/Stat3 in liver regeneration and (rat), 110:1854
hepatitis B replication and, 110:1519
shock wave cavitation and, 106:937
in ulcerative colitis, 107:369
Cell cycle inhibitors, induced by SCFA in colonocytes, 114:940
Cell death
after pancreatic duct obstruction, mechanisms of (opossum, rat), 110:875
apoptotic versus necrotic, in acute pancreatitis, 111:1781–c
basic concepts of, 110:1238–vidd
hepatocyte
mitochondrial permeability transition and (rat), 115:520–tmig, 115:693, 115:783–e
TNF-α–induced, glutathione and (mouse, rat), 115:1229
PARP inhibitors and, 109:472
T cell-dependent liver injury and (mouse), 109:166
Cell-mediated immunity
hepatitis C virus and, 107:1436
SF-25 monoclonal antibody and (nude mice), 108:172
Cellobiose
intestinal permeability and, 108:1569–srr
lactase-phlorizin hydrolase active sites and (rat), 109:1234
Cells of Cajal
and intestinal peristalsis, 114:627–tmig
and intestinal peristalsis (mouse), 114:724
Cellulose
cholesterol absorption and (hamster), 107:444
and resistant starch in colonic carcinogenesis (rat), 110:116
Central nervous system (CNS), Whipple's disease and, 106:782–cr
Central program generator (CPG) neurons, swallowing and, 109:1700–e
Central structures, viscerosensitive response to rectal distension and (rat), 107:94
Central systems, visceral hyperalgesia and, 107:271–srr
Central veins, and TNF-α in regenerating liver (rat), 112:2089
Centrilobar veins, complement-regulatory protein expression in liver and, 107:505
Centrilobular cell necrosis, massive, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
Centrilobular staining, nitric oxide in experimental alcoholic liver disease and (rat), 109:899
Centromeres, recombinant, nuclear antigen reactivity in autoimmune hepatitis and, 107:200
Cephalosporins, for Whipple's disease, 106:782–cr
Cerebral activity in perception of visceral pain, normal and pathological, 112:64
Cerebral cortex
edematous, after hepatectomy (rat), 108:1097
esophageal EMG modulation and, 109:1437
response to esophageal mucosal acid exposure, 115:1311–tmig, 115:1353
swallowing and, 109:1700–e
topographic representation of esophageal motor function on, 111:855

Cerebral ventricles, lateral, viscerosensitive response to rectal distension and (rat), 107:94
Cerebrospinal fluid analysis, in staging and monitoring of Whipple's disease, 113:434
Cerulein
acute necrotizing pancreatitis and (rat), 110:232
in acute pancreatitis (rat), 106:207
growth regulation of pancreatic duct cells and (guinea pig), 109:944
IL-10 in pancreatitis and, 108:1917–rc
nitric oxide and (rat), 108:1855
pancreatic cysteine depletion induced by (mouse), 107:824
pancreatic fibrosis induced by TGF-β and fibronectin (mouse), 110:576
Cerulein pancreatitis
disruption of acinar cell calcium signaling as early feature in (mice), 111:481
effect of glucocorticoids on cell sensitivity to apoptosis (rat), 114:372
effects of L-2-oxothiazolidine-4-carboxylate in (mouse), 112:1681
glucocorticoids and (rat), 109:933
protection against, relationship to hyperthermia-induced heat shock protein expression (rat), 111:1333
rat model for, 108:1855, 108:1863
Ceruloplasmin
primary sclerosing cholangitis and, 108:1199
in Wilson's dieseae, 107:1189–rc
Cervical esophagostomy, lower esophageal sphincter relaxation and, 107:1059
Cervical mucous cells, apomucins and, 107:160
Cervical vagosympathetic trunk, transient LES relaxations and, 109:1705–e
Cervix, papilloma-carcinoma sequence in, 108:550–cr
Cesium chloride density gradients, mucin biosynthesis and, 107:1352
Cetrimide, intestinal permeability and, 108:1574–srr
CFA, arthritis in cholestasis and (rat), 107:1469
CF-IBE cells, complementation of cystic fibrosis defect in, 108:584–rc
c-fos transcription, in brainstem, gastric acid-induced, vagal afferent signaling in (rat), 115:649
CGS9343B, cholecystokinin-coupled intracellular signaling and, 106:763
Charcot, Jean Martin, 115:541
Chelation, nitric oxide in gastric chief cells and (guinea pig), 109:1214
Chemical coding, enteric inhibitory neurons and, 108:556–srr
Chemical stimulus, esophageal sensitization in noncardiac pain and, 108:311
Chemiluminescence
free radical production after cold storage and (rat), 108:1167
hepatic reperfusion injury and (rat), 108:463
Chemoattractant, neutrophil, production after ischemia-reperfusion in liver, 112:551
Chemocytotoxicity, shock wave cavitation and, 106:937
Chemokines
chemotaxis of intraepithelial lymphocytes and, 109:1154
C-X-C, C-C, and C-, expression by colonic epithelial cells, 113:1214
C-X-C and C-C, secretion induced by rotavirus infection of intestinal epithelial cells, 114:947
C-X-C ENA-78, preferential expression in IBD intestinal epithelium, 113:808
gene expression, in pancreatic acinar cells and acute pancreatitis (rabbit), 113:1966
gut epithelial, and rotavirus, 114:867–tmig
neutrophil-attracting, induction in hepatic stellate cells (rat), 113:277
Chemoprevention
for colon cancer, 109:2036–e
for rectal epithelial proliferation, 106:982
Chemosensitivity, in irritable bowel syndrome, 110:655–c
Chemotaxis
eosinophil migration and, 108:409
intraepithelial lymphocytes and, 109:1154
ischemia/reperfusion injury and (rat), 109:505
monocyte-chemoattractant protein 1 and, 108:40
neutrophil, platelet activation and, 106:827–tmig, 106:840
Chemotherapy
antioxidant enhancement of in colorectal cancer cells, 114:235–gn
in bleeding cirrhotic patients, infection and, 108:1828
for colon cancer, 106:899, 109:984–vidd
for gastrointestinal lymphoma, 106:846
Helicobacter pylori-associated gastric lymphoproliferative disease in child and, 109:973–cr
for hepatocellular carcinoma, 106:1032
IL-6-producing gastric carcinoma and, 107:543–cr
intestinal permeability and, 108:1576–srr
parenteral nutrition and, 107:594–ss
photodynamic therapy for esophageal cancer and, 108:310–tmig
rectal epithelial proliferation and, 106:982
retinoids in pancreatic cancer and (nude mice), 109:1646
Schistosoma mansoni fibrosis and, 107:773
Chenodeoxycholate
intestinal absorption of bile acids and (rabbit), 110:459
kinesin inhibition by (rat), 108:824
Chenodeoxycholic acid
colonic permeation of inulin and (rat), 108:12
and hydroperoxides and bile acid toxicity (rat), 109:1249
intestinal permeability and, 108:1576–srr
MHC class I and (rat), 107:781
Chest, hemoglobin effects on esophageal motor function and, 109:1241
Chest pain
esophageal pH recording and, 110:1990–aga
foregut duplication cysts and, 109:838
lower retrosternal, hemoglobin effects on esophageal motor function and, 109:1241
mesalamine and, 108:1889–cr
noncardiac. *See* Noncardiac pain
unexplained, 115:222–e
Chest radiography
methotrexate pneumonitis and, 107:266–cr
yearly, effect on five-year survival rate in colorectal cancer, 114:7
Chewing, salivary esophagoprotection and, 110:675
C3H/HeJBir mice, spontaneous colitis in, 109:1358–srr
C3H/HeJ mice, colitis in, 107:1726
Chief cells
gastric
pepsinogen secretion and (guinea pig), 108:1709, 111:945
zymogen granules in (rat, rabbit), 110:809
nitric oxide and (guinea pig), 109:1214
Childhood abuse, gastrointestinal symptoms and, 107:1040
Child-Pugh score
antral vascular ectasia and, 108:138
infection in bleeding cirrhotic patients and, 108:1828
tamoxifen in hepatocellular carcinoma and, 109:917
Children

plasmid transfection, butyrate and, 107:499
toxic oil syndrome and, 106:691

Chloride
absorption, IL-10 and, in small intestine (rat), 111:936
altered cell ions in cystic fibrosis and, 110:411
CFTR and, 110:1667–ss
conductance
ATP-activated, in biliary cells, 107:236
in enterocytes (rat, human), 112:1213
cryptosporidiosis and (piglet), 108:1030
in cystic fibrosis, 107:906–tmig, 107:950
flux, octreotide and (prairie dog), 108:1547
lactate-anion exchanger and (rat), 106:559
mechanism of levamisol inhibition of intestinal secretion, 114:1257
mucosal secretory reflexes and, 110:2021–ss
paracrine regulation of intestinal secretion and, 107:1206–ss
secretion
calcium-dependent, thermostable direct hemolysin and (rabbit), 109:383
IL-10 and
in small intestine (rat), 111:936
in T84 monolayers, 113:151
induction by γ-aminobutyric acid, 112:672
transport
in pancreatic ducts, β-adrenergic control of (rat), 115:714
in primary colonocyte cultures at different stages of development (rabbit), 111:1547
tumor necrosis factor α and, 106:1514
ursodeoxycholate and, 109:965

Chloride channels, ClC family of, 110:646–ss

Chlorpheniramine
histamine receptors in intestinal repair and (rat), 107:1297
interleukin 1 and (rat), 106:1493

Cholangiocarcinoma
ATP-activated conductances in biliary cells and, 107:236
Ki-*ras* and p53 protein expressions in, 109:1612
nonresectable, photodynamic therapy, 114:536
in primary sclerosing cholangitis, 106:160, 107:537–cr
serum tumor markers for, 108:865
somatostatin receptors and, 108:1908–rc, 110:1675–c
ursodeoxycholate and, 109:965
use of PDT, 114:604–e

Cholangiocytes
expression of apical Na^+-dependent bile acid transporter (rat), 113:1734
heterogeneity, in liver (rat), 110:1636–rc

Cholangiography
choledocholithiasis and, 106:1062
tubeless, 110:329–tmig, 110:589

Cholangiopathy
autoimmune, 107:1839–cr
antibodies to carbonic anhydrase in, 112:1053–c
ischemic, 109:1338–cr
paroxysmal nocturnal hemoglobinuria and, 109:1338–cr
mast cell, 109:1677–cr

Cholangitis
antibiotics and, 109:323–ss
autoimmune, carbonic anhydrase antibodies and, 108:1615–tmig, 108:1802
HIV-associated, *Septata intestinalis* in, 108:247–cr
neutrophil antibodies in, 107:328–tmig, 107:532
nonsuppurative, in mdr2 gene knockout mice, 111:165
paroxysmal nocturnal hemoglobinuria and, 109:1338–cr

Cholate
effect on liver disease in FVB mice with *mdr2* gene knockout, 111:165
kinesin inhibition by (rat), 108:824

[^{3}H]Cholate, organic anion transport protein and, 109:1274

Cholecystectomy
after diarrhea, 111:816–e
bowel habit after, 111:617
extrahepatic bile duct cancer and, 107:1205–ss
gallbladder motility and, 108:1332–c
laparoscopic
ERCP and, 109:2–tmig, 109:252, 109:320–e
gallstone recurrence and, 106:1–tmig

Cholecystitis
acute
acalculous, 106:1718–ss
endoscopic drainage of, 107:311–ss
chronic
associated with *Helicobacter pylori* infection, 114:755
and *Helicobacter pylori,* 114:627–tmig

Cholecystoduodenal fistula, 112:682–im

Cholecystokinin (CCK)
amylase inhibition and (dog), 108:1221
antagonists, selectiveness of (dog), 108:1953

bile salt binding and, 107:1627
calcium signals in gastric endocrine cells and, 110:1835
colon cancer and, 109:1384–e
donor gallbladder in liver transplantation and, 107:847
EM523 and (dog), 110:241
esophageal effects, 115:520–tmig
fat-induced gastric sensations and, 110:1379
galanin receptors and (dog, guinea pig), 108:3
gallbladder contractility defect and (ground squirrel), 110:251
in gallbladder filling and emptying (dog), 106:1652
gallstone recurrence and, 106:2–tmig, 106:215
gastric acid and, 107:1610
gastric emptying in diabetes and, 109:755
gastrin and, 107:1610
ileal crypts and (mouse), 108:1345
insulin and (rat), 106:200
intestinal permeability and, 108:1576–srr
lower esophageal sphincter relaxation and, 107:1059
negative feedback regulation of secretion, 114:123
nitric oxide and (cat), 108:1215
nitric oxide in gastric chief cells and (guinea pig), 109:1214
octreotide-associated gallstones and (rat), 107:1503
octreotide therapy and, 107:379
pancreatic effects (rat), 115:520–tmig, 115:733
pancreatic ischemia-reperfusion injury and (dog), 107:1125
pancreatic polypeptide and (rat), 108:1517
protease inactivation and, 107:1627
proteolytic activity and, 110:330–tmig, 110:567
released by pituitary adneylate cyclase-activating peptide, 114:1054
release stimulated by hydrolysis of dietary fat by pancreatic lipase, 114:123
satiety and, 106:1374–e, 106:1451, 107:1913–c
secretion, autoregulation of (rat), 109:231
signaling, in gallbladder muscle, 106:763
stimulation of heat shock protein 27 phosphorylation in pancreas (rat), 112:1354

Cholecystokinin (CCK) receptors, 109:1703–e
CCK-A, 107:905–tmig, 107:1019, 107:1135, 110:1379
extrasphincteric, and postprandial reflux, 115:520–tmig, 115:597
gene abnormality, 109:1375
localization in stomach, 112:1197
pancreatic growth and (rat), 107:1135
in upper GI tract (dog), 107:905–tmig, 107:1019
CCK-B, 109:1060, 109:1181
agonists/antagonists, gastric histidine decarboxylase and (rat), 109:1181
gastrin in pancreatic tumors transfected with, 114:419–c
CCK-B/gastrin, 107:905–tmig, 107:1019
deficiency, abnormal gastric histology and decreased acid production (mouse), 112:280–rc
localization in stomach, 112:1197
and pancreatic amylase secretion, 115:808–tmig, 115:988
transgenic, and exocrine pancreatic secretion (mouse), 115:808–tmig, 115:988
in upper GI tract (dog), 107:905–tmig, 107:1019
in pancreas and gallbladder muscle, 111:1621
transfected, mediation of growth inhibitory effects on pancreatic cancer cell lines, 112:952
transient LES relaxations and, 109:1703–e

Cholecystokinin B (CCK-B)
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
in hypergastrinemia (athymic rat), 109:1415

Cholecystokinin octapeptide (CCK-8)
amino acid consumption test and, 106:488
gallbladder contractility and (prairie dog), 106:1662

Choledochal cyst, 114:238–im

Choledocholithiasis
endoscopic sphincterotomy for, 110:658–tmig, 110:894
endoscopic ultrasonography and, 106:1062
magnetic resonance cholangiography and, 108:1948–ss
pancreatitis and, 106:742

Choledoscopy, choledocholithiasis and, 106:1062

Cholelithoptysis, earlier report of, 106:1400–c

Cholera
experimental, glucose-stimulated sodium transport in intestine during, 112:1529
small intestinal ultrastructure in, 109:422

Cholera toxin
diarrhea caused by, 5-hydroxytryptamine in (rat), 115:808–tmig, 115:883, 115:1009–e
distant secretion and (rat), 108:2–tmig, 108:34
ECL cells and, 107:2–tmig
ileal secretion of, prevention by bromelain (rabbit), 113:175
nerves and, 108:287–e
neurogenic inflammation in intestine and (rat), 108:295–ss
neuronal involvement in effects of (rat), 107:657
prevention of mucosal T-cell staphylococcal enterotoxin B-induced anergy (mouse), 115:1197
Saccharomyces boulardii and, 106:2–tmig, 106:65
therapeutic immunization against *Helicobacter mustelae* and, 110:1770

Choleresis, ursodeoxycholate and, 109:965

Cholestasis
arthritis and (rat), 107:1469
canalicular conjugate export pump down-regulation in (rat), 113:255
cyclosporin-induced (rat), 107:255
ethanol-induced hepatotoxicity and, 109:555
extrahepatic, Crohn's disease and, 108:1246–cr
hepatic tight junctions in (rat), 110:1564, 110:1662–e
and hepatocyte adaptation to mitochondrial permeability transition (rat), 115:520–tmig, 115:693, 115:783–e
and hydroperoxides and bile acid toxicity (rat), 109:1249
interferon α and (rat), 108:1192
intrahepatic, TPN induction in infants, 111:843–tmig
leukocytes and (rat), 109:923
leukotriene C_4 synthesis and (rat), 108:1793
liver failure due to hepatitis C and, 106:248–cr
MHC class I and (rat), 107:781
microbicidal activity of neutrophils in (rat), 112:1692
neonatal, monohydroxy bile acid-related (mouse), 115:1223
ntcp expression and (rat), 110:199
overview of, 107:1569–br
pruritus in, 108:1582–vidd
oral naltrexone treatment, 113:1264
treatment, 113:1058–tmig
recurrent familial, disclosed by pregnancy, 114:1354–c
recurrent familial prolonged intrahepatic of pregnancy, and chronic liver disease, 113:966–cr
sepsis associated with, 112:302–e
tetracycline-induced bile duct paucity and, 107:1844–cr

in total parenteral nutrition, 111:572–tmig
UDCA and (pig), 111:1111
ursodeoxycholic acid for, 111:716
WBC opioid binding and (rat), 108:1479

Cholesterol
apolipoprotein E phenotype in colon cancer and, 110:1785, 110:2007–e
biliary
hepatic cytoprotection by (rat), 107:244
nucleation, in postmenopausal women, 112:1278
calcium binding in model bile and, 107:831
colchicine and, 108:1470
crystallization
α_1-acid glycoprotein and, 106:231
biliary low-density particle and, 110:1936
crystals
calcium phosphate precipitation and (bovine), 109:1661
postprandial gallbladder motor function and, 109:582
dietary, and enterohepatic cycling of bilirubin (mouse, rat), 115:724
esters, HepG2 cells and, 108:515
gallbladder contractility and (prairie dog), 106:1662
gallstone disease
bacterial colonization in, 108:624–tmig, 108:860, 108:934–e
biliary group II phospholipase A2 and altered gallbladder bile in, 112:2036
brown pigment in, 108:1337–tmig, 108:1534
CCK-A receptor abnormality and, 109:1375
in Chilean Hispanics, 115:937, 115:1012–e
impaired gallbladder contractility in (ground squirrel), 110:251
nucleation of cholesterol crystals and, 108:1882
octreotide-associated, 107:1258–tmig, 107:1503
gallstone recurrence and, 106:2–tmig, 106:215–tmig
hepatolithiasis and, 110:963–c
intestinal absorption of bile acids and (rabbit), 110:459
metabolism
bile acids and, 113:1818–tmig
gallstones and, 110:1619
pellets, bilirubin in (swine), 110:607
plasma, reduced in *mdr2* knockout mice (mouse), 114:1024
pronucleators, pronase resistance of, 110:1926
protein diffusion and, 106:749
psyllium and (hamster), 107:444
saturation with critical for crystal formation in gallbladder bile, 114:1016
Smith-Lemli-Opitz syndrome and (rat), 109:1301
ursodeoxycholic acid and, 106:1333, 108:1470

Cholesterol crystal-binding protein, biliary secretory IgA as, 115:129

Cholesterol 7α-hydroxylase
in bile acid synthesis (mouse), 115:1223
inhibition by increased bile acid pool (rabbit), 113:1958
liver disease and, 108:1337–tmig, 108:1534
taurocholate and (rat), 108:533

Cholestyramine
cholesterol absorption and (hamster), 107:444
loading, in assessment of hepatic reserve for bile acid synthesis, 112:1284
primary sclerosing cholangitis and, 106:494

Cholic acid
gallstone recurrence and, 106:2–tmig, 106:215
induction of apical sodium-dependent bile acid transporter mRNA in ileum (rat), 113:1599
Smith-Lemli-Opitz syndrome and (rat), 109:1301
synthesis, from 27-hydroxycholesterol in humans, 115:509–c

Choline
Na^+ transport in proximal colon and, 106:125
pancreatic H^+/HCO_3^- secretion and (pig), 108:850

Choline acetyltransferase, immunoreactivity in small and large intestine, 111:401

Cholinergic agonists, and gastrin release from antral G cell primary cultures, 112:357

Cholinergic blockers, capsaicin in colonic activity and (conscious dog), 109:1197

Cholinergic nerves
chronically denervated LES in achalasia and (opossum), 109:789
colonic myoelectric complexes and (mouse), 108:1371
glucose effects on colon motility and, 108:310–tmig
neurons, in small and large intestine, 111:401
secretomotor neurons, GABA-induced ileal electrolyte transport and, 110:498

Cholinergic nicotinic transmitters, colonic relaxation and (dog), 106:606

Cholinergic pathway, EM523 and (dog), 109:1513

Cholinergic responses, in lower esophageal sphincter (cat), 106:381

Chondrocytes, and cross-reactive peptide in colon and ocular and joint tissue, 107:103

Chromatin condensation, T cell-dependent liver injury and (mouse), 109:166

Chromatography, kinesin inhibition and (rat), 108:824

Chromoendoscopy, high-resolution, for colon polyps, 110:1253–rc

Chromogranin peptides, CL cells and (rat), 108:1445

Chromosome(s)
1, in colorectal cancer, 111:250–e
1p
allelic loss, and prognosis for colon cancer, 113:761
deletions in, in early colorectal adenomas, 111:102
3, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1286–e
4q, allelic loss, in HCC, α-fetoprotein and, 110:184
5, in esophageal cancer, 110:52
6, Crohn's disease and, 110:974–tmig, 110:1053
7, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1286–e
7q35, hereditary pancreatitis gene on, 110:1975–rc
10q23, Bannayan-Riley-Ruvalcaba syndrome gene on, 113:1433–rc
12
in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
human, organic anion transport protein and, 109:1274
IBD2 on, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e
16q, allelic loss, in HCC, α-fetoprotein and, 110:184
16
in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
hts gene on (rat), 107:1189–rc
IBD1 on, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e
17p
Barrett's adenocarcinoma and, 106:1589

colon cancer and, 106:42
17q25.1, deletion of tylosis esophageal cancer locus on in sporadic esophageal cancer, 114:1206
18q, allelic loss on as prognostic marker for stage II colorectal cancer, 114:1180
18q21, allelic loss on and prognosis for stage II coloretal cancer, 114;1168
alterations
in neoplastic progression related to ulcerative colitis, 113:791
in ulcerative colitis, 114:624–c
translocation, DNA mismatch repair and, 109:1685–srr

Chronic idiopathic intestinal pseudo-obstruction (CIIP)
childhood, jejunal feeding in, 108:1379
pathogenesis, DNA viruses in, 115:498–ss

Churg-Strauss vasculitis, deranged CD95 system in case of, 114:1351–c

CI-959, cytoprotective effects, in gastric mucosa (rat), 109:1027–tmig, 109:1225

Cigarette smoking. *See* Smoking

Cimetidine
bFGF-CS23 and (rat), 106:1106–rc
gastric ethanol metabolism and (rat), 108:737
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
histamine receptors in intestinal repair and (rat), 107:1297

4-α-OH-Cinnamate, propionate-induced changes in intracellular pH and (rabbit), 107:347

Ciprofloxacin
for acute necrotizing pancreatitis (rat), 110:232
for cirrhosis (rat), 110:974–tmig, 110:1150
Crohn's disease and, 108:1936–e
for ulcerative colitis, 115:1072, 115:1289–e

Circadian rhythms, rectal epithelial proliferation and, 106:982

Circular muscle
cells, jejunal, calcium currents in (dog, human), 109:707
cholecystokinin A and B/gastrin and (dog), 107:905–tmig, 107:1019
colonic, neurochemical coding and projections, 113:1916
fetal colonic integrin expression and, 110:58

Circulation
mesenteric, response to adenosine, 107:1168–srr
paracentesis and, 106:558–tmig, 106:709, 113:579
TIPS and, 107:593–ss

Cirrhosis
and abstinence from alcohol, 111:572–tmig
acute variceal hemorrhage in, terlipressin and somatostatin treatment, 111:1291
alcoholic. *See* Alcoholic cirrhosis
anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
antral vascular ectasia and, 108:138
aortic smooth muscle cell response to angiotensin II in (rat), 112:2065
with ascites, treatment by paracentesis, 111:1002
atrial natriuretic peptide and (rat), 108:1496
autoimmune hepatitis and, 110:848
bacteria and, 108:1616–tmig, 108:1828
bacterial translocation and (rat), 108:1835
biliary
hepatic microcirculation and peribiliary plexus in (rat), 111:1118
Na^+/H^+ exchange in (rat), 107:468
survival, 111:716
ursodeoxycholic acid therapy and, 111:1782–c
bleeding in, isosorbide-5-mononitrate versus propranolol for, 113:1632
branched-chain amino acids in, 111:252–e
captopril for, 106:1131–c
cardiomyopathy in, β-adrenoreceptor signal transduction in (rat), 110:1191
clinical issues in, 113:14270–tmig
coagulopathy with, treatment of, 113:1818–tmig
complications of, 113:1046–br
decompensated hepatitis B and, 109:908
diagnosis of HPS with macroaggregated albumin lung perfusion scan, 114:305
disseminated intravascular coagulation and, 109:340–tmig, 109:531
down-regulation of 11beta-hydroxysteroid dehydrogenase (rat), 114:175
endoscopic assessment of variceal volume and wall tension and effects of pharmacological therapy, 113:1640
endothelin 1 and, 110:534
endothelin 1 and (rat), 107:1085, 107:1201–e, 108:1842
evidence against use of aminoglycosides in patients with, 114:612–ss
flumazenil for hepatic coma and, 107:1204–ss
gastric microcirculation and (rat), 108:1183
gastric phospholipids and, 107:327–tmig, 107:362
gene for, 107:1258–tmig, 107:1430
glucagon-stimulated glycogenolysis in, 115:1530
gluconeogenesis in, quantification of, 115:1530
growth hormone therapy, 113:1617
hepatic arterial resistance in, 108:1152
hepatic iron index in, 113:1052–c
hepatic microcirculation and peribiliary plexus in (rat), 111:1118
hepatic mitochondrial DNA deletion in alcoholics and, 108:193
hepatitis B core promoter sequence analysis and, 109:1618
hepatitis B precore/core gene in, genomic variations in, 108:505
hepatitis B precore mutation in, 106:243–cr
hepatitis C and, 106:248–cr, 106:558–tmig, 106:686, 110:2019–ss
hepatitis C genotype in, 108:1088
changing prevalence of, 108:581–rc
and risk of HCC, 111:193
hepatitis C-induced, patient survival, 112:322–tmig
hepatocellular carcinoma and, 108:624–tmig, 108:768, 108:812
liver cell dysplasia as risk factor for, 108:624–tmig, 108:812
surgical resection of, prognostic value of preoperative portal pressure in, 111:1018
hepatocellular neoplasia and, 111:526–e
hepatomas in, surgical resection of, 111:843–tmig
hepatopulmonary syndrome and, 109:1283
impaired intestinal sugar transport, correction by low doses of insulin-like growth factor I (rat), 113:1180
incomplete septal, 106:459
increased activin A expression in liver (rat), 114:550
increased levels of adrenomedullin in, 114:336
inducible nitric oxide synthase in (rat), 112:2056
insulin autoimmune syndrome in, 109:1673–cr
interleukins in, 107:789
intestinal permeability and, 108:1576–srr
iron overload, 112:677–tmig
collagen expression and (rat), 107:1118
leukocyte response to lipoxygenase products in, 115:147
long-term survival, effects of isosorbide-5-mononitrite compared with propranolol, 113:1632
macronodular, incomplete septal cirrhosis and, 106:459

macroregenerative nodules in detected with ultrasonography, 112:1617
malnutrition in, 106:1404–tmig
mesenteric vessel abnormal responses in (rat), endothelium in, 111:1627
micronodular, nonalcoholic steatohepatitis and, 107:1103
misoprotil renal effects in, 106:557–tmig, 106:658
monocyte chemoattractant protein 1 and (rat), 110:1870
Na^+/H^+ exchange in (rat), 107:468
neurological deficits and hepatic encephalopathy, 111:256–e
neuropsychiatric profile, 111:147
nitric oxide production normalization and (rat), 109:1414–tmig, 109:1624

cA2 anti-TNF chimeric monoclonal antibody and, 109:1–tmig, 109:129
cancer and, 107:1675
clinical features/characteristics of, 111:604
colitis-associated neoplasms and, 107:420
colorectal, clinical follow-up study, 114:1151
comparison of small bowel enteroclysis and small bowel follow-through, 113:390
controlled trial of anti-tumor necrosis factor α antibody, 113:1042–ss
course after allogeneic bone marrow transplantation, 114:433
cyclosporine and, 109:670–tmig, 109:774, 109:1001–e
cytokine patterns and disease progression, 113:118
dexamethasone-β-D-glucuronide and (rat), 108:1688
early postoperative recurrence, risk factors for, 115:259
endogenous overproduction of 1,25-dihydroxyvitamin D and hypercalcemia, 114:1061–cr
endoscopic recurrence of, 108:310–tmig, 108:345
enteral nutrition and, 106:1368–vidd
Epstein-Barr virus-induced gene 3 in, 115:307
Escherichia coli virulence and, 115:1405
etiology and pathogenesis of, 115:182–srr
expression and release of IL-12 from intestinal lamina propria mononuclear cells, 112:1169
expression of inducible nitric oxide synthase in epithelial cells in, 111:871
familial aggregation, age-adjusted risk and concordance, 111; 597
family history of, 111:572–tmig, 111:813–e
linkage analysis in, 115:1039–tmig, 115:1056, 115:1286–e
focally enhanced gastritis in, 112:690
gastroduodenal, focality, 112:1031–e
genetics of, 111:1390–ss
granulomatous pancreatitis and, 110:321–c
hematopoietic stem cell transplantation in, 115:1035–c
HLA-linked susceptibility and resistance genes in, 109:1462

Hsp60 expression and, 108:75
ICAM-1 antisense oligonucleotide treatment trial, 114:1133–rc
ICAM-1 gene and, 109:440
immunotherapy, 113:1819–gn
incidence, prevalence, and survival in Olmsted County, Minnesota, 114:1161
increased small intestinal permeability in families with, 113:802
infection with *Escherichia coli* O157:H7 mimicks, 112:995–cr
integrins and, 107:1364
intestinal permeability and, 108:2–tmig, 108:132, 108:1573–srr, 110:1330–tmig, 110:1395
Listeria monocytogenes and, 108:1337–tmig, 108:1396, 108:1589–e
long-term survival in cases complicated by systemic amyloid A amyloidosis, 112:1362–cr
low bone density and, 107:905–tmig, 107:1031
lymphocyte apheresis for, 107:327–tmig, 107:357, 107:579–e, 108:952–c
maintaining remissions with n-3 fatty acids, 112:2155–ss
measles virus infection and, 108:623–tmig, 108:911–srr, 108:1396
mesalamine for, 106:553–c, 107:632, 108:310–tmig, 108:345, 108:1338–tmig, 108:1427, 110:657–tmig, 110:688, 113:1457
meta-analysis of enteral feeding in, 108:957–tmig, 108:1056
metronidazole and, 108:1615–tmig, 108:1617, 108:1935–e
molecular evidence for two forms of, 109:2044–ss
monocyte-chemoattractant protein 1 and, 108:40
monocyte homing and, 109:1027–tmig
and 6-MP metabolite levels, 113:690–ss
mucosal healing in, 114:419–c
neutrophil antibodies in, 107:328–tmig, 107:532
oral contraceptive use and smoking as risk factors for relapse, 114:1143
osteopenia and, 107:905–tmig, 107:1031, 108:417
and pachydermoperiostosis, new syndrome of, 112:241–cr
pANCA definition of clinical subgroup, 112:316–c
pancreatic, 108:1246–cr, 110:322–c
parenteral nutrition and, 106:1368–vidd
patients positive for antibodies against intestinal goblet cells, 113:1–tmig
peanut lectin and, 106:117
pediatric, serological assays in, diagnostic accuracy of, 115:822
perinuclear antineutrophil cytoplasmic antibodies in, 110:1810
peripheral monocytes and, 109:1029
platelets in, 106:827:tmig, 106:840
polymeric enteral diets and, 106:1393–ss
postoperative
drug choice in preventing, 110:652–c
mesalamine and, 109:340–tmig, 109:404
potential hereditary influences, 111:573
prednisolone for, 110:657–tmig, 110:688
primary sclerosing cholangitis and, 106:1–tmig
prognostic markers, 109:1029
and purine analogues, 111:1774–ss
quality of life index for, 106:286–tmig, 106:287
recurrence, 108:310–tmig, 108:345, 108:376, 108:1617
endoscopic/radiological evidence, 113:1823
induced by ileal fluid infusion, 114:233–tmig, 114:262
postoperative, 114:398–e
remission
cyclosporine for, 109:774
mesalamine for, 110:688
with phenelzine treatment, 115:1034–c
risk of after appendectomy, 113:377
role of NF-κB p65 in mucosal inflammation in, 112:2153–ss
scanning-electron micriscopic lesions and, 108:376
small bowel barium studies, 114:1349–c
smoking and, 106:558–tmig, 106:643, 106:807–e, 108:1683, 110:329–tmig, 110:424
azathioprine, and clinical course, 111:1161–c
somatostain receptors and, 106:951
steroid refractory, intravenous IL-10 in, 113:383
stomach and, 112:677–tmig
Streptococcus spp. and, 108:1338–tmig, 108:1396
substance P and, 106:828, 109:850
toxic megacolon and, 107:858–cr
trial of meslamine in maintenance of remission, 112:1069
tumor necrosis factor α and, 106:1455
vertebral compression fractures in pediatric patients with, 112:1710–cr

Crohn's disease activity index (CDAI), quality of life and, 106:287

Cromolyn sodium, ulcerative colitis and, 108:1889–cr

Cross-linking, lysyl oxidase-mediated, stabilization of collagen in granulomatous fibrosis, 111:172

Cross-reacting antigen gene, cis-acting elements required for expression of in colorectal carcinoma, 112:776

Cross-reactive peptide, in colon and ocular and joint tissue, 107:103

Crural diaphragm
atropine and, 109:1547
psychological stress and, 106:1477
transient LES relaxations and, 109:606–srr, 109:1703–e

Cryoglobulinemia
in chronic liver diseases, 106:1291
presenting after liver transplantion, 110:265–cr

Cryopatches, intestinal sites for gamma, delta T-cell replication, 114:1121–gn

Cryostat sections, lipid islands in gastric mucosa and, 110:369

Cryoulcers, lack of somatostatin receptors and (rat), 107:339

Crypt(s)
aberrant, wheat bran suppresses (rat), 110:508
altered cell ions in cystic fibrosis jejunum and, 110:411
anoikosis and, 110:1681–tmig, 110:1776
embedded, anoikosis in colonic crypt cells and, 110:1776
intestinal transplant pathology and, 110:1820
protein kinase C during colon tumor development and, 110:1753

Crypt abcesses, nitric oxide in primate colitis and (rhesus macaque), 108:705

Crypt architecture
acute self-limited colitis and, 107:635–tmig, 107:755
inflammatory bowel disease and, 107:635–tmig, 107:755

Crypt atrophy, inflammatory bowel disease and, 107:635–tmig, 107:755

Crypt cells
adhesion molecules and, 107:1894–e
bacterial modulation of endocrine cells and (rat), 107:1259
butyrate inhibition of urokinase secretion and, 107:410
cellular differentiation and, 107:1894–e
duodenal, presence of alkaline phosphatase II messenger RNA in (rat), 112:376
epithelial, cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
familial adenomatous polypsosis and, 106:362
kinetics, calcium regulation of (mouse), 109:339–tmig, 109:498

laminin receptor expression and (rat), 107:764
mucosal priliferation in sepsis and (rat), 107:121
peanut lectin and, 106:117
proliferation rates, o-3 fats and (rat), 109:431
transferrin endocytosis and (rat), 106:414
Crypt foci, aberrant
association with colon cancer, 111:772–cr
carcinembryonic antigen and, 107:1719
Crypt-isolation technique, for flow cytometric analysis, 106:100
Cryptosporidiosis
chronic diarrhea in HIV infection and, 110:30
complexity of intestinal pathophysiology and, 106:252–e
glutamine and (piglet), 106:1418
intestinal function and, 108:957–tmig, 108:1075
intestinal permeability and, 108:1030, 108:1575–srr
mucosal immunity to, 108:624–tmig, 108:627
Cryptosporidium parvum
cryptosporidiosis and (piglet), 108:1030
enterotoxic effect of (calf, human), 106:28
Crypt-villus axis
bicarbonate transport and (rabbit), 106:1562
hypolactasia and, 107:1–tmig
laminin A-chain isoforms and, 106:829
Crystallization, cholesterol, biliary low-density particle and, 110:1936
Cs^+, Na^+ transport in proximal colon and, 106:125
***c-src* tyrosine kinase,** dysplasia in ulcerative colitis and (rat), 107:1565–ss
CTLA-4 immunoglobulin, effects on T-cell action in celiac disease, 115:519–tmig
Cultured mucosal explants, aminopeptidase N in small intestine and (fetal pig), 109:1039
Curling, Thomas Blizard, Curling's ulcer, 114:901
Curling's ulcer, 114:901
Currents
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
ursodeoxycholate and, 109:965
Cutaneous cysts, FAP-associated, mouse model for, 114:275
Cutaneous photosensitization, after photodynamic therapy for esophageal cancer, 108:337
Cutaneous vasculitis, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
C-X-C chemokine
ENA-78, preferential expression in IBD intestinal epithelium, 113:808
expression by colon epithelial cells, 113:1214
Cycles, chronic pancreatitis and, 109:224, 109:316–e
Cyclic AMP
CF-IBE cells and, 108:584–rc
cholangiocarcinoma and, 108:1908–rc
cholera toxin and, 108:2–tmig
colonic permeation of inulin and (rat), 108:12
eicosanoid production and (dog), 106:297
and energy metabolism by parietal cells, 115:501–ss
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
Saccharomyces boulardii and, 106:2, 106:65
ursodeoxycholate and, 109:965
Cyclic GMP
atrial natriuretic peptide in hepatic vasodilation and (rat), 108:803
colonic Cl^- secretion in cystic fibrosis and, 107:906–tmig, 107:950
in duodenal bicarbonate secretion, 111:1763–e
natriuretic peptide stimulates production in biliary epithelial cells, 114:782
nitric oxide and, 108:841
in gastric chief cells and (guinea pig), 109:1214
normalization of production in cirrhosis and (rat), 109:1624
STa receptors and, 109:325–ss
Cyclin D1
in colon cancer, 110:669
regulation of proliferation in pancreatic, colonic, and esophageal cancers, 114:630–gn
Cycloheximide
cytochrome P4502B traffic and (rat), 108:1110
MHC class I and (rat), 107:781
toxic oil syndrome and, 106:691
Cyclooxygenase
blockade, portal hypertension and (rat), 110:1529
colon cancer and, 108:1312–e (rat), 110:1259–rc
in colorectal cancer, 113:1999–e
COX-1
expression in colonic epithelium, dextran sodium sulfate and (mouse), 115:807–tmig, 115:856
induction in stomach during endotoxemia (rat), 113:195
and inflammation (mouse, rat), 115:101, 115:227–e
structure, and development of safer NSAIDs, 112:679–gn
COX-2
aspirin and suppression of intestinal polyposis by targeted inhibition of, 113:1039–ss
elevated levels in Min adenomas (mouse), 111:1134–rc
expression, and heat shock protein induction, 115:1312–tmig, 115:1454
and gastric ulcer healing, 112:321–tmig
gene, expression is enhanced in alcoholic liver disease (rat), 112:943
induction and inhibition in gastric mucosal lesions and delays in healing (mouse), 112:387
induction in stomach during endotoxemia (rat), 113:195
in inflammatory bowel disease, 115:297
inhibitor, suppression of growth of H-*ras*-transformed intestinal epithelial cells (rat), 113:1883
selective inhibitors, anti-inflammatory effects (mouse, rat), 115:101, 115:227–e
structure, and development of safer NSAIDs, 112:679–gn
ulcer healing and, 109:524, 109:614–e
upregulation, in colorectal cancer, 107:1183–rc
and wound healing in the stomach, 112:645–e
duodenal mucus and alkali secretion and (rat), 109:1526
inhibition, indomethacin-induced enteropathy and (rat), 106:567
intestinal permeability and, 108:1573–srr
liver, in alcholic liver disease, 113:1811–c
refractory peptic ulcers and, 109:1027–tmig, 109:1124
Cyclophosphamide, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
Cyclopiazonic acid
gallbladder contractility defect and (ground squirrel), 110:251
myenteric denervation of jejunum and (rat), 108:1629
Cyclosporin A
cholestasis and (rat), 107:255
experimental colitis induced by, 109:1354
fibrosing cholestatic hepatitis after renal transplantation and, 107:1514–cr
Cyclosporine
Crohn's disease and, 106:287, 108:1936–e, 109:670–tmig, 109:774, 109:1001–e

enemas, for ulcerative colitis, 106:1429
inflammatory bowel disease and, 108: d943–ss
tumor necrosis factor α and, 106:1455
***C282Y* mutation,** expression of HLA-linked hemochromatosis in subjects with, 114:1003
CYP2A6, autoantigen in autoimmune pathology, APS-1, 114:324
Cystadenocarcinoma, pancreatic, association with malignant liver cysts and polycystic disease of the kidney, 112:2104–cr
Cysteine
alcoholic liver disease and, 106:1095–srr
glutathione and (rat), 106:1199
pancreatic, cerulein-induced depletion of (mouse), 107:824
refrigerated donor livers and, 108:1510
Cysteine protease inhibitor, prevention of in vitro cerulein-induced trypsinogen activation, 115:802–c
Cysteinyl leukotrienes, bile transport and (rat), 108:1793
Cystic fibrosis
case-control study of fibrosing colonopathy, 111:260–ss
clonic Cl^- secretion in, 107:906–tmig, 107:950
defect, complementation of in biliary cells, 108:584–rc
exocrine pancreatic insufficiency and, 106: 1638
gene therapy and, 106:1080–srr
intestinal permeability and, 108:1576–srr
overview, 109:1021–br
pancreatic insufficiency in, 111:833–c
rectal mucosa in, protein phosphorylation and, 106:890
ursodeoxycholate and, 109:965
Cystic fibrosis transmembrane conductance regulator (CFTR)
chloride channels and, 110:1667–ss
immune regulation of, 109:630–ss
intestinal villus expression of (human, rat), 108:1016
jejunal, altered cell ions in, 110:411
knockout mice, MUCLIN expression (mouse), 113:521
marker of pancreatic duct development, 113:914
transport pathway mediated by and acid-stimulated duodenal bicarbonate secretion (mouse), 113:533
Cystic mass, liver, 113:6–im
Cystoadenomas, pancreatic cyst fluid analysis and, 108:958–tmig, 108: 1230
Cysts
fenestration, in polycystic liver disease, 108:309–tmig, 108:487
foregut duplication, 109:838
gastric toxoplasmosis in AIDS and, 110: 258–cr
pancreatic, fluid analysis and, 108:958–tmig, 108:1230
Cys282Tyr mutation, and mild iron overload in nonalcoholic steatohepatitis, 114:311
Cytochromes P450
CYP3A, aflatoxin B1-adduct formation and (rat, human), 106:433
CYP3A2, pretranslational down-regulation of (rat), 109:198
CYP3A inhibitor, for herbal tea hepatitis (mouse), 106:464
CYP1A system, remodeling hypergastrinemia model and, 109:1407–c
CYP2B, cellular trafficking and (rat), 108: 1110
CYP2C11, pretranslational down-regulation of (rat), 109:198
CYP2D6
conformational epitopes on, 108:470
microsomal autoantibodies in viral hepatitis and, 108:455
CYP2E1
in alcoholic liver disease, 107:1258–tmig, 107:1430
and autoimmunity in alcoholics, 111: 206
hepatocellular carcinoma susceptibility and, 109:1266
hydroxyethyl free radicals and, 108:201
increased expression in hepatocytes in nutritional model of hepatic steatosis with inflammation (rat), 111:1645
polymorphism, genetic aspects of alcoholism and, 107:577–vidd
CYPIID6, hepatitis C virus and, 106: 1603
as hepatocellular antigens in APS-1, 114: 324
as hepatocellular autoantigens, 114:400–e
interleukin 2 and (rat), 109:1589
UGT and, 108:1464
Cytofluorimetry, shock wave cavitation and, 106:937
Cytokeratin(s)
in GI malignancies, 106:1326
immunostaining for membrane attack complex of complement and, 108: 495
markers, distribution in Barrett's specialized columnar epithelium, 112:760
villin in M cells and (mouse), 110:515
Cytokeratin-18, bone marrow micrometastases in colorectal cancer and, 109: 1535
Cytokeratin-19, immortalized murine biliary epithelial cells and (transgenic mice), 109:1308
Cytokines
acute pancreatitis and, 110:639–e
adhesion molecules in liver grafts and, 107:1094
alcoholic liver disease and, 106:1085–srr
anti-inflammatory and immunoregulatory, mechanims of IFN alfa action, 112: 1017–vidd
APRF/Stat3 in liver regeneration and (rat), 110:1854
bile canalicular contraction and, 108:841
CGP 47969A and (rabbit), 109:669–tmig, 109:812
C3 in exocrine pancreas and, 110:1919
different profiles on intrahepatic T cells in chronic hepatitis B and hepatitis C virus infections, 112:193
enterocolitis and (rat), 106:960
in eosinophilic gastroenteritis, 110:768, 110:952–e
in ethanol-induced cytotoxicity in Hep G2 cells, 115:157
in gastritis (mouse), 110:1791
G-cell function and (rabbit), 110:147
glucocorticoids in acute pancreatitis and (rat), 109:933
Helicobacter pylori infection and, 108:65
immune adhesion molecules and, 107: 1457
inflammatory bowel disease and, 108:21, 108:284–e, 108:1338–tmig, 108: 1434
interleukin 12-related, in ulcerative colitis, 115:307
intestinal inflammation and, 106:533–vidd
and intestinal ion transport, 111:844–tmig
liver injury by alcohol blocked by antibiotics (rat), 108:1–tmig
modulate fibroblast phenotype and epithelial-stroma interactions in intestine (rat), 112:826
modulation of T-lymphocyte activation by intestinal smooth muscle cells, 112: 1986
monocyte chemoattractant protein 1 and (rat), 110:1870
mRNA in gastric mucosa, *Helicobacter pylori cagA* gene and, 110:1681–tmig, 110:1744
myenteric nerves and (rat), 109:1852
patterns of and disease progression in Crohn's disease, 113:118
production
with gluten exposure in celiac disease, 115:519–tmig, 115:551

stimulation by *Helicobacter pylori* urease, 111:419
profiles, mucosal macrophages from IBD, 112:1493
proinflammatory, modulate expression in intestinal mucosal mesenchymal cells, 114:1244
recombinant, effect on gastrin release from cultured G cells (dog), 113:465
regulation of bile salt transporters (rodents), 111:193
Schistosoma mansoni fibrosis and, 107:773
smooth muscle and (rat), 107:691, 108:1720
staphylococcal enterotoxin B and (mouse), 106:450
ulcerative colitis and, 106:557–tmig, 106:637

Cytokinetic variables, familial adenomatous polyposis and, 109:994–rc

Cytolytic membrane attack complex, in hepatitis, 108:495

Cytolytic trigger, mitochondrial membrane permeability transition and (rat), 110:558

Cytomegalovirus (CMV)
in child with Ménétrier's disease, 109:592–cr
colitis, chronic diarrhea in HIV infection and, 110:30
diarrhea after marrow transplantation and, 107:1398
enteritis
after intestinal transplantation, diagnosis with DNA amplification, 112:1121
PCR early detection, 112:1063–tmig
esophageal infections and, 106:517–srr
esophagitis induced by and TNF-alpha mucosal levels, 114:77
gastrointestinal disease, CMV DNA levels in biopsy specimens, 111:439
immediate early promoter, lipase cDNA and, 106:1638
intestinal transplant pathology and, 110:1820
toxic megacolon and, 107:858–cr

Cytoplasm
apical, aminopeptidase N in small intestine and (fetal pig), 109:1039
cellular, hepatitis B virus and, 106:664
chemotaxis of intraepithelial lymphocytes and, 109:1154
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
TGF-β1 in colon cancer and, 110:375

Cytoplasmic staining, *MUC6* and Lewis antigen expression and, 109:723

Cytoplasmic vesicles, ECL cell response to gastrin and (rat), 107:18

Cytoprotection
assay, epidermal growth factor stability in gastric juice and, 108:92
ghosts of dead cells and, 108:304–c
glycine and (rat), 106:168
hepatic, by biliary cholesterol and phospholipid (rat), 107:244
human spasmolytic polypeptide and, 108:108
medullary TRH and (rat), 109:861
MnSOD induction in acute colitis and (rat), 109:801

Cytosine, bacterial colonization of cholesterol gallstones and, 108:860

Cytoskeletal proteins
calpain activation during oxidative stress and (rat), 110:1897
ulcerative colitis and, 109:3, 109:307–e
villin in M cells and (mouse), 110:515

Cytoskeleton, recycling of transporters and, 109:1707–e

Cytosol
calcium, ursodeoxycholate and, 109:965
ileal crypts and (mouse), 108:1345

DNA
amplification
for diagnosis of cytomegalovirus enteritis after intestinal transplantation, 112:1121
prednisone in chronic hepatitis C and, 107:196
aneuploidy
colorectal adenomas and, 109:1098
as precancerous marker in ulcerative colitis, 115:1312–tmig, 115:1395
binding, APRF/Stat3 in liver regeneration and (rat), 110:1854
complementary, carbonic anhydrase IX, MC/CA IX, sequence and expression in alimentary tract (rat, human), 112:398
end labeling, pancreatic duct obstruction and (opossum, rat), 110:875
fragmentation
hepatic, T cell-dependent liver injury and (mouse), 109:1–tmig, 109:166
pancreatic duct obstruction and (opossum, rat), 110:875
genomic, organic anion transport protein and, 109:1274
hepatitis B virus, 106:664, 106:1048
hepatocyte proliferation and (rat), 106: 1024
heterogeneity, colon cancer and, 108:1040
human papillomavirus, 109:1876
IFN therapy in chronic hepatitis C with normal ALT and, 110:291–rc
immunization based on
immune response to hepatitis B virus structural proteins after (mouse), 112:1307
plasmid, immune response to hepatitis C virus structural proteins after (mouse), 112:1321
jejunoileal resection and (rat), 106:94
microsatellite instability in stomach cancer, 110:38
mismatch repair
and cancer, 109:1685–srr
and colorectal cancer, 115:789–ss
deficiency, in HNPCC, genetic polymorphisms in carcinogen metabolism and, 115:1311–tmig, 115:1387
loss of, 111:519–e
mitochondrial, hepatic, 108:193, 113:599
mutations, hereditary nonpolyposis colorectal cancer and, 108:1337–tmig, 108:1405
nucleotides in protein synthesis and (rat), 110:1760
ploidy
and achalasia-associated esophageal squamous cell carcinoma, 108:545–cr
and colon cancer, 108:1040
sequencing, direct, colon cancer staging and, 106:42
synthesis
after ventromedial hypothalamic lesion formation (rat), 110:885
hepatocellular (rat), 108:477
HGF stimulation of in preneoplastic hepatocytes (rat), 114:775
stimulated by *Helicobacter pylori* LPS in enterochromaffin-like cells, 113: 1110
vaccines, and viral hepatitis, 112:1410–e
DNA fingerprinting, small intestinal injury in giardiasis and (rat), 109: 766
DNA index, colon cancer and, 106:100
DNA polymerase, hepatitis B virus and, 106:664
DNA probes
bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208
HPV in esophagus squamous cell carcinoma and, 107:2–tmig, 107:128
laminin receptor expression and (rat), 107: 764
mucin and apomucin localization and, 107:28
nm23-H1 gene in small hepatocellular carcinoma and, 107:486
DNA viruses, in pathogenesis of idiopathic intestinal pseudo-obstruction, 115:498–ss
Docking, of membrane vesicles, 109:1708–e
Docosahexaenoic acid, cytotoxicity of to Caco-2 cells, 107:80
Dogiel type I morphology, retrogradely labeled myenteric neurons and, 109:866
Dopamine
EM523 and (dog), 109:1513
jejunal sodium transport and (rat), 107: 675
receptor, genetic aspects of alcoholism and, 107:575–vidd
Sandhoff disease and, 106:775–cr
Doppler ultrasonography
bicarbonate in gastric mucosal repair and (cat), 107:149

hepatic arterial resistance and, 108:1152
hepatic venous obstruction and, 106:828–tmig, 106:1042
TIPS and, 106:1138–tmig, 106:1277, 108:1143

Dorsal motor nucleus
pancreatic polypeptide microinjection into (rat), 108:1517
vagal, nitric oxide synthase in (cat), 109:1484

Dorsal vagal complex, neuropeptide Y stimulation of biocarbonate-dependent bile secretion (rat), 112:1673

Dose-ranging study, budesonide for Crohn's disease and, 110:45, 110:299–e

Dot blot analysis, glutamine synthetase and, 106:1312

Double-immunogold labeling, of GABA and gastrin in antrum (rat), 107:137

Double-labeling immunofluorescence, *MUC6* and Lewis antigen expression and, 109:723

Double mutants, lactase-phlorizin hydrolase active sites and (rat), 109:1234

Double-staining methods, Crohn's disease and, 109:1029

Down-regulation
EGF inhibits parietal cell function via PKC and, 110:469
IL-2 effects on cytochrome P450 and (rats), 109:1589
by interleukin 1β, 110:344
pretranslational, of CYP 2C11 and 3A2 (rat), 109:198

Doxantrazole
food protein-induced anaphylaxis and (rat), 106:1505
interleukin 1 and (rat), 106:1493
mast cell regulation of esophageal blood flow and (opossum), 110:121

***Dpc4* gene**
(Smad 4), in intestinal tumorigenesis (mouse), 115:1598–ss
somatic alteration of in colorectal cancer, 111:1369–rc, 111:1387–e

DPDPE, colorectal distension and (rabbit), 110:139

DP genes, HLA genes in Crohn's disease and, 109:1462

DQ genes, HLA genes in Crohn's disease and, 109:1462

DR4, autoimmune hepatitis and, 106:1321

Dreiling tube, Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221

DR genes, HLA genes in Crohn's disease and, 109:1462

Drugs
commonly used, alcoholic liver disease and, 106:1085–srr
development of, and mega-mergers of pharmaceutical companies, 114:631–gn
gastric H^+,K^+-ATPase turnover and (rat), 109:1134
liver disease induced by, 109:1716–br
remodeling hypergastrinemia model and, 109:1407–c

Drug therapy, mesalamine-releasing, efficacy of, 115:1306–c

Dry swallows, pharyngeal water stimulation inhibits peristalsis and, 110:419

D2S119 locus, microsatellite DNA markers and, 109:1690–srr

D11S904 locus, microsatellite DNA markers and, 109:1690–srr

DU. *See* Duodenal ulcer

Dual energy X-ray absorptiometry
low bone density in Crohn's disease and, 107:1031
osteopenia and, 108:417

Dual inhibitory mechanism, of secretion (rat), 107:1751

Dual inhibitory pathways, link antral somatostatin and histamine secretion (dog, human, rat), 109:1566

Dual-photon absorptiometry, celiac disease and, 109:122

Dual sodium-mannitol flux analysis, dexamethasone and (rat), 106:35

Dual wavelength spectrophotometry, bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208

Ductal carcinoma(s)
intermediate filaments in, 106:1326
pancreatic, 107:1488
tubular adenocarcinoma, Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221

Ductal cell(s)
epithelial, C3 in exocrine pancreas and, 110:1919
growth regulation of (guinea pig), 109:944–109:945, 109:1005–e
hyperplasia, K-*ras* mutation in, 110:227, 110:306–e
liver disease and, 108:145
pancreatic ischemia-reperfusion injury and (dog), 107:1125
retinoids in pancreatic cancer and (nude mice), 109:1646

Ductal drainage, sphincter of Oddi dysfunction and, 108:242–cr

Ductal pressure, lysosomal enzymes in pancreatitis and (rat), 109:573

Ductular proliferation
colchicine and, 108:1470
ursodeoxycholic acid and, 108:1470

Dukes' classification
advanced, of colorectal cancer, 109:1413–tmig, 109:1535
cancer in ulcerative colitis and, 107:906–tmig, 107:934
for colon cancer, 110:375, 110:669
hypergastrinemia in colon cancer and (rat), 108:1068

Dummy receptor, carbon tetrachloride injury and (rat), 108:1616–tmig, 108:1849

Duodenal brake, assessment of, 110:740

Duodenal bulb, effect of *Helicobacter pylori* infection on pH, 111:391

Duodenal gastric metaplasia, in *Helicobacter pylori*–positive patients, 113:741

Duodenal gastrinomas, preoperative detection with somatostatin receptor scintigraphy, 111:845

Duodenal juice
bacterial lipase and, 107:231
Ki-*ras* mutations in, in pancreatic cancer, 110:2–tmig, 110:221, 110:306–e
total protein, in acute pancreatitis, 106:1390–ss

Duodenal ulcers
acid response to gastrin in patients with, 114:50
alternative treatments for, 110:2018–ss
cytokines in G-cell function and (rabbit), 110:147
Helicobacter pylori and, 108:1338–tmig, 108:1412, 109:670–tmig, 109:681, 110:1325–c, 111:391, 113:1983–srr
antrum infection and, 110:1386
augmentation of pH-increasing effect of omeprazole and, 110:725
recurrence after eradication, 110:1244–srr
treatment for, and reflux esophagitis, 112:1442
Helicobacter pylori and (rat), 107:1563–ss
sucralfate and, 110:657–tmig, 110:717, 110:947–e
transient LES relaxations and, 109:1704–e

Duodenitis, gastric metaplasia and, 110:452

Duodenogastric reflux
bad bile in esophagus and, 110:323–c
Bilitec and, 108:1332–c
esophageal mucosal injury and, 108:1897–srr

Duodenogastroesophageal reflux, significance of, 107:636–tmig, 107:747

Duodenogastroesophageal reflux (DGER), in GERD, 111:1168–tmig, 111:1192
Duodenojejunal manometry, ambulant, jejunal sensorimotor dysfunction in IBS and, 110:393
Duodenum
adaptive cytoprotection and (rat), 107:720
AIDS-related cryptosporidiosis and, 108:624–tmig, 108:627, 108:1075
amino acid consumption test and, 106:488
bicarbonate secretion
acid-stimulated, and CFTR-mediated transport pathway (mouse), 113:533
alterations in, and mucosal susceptibility to acid in diabetes (rat), 112:418
and aspirin and alcohol, 114:428–tmig
Brunner's glands and (rabbit, rat), 109:1160
Helicobacter pylori and, 110:658–tmig, 110:705, 110:947–e
histamine and (rabbit), 108:1676
role of cGMP in, 111:1763–e
role of prostaglandin E receptor subtypes in (rat), 113:1553
bile, gallstone recurrence and, 106:215
casein feeding, cholecystokinin-stimulated pancreatic enzyme secretion and (rat), 107:525
cell proliferation of mucosa of in FAP, 113:1159
characterization of cell lines derived from, 111:8
cholecystokinin A and B/gastrin and (dog), 107:905–tmig, 107:1019
Crohn's disease and, 108:1246–cr
diarrhea after marrow transplantation and, 107:1398
diffuse hemorrhagic gastroenteropathy and, 106:500–cr
distension
functional dyspepsia and, 107:1345
pyloric motor response to, 106:583
sympathetic nervous system in, 108:680
effect of *Helicobacter pylori* infection on postprandial acid load, 111:391
EGF promotes rapid response to injury of epithelium of (rabbit), 111:28
gastric mucosal hydrophobicity in ulceration of, 113:449
genetic hemochromatosis and, 108:1–tmig, 108:208
HCO_3^- secretion in, 108:102
guanylin and, 111:1558
hyperglycemia and, 108:951–c
inhibition of bicarbonate secretion by ulcerogenic agents, 114:527
late radiation enteropathy and, 109:1078
lipids, cholecystokinin-A receptors and, 110:1379
mesalamine microgranule delivery in, 108:1427
mucosa, $CD4^+$ T cells with specific reactivity against astrovirus, 114:115
mucosal alkaline secretion in (rat), 109:1413–tmig, 109:1526
in response to luminal acidity, carbon dioxide and (rat), 115:680
perforation of, 106:797–cr
phosphatidylcholines and (rat), 107:720
presence of alkaline phosphatase II messenger RNA in crypt and villus cells of (rat), 112:376
proteins, immunolocalization of (rat), 110:478
proximal, dietary ammonium-induced hypergastrinemia and (rat), 108:320
water extract of *Helicobacter pylori* inhibits mucosal alkaline secretion (rat), 113:1570
wheat amylase inhibitors in and effect on pancreatobiliary secretions, 111:1313
Zollinger-Ellison syndrome and, 108:1637
Duplex sonography, antroduodenal motility in diabetes and, 107:403
Duplex ultrasound
inaccuracy in predicting TIPS patency, 114:975
in predicting patency of TIPS, 115:1305–c
Duplicate publication, additional comments, 108:950–c
Duration, transient LES relaxations and, 109:605–srr
Dynamic magnetic resonance imaging, vocal cord closure during deglutition and, 109:843
Dynein, kinesin inhibition and (rat), 108:824
Dysautonomia
antroduodenal, hyperglycemia and, 108:951–c
Sandhoff disease and, 106:775–cr
Dyslipidemia, relationship of hyperamylasemia to, 112:1058–c
Dysmenorrhea, functional bowel disorders and, 109:1017–ss
Dysmorphic features, Smith-Lemli-Opitz syndrome and (rat), 109:1301
Dysmotility, jejunal sensorimotor dysfunction in IBS and, 110:393
Dyspepsia
abuse and, 107:1040
AGA medical position statement, 114:579–aga

ET-1
cirrhosis and (rat), 107:1085, 107:1201–e, 108:1842
hemorrhagic shock and (rat), 106:988
hepatic stellate cells and, 110:534
induction of leukocyte adhesion in small intestinal submucosal venules (rat), 114:103
in intestinal anaphylaxis (rat), 115:348
nicotine and, 107:864–srr

Endothelin receptors
in cecal circular smooth muscle cells (guinea pig), 108:51
ET_A, blockade, disturbance of hepatic microcirculation, 115:412

Endothelium
in abnormal responses of mesenteric vessels in portal hypertension and liver cirrhosis (rat), 111:1627
adhesion molecule expression in *Helicobacter pylori*-associated antral gastritis, 112:1908
Crohn's disease and, 108:911–srr
hepatic, vascular adhesion protein 1 and, 110:522
nitric oxide synthase
nitric oxide, and portal hypertension, 112:1767–ss
in pathogenesis of hepatopulmonary syndrome (rat), 113:606
vascular
in inflammatory bowel disease, 106:596
NSAID gastropathy in arthritis and (rat), 109:1173
pattern of adhesion molecule expression on in *Helicobacter pylori*-associated antral gastritis, 112:1908

Endothelium-derived relaxing factor, nitric oxide in ethanol-induced gastric mucosal injury and (rat), 108:58

Endotherapy, organized pancreatic necrosis, 111:820–e

Endotoxemia
alcohol-induced liver injury and (human, rat), 108:1–tmig, 108:218
bilirubin transport in (rat), 107:1075
disseminated intravascular coagulation and, 109:340–tmig, 109:531
impaired uptake and secretion of hepatocyte transport of bile acids and organic anions (rat), 112:214
induction of cyclooxygenase 1 and 2 in stomach during (rat), 113:195
risk, FK506 (tacrolimus) and, 115:67

Endotoxin
alcohol-induced liver injury and (rat), 108:1–tmig, 108:218
bile canalicular contraction and, 108:841
Escherichia coli, and superoxide anion release by gastric mucosal cells (guinea pig), 115:1186
gut, restriction and role of plasma arginase (rat), 113:1375
Helicobacter pylori, and superoxide anion release by gastric mucosal cells (guinea pig), 115:1186
ICAM-1 up-regulation and (rat), 110:866
inhibition of inducible nitric oxide synthase ameliorates gut mucosal barrier dysfunction (rat), 113:1246
intestinal permeability and, 106:35, 108:1576–srr
Kupffer cell sensitization and tolerance to, caused by ethanol, 115:443, 115:494–e
liver damage induced by, differential effects of nitric oxide synthase inhibitors on (rat), 113:1323
mucosal proliferation in sepsis and (rat), 107:121
nitric oxide production and (rat), 108:463
nitric oxide synthase in portal hypertension and (rat), 108:1487
PAF-induced intestinal injury and (rat), 109:83
regulation of bile salt transporters (rodents), 111:193
toxic megacolon and, 109:1497

Enema
barium. *See* Barium enema
butyrate and cancer in colitis and (rat), 110:1727
cyclosporine, 106:1429
epidermal growth factor in experimental colitis and (rat), 107:12

Energy
excretion, dietary stimulation of Bifidobacteria and, 108:975
metabolism, liver regeneration and (transgenic mouse), 110:1166

Energy balance, alcoholic liver disease and, 106:1094–srr

Enkephalins, opioid binding in cholestasis and (rat), 108:1479
Enolase, premalignant colon lesions and, 108:117
Enriched PCR—single-strand conformation polymorphism technique, Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221
E2/NS1 envelope glycoprotein, in agammaglobulinemia, 106:1072–cr
E2/NS1 region, hepatitis C virus and, 106:1344–cr

postoperative, for patients with gastrointestinal malignancy, 115:1299–ss
technical review of, 108:1282–aga
tumor necrosis factor α and, 106:1455
Enteric nervous system
cholera toxin and (rat), 108:2–tmig, 108:34
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
ileal crypts and (mouse), 108:1345
ileal motility patterns and (rat), 106:649
innervation of GI tract, 114:559–srr
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
neurons, substance P receptors in IBD and, 109:850
neurotransmitters, neurons and, 108:554–srr
neurotrophins and, 110:756
plexuses, neuronal coding in human ileum and, 107:680
Enteric neuromuscular function, immunomodulation, 111:1683–srr
Enteric organisms, gut translocation of, 107:635–tmig, 107:643
Enteritis
Clostridium difficile, mast cell involvement, 114:956
cytomegalovirus
after intestinal transplantation, diagnosis with DNA amplification, 112:1121
PCR early detection, 112:1063–tmig
eosinophilic, 106:1–tmig, 106:3
Enterobacteriaceae, colonization of cholesterol gallstones, 108:624–tmig
Enterochromaffin cells
neuropeptides and, 106:827–tmig, 106:859
uroguanylin expression, in GI tract (rat), 113:1007
Enterochromaffin-like (ECL) cells
carcinoid tumors and (African rodent), 109:341
circulating pancreastatin and (rat), 108:1445
culture, 111:781–srr
dietary ammonium-induced hypergastrinemia and (rat), 108:1–tmig, 108:320
function, galanin and, 115:330
gastric, 111:783–srr
calcium signals and, 110:1835
increased *Reg* gene expression in after water immersion stress (rat), 111:45
peptide YY inhibits function (rat), 112:127
gastric histidine decarboxylase and (rat), 109:1181
gastrin-induced histamine secretion from (rat), 107:2–tmig, 107:18
gastrin signaling in, 115:93
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
Helicobacter pylori LPS stimulates histamine release and DNA synthesis, 113:1110
histamine secretion (rat), 110:1084
neurohormonal modulation of, 110:1084
ileal crypts and (mouse), 108:1345
IL-1β functionally impairs (rat), 112:364
morphology, 111:781–srr
ontogeny and phylogeny, 111:781–srr
proliferation, regulation of, 111:781–srr
Reg gene expression in (rat), 111:45
and gastric mucosal proliferation in hypergastrinemia, 115:1483
secretion, 111:781–srr
somatostatin receptor subtype on (rat), 107:1067
tumorigenesis, role of gastrin, 114:1114–c
tumor transformation, TGF-α in, 111:1212
Enteroclysis
in Crohn's disease, 114:1349–c
radiopaque markers and, 110:1958–cr
small bowel, comparison with small bowel follow-through in Crohn's disease, 113:390
Enterocolitis
indomethacin-induced, 109:1349–srr
methotrexate-induced, effect of *Lactobacillus* (rat), 111:334
nongranulomatous chronic idiopathic, corticosteroid therapy, 111:629
PG-PS, 109:1353–srr
Enterocytes, 113:1803–ss
aflatoxin B1-adduct formation and (rat, human), 106:433
altered cell ions in cystic fibrosis jejunum and, 110:411
Bacteroides fragilis enterotoxin and, 110:1429
chloride conductance and sodium-dependent glucose transport (rat, human), 112:1213
cultured, bacterial induction of inducible nitric oxide synthase in, 114:93
differentiation, and integrin α7β1 expression in intestinal cells, 113:1510
α-D-glucosidase inhibitors actions on entry of free glucose into (rat), 113:205
hypolactasia and, 107:1–tmig, 107:54
immunolocalization of duodenal proteins and (rat), 110:478
infection with rotavirus induces secretion of CXC and CC chemokines, 114:947
insulin and (rat), 106:49
keratinocyte growth factor in IBD and, 110:441
lactate-anion exchanger and (rat), 106:559
laminin receptor expression and (rat), 107:764
modification of glucose and glutamine metabolism by parenteral nutrition (rat), 112:429
mRNA distribution patterns in, 115:86
peroxynitrite activation of poly(ADP-ribose) synthase in, 114:510
radiation-induced ion transport dysfunction and (rat), 106:286–tmig, 106:324
resistance to sulindac-induced apoptosis, K-*ras* and (rat), 113:1892
senescent, anoikosis in colonic crypt cells and, 110:1776
taurocholate and (rat), 106:866
villin in M cells and (mouse), 110:515
villus, CFTR and (rat, human), 108:1016
***Enterocytozoon bieneusi* infection**
jejunal sodium and water absorption promoted by gum arabic, oral rehydration solutions, 112:1979

persistence in treated celiac sprue, 112: 2146–e
shellfish poisoning, 112:1–tmig
thalidomide therapy for, 112:1781–tmig, 112:1823

Enteroendocrine adaptation, in transposed small bowel (rat), 106: 1576

Enteroglucagon
GI tract endocrine cells and (db/db mice), 108:967
jejunoileal resection and (rat), 106:94

Enterohepatic circulation
of bilirubin (rat), 110:1682–tmig, 110: 1945, 110:2013–e
in nonsteroidal anti-inflammatory drug enteropathy (rat), 112:109

Enteropathy
gluten sensitive, latent celiac disease, 111: 571–tmig
indomethacin-induced (rat), 106:567
intestinal permeability and, 108:1574–srr
mild gluten-sensitive, in celiac disease, 111:608
NSAID-induced, 112:1–tmig
pediatric autoimmune, tacrolimus (FK506) for, 111:237–cr
protein-losing, portal hypertension caused by, TIPS for, 111:1679–cr
radiation, 109:1078

Enterostatin, gastric, in lipase-catalyzed fat digestion, 115:1040–tmig, 115: 1179

Enterotoxicity
cryptosporidial diarrhea and (calf, human), 106:28
thermostable direct hemolysin (rabbit), 109:383

Enterotoxin
bacterial internalization and, 110:1429
bromelain prevents secretion of in ileum (rabbit), 113:175
Clostridium difficile, inhibition by receptor decoy (rat), 111:433
colonic Cl^- secretion in cystic fibrosis and, 107:906–tmig, 107:950
diarrhea caused by, role of 5-hydroxytryptamine in (rat), 115:808–tmig, 115: 883, 115:1009–e
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
neuronal involvement in effects of (rat), 107:657

Enterotoxin B, staphylococcal, T-cell-dependent liver injury and (mouse), 109:166

Enterotrophism, short-chain fatty acids and (rat), 106:375

Enterotropic peptide-based formula, in nutritional support for HIV patients, 107:1208–ss

Envelope glycoprotein, in agammaglobulinemia, 106:1072–cr

Enzymatic digestion, somatostatin receptor subtype on ECL cells and (rat), 107:1067

Enzyme immunoassay (EIA)
anti-asialoglycoprotein receptor autoantibodies, 107:799
intestinal fatty acid-binding protein and, 110:339
nuclear antigen reactivity in autoimmune hepatitis and, 107:200

Enzyme-linked immunosorbent assay 2 (ELISA-2), changing prevalence of hepatitis C genotypes and, 108:581–rc

Enzyme-linked immunosorbent assay (ELISA)
Ancylostoma caninum and, 106:1–tmig, 106:3
anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
antineutrophil cytoplasmic antibodies and, 108:1159
cholesterol gallstones and, 106:749
cytokines in longitudinal muscle myenteric plexus and (rat), 107:691
Helicobacter pylori and, 106:1405
hepatitis C virus and, 107:1443
IL-8 in HT-29 cells and, 108:653
IL-10 in IBD and, 108:1434
inflammatory bowel disease and, 108:21
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
microsomal autoantibodies in viral hepatitis and, 108:455
MUC6 and Lewis antigen expression and, 109:723
PAP protein and, 106:557–tmig, 106:728
P_2 purinergic receptors and (rabbit), 106: 1485
primary sclerosing cholangitis and, 106: 185
for tissue transglutaminase autoantibodies, in celiac disease, 115:1311–tmig, 115:1317–rc, 115: 1322, 115:1584–e
trefoil peptides in gastric injury and (rat), 110:489
vasoactive intestinal polypeptide and, 106:576

Enzymes
microvillous, insulin and (rat), 106:49
pancreatic
cholecystokinin-stimulated secretion of (rat), 107:327–tmig, 107:525
octreotide therapy and, 107:328–tmig, 107:379

Enzymohistochemical staining, hypolactsaia and, 107:54

Eosinophilia, *Ancylostoma caninum* and, 106:1–tmig, 106:3

Eosinophilic esophagitis, gastroesophageal reflux and, 109:1503

Eosinophilic gastroenteritis
cytokines in, 110:768, 110:952–e
dog tapeworm in, 106:1–tmig, 106:3

Eosinophilic inflammation, pelvic ileal pouches and, 107:435

Eosinophil migration, gross epithelium, 108:409

Eosphagus, detection of high-grade dysplasia of Barrett's esophagus with laser-induced fluorescence endoscopy, 111:93

Epidermal growth factor (EGF)
acidic gastric juice and, 108:92
in ECL cell tumor transformaton, 111: 1212
ethanol treatment and differential inhibition of signaling pathways of in hepatocytes (rat), 112:2073
experimental colitis and (rat), 107:12
expression at mRNA gene for in small intestinal cell cultures, 111:8
growth regulation of pancreatic duct cells and (guinea pig), 109:944
HB-EGF in gastric mucosa and, 109:1051
heparin-binding, in hepatocellular carcinoma, 107:1799
hepatocellular DNA synthesis and (rat), 108:477
immortalized murine biliary epithelial cells and (transgenic mice), 109: 1308
influence on cell proliferation, glycoproteins, and lipase activity in fetal stomach, 112:1188
inhibition of bombesin-induced activation of phospholipase C-β_1 in pancreatic acinar cells (rat), 113:1747
inhibits parietal cell function via PKC (dog), 110:469
intestinal growth and, 108:1330–c
jejunal resection and (rabbit), 107:87
long-term alcohol consumption interferes with DNA synthesis induced by, 112:1782–tmig
modulation of pepsinogen secretion in gastric chief cells (guinea pig), 111: 945
nicotine and, 107:864–srr
peptides related to, 108:564–srr
possible treatment for gastritis and peptic ulcer, 111:1–tmig
rapid response to epithelial injury in duodenum (rabbit), 111:28
receptor

and ontogenic regulation of phospholipase C-γ1 (rat), 107:109
pancreatic ductal carcinoma and, 107:219
receptor kinase, intestinal (rat), 107:1278
receptor tyrosine kinase, Shc and (rat), 109:1845
salivary esophagoprotection and, 110:675
systemic treatment induced ductal proliferations in pancreas (pig), 113:1367

Epidermal growth factor receptor
in pancreatic cancer development, 115:1040–tmig, 115:1254
requirement of phospholipase C activity for intestinal epithelial cell migration stimulated by, 114:493

Epidermal growth factor receptor kinase, inhibition of induces protease-dependent apoptosis in colon cancer cells, 114:930

Epigastric symptoms, gastric distension and, 108:330

Epinephrine
acute colitis and (rat), 106:1190
bicarbonate transport and (rabbit), 106:1562

Epiphenomenon
Helicobacter pylori and, 110:1325–c
of small bowel bacterial overgrowth, 110:955–ss

Epithelial barrier function, intestinal, trefoil peptides and (rat), 109:516

Epithelial bridge formation, in Crohn's disease, 108:376

Epithelial cell line
intestinal, uptake of L-carnitine, 111:1534
small intestine, immunologic, functional, and morphologic characteristics, 111:8

Epithelial cells
activated nuclear factor κB in, and mucosal inflammation, 115:357
adherence, by enteropathogenic *Escherichia coli*, 115:233–ss
biliary
ATP-activated conductances in, 107:236
calmodulin-dependent protein kinase II and, 109:1316
cGMP production is stimulated by natriuretic peptide, 114:782
hepatocyte stem cell induction from (rat), 110:1182, 110:1311–e
immortalized murine, 109:1308
sodium, hydrogen antiporter activation by ATP in, 111:1321
bone marrow micrometastases in colorectal cancer and, 109:1535
Brunner's glands and bicarbonate secretion (rabbit, rat), 109:1160
ciliary, nonpigmented and cross-reactive peptide in colon and ocular and joint tissue, 107:103
colonic
butyrate as survival factor for, 112:1036–e
CD95-mediated apoptosis in, I think.], 113:150 , 113:160
Entamoeba histolytica stimulation of IL-8 from without parasite-enterocyte contact, 112:1536
expression of C-X-C, C-C, and C-chemokines by, 113:1214
migration promoted by short-chain fatty acids, 113:487
$pp60^{c\text{-}src}$ overexpression elicits invasive behavior in (rat), 114:1287
proliferation (mouse), 108:1745
colorectal, familial adenomatous polyposis and, 109:994–rc
cross-talk with intraepithelial lymphocytes, in intestinal villus tips versus crypts (mouse), 115:807–tmig, 115:866
cultured from Barrett's esophagus, genetic analysis, 114:295
cultured intestinal, bacterial induction of inducible nitric oxide synthase, 114:93
cyclooxygenase 2 in, in inflammatory bowel disease, 115:297
esophageal, HCl and (rabbit), 108:662
gallbladder, mucin secretion and dog, 109:264
regulation by calcium and protein kinase C, 112:978
gastric
growth regulation by *Helicobacter pylori*, 113:1836
HB-EGF in gastric mucosa and, 109:1051
Lewis antigen expression, and *Helicobacter pylori* infection, 115:1113
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
IEC-18 intestinal, effects of mesalamine on hsp72 stress response in (rat), 113:1474
ileal crypts and (mouse), 108:1345
IL-10 maintains barrier integrity, 113:151
immortalized intestinal, cell dynamics and differentiation, 113:1198
inflammation initiated by, and tissue damage in intestinal amebiasis, 115:1446
interleukin 1 receptor antagonist isoforms in, 115:1426
intestinal
CD1 molecule and (rat), 106:1143
colorectal crypt and, 106:982
cytokines and, 106:534–vidd
Escherichia coli and, 106:1150
express and respond to interleukin 15, 111:1706–rc
H-*ras* transformed, growth suppressed by cyclooxygenase 2 inhibitor (rat), 113:1883
IL-4 induces DAF gene expression in, 111:911
infection with rotavirus induces secretion of CXC and CC chemokines, 114:947
mesalamine effects on hsp72 stress response in (rat), 113:1474
mesalamine-mediated peroxynitrite-induced apoptosis in, 113:1480
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
monocyte-chemoattractant protein 1 and, 108:40
PAF acetylhydrolases and, 109:1826
$\alpha_4\beta_1$-positive (nude mice), 106:19
production of chemokines after rotavirus infection, 114:867–tmig
Saccharomyces boulardii and, 106:2–tmig, 106:65
transferrin endocytosis and (rat), 106:414
wounded, mitogen-activated protein kinase activation by TGF-alpha in (rat), 114:697
MnSOD induction in acute colitis and (rat), 109:801
proliferation in presence of dextran sodium sulfate, prostaglandin sensitivity of (mouse), 115:807–tmig, 115:856
response to stress, 112:662–ss
T84
monolayers, eosinophil migration across, 108:409
organization and differentiation induced by fibroblasts and TGF-β, 111:1252
trefoil peptides and (rat), 109:516
vesicle targeting to apical domain and (rat), 109:1600

Epithelial origin, M cells, 111:1163–c

Epithelial-stromal interactions, cytokine modulation of in intestine (rat), 112:826

Epithelioid granulomas, inflammatory bowel disease and, 107:755

Epithelium
acid-base effects on electrolyte transport, 111:1358–srr
acid reflux-damaged, dilated intercellular spaces in, 111:1200
alimentary tract, expression of CDX1 protein, 113:478

biliary and pancreatic duct, 113:1420–br
gastric, *Helicobacter pylori* activates NF-κB in, 113:1099
Barrett's
cell origin for, 112:677–tmig
malignant and premalignant, Src activation in, 112:348
specialized columnar, cytokeratin markers in, 112:760
biliary
immunogenicity, adhesive interaction with lymphocytes, 112:968
pathobiology, 112:269–vidd
primary sclerosing cholangitis and, 106:1–tmig, 106:185
C3 in exocrine pancreas and, 110:1919
colonic
butyrate as survival factor for, 112:1036–e
transduction by adenoviral vectors in immunocompromised mice, 112:1586
columnar, fetal colonic integrin expression and, 110:58
duodenal, EGF promotes rapid response to injury of (rabbit), 111:28
dysplastic, identification in gastrointestinal malignancy, 111:247–e
effects of insulin-like growth factor I on in parenterally fed jejunum (rat), 111:1501
esophageal, HCl-induced cell edema in (rabbit), 112:847
expression of inducible nitric oxide synthase and nitrotyrosine in IBD, 111:871
fetal colonic integrin expression and, 110:58
folate depletion in neoplastic colon mucosa, 112:1163
gallbladder, roles of calcium and protein kinase C in regulation of mucin secretion from, 112:978
gastric
human spasmolytic polypeptide and, 108:108
inflammation induced by, 108:65
murine autoimmune gastritis and (mouse), 110:1791
Helicobacter pylori-infected, aberrant expression of gland-type gastric mucin in, 113:455
intestinal
apomucins and, 107:160
bile regulation of MHC class II molecule expression on (rat), 113:1901
and cross-reactive peptide in colon and ocular and joint tissue, 107:103
effect of NO, 114:601–e
glucocorticoids and (rat), 107:1663
luminal lipid hydroperoxides and, 107:80
manganese superoxide dismutase and (rat), 107:1663
MHC allopeptides to primed T cells and (rat), 107:1537–rc
myofibroblasts and (rat), 107:701, 107:881
neutrophil migration across, 113:1489
paracellular permeability increased by okadaic acid, 112:100
permeability
altered by EPEC-induced myosin light chain phosphorylation, 113:1873
sodium-glucose cotransport and, 107:319–c
preferential expression of C-X-C chemokine ENA-78 in IBD, 113:808
rapid antigen transport in jejunem (rat), 113:856
regulation of permeability by hypoxia, 114:657
retinal pigment, congenital hypertrophy of, 106:1404–tmig, 106:1542
small intestine, growth depends on T-cell activation during weaning (rat), 111:37
specialized columnar, Barrett's esophagus and, 107:945
superficial, *MUC6* and Lewis antigen expression and, 109:723
surface, anoikosis in colonic crypt cells and, 110:1776

Epitopes
MUC6 and Lewis antigen expression and, 109:723
T-lymphocyte, of recombinant hepatitis B virus surface antigen, 112:2017

Epoxide hydrolase inducers, microsomal, herbal tea hepatitis and (mouse), 106:464

Epoxygenases, gut and, 109:285–srr

Epstein-Barr virus, esophageal infections and, 106:520–srr

Epstein-Barr virus-induced gene 3 in Crohn's disease, 115:307
upregulation in ulcerative colitis, 115:307

***erb B*-2 gene,** in gastric carcinoma, 107:1209–ss

Erk activation, hypo-osmolarity—induced (rat), 110:858

Erosions, gap junctions in gastric mucosa and, 109:1492

Erosive esophagitis, omeprazole for, 108:613–ss

Erythema nodosum, ulcerative colitis course and, 107:1–tmig

Erythrocytes, and hepatic cytoprotection by biliary cholesterol and phospholipid (rat), 107:244

Erythromycin
accelerates gastric emptying, 111:571–tmig
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
effect on calcium-activated potassium channels in colonic myocytes (rabbit), 114:748
gastroparesis and, 107:1904–ss
inhibitory effect on pyloric muscle (rabbit), 111:682
lower esophageal sphincter function and (cat), 106:624
proximal gastric tone and, 109:32

Erythrophagocytosis, Kupffer cell, liver transplantation and, 110:1891

Erythropoietin, for inflammatory bowel disease anemia, 112:660–ss

Escalating dosage, IFN-α in hepatitis C and, 109:156

Escherichia coli
adherent strains, in ileal mucosa, and Crohn's disease, 115:1405
bacterial adherence and (rat), 106:35
cirrhosis and (rat), 108:1835
colonization of cholesterol gallstones, 108:861
and colorectal cancer, 115:281
Crohn's disease and, 108:1338–tmig, 108:1396
diarrhea after marrow transplantation and, 107:1398
endotoxin, and superoxide anion release by gastric mucosal cells (guinea pig), 115:1186
enteritis, Shiga-like toxin I in (rabbit), 106:306, 106:540–e
enterohemorrhagic (O157:H7)
as emerging national health crisis, 108:1923–aga
infection which mimicks Crohn's disease, 112:995–cr
prevention and control strategies for, 108:1928–aga
slaughter and processing and, 108:1927–aga
swimming-associated outbreak and, 108:1597–ss
enteropathogenic, 114:235–gn
and intestinal barrier function, 113:1817–tmig
and intestinal epithelial permeability, 113:1873
mechanisms of pathogenicity, 115:233–ss
gut translocation and, 107:636–tmig
heat-labile enterotoxin, intestinal secretion induced by (rat), 115:808–tmig, 115:883, 115:1009–e
heat-stable enterotoxin

colonic Cl^- secretion in systic fibrosis and, 107:906–tmig, 107:950
in colonic tumors, 107:1653
inflammatory diarrhea and, 106:1403–tmig, 106:1554
lipopolysaccharide, hepatic reperfusion injury and (rat), 108:463
meat infected with and food poisoning, 113:1059–gn
mucosal barrier and, 106:255–e
omeprazole and (rat)(correction), 107:1573
Shiga-like toxin, treatment with receptor decoy, 111:277–tmig
signal transduction and, 106:1150
toxins, *Saccharomyces boulardii* and, 106:2–tmig, 106:65

Eserine, lower esophageal sphincter pressure and (cat), 106:381

Esh avian sarcoma virus, premalignant colon lesions and, 108:117

Esophageal adenocarcinoma
familial aggregation of GERD in patients with, 113:1449
microsatellite DNA markers and, 109:1690–srr
progress in testing, 112:1417–ss

Esophageal body contractions, transient lower esophageal sphincter relaxations and, 110:659

Esophageal cancer
anti-p53 antibodies in, 115:19
APC gene mutations and, 107:1759
cyclin D1 regulation of proliferation in, 114:630–gn
human papilloma virus and, 109:1876
microsatellite DNA markers and, 109:1690–srr
palliation of advanced, 107:1902–ss
photodynamic therapy for, 108:310–tmig, 108:337, 108:593–e, 109:63, 109:1406–c
p53 mutations in, 106:1589
5q-LOH in, 110:52
skin photoreactions, 109:63
spectroscopic diagnosis of, 110:643–ss
sporadic, deletion of tylosis esophageal cancer locus on chromosome 17q25 in, 114:1206
tumor-derived immunsuppression and, 106:1717–ss

Esophageal candidiasis, natural history of, after successful treatment in AIDS, 107:635–tmig, 107:744

Esophageal carcinosarcoma, genetic analysis, 113:973

Esophageal diseases, functional investigation in, 107:1568–br

Esophageal manometry
clinical use of, 107:1865–paps
hemoglobin effects on esophageal motor function and, 109:1241
perspectives on, 109:2053–c

Esophageal motor neurons, swallowing and, 109:1700–e

Esophageal mucosa
acid exposure
cerebral cortical response to, 115:1311–tmig, 115:1353
differential effect on mechanosensitivity and chemosensitivity in humans, 115:1363
defense mechanisms, transient LES relaxations and, 109:1703–e

Esophageal papilloma, papillomavirus in, 108:550–cr

Esophageal shortening
acute intraluminal acid perfusion and (opossum), 107:1736
hiatus hernia and, 109:1818

Esophageal sphincter. *See* Lower esophageal sphincter; Upper esophageal sphincter

Esophageal stenosis, congenital, 109:275–cr

Esophageal stricture, benign, omeprazole and ranitidine for, 107:1257–tmig, 107:1312

Esophageal traction, attractions of, 107:1562–ss

Esophageal variceal hemorrhage
acute, somatostatin versus vasopressin for, 109:1028–tmig, 109:1289
emergency TIPS for, 114:981

Esophagitis
acute, topical nitroglycerin for pain relief in, 107:1215–c
AIDS-associated CMV-induced, and TNF-alpha mucosal levels, 114:77
Candida in AIDS, treatment with fluconazole versus itraconazole, 111:1169
comorbid occurrence of laryngeal or pulmonary disease in U.S. military veterans, 113:755
duodenogastroesophageal reflux and, 107:636–tmig, 107:747
endoscopic assessment, 111:85
endoscopy compared to fluconazole in AIDS and, 110:1803
eosinophilic, 109:1503
erosive
esophageal clearance in, 106:108
omeprazole for, 108:613–ss
esophageal pH recording and, 110:1989–aga
evolving to verrucous squamous cell carcinoma, 110:904–cr
experimental, leukotrienes and acetylcholine-induced contraction of esophageal circular smooth muscle, 112:1548
medical healing of, 106:907
reflux. *See* Reflux esophagitis
severe, long-term strategy for management of patients with, 112:1078

Esophagogastric junction, adenocarcinoma of, Barrett's esophagus and, 109:1541

Esophagogastroduodenal manometry, rumination syndrome and, 108:1024

Esophagogastroduodenoscopy, ambulatory pH recordings and, 110:1985–aga

Esophagomyotomy, histological features in specimens from achalasia patients, 111:648

Esophagopharyngeal distribution, of refluxed gastric acid in reflux laryngitis, 109:1575

Esophagopharyngeal gas venting, upper esophageal sphincter (UES)/esophageal achalasia and, 109:1328–cr

Esophagoprotection, salivary, 110:657–tmig, 110:675, 111:834–c

Esophagus. *See also* Barrett's esophagus
ablation of abnormal epithelium, use of PDT, 114:604–e
achalasia, airway obstruction and, 109:1328–cr
in acid reflux-damaged epithelium, 111:1200
adenocarcinoma, duodenogastroesophageal reflux and, 107:747
bad bile in, 110:323–c
body
function in preterm neonates, 109:1757
transient LES relaxations and, 109:604–srr
bolus transit, imaged by ultrafast computerized tomography, 110:1422
bone marrow micrometastases in colorectal cancer and, 109:1535
central response to electrical stimulation is intensity dependent, 112:1137
cholecystokinin and, 115:520–tmig
chronically denervated LES in achalasia and (opossum), 109:789
circular smooth muscle, acetylcholine-induced contraction of and leukotrienes in experimental esophagitis, 112:1548
columnar-lined, 110:614–srr
overview of, 110:6140–srr
cortical control may be bilaterally organized, 111:855
dilated intercellular spaces
disorders, overview of, 109:1020–br
distal, phrenic ampulla and, 109:1715
distention

cerebral cortical response to, 115:1311–tmig, 115:1353
hypersensitivity to, noncardiac chest pain and, 115:1363
MEG study of neuronal source, 114:559–srr
MRI of neuronal source, 114:559–srr
dysmotility, Sandhoff disease and, 106:775–cr
effects of calcitonin gene-related peptide on smooth muscle of (opossum), 113:514
EMG, modulation of, 109:1437
epithelium, HCl and (rabbit), 108:662, 109:414, 112:847
fluconazole compared with endoscopy for HIV in, 110:1682–tmig, 110:1803
in gastroesophageal reflux disease, 109:1703–e, 111:1167–tmig
in ambulant subjects, 108:83
heterotopic gastric mucosa in, acid secretion from, 115:1574–cr
infections, overview of, 106:509–srr
intramural pseudodiverticulosis, 115:6–im
LTD_4-induced smooth muscle contraction in (cat), 115:919, 808–tmig
motility
disorders of, inhibition and, 106:827–tmig, 106:875
preterm neonates and, 109:1757
simultaneous HRES an manometry in study of, 109:832
motor function, topographic representation on cerebral cortex, 111:855
mucosa, portal hypertension activates nitric oxide synthase genes in (rat), 110:549
mucosal injury, duodenogastric reflux and, 108:1897–srr
Na^+/H^+ exchanger in (rat, rabbit), 109:1421
neuronal pathways and transmission to LES (guinea pig), 115:661
nitric oxide synthase in (opossum), 106:1444
perforation, 106:787–srr
gastrografin for, 108:618–c
peristalsis
nitric oxide synthase in (rat), 108:367
pharyngeal water stimulation inhibits, 110:419
PET identification of brain loci processing sensation for, 113:50
pH
recording, guidelines for, 110:1981–aga, 110:1982–aga
symptom association with, 107:1741
physiology, anatomy and, 106:1132–c
premotor neurons, psudorabies varus and, 107:728
prevention of variceal bleeding, 112:1781–tmig
sclerotherapy and, 108:550–cr
secretion, acid and pepsin effects on, 106:973
sensation, fMRI study of cerebral processing, 114:559–srr
sensitization, noncardiac pain in, 108:311
shortening
acid-induced, mast cell mediators in, 115:1296–ss
hiatus hernia and, 109:1818
solitarial premotor neuron projections in and swallowing (rat), 114:1268
spasm, hemoglobin induces, 109:1027–tmig, 109:1241
squamous cell carcinoma, 108:310–tmig, 108:337
achalasia-associated, 108:545–cr
environmental factors in, 107:2–tmig, 107:128
HPV and, 109:1876
DNA sequences in, 107:1, 107:128
papillomavirus and, 108:1605–c
surgery of, 110:318–br, 110:649
timing, propagation, coordination, and effect of shortening during peristalsis, 112:1147
varices and rebleeding predicted by paraesophageal varices on endosonography, 112:1811
vasoactive intestinal contractor and (opposum), 107:1621

Esterase, tumor necrosis factor α and, 106:1455

Estrogen-receptor blockers, tamoxifen in hepatocellular carcinoma and, 109:917

Estrogens, tamoxifen in hepatocellular carcinoma and, 109:917, 111:271–c

Ethane, liver cell necrosis and, 108:257–srr

Ethanol
amino acid transport and, 108:899–srr
antibiotics block liver injury by (rat), 108:1–tmig, 108:218
anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
causes cell swelling in liver (rat), 114:1046
cytotoxicity in Hep G2 cells, cytokines in, 115:157
-derived protein adducts, antibodies against, 113:353–e
differential inhibition of EGF signaling pathways in hepatocytes (rat), 112:2073
effect of cigarette smoking on gastric mucosal damaged induced by (rat), 113:1188
endothelial cell arrest and (rat), 107:818
epidermal growth factor in experimental colitis and (rat), 107:12
fibrosis and (baboon), 106:152, 106:257–e
first-pass metabolism, 111:1143–e
gastric alcohol dehydrogenase activity and, 109:663–c
gastric injury induced by, trefoil peptides and (rat), 110:489
gastric metabolism of (rat), 108:737
gastric mucosal injury and (rat), 108:58
and hepatocyte proliferation in insulin receptor substrate 1 transgenic mice, 115:1558
IGF-1 and (rat), 108:644
inhibition of duodenal bicarbonate secretion, 114:527
Kupffer cell sensitization and tolerance to endotoxin caused by, 115:443, 115:494–e
liver and, 106:1085–srr
damage induced by fatty acid ethyl esters, 108:515
long-term, hepatocyte attachment to ECM and (rat), 106:473
metabolism by gastric cells, 111:863
mitochondrial glutathione depletion induced by, and TNF cytotoxicity (rat), 115:1541
nitric oxide in experimental alcoholic liver disease and (rat), 109:899
oxidative stress on mitochondrial and cell membrane of hepatocytes and liver after exposure to (rat), 112:1331
pancreatitis and, 106:742
perturbs receptor-operated cytosolic free calcium concentration signals in cultured hepatocytes (rat), 113:641
portal hypertension and (rat), 106:702
prostaglandin E_2 in uremia and (rat), 107:1382
reduces vesicle movement in hepatocytes (rat), 113:1938
short-term, system A activity impairment by (rat), 106:480
tamoxifen in hepatocellular carcinoma and, 109:917
toxicity, isolated gastric mucosal cells and (rat), 107:907

Ethanol erosion model, leukocyte adhesion and (rat), 109:1027–tmig, 109:1225

Ethics
with placebo in biliary colic study, 115:799–c
of randomized clinical trials, 110:282–vidd

Ethidium bromide DNA fluorescence, ethanol-induced damage in gastric mucosal cells and (rat), 107:907

Ethnicity, anti-asialoglycoprotein receptor aitoantibodies and, 107:799
Ethyl arachidonate, HepG2 cells and, 108:515
Ethylene glycol bis(β-aminoethyl ether)-N,N,N,'N'-tetraacetic acid (EGTA), ethanol-induced damage in gastric mucosal cells and (rat), 107:907
Ethylene glycol polymers, intestinal permeability and, 108:1568–srr
Ethylidopropylamiloride, bicarbonate secretion from distal colon and (rat), 107:329
Ethyl oleate, HepG2 cells and, 108:515
Ethyl propionate, dissolution of gallstones with, 113:232
Etidronate, treatment, osteopenia in primary biliary cirrhosis, 113:219
Euglycemia
glucose effects on colon motility and, 108:350
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
rectoanal inhibitory reflex and, 108:1700
Eukaryotic cells, in vitro, *Helicobacter mustelae* and *Helicobacter pylori* adhesion to, 109:692
Euro-Collins solution, free radical production after cold storage and (rat), 108:1167
European gene pool, hypolactasia and, 107:1–tmig
European hepatocellular carcinoma, 53 in, 108:1176
Europeans, anti-asialoglycoprotein receptor aitoantibodies and, 107:799
European trial, of cyclosporine in Crohn's disease, 109:670–tmig, 109:774, 109:1001–e
Event-related potentials (ERPs), genetic aspects of alcoholism and, 107:575–vidd
Evolution
of esophagitis to squamous cell cancer, 110:904–cr
of graft damage, hepatitis C replication after liver transplantation and, 110:167
long-term, of gut inflammation in spondyloarthropathy, 110:1696
Excitatory effect, capsaicin in colonic activity and (conscious dog), 109:1197
Excitatory motor neurons, transmitters of, 108:557–srr
Excitatory synapses, swallowing and, 109:1701–e
Exercise, gastroesophageal reflux in ambulant subjects and, 108:83
Exocrine insufficiency, pancreatitis and, 107:1481
Exocrine pancreatic insufficiency, bacterial lipase and high-fat diets in (dog), 112:2048
Exocytosis, rab3D protein and (rat, rabbit), 110:809
Exogenous chemical carcinogens, in evolution of esophagitis to squamous cell cancer, 110:904–cr
Exogenous factors, refractory peptic ulcers and, 109:1124
Exons
CCK-A receptor abnormality and, 109:1375
DNA mismatch repair and, 109:1691–srr
Experimental colitis
butyrate enemas and (rat), 110:1727
keratinocyte growth factor ameliorates mucosal injury in (rat), 110:1077
polyunsaturated phosphatidylcholine prevents stricture formation in (rat), 110:1093
and TGF-α, 113:735–tmig
Expression cloning, of gastric mucin cDNA, 109:735
Exteroceptive cutaneous-muscular flexion reflex, gastric distension and, 107:985
Extracellular matrix
anoikosis in colonic crypt cells and, 110:1681–tmig, 110:1776
changes, in acute graft-versus-host disease (mouse), 115:1205
composition in collagenous colitis, 113:136
fetal colonic integrin expression and, 110:58
fibronectin receptors and (nude mice), 106:19
genes, FK506-enhanced fibrogenesis and (rat), 107:492
liver, collagens in bind HGF, 114:139
loss, in intestinal inflammation, effects of IL-10 on, 115:573
myofibroblasts and (rat), 107:701
PDGF in liver fat-storing cells and, 107:1110
perivenous hepatocyte attachment to (rat), 106:473
proteins, *Schistosoma mansoni* fibrosis and, 107:773
reduction by inhibition of TGF-β1 in pancreatitis (rat), 113:295
Extracolonic tumors, DNA mismatch repair and, 109:1693–srr
Extraesophageal reflux, esophageal pH recording and, 110:1988–aga
Extragranular cytoplasmic matrix, GABA and gastrin in antrum and (rat), 107:137
Extrahepatic bile duct carcinoma, *ras* mutations in, 107:1147
Extraluminal force transducers, nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
Extra-short-chain fatty acids (ESCFAs), bacterial adaptation in short bowel and, 109:1446
Extravasation, lymphocyte migration in Peyer's patches and (rat), 109:1113
Eye, common peptide among colon, joint and, 107:103
Eyes, Wilson's disease and, 108:885–cr

Facial stimulation, esophageal motility in preterm neonates and, 109:1757
F-actin
network, villin in M cells and (mouse), 110:515
raw kidney beans in small intestine and (rat), 106:73
Factor analysis, of gastrointestinal symptoms, 110:969–c
Factor V inhibitors, insulin autoimmune syndrome and, 109:1673–cr
Factor V Leiden mutation
hepatic failure and Budd-Chiari syndrome in pregnant woman with, 111:1670–cr
and thrombosis in inflammatory bowel disease, 115:807–tmig, 115:830

liver cell necrosis and, 108:257–srr
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
nicotine and, 107:864–srr
secretory diarrhea and, 109:2019–srr
Free reflux, transient LES relaxations and, 109:1703–e
Fresh frozen plasma
clotting factors in, 115:800–c
orthotopic liver transplantation and, 109:1631
Freston, James W., 108:1339–aga
Freund's adjuvant, arthritis in cholestasis and (rat), 107:1469
Frog toxin, pain control, 114:430–gn
Fructose
intestinal transport of, 115:800–c
transport mechanisms, 113:1171
Fructose-1,6-biphosphate, ischemic liver protection and (rat), 108:1785
Fulguration, polycystic liver disease and, 108:309–tmig
Fullness, postprandial, functional dyspepsia and, 107:1258–tmig
Functional disorders
task force on training in, 110:1274–aga
visceral hyperalgesia and, 107:271–srr
Functional magnetic resonance imaging (FMRI)
of cerebral cortical response to acid exposure of esophageal mucosa, 115:1311–tmig, 115:1353

of cerebral cortical response to distention of esophagus, 115:1311–tmig, 115:1353
study of brain-gut axis, 114:559–srr

Fundectomy
gastric, hypergastrinemia effect on gastrin receptor expressing HHC and (athymic rat), 109:1415
pancreastatin and (rat), 108:1445

Fundic gland
HB-EGF in gastric mucosa and, 109:1051
polyps, gastric adenocarcinoma in patients with attenuated adenomatous polyposis coli, 113:659–cr

Fundic relaxation, duodenal distension and, 106:583

Fundoplication
surgery for Barrett's esophagus, 111:1395–e
transient LES relaxations and, 109:608–srr

Fundus
effect of TGF-α and IL-8 on release of somatostatin from D cells of (dog), 112:136
gastric
cholecystokinin A and B/gastrin and (dog), 107:1019
islet amyloid polypeptide and (mouse, rat), 107:712

Fungal infections
basidiobolomycosis mimicking IBD, 112:250–cr
esophageal infections and, 106:512–srr

Fura-2
bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
chemotaxis of intraepithelial lymphocytes and, 109:1154
ursodeoxycholate and, 109:965

Fura-2/AM, ileal crypts and (mouse), 108:1345

Furano neo-clerodane diterpenoids, germander and (mouse), 106:285–tmig, 106:464

Furosemide
colonic Cl^- secretion in cystic fibrosis and, 107:950
lactate-anion exchanger and (rat), 106:559
Na^+ transport and, 106:125
plus prazosin, for portal hypertension, 109:1257–tmig

Fusion, of membrane vesicles, 109:1708–e

Fusobacteria, dietary stimulation of Bifidobacteria and, 108:958–tmig, 108:975

Gadolinium chloride, free radical production after cold storage and (rat), 108:1167

Gain of function, DNA mismatch repair and, 109:1685–srr

Galactosamine, staphylococcal enterotoxin B and (mouse), 106:450

Galactosamine/lipopolysaccharide, hepatoprotective role of IL-10 after liver injury with (mouse), 112:935

D-Galactosamine, T cell-dependent liver injury and (mouse), 109:166

Galactose
esophageal secretion and, 106:973
prazosin and, 109:1257

α-Galactose, anti-gal IgG and (rat), 110:1704

L-Galactose, paracellular transport of (rat), 109:1207

1,3-*N*-α-Galactose-β acetylgalactosamine, in colonic proliferation, 106:117

β-Galactosidase
bacterial adaptation in short bowel and, 109:1446
lysosomal enzymes in pancreatitis and (rat), 109:573

Galanin
congenital esophageal stenosis and, 109:275–cr
and enterochromaffin-like (ECL) cell function, 115:330
neuronal coding in human ileum and, 107:680
smooth muscle receptors and (dog, guinea pig), 108:3

Galectins
in colon cancer progression, 113:1818–tmig
in tumor biology, 113:2003–e
type 3, in colon cancer metastasis, 115:287
types 1 and 3, differential expression in colorectal cancer progression, 113:1906

Gallbladder
absorption, octreotide and (prarie dog), 108:1547
anomalous arrangement of pancreaticobiliary duct and, 110:1614
bile
altered, in patients with multiple cholesterol stones, 112:2036
cholesterol saturation critical for crystal formation in, 114:1016
bilirubin in cholesterol pellets implanted in, 110:607
bombesin and, 107:1627
calmodulin-dependent protein kinase II and, 109:1316
cancer
progression from preneoplastic lesions, 111:232
ras mutations in, 107:1147
cholecystokinin receptor expression in muscle of, 111:1621
cholecystokinin signaling and, 106:763
contractility
aspirin and (prairie dog), 106:1662
defect in (ground squirrel), 110:251
donor, in liver transplant recipients, 107:636–tmig, 107:847
exocrine pancreatic insufficiency and, 106:1638
filling and emptying (dog), 106:1652
function of, 107:1211–br
gallstone recurrence and, 106:215, 106:225
inflammation, nitric oxide and (cat), 110:329–tmig, 110:598
intact, sphincter of Oddi dysfunction and, 106:1716–ss
motility
cholecystectomy and, 108:d1332–c
and gallstone pathogenesis, 111:823–e
MUC6 and Lewis antigen expression and, 109:723
mucin
bile salts and, 110:325–c
calcium phosphate precipitation and (bovine), 109:1661
muscarinic receptors and, 108:1329–c
muscarinic receptors and (guinea pig), 107:631–c
postprandial motor function and, 109:582
primary sclerosing cholangitis and, 106:1–tmig, 106:185
in proteolytic activity and CCK release, 110:567
relaxation in patients with pigment and cholesterol stones, 113:930
smooth muscle, inhibitory effect of bile salts on (guinea pig), 112:1699

Gallbladder disease, and *Helicobacter pylori,* 114:627–tmig

Gallbladder emptying
bile composition and, 108:1615–tmig, 108:1882
biliary lithotripsy and, 107:1496
ejection fraction and, 107:1496
and gallstone formation, 111:765
and microlithiasis, 115:124

Gallbladder epithelial cells, mucin secretion
dog, 109:264
regulation by calcium and protein kinase C, 112:978

Gallstone(s)
and apolipoprotein E, 111:1405–tmig
bacteria and, 109:2050–c
bile duct cancer and, 107:1205–c

biliary low-density particle and, 110:1936
calcium in, 109:1720–c
calcium phosphate precipitation and (bovine), 109:1661
CCK-A receptor abnormality and, 109:1375
cholesterol
apolipoprotein E4 as risk factor for formation, 111:1767–e
bacterial colonization of, 108:624–tmig, 108:860, 108:934–e
in Chilean Hispanics, 115:937, 115:1012–e
genetic epidemiology, in Chilean population, 115:937, 115:1012–e
nucleation of cholesterol crystals and, 108:1882
pathogenesis of, 115:129
color of, 110:329–tmig, 110:607
7α-dehydroxylation bacteria enhance deoxycholic acid input and bile saturation, 111:1611
disease, centennial year paper on, 113:341–aga
dissolution with ethyl propionate, 113:232
early clearance of, 107:1496
ERCP and, 109:2–tmig, 109:252, 109:320–e
formation of and emptying of gallbladder, 111:765
genetic epidemiology, in Mestizo Hispanics, 115:937, 115:1012–e
hepatic cholesterol metabolism and, 110:1619
and increased phospholipase A2, 112:2036
liver disease and, 108:1337–tmig, 108:1534
octreotide and, 107:1258–tmig, 107:1503
(prairie dog), 108:1547
pathogenesis of and gallbladder motility, 111:823–e
pigment and cholesterol, gallbladder relaxation in patients with, 113:930
polymorphism, 111:1603
postprandial gallbladder motor function and, 109:582
pronase resistance of cholesterol pronucleators and, 110:1926
prospective study of recurrence, 111:765
protein diffusion into, 106:749
recurrence of, 106:1–tmig, 106:215, 106:225, 106:262–e
repeated shockwave lithotripsy of with and without adjuvant bile acid therapy, safety and efficacy, 112:1603
Gallstone pancreatitis, 106:269–ss, 106:742, 106:810–e
emergent ERCP in, 113:1040–ss
Gamma camera imaging
abdominal, in cholestatic liver disease, 106:134
cholangiocarcinoma and, 108:1908–rc
Gammagard, hepatitis C and, 110:1120
Gamma globulin, IL-6-priducing gastric carcinoma and, 107:543–cr
Ganglia
myenteric, 109:866
neuronal coding in humam ileum and, 107:680
Gap junctions, gastric mucosal, 109:1492
GAP protein, and ontogenic regulation of phospholipase C-γ1 (rat), 107:109
Garlic, stomach cancer and, 110:12
Gas, intramural, pneumatosis cystoides intestinalis and, 108:1560–cr
Gas chromatography, platelet-activating factor and, 106:1301
Gas chromatography-mass spectrometry, tauroursodeoxycholate and (rat), 109:564
Gas entrapment, upper esophageal sphincter/esophageal achalasia and, 109:1328–cr
Gas exchange, hepatopulmonary syndrome and, 109:1283
Gas liquid chromatography, gastric phospholipids and, 107:362
Gastrectomy
pancreastatin and (rat), 108:1445
partial
duodenogastroesophageal reflux and, 107:636–tmig, 107:747
Helicobacter pylori-associated gastric lymphoproliferative disease in a child and, 109:973–cr
Gastric accommodation
and early satiety, 115:1311–tmig, 115:1346, 115:1586–e
to meal, in functional dyspepsia, 115:1311–tmig, 115:1346, 115:1586–e
Gastric acid
apolipoprotein A-IV and (rat), 109:1583
bFGF-CS23 and (rat), 106:1106–rc
and c-fos transcription in brainstem, vagal afferent signaling in (rat), 115:649
cholecystokinin and, 107:1610
control of preprogastrin mRNA translation by (rat), 111:1224
decreased production in CCK-B/gastrin receptor deficiency (mouse), 112:280–cr
effects of aging on secretion of, 110:1043
EGF inhibits parietal cell function via PKC and, 110:469
gastric metaplasia of duodenum and, 110:452
Helicobacter pylori infection and, 110:926–srr, 110:1386, 113:715
high basal secretion in somatostatin receptor subtype 2, 114:1125–rc
mechanism of hypersecretion in patients with islet cell tumor with hypergastrinemia (rat), 113:1129
regulation of pH_i during exposure to *(Necturus)*, 108:999
sucralfate and, 110:657–tmig, 110:717, 110:947–e
trap, and antibiotic treatment of *Helicobacter pylori*, 111:277–tmig
Gastric acid secretion, 107:1582–tmig
basal output, *Helicobacter pylori* and, 109:681
enterochromaffin-like (ECL) cells and, 111:783–srr
Helicobacter pylori and, 110:1647–e, 115:509–c, 115:510–c
from heterotopic gastric mucosa in esophagus, 115:1574–cr
histamine H_3 receptors and, 115:245–c
histamine-stimulated (mouse), 113:1545
neural and paracrine regulation of, 111:837–c
nocturnal, on omeprazole, control by ranitidine, 115:1335
Gastric adenocarcinoma, 107:1209–ss
association with HLA class II gene DQB1*0301, 111:426
in fundic gland polyps in patient with attenuated adenomatous polyposis coli, 113:659–cr
trends in, 109:1750
Gastric antral vascular ectasia (GAVE), portal hypertensive gastropathy and, 108:138
Gastric antrum, contraction of and signal transduction pathways (cat), 113:507
Gastric atrophy, and *Helicobacter pylori*, 113:S51
Gastric barostat, nonulcer dyspepsia and, 107:596–ss
Gastric biopsies, a matter of routine, 109:664–c
Gastric cancer
abnormal immunoreactivity of E cadherin - catenin complex and patient survival, 112:46
allelic deletions of *MCC/APC* and *p53* in, 106:1584
dimeric sialyl^{Lex} expression in, 114:462
disease association of HLA, 111:523–e
erb b-2 gene in, 107:1209–ss
expression of Lewis$_x$-related epitope as indication of metastatic potential, 111:1433

gap junctions in gastric mucosa and, 109:1492
gastric dysplasia and, 108:1955–c
growth regulation by gastrin and glycine-extended progastrin, 113:782
Helicobacter pylori, 113:S56, 113:1983–srr, 114:408–ss, 115:520–tmig, 115:642, 115:780–e
eradication of, 115:512–c
seropositivity, meta-analysis, 114:1169
treatment of, 112:1044–ss
Helicobacter pylori and, 106:1398–c, 107:1835–cr
IL-6-producing, 107:543–cr
MAGE gene expression in, 109:1414–tmig, 109:1522
microsatellite instability in, 110:38
no correlation of *Helicobacter pylori* and blood groups, 114:621–c
novel chemotherapeutic strategy, 111:1167–tmig
onions and, 110:2–tmig, 110:12
patient care study of, 107:314–ss
pepsinogen A and, 107:1257–tmig, 107:1335
relation of genetic alterations to histology, tumor stage, and *Helicobacter pylori* infection, 112:1457
sialylated carbohydrates in, 114:427–tmig
subtypes, *Helicobacter pylori* and, 109:885
trends in, 109:1750

Gastric carcinoids, 111:781–srr. *See also* Enterochromaffin-like cells
antrectomy in, octreotide suppression test and prediction of outcome, 114:817–cr
type II, role of multiple endocrine neoplasia type I gene locus in pathogenesis of, 113:773

Gastric cardia, inflammation and intestinal metaplasia of
role of GERD in, 114:633
role of *Helicobacter pylori* in, 114:633

Gastric cells
adhesions of *Helicobacter pylori* to, 113:72
glutathione and (rat), 106:1199
metabolism of alcohol, 111:863
pepsinogen and, 109:1214
pepsinogen secretion and (guinea pig), 108:1709

Gastric cytoprotection, leukocyte adhesion and (rat), 109:1027–tmig, 109:1225

Gastric distention
cholecystokinin-A receptors and, 110:1379
functional dyspepsia and, 107:1258, 107:1345
glucose effects on colon motility and, 108:309–tmig, 108:350
nociceptive reflec and, 107:985
percutaneous endoscopic gastroscopy and, 106:2–tmig, 106:13
transient LES relaxations and, 109:604–srr

Gastric dysplasia
epithelial, precancerous significance of, 107:1257–tmig, 107:1288, 107:1543–e
stomach cancer and, 108:1955–c

Gastric electrical uncoupling, recognition by electrogastrography (dog), 112:2006

Gastric emptying
acceleration
by erythromycin, 111:571–tmig
in gastroparesis, 114:456
anaphylaxis and (rat), 106:1505
antropyloric modulation of transpyloric flow and (pit), 107:37, 107:302–e
assessment with three-dimensional ultrasonography, 113:38
[^{13}C]acetate breath test for, 108:957–tmig, 108:1048
carcinoid diarrhea and, 110:405
[C]octanoic acid breath test for, comparison with scintigraphy, 112:1155
in diabetes, 109:755
donor gallbladder in liver transplantation and, 107:636–tmig, 107:847
duodenal distension and, 106:583
fedotozine and (dog), 107:1327
functional dyspepsia and, 107:1561–ss, 110:1036
glycemia in diabetes and, 109:755
interleukin 1β and (rat), 106:1568
mesalamine and, 108:1427
nonulcer dyspepsia and, 107:596–ss
scintigraphic evaluation of, applications of, 115:747–srr
transient LES relaxations and, 109:1703–e

Gastric epithelial blood group A, molecular mimicry of by *Helicobacter mustelae* (ferret), 114:675

Gastric epithelial restoration, platelet-derived growth factor and (rabbit), 110:775

Gastric fundal bleeding, emergency TIPS for, 114:981

Gastric fundectomy, hypergastrinemia effect on gastrin receptor expressing HHC and (athymic rat), 109:1415

Gastric fundic gland polyps, as preneoplastic lesions, 114:422–c

Gastric glands
indentification, 111:781–srr
oscillating pressure of, gastric mucosal smooth muscle and VIP, 114:284
zymogenic cell differentiation and (transgenic mice), 108:447

Gastric hyperemia, acid-evoked, role of sensory neurons, 114:823–srr

Gastric hyperplasia, prevention of, TGF-β1 and, 115:521–gn

Gastric hypersensitivity, in functional dyspepsia, 107:1258, 107:1345

Gastric inflammation, allergic, role of mast cell-dependent TNF-α production in (mice), 113:1560

Gastric injury, trefoil peptides and (rat), 110:330–tmig, 110:489, 110:632–e

Gastric juice
bacterial lipase and, 107:231
effect of omeprazole on distribution of metronidazole, amoxicillin, and clarithromycin, 111:358
epidermal growth factor stability in, 108:92
Helicobacter pylori and (rat), 108:320
late radiation enteropathy and, 109:1078

Gastric lumen, blood in increases splanchnic blood flow and portal pressure in portal hypertension (rat), 111:1103

Gastric lymphoma, 108:610–ss
antibiotics and, 109:334–c
CagA$^+$ *Helicobacter pylori* strains and, 113:2022–c
Helicobacter pylori and, 107:1835–cr, 108:610–ss
histological grading, 112:1466
predisposing factors for, 110:1969–cr
resolution of, 109:973–cr

Gastric MALT, and *Helicobacter pylori* eradication, 113:S61

Gastric MALT lymphoma
and *Helicobacter pylori* eradication, 113:S61
regression after eradication of *Helicobacter pylori*, prediction by endosonographic staging, 113:1087

Gastric maltoma, with M proteins in serum and gastric juice, 114:1352–c

Gastric metaplasia, duodenal, 110:452

Gastric microcirculation, secondary biliary cirrhosis and (rat), 108:1183

Gastric motility
effect of SCFA on, 111:277–tmig
gastric emptying in diabetes and, 109:755

Gastric motor response, anaphylaxis and (rat), 106:1505

Gastric mucosa
bicarbonate in repair of (cat), 107:149
calcium and nitric oxide-mediated injury to (rat), 111:65
CGRP protection of by activation of potassium channel (rat), 114:71
and Crohn's disease, 112:677–tmig
effects of lansoprazole treatment, 112:707
endogenous glutathione and damage caused by experimental diabetes (rat), 112:855
gap junctions in, 109:1492

gland luminal pressure increased by prostaglandin E_2 and aggressive factors (rat), 114:1276
growth, TGF-β1 and, 115:521–gn
growth factors and (rat), 109:1068
HB-EGF and, 109:1051
Helicobacter felis and, 108:1386
heterotopic, in esophagus, acid secretion from, 115:1574–cr
high intraglandular pressure induced by omeprazole (rat), 112:1221
induction of heat shock proteins in by GGA (guinea pig), 111:345
lipase and, 108:1650
lipid islands in, 110:369, 110:630–e
lymphocytes in during *Helicobacter pylori* infection, 114:471
metaplasia, adherence of *Helicobacter pylori* to, 111:1206
nitric oxide and (rat), 108:58
pepsin and, 108:1650
pH and (rat), 107:1–tmig, 107:180
pharmacology, 111:521–e
proliferation, gastrin-induced, Reg protein and (rat), 115:1483
prostaglandins and (rat), 107:1746
protection and sensory neuron stimulation, 114:823–srr
sensory afferent neurons and hypertonic damage and restitution (rat), 111:1474
smoking and, 108:1329–c
nicotine and, 107:864–srr
superoxide anion release, NADP oxidase-like system in (guinea pig), 115:1186
uremic, prostaglandin E_2 and (rat), 107:1382
zymogenic cell differentiation and (transgenic mice), 108:447

Gastric mucosal cells
isolated, ethanol-induced damage in (rat), 107:907
P_2 purinergic receptors and (rabbit), 106:1485

Gastric mucosal lesions, induction and inhibition of cyclooxygenase 2 and delays in healing (mouse), 112:387

Gastric myenteric plexus, impaired nitric oxide synthase expression in spontaneous diabetes (rat), 113:1535

Gastric pacing
for improvement of gastroparesis, 114:456
treatment for gastroparesis, 114:598–e

Gastric pathology
association of *Helicobacter heilmannii* with in pig and human, 111:244–e
role of regulation of acid secretion, 114:607–ss

Gastric permeability
in celiac disease, 112:314–c, 112:2161–c
in patients with celiac disease, 111:73

Gastric pH, in *Helicobacter pylori*—positive patients, 113:741

Gastric phospholipids, of peptic ulcer, and *Helicobacter pylori*, 112:1056–c

Gastric pouch, capsaicin in colonic activity and (conscious dog), 109:1197

Gastric pouch dogs, phase III activity in, 106:1533

Gastric secretion
history of, 106:1126–br
impact of afferent neurons, 114:823–srr

Gastric surgery, early detection of vitamin B_{12} deficiency after, 111:1151–ss

Gastric tone
gastric emptying in diabetes and, 109:755
gastric sensitivity to distension and, 108:330
proximal
and colonic fermentation, 111:289
erythromycin and, 109:32

Gastric toxoplasmosis, in AIDS, 110:258–cr

Gastric tumors, CEA-producing, gene therapy for, 111:1241

Gastric ulcer(s)
COX-2 and healing, 112:321–tmig
induction of MAPK signal transduction pathway during healing (rat), 114:706
in pigs infected with *Helicobacter heilmannii*, 111:1–tmig
recurrence after *Helicobacter pylori* eradication, 110:1244–srr
role of hepatocyte growth factor during healing (rat), 113:1858
role of Met during healing (rat), 113:1858

Gastric ulcer disease, pars esophagea, association with *Helicobacter heilmannii* (swine), 111:19

Gastric varices, treatment, TIPS in, 115:1606–c

Gastric venting, esophageal distension and, 110:659

MRI in liver cirrhosis, 111:147
Glomerular filtration rate, prazosin and, 109:1257
Glomerulonephritis, hepatitis B-related, 109:540
Glossopharyngeal nerve, swallowing and, 109:1700–e
Glottus, coordination of deglutitive function and pharyngeal bolus transit during eating, 112:73
Glucagon
bacterial modulation of endocrine cells and (rat), 107:1259
EM523 and (dog), 110:241
gastric distension and, 108:330
gastric emptying in diabetes and, 109:755
growth regulation of pancreatic duct cells and (guinea pig), 109:944
hepatic resistance to, in cirrhosis, 115:1530
hepatic system A activity induced by (rat), 106:480
octreotide therapy and, 107:328–tmig, 107:379
pancreatic ischemis-reperfusion injury and (dog), 107:1125

Glucagon 37, stimulation of intestinal glucose absorption (rat), 115:1040–tmig, 115:1163
Glucagon 37 receptor, and stimulation of intestinal glucose absorption (rat), 115:1040–tmig, 115:1163
Glucagonlike peptide 1, discovery of, 107:1848–srr
Glucocorticoid-dextran prodrug conjugates, in colitis therapy (rat), 106:405
Glucocorticoid-responsive chronic hepatitis, novel histological lesion in, 113:664
Glucocorticoids
acute pancreatitis and, 114:234–tmig rat, 109:933
arthritis in cholestasis and (rat), 107:1469
bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208
effect on pancreatic acinar cell sensitivity to apoptosis (rat), 114:372
manganese superoxide dismutase levels and (rat), 107:1663
methotrexate pneumonitis and, 107:266–cr
ulcerative colitis and, 108:1889–cr
Glucocorticosteroids
dexamethasone-β-D-glucuronide and (rat), 108:1688
smoking in Crohn's disease and, 110:424
ulcerative colitis and, 110:1713
Gluconeogenesis, in cirrhosis, quantification of, 115:1530
Glucosamine, labeled, mucin and, 106:389
Glucose
absorption, enteric glucagon 37 and (rat), 115:1040–tmig, 115:1163
absorptive hyperemia and, 108:1599–ss
amylase inhibition and (dog), 108:1221
bacterial overgrowth and, 106:615
bicarbonate transport and (rabbit), 106:1562
blood, and gastric emptying in normal subjects and patients with IDDM, 113:60
colonic motility and, 108:309–tmig, 108:350
colonocyte metabolism of (rat), 106:423, 109:1890
cryptosporidiosis and (piglet), 108:1030
duodenal HCO_3^- secretion and, 108:102
fatty acid uptake during starvation and (rat), 107:1415
follistatin and (rat), 108:1136
gustatory stimulation during sliip and (dog), 107:650, 107:879–e
homeostasis, islet amyloid polypeptide in (mouse, rat), 107:712
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:623–tmig, 108:727
insulin in intestinal absorption of (rat), 110:1863
intestinal
absorption, surgical bowel manipulation and (rat), 110:1669–ss
oxyntomodulin stimulation of (rat), 112:1971
permeability and, 108:1569–srr
as intestinal brake, 108:1616–tmig, 108:1700
modification of metabolism in enterocytes by parenteral nutrition (rat), 112:429
nonalcoholic steatohepatitis and, 107:1103
pancreatic ischemia-reperfusion injury and (dog), 107:1125
sodium transport stimulated by in intestine during experimental cholera, 112:1529
solute absorption stimulated by, 107:389
transport
small intestinal transection and (rabbit), 107:87
sodium-dependent, in enterocytes (rat, human), 112:1213
[^{14}C]Glucose, FK506 and (rat), 109:107
L-Glucose, paracellular transport of (rat), 109:1207
Glucose clamp technique, myoelectrical activity in hyperglycemia and, 107:1390
Glucose-dependent insulinotropic polypeptide, gastric emptying in diabetes and, 109:755
Glucose gas test, late radiation enteropathy and, 109:1078
Glucose intolerance formulas, role of, 108:1296–aga
Glucose-mediated regulation, intestinal epithelial tight junction permeability and, 109:1393–e
Glucose metabolism, gastric emptying in diabetes and, 109:755
Glucose oxidase, glutathione and (rat), 106:1199
Glucose polymer, small intestinal handling of, oral rehydration therapy, 114:197–vidd
Glucuronidation, hepatic, 108:183, 108:1464
Glucuronides, bilirubin transport in endotoxemia and (rat), 107:1075
Glucuronosyltransferases, autoantibodies against differ between viral hepatitis and autoimmune hepatitis, 111:1576
GLUT2, in human and murine diabetes, 114:429–gn
Glutamate
brain *myo*-inositol in hepatic encephalopathy and, 107:1475
gut protection by, 107:1582–tmig, 107:1885
intestinal cell proliferation and, 107:429
L-Glutamate, nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
Glutamate dehydrogenase, ethanol-induced hepatotoxicity and, 109:555
Glutamic acid, lactase-phlorizin hydrolase active sites and (rat), 109:1234
Glutamine
brain edema and (rat), 108:1097
colonocyte mryabolism and (germfree rat), 109:1890
cryptosporidiosis and (piglet), 106:1418
depletion in nonanorectic, non-weight-losing tumor-bearing rats, 112:118
effect on adaptation in short-bowel syndrome, 113:1074
and enhancement of bowel absorption, 114:1110–c
heterozygous ornithine transcarbamylase deficiency and, 109:282–cr
intestinal sodium absorption and, 106:1698–e
modification of metabolism in enterocytes by parenteral nutrition (rat), 112:429
nutritional pharmacology and, 106:1366–vidd
parenteral nutrition and, 108:1961–c
short bowel syndrome and, 110:1318–ss
Glutamine dipeptide, parental nutrition supplemented by, 107:1595
Glutamine synthetase, in liver cancer, 106:1312
γ-Glutamyl cysteine synthetase, hydroperoxide metobolism in Caco-2 cells and, 107:80
γ-Glutamyltransferase, colchicine and, 108:1470
β-Glutamyltransferase
ethanol-induced hepatotoxicity and, 109:555
ursodeoxycholic acid and, 108:1470
γ-Glutamyltranspeptidase
hepatitis C genotype in blood donors and, 110:178
interferon α and, 106:686
Glutaraldehyde colitis, after endoscopy, 108:1250–cr
Glutarate, in glucocorticoid prodrugs (rat), 106:405
Glutathione (GSH)
alcoholic liver disease and, 106:1085–srr

antioxidant systems, hydroperoxide metabolism in Caco-2 cells and, 107:80
biliary, atrial natriuretic peptide and (rat), 106:143
cerulein-induced cysteine depletion and (mouse), 107:824
depletion, herbal tea hepatitis and (mouse), 106:464
endogenous, in gastric mucosal damage from experimental diabetes (rat), 112:855
free radicals and (cat), 106:629
hepatocyte oxidative injury and (rat), 109:206
mitochondrial toxicity of tacrine and (human, rat), 110:1878
modulation of TNF-α–induced cytotoxicity in hepatocytes (mouse, rat), 115:1229
oxidant injury and (rat), 106:1199

Glutathione *S*-transferase M1 polymorphisms, hepatocellular carcinoma susceptibility and, 109:1266

Glutathione *S*-transferase subunit proteins, as antigens in autoimmune hepatitis, 114:329

Gluten, intestinal permeability and, 108:1573–srr

Gluten challenge, rectal, in celiac children and siblings, 111:318

Gluten exposure, in celiac disease
interferon-γ production with, 115:519–tmig, 115:551
interleukin production with, 115:519–tmig, 115:551
tumor necrosis factor α production with, 115:519–tmig, 115:551

Gluten-free diet
causes of chronic diarrhea in celiac sprue after treatment with, 112:1830
celiac disease and, 109:122
with alopecia areata, 109:1333–cr
childhood, role of pancreatic impairment in growth recovery during, 112:1839
osteosynthetic activity before treatment with for celiac disease is predictive of bone mass recovery after, 113:67

Gluten-sensitive enteropathy
in celiac disease, 111:608
latent celiac disease, 111:571–tmig

Glycans, α_1-acid glycoprotein and, 106:231

Glycerol
intestinal permeability and, 108:1569–srr
intracolonic injection of, 110:351

Glyceryl trinitrate, ulcer healing and, 109:524

Glycine
calcium binding in model bile and, 107:831
colon cancer and, 109:1142, 109:1384–e
cytoprotection, in hepatocytes (rat), 106:168
6-fluoro-ursodeoxycholic acid analogue and, 108:1204
glutathione and (rat), 106:1199
lactase-phlorizin hydrolase active sites and (rat), 109:1234
prevents alcohol-induced liver injury (rat), 110:1536

[^{14}C]Glycocholate, organic anion transport protein and, 109:1274

Glycoconjugates, intestinal absorption of bile acids and (rabbit), 110:459

Glycodeoxycholic acid, in acute pancreatitis (rat), 106:207

Glycolmethacrylate, pelvic ileal pouch and, 109:1090

Glycoproteins
cholesterol-nucleating, pronase resistance of, 110:1926
in colorectal cancers and adenomas, 110:362
influence of EGF on in fetal stomach, 112:1188
lectins in colon cancer cells and, 106:85
mucin, 106:1054
neutrophil adhesion in cholestasis and (rat), 109:923
nucleation of in postmenopausal women, 112:1278

Glycosylation
MUC6 and Lewis antigen expression and, 109:723
mucin biosynthesis and, 107:1352

Glycoursodeoxycholate, cholesterol-rich membranes and, 106:1333

Goblet cell(s)
autoantibodies for in IBD, 113:101
guanylin and (rat), 109:1863, 109:2039–e
intestinal
antibodies against in IBD, 113:1–tmig
role of T helper 2 cells in hyperplasia of, mice infected with *Trichinella spiralis* (mouse), 113:542
mucins in, 107:28, 107:160
mucus depletion of, inflammatory bowel disease and, 107:755
trefoil peptides and (rat), 109:516

Goblet-cell hyperplasia, in Crohn's disease, 108:376

Gold standard
colon polyps, 112:292–e
diagnostic, for chronic hepatitis, 106:1723–c

Golgi apparatus
cytochrome P4502B traffic and (rat), 108:1110
hepatic glucuronidation and (rat), 108:183
immunolocalization of duodenal proteins and (rat), 110:478

Golgi complex, aminopeptidase N in small intestine and (fetal pig), 109:1039

Golgi stack, colon cancer and, 109:1384–e

Golgi vesicles, hepatic system A activity and (rat), 106:480

GOR autoantigen, hepatitis C virus and, 107:1436, 107:1443, 107:1550–e

GP53, in platelet activation, 106:827–tmig, 106:840

gp120, HIV-associated diarrhea and, 108:1939–e

gp210, in primary biliary cirrhosis, autoantibodies against, 106:193

G proteins
α subunits, expression in colon, and azoxymethane-induced colonic neoplasms (rat), 115:1494
in TNF-α inhibition of collagen α_1(I) gene expression in hepatic stellate cells (rat), 113:625

GP-2 zymogen granule protein, in acute pancreatitis (rat), 107:1819

Graft(s), liver, adhesion molecules in, 107:1094

Graft dysfunction, refrigerated donor livers and, 108:1337–tmig, 108:1510

Graft injury, hepatitis C replication after liver transplantation and, 110:167

Graft rejection, graft-vs.-host hemolysis after liver transplantation and, 110:1891

Graft-versus-host disease (GVHD)
diarrhea after marrow transplantation and, 107:1398
Fas-mediated cytotoxicity by intestinal intraepithelial lymphocytes (mouse), 113:168
intestinal involvement in, 115:28. 115:220–e
pathogenesis of, OX40-OX40L interactions in (mouse), 115:1205

Graft-versus-host hemolysis, after liver transplantation, 110:1891

Gram-negative bacilli
enteric colonization with in late radiation enteropathy, 109:1078
parenteral nutrition complications and, 109:1409–c

Gram-negative bacteria, liver injury by alcohol blocked by antibiotics (rat), 108:1–tmig, 108:218

Gram-positive cocci
dietary stimulation of Bifidobacteria and, 108:975
parenteral nutrition complications and, 109:1409–c
Granisetron
colonic injection of glycerol in IBS and, 110:351
fedotozine modulation of colonic distension and (dog), 107:1327
mast cell degranulation in colonic motility and (rat), 107:976
Granulocyte-macrophage colony-stimulating factor (GM-CSF)
in eosinophilic gastroenteritis, 110:768, 110:952–e
in murine autoimmune gastritis (mouse), 110:1791
Granulocyte/macrophage colony-stimulating factor (GM-CSF), eosinophil migration and, 108:409
Granulomas
colonic sarcoidosis and, 108:1556–cr
Crohn's disease and, 108:1396
inflammatory bowel disease and, 107:755
Listeria monocytogenes and, 108:1338–tmig, 108:1396
mediastinal, 109:366
pyogenic, 108:1894–cr
Schistosoma mansoni fibrosis and, 107:773
Granulomatous enterocolitis, selective kallikrein-kinin system activation in (rat), 110:1467
Granulomatous inflammation
HIV-associated necrotizing cholangitis caused by *Septata intestinalis* and, 108:247–cr
pancreatic, in Crohn's disease, 108: d1246–cr
Granulomatous pancreatitis, Crohn's disease or sarcoidosis?, 110: 321–c
Granulomatous vasculitis, Crohn's disease and, 108:623–tmig, 108: 911–srr
Grapefruit juice, heartburn and, 108:2–tmig
Gräsbeck-Imerslund disease, pathogenesis of, 108:1622
Graves' disease, primary biliary cirrhosis and, 106:1342–cr
Gravimetry, calcium phosphate precipitation and (bovine), 109:1661
Gravity, gastroesophageal reflux disease and, 109:1703–e
Gray-scale presentation, scintigraphic colonic transit studies and, 107:1271
Gross tumor morphology, Ki-*ras* mutations and, 109:1612
Growth, intestinal
epidermal growth factor and, 108:1330–c
epidermal growth factor receptor kinase and (rat), 107:1278
Growth-associated protein 43, correlation with pain in chronic pancreatitis, 112:1648
Growth factor(s)
autocrine
glycine-extended gastrin as in colon cell line, 113:1576
regulation of cultured intestinal muscle growth, 113:817
colon cancer and, 109:1142
healing ulcers and (rat), 107:339
in liver disease, 108:145
nonmitogenic actions and role in intestinal physiology and pathophysiology, 112:225–srr
ulcer healing and (rat), 109:1068
Growth factor receptors, and pancreatic cancer, 114:628–tmig
Growth hormone

macroaggregated albumin lung perfusion scan for diagnosis, 114:233–tmig
and nitric oxide, 113:682–e
role of endothelial nitric oxide synthase in pathogenesis of (rat), 113:606
TIPS and, 109:978, 109:1009–e, 113:728–c
Hepatorenal nerves, portal insulin in intestinal glucose absorption and (rat), 110:1863
Hepatorenal syndrome, treatment of, 115:503–ss
Hepatotoxicity
acetaminophen-induced, 109:109:1725, 109:1907, 109:2043–ss
ethanol-induced, 109:555
HEp-2 cells, *Escherichia coli* and, 106:1150
HEPES buffer
nitric oxide synthase and (opossum), 106:1444
pancreatic H^+/HCO_3^- secretion and (pig), 108:850
HepG2 cells
activin-follistatin system in, 108:834
ethanol-induced cytotoxicity in, cytokines in, 115:157
ethanol-induced hepatotoxicity and, 109:555
fatty acid ethyl esters and, 108:515
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Heptotoxins, TNF induction of apoptosis during poisoning with (mouse), 112:923
Herbal remedies, hepatoxicity, 113:1408–e
Herbal tea hepatitis, due to germander (mouse), 106:285–tmig, 106:464
Herbimycin, IL-8 in HT-29 cells and, 108:653
Hereditary hemochromatosis (HHC)
genotypic/phenotypic correlations, 114:319
hepatic iron concentration in, 106:674
HLA-linked, expression in subjects with *C282Y* mutation, 114:1003
utility of hepatic iron index, 113:1270, 114:1113–c
Hereditary hemorrhagic telangiectasia, hepatopulmonary syndrome and, 109:1011–e
Hereditary mixed polyposis syndrome, 112:643–e
clinical and molecular features, 112:327
mutation in HMPS gene, 112:321–tmig
Hereditary nonpolyposis colorectal cancer (HNPCC)
adenoma to carcinoma progression, genetic instability and, 109:73
age of onset, genetic modifiers of, 115:1311–tmig, 115:1387
BAX gene mutation in, 114:268
DNA mismatch repair and, 109:1685–srr, 111:516–e, 115:789–ss
gene carriers, cancer risk in, 110:973–tmig, 110:1020
genetic linkage and, 106:815–ss
genetic link with IBD, 114:608–ss
genetic modifiers in, 115:1311–tmig, 115:1387
hereditary nonpolyposis, TGF-β type II receptor gene mutations in adenomas from, 112:33
lifetime risk for, 108:1405
linkage analysis of, 110:1404
mismatched DNA nucleotides and, 109:1368–rc
molecular nature of tumors, 111:307
mutations predisposing to, 113:1146
screening for, 108:1337–tmig, 108:1405, 108:1590–e, 115:809–gn
survival rates in, 110:657–tmig, 110:682, 110:943–e
TGF-β type II receptor gene mutations in adenomas from, 112:33
tumor location in, genetic modifiers of, 115:1311–tmig, 115:1387
Hernia
esophageal shortening and, 109:1818
hiatial
esophageal shortening and, 107:1736
opposum, 107:1736
phrenic ampulla and, 109:1715
Herpes simplex virus (HSV), esophageal infections and, 106:516–srr
Herpes-type viruses, oral hairy leukoplakia and, 106:506–cr
Heterodimeric surface molecules, anoikosis in colonic crypt cells and, 110:1776
Heterogeneity
adenoma-carcinoma progression in HNPCC and, 109:73
cholangiocyte, in liver (rat), 110:1636–rc
Crohn's disease positive for pANCA and, 110:1810
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
MUC gene pancreatic expression and, 109:953
in ulcerative colitis, 108:597–e
Heterosexual exposure, hepatitis C in fulminant viral hepatitis and, 107:2–tmig
Heterozygosity, ornithine transcarbamylase deficiency and, 109:282–cr
Hexamethonium
capsaicin in colonic activity and (consious dog), 109:1197
colonic myoelectric complexes and (mouse), 108:1371
colonic relaxation and (dog), 106:606
EM523 and (dog), 109:1513
fedotozine modulation of colonic distension and (dog), 107:1327
neuronal involvment in toxin effects on ileum and (rat), 107:657
secretory diarrhea and, 109:332–c
Hexosaminidase B deficiency, diarrhea and automatic dysfunction in, 106:775–cr
Hexoses, bacterial adaptation in short bowel and, 109:1446
HFE gene, study of in Italian population, 114:996
H^+/HCO_3^-, pancreatic, secretin and (pig), 108:850
Hiatial hernia, 107:1736
esophageal shortening and, 107:1736
phrenic ampulla and, 109:1715
High-amplitude phase contractions, colonic injection of glycerol in IBS and, 110:351
High-density lipoprotein (HDL)
colchicine and, 108:1470
ursodeoxycholic acid and, 108:1470
High-performance liquid chromatography (HPLC)
bile canalicular contraction and, 108:841

bilirubin in cholesterol pellets and, 110:607
β-carotene absorption and (ferret), 108:719
cyclosporine enemas and, 106:1429
eicosanoid production and (dog), 106:297
epidermal growth factor stability in gastric juice and, 108:92
intestinal permeability and, 108:1569–srr
jejunal sodium transport and (rat), 107:675
long-term hemodialysis and, 109:1028–tmig, 109:1295

Hilar intrahepatic bile ducts, pancreatic enzymes and, 108:1236

Hirschsprung's disease (HD)
glial-derived neurotrophic factor in, 112:1381–rc
interstitial cells of Cajal in, 111:901
lethal spotted mutant mice as model for, 112:1575

HISM cells, interleukin 1β inhibits collagen in, 110:344

Hispanics, gallstone disease in, genetic epidemiology of, 115:937, 115:1012–e

Histamine
antral, dual inhibitory pathways and (dog, human, rat), 109:1566
duodenal bicarbonate secretion and (rabbit), 108:1676
ECL cells and (rat), 110:1084
food protein-induced anaphylaxis and (rat), 106:1505
GABA-induced ileal electrolyte transport and, 110:498
gastrin-induced secretion of from ECL cells (rat), 107:2–tmig, 107:18
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
ileal vasodilator mechanisms and (guinea pig), 108:712
inhibition of somatostatin and stimulation of acid secretion in stomach (mouse), 113:1545
mast cell regulation of esophageal blood flow and (opossum), 110:121
N^{α}-methyl histamine in *Helicobacter pylori* infection and, 108:958–tmig, 108:959
nitric oxide and (rat), 106:367
phase III activity and (dog), 106:1533
radiation-induced ion transport dysfunction and (rat), 106:324
receptors, intestinal repair and (rat), 107:1297
release
in enterochromaffin-like cells, galanin and, 115:330
in enterochromaffin-like cells stimulated by *Helicobacter pylori* LPS, 113:1110
to gastric lumen, 115:245–c
secretion in antrum inhibited by somatostatin (human, dog, rat), 111:919
somatostatin receptor subtype on ECL cells and (rat), 107:1067

Histamine receptor(s), 107:1297, 108:712, 109:1566
H_1, intestinal repair and (rat), 107:1297
H_2, 109:1060
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
intestinal repair and (rat), 107:1297
H_3, and gastric acid secretion, 115:245–c

Histamine receptor antagonists
H_1
GABA-induced ileal electrolyte transport and, 110:498
mast cell regulation of esophageal blood flow and (opossum), 110:121
radiation-induced ion transport dysfunction and (rat), 106:324
H_2
continuous infusions of, 106:60
for dyspepsia, 110:72
dyspepsia and, 108:1324–ss
for gastroesophageal reflux disease, 107:1545–e
gastroesophageal reflux disease and, 108:1958–c
nicotine and, 107:864–srr
peptic stricture disease and, 106:907
refractory peptic ulcers and, 109:1027–tmig
transient LES relaxations and, 109:608–srr
H_3, intestinal repair and (rat), 107:1297

Histidine decarboxylase (HDC)
ECL cell response to gastrin and (rat), 107:18
N^{α}-methyl histamine in *Helicobacter pylori* infection and, 108:959
regulation, 111:781–srr
stomach, CCK-B receptor agonists/antagonists and (rat), 109:1181

Histoautoradiography, rectal epithelial proliferation and, 106:982

Histochemistry
aminopeptidase N in small intestine and (fetal pig), 109:1039
chronically denervated LES in achalasia and (opossum), 109:789
iron overload effect on collagen expression and (rat), 107:1118
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
nitric oxide in primate colitis and (rhesus macaque), 108:705
nitric oxide synthase
in dorsal motor nucleus of vagus and (cat), 109:1484
in esophageal peristalsis and (rat), 108:367

Histogenesis, of colorectal hyperplastic polyps, 109:1468

Histological cirrhosis, in type 1 autoimmune hepatitis, 110:658–tmig, 110:848

Histology
achalasia-associated esophageal squamous cell carcinoma, 108:545–cr
alcoholic pancreatitis, 112:315–c
Barrett's esophagus and, 107:945
B-cell isotype response to bacterial load and, 109:819
cancer in ulcerative colitis and, 107:906–tmig, 107:934
CGP 47969A and (rabbit), 109:812
congenital esophageal stenosis and, 109:275–cr
FK506-enhanced fibrogenesis and (rat), 107:492
gastric cancer and, 109:1750
gastric epithelial dysplasia and, 107:1288
gastrointestinal wall layers, correlated with magentic resonance endoscope imaging, 112:1568
and genetic alterations in gastric cancer, 112:1457
grading in gastric lymphoma, 112:1466
graft-vs.-host hemolysis after liver transplantation and, 110:1891
gut inflammation in spondyloarthropathy and, 110:1696
Helicobacter pylori diagnostic tests and, 109:136
Helicobacter pylori in gastric cancer subtypes and, 109:885
nerve damage in colitis and (rat), 109:718
ulcerative colitis and, 107:369

Histomorphological surveillance, pelvic ileal pouch and, 109:1090

Histomorphometric analysis
quiescence in intestinal stem cells and (rat), 107:1319
Schistosoma mansoni fibrosis and, 107:773

Histones, soluble TNF-α receptor and (rat), 108:1849

Histopathology
Crohn's disease positive for pANCA and, 110:1810
gastric toxoplasmosis in AIDS and, 110:258–cr
intestinal transplant pathology and, 110:1820
of liver, 107:598–br

***Histoplasma* spp.,** esophageal infections and, 106:515–srr

HIV. *See* Human immunodeficiency virus

Hydrophobic barrier, gastroduodenal mucosa, deranged after parenteral nonsteroidal anti-inflammatory drugs (rat), 112:1931

Hydrophobicity
bile acid, hydroperoxides and (rat), 109:1249
colonic, trinitrobenzenesulfonic acid and (rat), 110:780

Hydrostatic pressure, gastric mucosal pH and (rat), 107:180

Hydroxocobalamin, normalization of plasma vitamin B_{12}, 113:430

5-Hydroxtryptamine
antagonist, in carcinoid diarrhea, 106:1184
corticotropin-releasing hormone and, 106:859
radiation-induced ion transport dysfunction and (rat), 106:324
Hydroxyarachidonate metabolites, eicosanoid production and (dog), 106:297
β-Hydroxybutyrate, ketogenesis impairment in citrullinemia and, 107:1154–cr
27-Hydroxycholesterol, cholic acid synthesis from, in humans, 115:509–c
α-4-Hydroxy-cinnamic acid, lactate-anion exchanger and (rat), 106:559
Hydroxyethyl free radicals, alcoholic cirrhosis and, 108:1–tmig, 108:201
Hydroxyethyl radical-cytochrome P4502E1 adducts, in development of autoimmune reactions in alcoholic liver disease, 111:206
Hydroxyethyl radicals, target immune reactions triggered by alcohol in hepatocytes (rat), 113:265
5-Hydroxyindoleacetic acid (5-HIAA), carcinoid diarrhea and, 110:405
Hydroxylation, pretranslational down-regulation of CYP 2C11 and 3A2 and (rat), 109:198
4-Hydroxynonenal, liver cell necrosis and, 108:257–srr
5-Hydroxytryptamine 3 (5-HT_3)
fedotozine modulation of colonic distension and (dog), 107:1327
mast cell degranulation in colonic motility and (rat), 107:976
5-Hydroxytryptamine (5-HT)
EM523 and (dog), 110:241
and enterotoxin-induced intestinal secretion (rat), 115:808–tmig, 115:883, 115:1009–e
mucosal secretory reflexes and, 110:2021–ss
5-Hydroxytryptamine 3 (5-HT_3) receptor antagonist, EM523 and (dog), 109:1513
Hydroxytryptamine receptors
5-HT
in intestinal muscle, 109:1791
mediate peristaltic reflex induced by mucosal stimuli (guinea pig, human), 111:1282
5-HT_3, in chemotherapy-induced emesis, 115:1606–c
5-HT_4, agonists, and peristaltic reflex (guinea pig, human, rat), 115:370
25-Hydroxyvitamin D_3, osteopenia and, 108:417
Hyoscine, colonic myoelectric complexes and (mouse), 108:1371
Hyperalgesia
of lumbar splanchnic afferents, in irritable bowel syndrome, 107:1686
rectal
induced by repetitive sigmoid stimulation in IBS, 112:55
irritable bowel syndrome and, 109:2–tmig, 109:40
visceral, 107:271–srr
Hyperalimentation catheter, parenteral nutrition complications and, 109:1409–c
Hyperammonemia
after heart-lung transplantation, 112:2161–c
brain *myo*-inositol in hepatic encephalopathy and, 107:1475
fatal, after orthotopic lung transplantation, 112:236–cr
Hyperammonemic coma, heterozygous ornithine transcarbamylase deficiency and, 109:282–cr
Hyperamylasemia
asymptomatic chronic, 112:1057–c
chronic nonpathological, of pancreatic origin, 110:1905
relationship to dyslipidemia, 112:1058–c
Hyperbilirubinemia
fasting, 115:799–c
and decreased intestinal motility (rats), 111:217
etiology, 114:1351–c
mechanism of, 113:1798
sepsis and, 107:1075
Hypercalcemia
bile and gallstones and, 109:1720–c
due to endogenous overproduction of 1,25-dihydroxyvitamin D in Crohn's disease, 114;1061–cr
pancreatitis and (rat), 109:239
Hypercalcemic pancreatitis, trypsinogen activation and, 110:324–c
Hypercoagulability
Crohn's disease and, 108:911–srr
in inflammatory bowel disease, 106:281–c
Hypercoagulable state, orthotopic liver transplantation and, 109:1631
Hyperdynamic circulation, nitric oxide corrects (rat), 109:1414–tmig, 109:1624
Hyperdynamic circulatory syndrome
nitric oxide synthase in portal hypertension and (rat), 108:1487
TNF-α and (rat), 108:761
Hyperemia
absorptive, 108:1599–ss
bicarbonate in gastric mucosal repair and (cat), 107:149
gastric mucosal, substance P and (rat), 106:286–tmig, 106:440
ostprandial, adenosine and, 107:1170–srr
secondary biliary cirrhosis and (rat), 108:1183
Hyperexcitability, central, cisceral hyperalgesia and, 107:271–srr
Hyperfermentation, bacterial adaptation in short bowel and, 109:1446
Hypergammaglobulinemia, IL-6-producing gastric carcinoma and, 107:543–cr
Hypergastrinemia
colon cancer and, 106:1263
colon cancer and (rat), 108:1068, 108:1307–e
colorectal cancer risk in, 115:268
cytokines in G-cell function and (rabbit), 110:147
gastric mucosal proliferation in, Reg protein and (rat), 115:1483
gastrin receptor expressing HHC and (athymic rat), 109:1415
Helicobacter pylori and (rat), 108:309–tmig, 108:320
Helicobacter pylori infection and, 109:1142
mechanism of gastric acid hypersecretion (rat), 113:1129
Hypergastrinemia model, remodeling, 109:1407–c
Hyperglycemia
acute, gastrointestinal motility and, 107:403
acute antroduodenal dysautonomia and, 108:951–c
colonic motility and, 108:309–tmig, 108:350
gastric slow-wave dysrhythmias and, 108:623–tmig, 108:727
myoelectric activity and, 107:1390
rectal perception and, 108:1616–tmig, 108:1700
slows gastric emptying in normal subjects and patients with IDDM, 113:60
in type II diabetes mellitus, accelerated gastric emptying and, 109:755
Hyperinsulinemia
cirrhosis and, 109:1673–cr
glucose effects on colon motility and, 108:310–tmig, 108:350
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
Hyperkalemia, laxatives and, 108:752
Hyperlipidemia, nonalcoholic steatohepatitis and, 107:905–tmig, 107:1103
Hyperosmolality
cholera toxin and (rat), 108:34

intestinal permeability and, 108:d1569–srr
lactulose/mannitol permeability ratios and (cat, human, rodent), 108:687
5-Hyperoxytryptamine, food protein-induced anaphylaxis and (rat), 106:1505
Hyperplasia
duct cell, K-*ras* mutation in, 110:227, 110:306–e
enterochromaffinlike cell, dietary ammonium-induced hypergastrinemia and (rat), 108:309–tmig, 108:320
gastric, prevention of, TGF-β1 and, 115:521–gn
Helicobacter pylori as risk factor for in argyrophil cells, 112:707
hepatic, sex steroids in (rat), 110:1199
inflammatory bowel disease and, 107:755
intestinal goblet cells, role of T helper 2 cells in mice infected with *Trichinella spiralis* (mouse), 113:542
liver, metabolic alterations associated with cell growth (rat), 113:238
MUC gene pancreatic expression and, 109:953
mucosal, jejunal resection and (rabbit), 107:87
Paneth's cell, 107:435
reactive epithelial, inflammatory bowel disease and, 107:755
Hyperplasia-dysplasia cancer hypothesis, peanut lectin and, 106:117
Hyperpolarization, colonic myoelectric complexes and (mouse), 108:1371
Hypersecretion, colonic, IL-1β and (rat), 109:483
Hypersensitivity reaction
Ancylostoma caninum and, 106:3
gastric, in functional dyspepsia, 107:1258, 107:1345
jejunal sensorimotor dysfunction in IBS and, 110:393
methotrexate pneumonitis and, 107:266–cr
monocyte chemoattractant protein 1 and (rat), 110:1870
Hypertension
intracranial, after hepatectomy (rat), 108:1097
portal
and endothelial nitric oxide synthase and nitric oxide, 112:1767–ss
intestinal permeability and, 108:1576–srr
nitric oxide synthase and (rat), 108:1487
secondary biliary cirrhosis and (rat), 108:1183
TIPS versus surgical decompression, 112:1768–ss
TNF-α and (rat), 108:761
Hyperthermia
relationship between heat shock protein expression induced by and protection against cerulein-induced pancreatitis (rat), 111:1333
whole-body, ischemia/reperfusion injury and (rat), 109:505
Hyperthyroidism
primary biliary cirrhosis and, 106:1342–cr
transaminase values in subclinical Addison's disease and, 109:1324–cr
Hypertriglyceridemia, pancreatitis and, 106:742, 106:810–e
Hypertrophic gastropathy
endoscopic ultrasonography and, 106:820–c
Helicobacter felis and (mouse), 110:155
Hypervariable regions, hepatitis C virus and, 108:623–tmig, 108:789, 108:958–tmig
Hyperventilation
effect on colonic motor and sensory function, 111:368
effect on colonic tone and contraction, 111:277–tmig
Hypoadrenalism, transaminase values in subclinical Addison's disease and, 109:1324–cr
Hypoaminotransferasemia, long-term hemodialysis and, 109:1295
Hypobetalipoproteinemia, heterozygous, fatty liver in caused by novel truncated form of apoplipoprotein B, 111:1125–cr
Hypocapnia, effects on colonic muscle tone, 111:368
Hypochlorhydria
associated with *Helicobacter pylori,* 114:618–c
bacterial overgrowth and, 106:557–tmig, 106:615
late radiation enteropathy and, 109:1078
Hypoechoic nodular pattern, hepatocellular carcinoma and, 108:1778
Hypogammaglobulinemia, intestinal permeability and, 108:1575–srr
Hypoglycemia, spontaneous, insulin autoimmune syndrome and, 109:1673–cr
Hypolactasia, cellular basis of, 107:1–tmig, 107:54
Hypomotility, antral
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
smoking and, 110:1–tmig, 110:3
Hypo-osmolarity, brain *myo*-inositol, 107:1475
Hypo-osmolarity-activated signal transduction pathway, taurocholate and (rat), 110:858
Hypoperfusion, intestinal, during cardiopulmonary bypass, 106:318
Hypopharyngeal intrabolus pressure, oral-pharyngeal dysphagia in Parkinson's disease and, 110:383
Hypoprothrombinemia, cirrhosis in autoimmune hepatitis and, 110:848
Hyporeactivity, reflex, in functional dyspepsia, 107:1258, 107:1345
Hypotension
hypoxia-induced intestinal injury and (rat), 106:346
mast cell regulation of esophageal blood flow and (opossum), 110:121
Sandhoff disease and, 106:775–cr
Hypothalamic osmoreceptors, in liver cirrhosis, 106:678
Hypothalamic-pituitary-adrenal (HPA) axis
arthritis in cholestasis and (rat), 107:1469
corticotropin-releasing hormone and, 106:859
Hypothalamus, ventromedial lesions of (rat), 110:885
Hypothyroidism
and expression of electrogenic amiloride-sensitive sodium transport in colon (rat), 111:1551
transaminase values in subclinical Addison's disease and, 109:1324–cr
Hypotonicity, L-xylose absorption and, 107:389
Hypovolemia
ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
orthotopic liver transplantation and, 109:1631
Hypoxemia
arterial, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
hepatopulmonary syndrome and, 109:978, 109:1283
methotrexate pneumonitis and, 107:266–cr
Hypoxia
intestinal injury and (rat), 106:346
liver
cell necrosis and, 108:261–srr
induction of hydrogen peroxide production in hepatocytes and apoptosis (rat), 114:153
injury by alcohol blocked by antibiotics (rat), 108:218
ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
regulation of epithelial permeability, 114:657

regulation of methionine adenosyltransferase in hepatocytes (rat), 114:364

Hypoxia/reoxygenation-induced damage, hepatocyte, atrial natriuretic peptide and, 106:143

^{125}I, efflux, ATP-activated conductances in biliary cells and, 107:236

***IBD1*, on chromosome 16,** in Americans with Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e

***IBD2*, on chromosome 12,** in Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e

IB4 monoclonal antibody, free radicals and (cat), 106:629

IBS. *See* Irritable bowel syndrome

ICAM-1 antisense oligonucleotide, treatment trial, Crohn's disease, 114:1133–rc

ICAM-1 gene, inflammatory bowel disease and, 109:440

ICC. *See* Interstitial cells of Cajal

Ice immersion, acute stress reactions and, 106:1403–tmig, 106:1477

Icterus, severity of and abnormal lipoprotein patterns in Alagille syndrome patients, 111:1023

Idiopathic genetic hemochromatosis, 112:326–im

Idiopathic hemochromatosis, HLA antigens and, 106:1683–srr

Idiopathic intestinal motility disorder, cisapride and, 106:916

IEC-6 cells
recombinant growth factors and, 106:1254
Saccharomyces boulardii and, 106:65

IEC-18 intestinal epithelial cells, effects of mesalamine on hsp72 stress response in (rat), 113:1474

IFA, arthritis in cholestasis and (rat), 107:1469

IFN. *See* Interferon

IGF-1 binding sites, up-regulation in colitis (rat), 108:644

Igmesine, effects in PGE_2-induced diarrhea, 115:520–tmig, 115:591

IHPC. *See* Infantile hypertrophic pyloric stenosis

Ileal brake, fat-induced, depends on peptide YY, 110:1491

Ileal-centered process, intestinal transplant pathology and, 110:1820

Ileal conduits, B-cell isotype response to bacterial load and, 109:819

Ileal crypts, calcium dynamics in (mouse), 108:1345

Ileal fluid, and recurrence of Crohn's disease, 114:233–tmig

Ileal loop model, cholera toxin and (rat), 108:2–tmig, 108:34

Ileal microadenomas, in adenomatosis coli, 109:374

Ileal pouch-anal anastomosis
pouchitis after, 107:1856–vidd
ulcerative colitis and, 109:1188, 109:1388

Ileal resection, enterohepatic cycling of bilirubin after rat (rat), 110:1945

Ileitis, severe recurrent, treatment with azathioprine in patients with Crohn's disease, 112:1475

Ileoanal anastomosis, osteopenia and, 108:417

Ileoanal pouch, mucosa of, 108:953–c

Ileoanal pull-through, health-related quality of life after, 113:7

Ileocolonic anastomosis, short-chain fatty acids and (rat), 106:375

Ileocolonic brakes, fast transit and, 110:405

Ileocolonoscopy, gut inflammation in spondyloarthropathy and, 110:1696

Ileorectal anastomosis, familial adenomatous polypsosis and, 106:285–tmig, 106:362

Ileum
adaption after proximal resection, epidermal growth factor and (rabbit), 107:87
AIDS-related cryptosporidiosis and, 108:957–tmig
alanyl-glutamine dipeptide and, 107:429
amylase inhibition and (dog), 108:1221
bacterial modulation of endocrine cells and (rat), 107:1259
bicarbonate transport and (rabbit), 106:1562
bile acid transport in (rabbit), 110:459
bladder mucosa, B-cell isotype response to bacterial load and, 109:819
bromelain prevents secretion of enterotoxins in (rabbit), 113:175
budesonide for Crohn's disease and, 110:45, 110:299–e
carbohydrate, upper gut function and (dog), 109:1977
carcinoid diarrhea and, 110:405
circular muscle cells, inflammatory modulation of muscarinic receptor activation in (dog), 112:864
c-*kit* receptor and (rat), 109:456
Clostridium difficile toxin A causes release of substance P from primary afferent neurons (rat), 111:1272
Crohn's disease and, 108:310–tmig, 108:345
distention, in colonic relaxation (dog), 106:606
electrolyte transport, GABA and (guinea pig), 110:498
enterotoxin and (rat), 107:657
galanin receptors and (dog, guinea pig), 108:3
glutamine and, 107:429
Gräsbeck-Imerslund disease and, 108:1622
histamine vasodilatory mechanisms and (guinea pig), 108:712
Hsp60 expression and, 108:75
induction of apical sodium-dependent bile acid transporter mRNA by cholic acid (rat), 113:1599
intestinal contents trigger postoperative occurrence of Crohn's disease, 114:262
mesalamine microgranule delivery in, 108:1427
motor patterns of in vitro (rat), 106:649
mucosa, adherent *Escherichia coli* strains in, and Crohn's disease, 115:1405
neuronal coding and, 107:680
NHE3 regulation of basal Na^+ absorption (dog), 112:174
nitric oxide/selectin interaction and, 107:1050
radiation-induced ion transport dysfunction and (rat), 106:286–tmig, 106:324
resection, extent of, and post-procedure bile acid transport (rat), 115:1040–tmig, 115:1172, 115:1291–e
smooth muscle, platelet-activating factor receptors and (guinea pig), 108:1666
terminal, nerve damage in colitis and (rat), 109:718

Ileus, postoperative, cisapride and, 106:827–tmig, 106:924

IL-1ra gene, in ulcerative colitis, 106:557–tmig, 106:637

Image analysis
leukocyte adhesion and (rat), 109:1225
vesicle targeting to apical domain and (rat), 109:1600

Image of the Month, 112:683, 112:1786, 113:6, 113:376, 113:739, 113:1061, 113:1432, 113:1822, 114:1124
Behçet's syndrome, 115:1316
carcinoma of the pancreas with umbilical metastasis, 114:632
cholecystoduodenal fistula, 112:682
choledochal cyst, 114:238
CREST syndrome, 112:1786
esophageal intramural pseudodiverticulosis, 115:6
fascioliasis in liver and mesentery, 114:872
gastrointestinal stromal tumor of stomach, 115:812

giant diverticulum of sigmoid colon, 112: 1436
idiopathic genetic hemochromatosis, 112: 326
intestinal infection with *Strongyloides stercoralis,* 114:6
Peutz-Jeghers syndrome, 112:1068
polyarteritis nodosa, 115:1044
recurrent lymphoma, 115:258
solitary rectal ulcer syndrome, 114:432
Streptococcus milleri liver abscess, 115:524
sunflower cataract and Wilson's disease, 112:6

Imaging
brain, study of brain-gut pathways, 114: 559–srr
magnetic resonance endoscope, histological correlates of gastrointestinal wall layers to, 112:1568

Imerslund-Gräsbeck syndrome, intrinsic factor-cobalamin receptor overexpression in, 115:17367–cr

Imipenem
for acute necrotizing pancreatitis (rat), 110:232
in severe acute pancreatitis, 115:1513

Immune adhesion molecules, hepatitis C virus and, 107:1457

Immune cell filtration, correlation with pain in chronic pancreatitis, 112:1648

Immune cholangiopathies, carbonic anhydrase antibodies and, 108:1615–tmig, 108:1802

Immune colitis, CGP 47969A and (rabbit), 109:669–tmig, 109:812

Immune complex/formalin colitis, experimental, 109:1347–srr

Immune mechanisms, prednisone in chronic hepatitis C and, 107:2–tmig, 107:196

Immune-mediated arthritis, in cholestasis (rat), 107:1469

Immune-mediated injury, liver cell necrosis and, 108:266–srr

Immune memory, long-term, vaccination by modified tumor cells and (rat), 109:1555

Immune regulation, of cystic fibrosis transmembrane regulator, 109:630–ss

Immune response
anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
chronic viral hepatitis and, 108:157
cytokines and, 106:533–vidd
to enteric bacterial antigens, and inflammatory bowel disease, 115:1595–ss
esophageal infections and, 106:509–srr
fibrosing cholestatic hepatitis and, 106: 822–c
to gliadin challenge in small intestine in celiac disease, 110:1368
to hepatitis B virus structural proteins after DNA-based immunization (mouse), 112:1307
hepatitis C virus and, 108:1957–c
to hepatitis C virus structural proteins after plasmid DNA-based immunization (mouse), 112:1321
homeostasis and, 109:1397–ss
insulin autoimmune syndrome and, 109: 1673–cr
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
SF-25 monoclonal antibody and (nude mice), 108:172

Immune system, response to feeding patterns, 114:1103–ss

Immunity
gut mucosal, and bacterial, 114:2–tmig
innate, in crypt microenvironment and Paneth cells, 113:1779–v
mucosal, and appendectomy and colitis, 112:1766–ss

Immunization
DNA, cellular and humoral immune response to hepatitis B virus structural proteins following (mouse), 112: 1307
against *Helicobacter felis* infection (mouse), 107:906–tmig, 107:1002
as *Helicobacter pylori* therapy, 109:2–tmig, 109:115
plasmid DNA-based, immune response to hepatitis C virus structural proteins (mouse), 112:1321

Immunoaffinity chromatography, α_1-acid glycoprotein and, 106:231

Immunoassay
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Helicobacter pylori in gastric cancer subtypes and, 109:885
stool decay-accelerating factor in colorectal cancer and, 109:826

Immunoblot
C3 in exocrine pancreas and, 110:1919
hepatitis C virus and, 107:1443
IL-2 effects on cytochrome P450 and (rats), 109:1589
kinesin inhibition and (rat), 108:824
PDGF in liver fat-storing cells and, 107: 1110
raw kidney beans in small intestine and (rat), 106:73
transin secretion and (rat), 109:889

Immunocytes, B-cell isotype response to bacterial load and, 109:819

Immunocytochemistry
altered cell ions in cystic fibrosis jejunum and, 110:411
congenital esophageal stenosis and, 109: 275–cr
of GABA and gastrin in antrum (rat), 107:137
GI tract endocrine cells and (db/db mice), 108:967
islet amyloid polypeptide and (mouse, rat), 107:712
MnSOD induction in acute colitis and (rat), 109:801
mucin and apomucin localization and, 107:28
neuronal coding in humal ileum and, 107: 680
raw kidney beans in small intestine and (rat), 106:73
self-superantigens in autoimmune gastritis and (mouse), 107:924
spasmolytic peptide and (rat), 106:336
transin secretion and (rat), 109:889
villin in M cells and (mouse), 110:515

Immunodeficiency
intestinal permeability and, 108:1575–srr
liver transplantation and, 108:879–cr

Immunoelectron microscopy
aminopeptidase N in small intestine and (fetal pig), 109:1039
cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
diarrhea after marrow transplantation and, 107:1398

Immunofluorescence. *See also* Indirect immunofluorescence
CD1 molecule and (rat), 106:1143
cell kinetic analysis of colonic crypts with (rat), 111:1493
cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
epidermal growth factor receptor kinase and (rat), 107:1278
islet amyloid polypeptide and (mouse, rat), 107:712
microsomal autoantibodies in viral hepatitis and, 108:455
MUC6 and Lewis antigen expression and, 109:723
nitric oxide synthase in esophageal peristalsis and (rat), 108:367
nuclear, in autoimmune hepatitis, 107: 200
perinuclear antineutrophil cytoplasmic antibodies and, 107:532, 108:423
retinoids in pancreatic cancer and, 109: 1646

Immunogenetics, of chronic liver diseases, 106:1676–srr

Immunogenicity, vaccination assay of colon cancer cells and (rat), 109:1414–tmig, 109:1555
Immunoglobulin
intravenous, hepatitis G virus in, 111:1399–c
primary sclerosing cholangitis and, 106:1–tmig, 108:1199
serum levels, methotrexate pneumonitis and, 107:266–cr
therapy with, hepatitis C after, 110:1120, 110:1307–e
Immunoglobulin A
anti-hydroxyethyl free radicals in alcoholic cirrhosis and, 108:1–tmig, 108:201
cryptosporidiosis with AIDS and, 108:624–tmig, 108:627
dexamethasone and (rat), 106:35
Helicobacter pylori diagnostic tests and, 109:1–tmig, 109:136
protects MDCK cells against *Salmonella typhimurium*, 107:906–tmig, 107:915
secretory, biliary, as cholesterol crystal-binding protein, 115:129
subclass adaptation and, 109:819
vasoactive intestinal polypeptide and, 106:576
Immunoglobulin A2, B-cell isotype response to bacterial load and, 109:819
Immunoglobulin E, *Ancylostoma caninum* and, 106:3
Immunoglobulin G
antigalactose antibody and (rat), 110:1704
anti-hydroxyethyl free radicals in alcoholic cirrhosis and, 108:1–tmig, 108:201
B-cell isotype response to bacterial load and, 109:819
cholesterol gallstones and, 106:749
colchicine and, 108:1470
cryptosporidiosis with AIDS and, 108:627
gastrin and, 106:1263
Helicobacter pylori and, 106:1405
Helicobacter pylori diagnostic tests and, 109:1–tmig, 109:136
Helicobacter pylori in gastric cancer subtypes and, 109:885
and immunity against *Helicobacter felis* infection in stomach (mouse), 113:185
primary sclerosing cholangitis and, 106:185
ulcerative colitis and, 109:3, 109:307–e
ursodeoxycholic acid and, 108:1470
Immunoglobulin G1
antineutrophil cytoplasmic antibodies and, 108:1159
ulcerative colitis and, 109:3, 109:307–e
Immunoglobulin M
antibody, hepatitis C in fulminant viral hepatitis and, 107:189
B-cell isotype response to bacterial load and, 109:819
colchicine and, 108:1470
and cross-reactive peptide in colon and ocular and joint tissue, 107:103
cryptosporidiosis with AIDS and, 108:624–tmig, 108:627
hepatitis B virus and, 106:828–tmig, 106:1006
hepatitis E virus and, 108:1–tmig, 108:225
ursodeoxycholic acid and, 108:1470
viremia in hepatitis E infection and, 108:225
Immunoglobulin superfamily, role in leukocyte-endothelial cell adhesion, 114:1066–srr
Immunogold staining, eosinophilic gastroenteritis and, 110:768
Immunohistochemistry
aflatoxin B1-adducts and (rat, human), 106:433
apomucins in human gastrointestinal tissues and, 107:160
bone marrow micrometastases in colorectal cancer and, 109:1535
colorectal aberrant crypt foci and, 108:434
Crohn's disease and, 109:1029
endothelin 1 in liver and, 110:534
eosinophilic gastroenteritis and, 110:768
familial adenomatous polyposis and, 109:994–rc
fetal colonic integrin expression and, 110:58
gap junctions in gastric mucosa and, 109:1492
gastric carcinoids and, 108:296–ss
genetic hemochromatosis and, 108:2–tmig
HB-EGF in gastric mucosa and, 109:1051
hypolactasia and, 107:54
inflammatory bowel disease and, 106:596
α_6-integrin in pancreatic cancer and, 108:523
of intestinofugal neurons (guinea pig), 115:909
intrahepatic cholangiocarcinomas and, 109:1612
lactase gene and (rat), 106:1223
latent TGF-β1-binding protein and, 108:1873
lipid islands in gastric mucosa and, 110:369
monocyte-chemoattractant protein 1 in IBD and, 108:40
MUC6 and Lewis antigen expression and, 109:723
MUC gene pancreatic expression and, 109:953
MUC1 mucin expression and, 106:353
nitric oxide/selectin interaction and, 107:1050
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
p53 protein in hepatocellular carcinoma and, 108:1176
protein kinase C during colon tumor development and, 110:1753
TGF-β1 in colon cancer and, 110:375
TGF-β regulation of fetal collagen and, 110:92
TNF-α in hepatitis B and, 108:1337–tmig, 108:1453
UGT and, 108:1464
VCAM-1 in chronic viral hepatitis and, 108:231
Immunohistology, fibrinogen/fibrin deposition and (rat), 108:1124
Immunolabeling, Crohn's disease and, 108:1396
Immunolocalization
of duodenal proteins (rat), 110:478
fetal colonic integrin expression and, 110:58
Immunologic diseases, concurrent, chronic viral hepatitis and, 108:157
Immunologic knockouts, gene-targeted (mouse), 107:312–ss
Immunology
gastrointestinal tract inflammation and, 108:1327–br
of liver transplantation, 107:1211–br
mucosal, 107:901–br
Immunomodulation
B-cell isotype response to bacterial load and, 109:819
by cholera toxin, and staphylococcal enterotoxin B-induced anergy in mucosal T cells (mouse), 115:1197
enteric neuromuscular function, 111:1683–srr
interleukin 2 in acute pancreatitis and (mouse), 110:583
Immunonutrition
impact of, 109:1713–ss
we are what we eat, 110:1676–c
Immunoperoxidase staining
CD1 molecule and (rat), 106:1143
gap junctions in gastric mucosa and, 109:1492
Immunophenotype, lipid islands in gastric mucosa and, 110:369
Immunoprecipitation
C3 in exocrine pancreas and, 110:1919
α_6-integrin in pancreatic cancer and, 108:523
monocyte-chemoattractant protein 1 in IBD and, 108:40

mucin biosynthesis and, 107:1352
PDGF in liver fat-storing cells and, 107:1110
Immunoreactivity, abnormal for E cadherin-catenin complex in gastric carcinoma, and patient survival, 112:46
Immunostaining
calcium signals in gastric endocrine cells and, 110:1835
colorectal aberrant crypt foci and, 108:434
Crohn's disease and, 108:911–srr
genetic hemochromatosis and, 108:208
membrane attack complex of complement and, 108:309–tmig, 108:495
p53 protein in hepatocellular carcinoma and, 108:1176
toxic megacolon and, 109:1497
Immunosuppression
arthritis in cholestasis and (rat), 107:1469
esophagus and, 106:1717–ss
fibrosing cholestatic hepatitis after renal transplantation and, 107:1514–cr
hepatitis C virus RNA and, 106:994
oral hairy leukoplakia and, 106:506–cr
Immunosuppressive drugs, smoking in Crohn's disease and, 110:424
Immunotherapy
for colon cancer, 107:1697, 107:1890–e
for Crohn's disease, 113:1819–gn
for *Helicobacter mustelae* (ferret), 110:1681–tmig, 110:1770, 110:2003–e
MAGE genes in gastric carcinoma and, 109:1522
vaccination by modified tumor cells and (rat), 109:1555
Impalement, HCl in esophageal cells and (rabbit), 108:662
Incontinence, fecal, scintigraphic colonic, transit studies and, 107:1271
Index colonoscopy, colorectal adenoma and, 108:402
India, viremia in hepatitis E infection and, 108:1–tmig, 108:225
Indirect immunofluorescence
of antineutrophil antibodies in familial IBD, 108:428
α-5(IV) collagen chain in fetal small intestine and, 107:957
laminin A-chain isoforms and, 106:829
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
myenteric neuronal intermediate filament proteins and (rat), 107:666
nuclear antigen reactivity in autoimmune hepatitis and, 107:200
Indocyanine green, prazosin and, 109:1257
Indomethacin
apolipoprotein A-IV and (rat), 109:1583
cryptosporidiosis and (piglet), 106:1418
in duodenal mucus and alkali secretion (rat), 109:1526
enterocolitis and, 109:1349–srr
gastric emptying and (rat), 106:1568
gastric injury induced by (rat), 108:393
trefoil peptides and, 110:489
growth factors in ulcer healing and, 109:1068
human spasmolytic polypeptide and, 108:108
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:623–tmig, 108:727
interleukin 1 and (rat), 106:1493
intestinal permeability and, 108:1573–srr
leukocyte adhesion and (rat), 109:1027–tmig, 109:1225
metronidazole and, 106:1271
and nicotine effects on EGG and antral motility, 110:3
NSAID gastropathy in arthritis and (rat), 109:1173
phospholipids in adaptive cytoprotection and (rat), 107:720
platelet-activating factor receptors and (guinea pig), 108:1666
P_2 purinergic receptors and (rabbit), 106:1485
Industrial solvents, alcoholic liver disease and, 106:1085–srr
Infant(s)
cell adhesion molecule distribution in those with intestinal epithelial dysplasia, 113:833
cow's milk allergy in, 106:1514
digestive disorders in, 106:1126–br
Infant formula
eosinophilic esophagitis and, 109:1503
necrotizing enterocolitis and (piglet), 106:1215
Infantile hypertrophic pyloric stenosis, interstitial cells of Cajal in, 111:279
Infarction, mesenteric, 110:339
Infection
bacterial, nitric oxide-derived nitrate excretion and (rat), 107:47
bleeding cirrhotic patients and, 108:1616–tmig, 108:1828
GI tract, 110:318–br
intestinal permeability and, 108:1574–srr
of transjugular intrahepatic portosystemic shunt (TIPS), 115:110
Infiltration
colorectal hyperplastic polyps and, 109:1468
Crohn's disease and, 109:1029
mast cell cholangiopathy and, 109:1677–cr
Inflammation
acute self-limited colitis and, 107:755
and bone loss associated with IBD, 112:2161–c
chronic, prevention, by combined corticosteroid and IL-10 activity (rat), 115:807–tmig, 115:856
colorectal hyperplastic polyps and, 109:1468
cyclooxygenase 1 and (mouse, rat), 115:101, 115:227–e
cytokines and, 106:533–vidd
eicosanoid production and (dog), 106:297
epidermal growth factor in experimental colitis and (rat), 107:12
epithelial cell-initiated, in intestinal amebiasis, 115:1446
Escherichia coli enteritis and (rabbit), 106:306
gastric epithelium and, 108:65
Gi-safe derivatives of NSAIDs and (rat), 107:173
HIV-associated necrotizing cholangitis caused by *Septata intestinalis* and, 108:247–cr
IGF-1 binding sites in colitis and (rat), 108:644
inflammatory bowel disease and, 107:755
and intestinal metaplasia of gastric cardia, 115:1306–c
intestine, role of nitric oxide synthase in resolving, 112:1022–rc
liver cell necrosis and, 108:266–srr
liver disease and, 108:145
monocyte-chemoattractant protein 1 in IBD and, 108:40
neurogenic (rat), 108:295–ss
neuronal involvment in toxin effects on ileum and (rat), 107:657
nonalcoholic steatohepatitis and, 107:905–tmig
parasitic, mast cells in, 106:286–tmig
pelvic ileal pouch and, 109:1090
platelet-activating factor receptors and (guinea pig), 108:1666
previous, alters responses of colon to stress (rat), 111:1509
primary sclerosing cholangitis and, 106:160, 106:185
recruitment and activation of leukocytes by bacterial products during, 114:1066–srr
role of human intestinal mucosal microvascular endothelial cells, 112:1895
Schistosoma mansoni fibrosis and, 107:773
toxic megacolon and, 109:1497
toxin A and (rabbit), 109:348
ulcerative colitis and, 109:1388–e
VCAM-1 in chronic viral hepatitis and, 108:231
visceral hyperalgesia and, 107:271–srr

Inflammatory bowel disease (IBD). *See also* Crohn's disease; Ulcerative colitis
active, differential lamina propria cell migration via basement membrane pores in, 115:807–tmig, 115:841
anemia, erythropoietin for, 112:660–ss
antineutrophil cytoplasmic antibodies and, 108:428
autonomic functioning in, 106:828–tmig, 106:945
from bench to bedside, 107:598–br
bone density and, 107:905–tmig, 107:1031, 108:1607–c
bone loss associated with and inflammation, 112:2161–c
bone mineral density in
assessment in children with, 114:902
mechanisms of, 112:1428–c
candidate susceptibility loci, analysis of, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
colonic proliferation in, 106:117
complicated by systemic amyloidosis, 113:731–c
and cross-reactive peptide in colon and ocular and joint tissue, 107:103
cyclooxygenase 2 in, 115:297
cyclosporine and, 108:943–ss, 109:1001–e
cytokine profiles in mucosal macrophages, 112:1493
designer drugs for, 112:2153–ss
development mediated by $CD4^+$ T-cell receptor $\alpha^-\beta^+$ cells (mouse), 112:1876
endopeptidase control, 113:737–gn
enhanced leukocyte binding by intestinal microvascular endothelial cells, 112:1895
environmental factors in, 111:587
etiology and pathogenesis of, 115:182–srr
experimental models of, 109:1344–srr
expression of inducible nitric oxide synthase and nitrotyrosine in colonic epithelium in, 111:871
familial nature, 111:587
family history, 111:572–tmig
Fas ligand and perforin expression by colon T cells in (mouse), 115:849
fungal infection mimicking, 112:250–cr
gene-targeted immunologic knockouts and (mouse), 107:312–ss
genetic analysis of patients with, 115:1039–tmig, 115:1056, 115:1062, 115:1066
genetic link with hereditary nonpolyposis colorectal cancer, 114:608–ss
genetics of, 106:557–tmig, 106:637, 115:1045–rc, 115:1056, 115:1062, 115:1286–e, 115:1595–ss
goblet cell autoantibodies in, 113:101
gut homing integrin as potential organ-specific therapeutic agent for treatment of, 111:1373–rc
gut inflammation in spondyloarthropathy and, 110:1696
gut translocation and, 107:643
Hsp60 and, 108:75
hypercoagulability in, 106:281–c
ICAM-1 gene and, 109:440
IL-15 activity in rectal mucosa, 114:1237
inherited coagulation disorders and, 108:1011, 108:1305–e
integrins and, 107:1364
interleukin 4 and, 110:1683
interleukin 10 and, 108:1338–tmig, 108:1434
interpretation of randomized trials and, 110:275–vidd
intestinal permeability and, 108:1574–srr
issues related to, 113:1–tmig
keratinocyte growth factor and, 110:441
kinin B_1 receptor gene in, as nonetiologic marker for symptomatic disease, 115:1045–rc, 115:1286–e
linkage analysis of, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
low-dose purine analogues in, 107:1905–ss
lymphocyte adhesion in, 106:596
mesalamine treatment, 113:1427–tmig
monocyte-chemoattractant protein 1 and, 108:40
mononuclear phagocyte response to IL-4 in, 108:21, 108:284–e
mucosal bactericidal/permeability-increasing protein in, 110:733
mucosal biopsy diagnosis of, 107:635–tmig, 107:755
mutant mice and, 109:1359–srr
myenteric nerve function and (rat), 109:669–tmig, 109:718
neutrophil antibodies in, 107:586–e
nitric oxide and (rhesus macaque), 108:705
nitric oxide synthase and (guinea pig), 109:1475
osteopenia and, 107:905–tmig, 107:1031, 108:417
overview, 109:1717–br
pathogenesis of, and immune reactivity to enteric bacterial antigens, 115:1595–ss
peanut lectin in, 106:117
pediatric
safety of azathioprine and 6-mercaptopurine in, 115:807–tmig, 115:813
serological assays in, diagnostic accuracy of, 115:822
peroxynitrite and (guinea pig), 109:1475
preferential expression of C-X-C chemokine ENA-78 in intestinal epithelium, 113:808
role of cadherins, 111:261–ss
role of leukocyte-endothelial cell adhesion in, 114:1066–srr
role of nitric oxide, 114:601–e
safety of mesalamine for treatment of during pregnancy, 114:23
smoking and, 108:1616–tmig, 108:1683
somatostatin receptors and, 106:828–tmig, 106:951
sticky platelets in, 106:827–tmig, 106:840
substance P and, 106:828, 106:951, 109:669, 109:850
survival and cause-specific mortality in, 110:1339
task force on training in, 110:1281–aga
TGF-α and TGF-β in, 110:975
thrombomodulin expression in, 113:107
thrombosis in, factor V Leiden mutation and, 115:807–tmig, 115:830
treatment
advances in, 115:1295–ss
lymphotoxin and TNF axes in, 115:1312–tmig, 115:1464
with mesalamine during pregnancy, 114:1–tmig
tumor necrosis factor α and, 106:1404–tmig, 106:1455
Inflammatory bowel disease questionnaire (IBDQ), quality of life and, 106:286–tmig, 106:287
Inflammatory cells, fibrinogen/fibrin deposition and (rat), 108:1124
Inflammatory lesions, membrane attack complex of complement in hepatitis and, 108:495
Inflammatory response
and *cagA* gene and cytokine mRNA, 110:1744
Crohn's disease positive for pANCA and, 110:1810
cytokines in G-cell function and (rabbit), 110:147
gastric metaplasia of duodenum and, 110:452
gastrin release and (rat), 110:801
monocyte chemoattractant protein 1 and (rat), 110:1870
neuropeptide receptors in peritumoral vessels and, 110:1719
nitric oxide in gallbladder mucosal secretion and (cat), 110:329–tmig, 110:598
pancreatic duct obstruction and (opossum, rat), 110:875
spondyloarthropathy and, 110:1696
task force on training in, 110:1280–aga

therapeutic immunization against *Helicobacter mustelae* and, 110:1770
Infliximab, as first Crohn's disease drug on approval track, 115:256–gn
Influenza A virus, Crohn's disease and, 108:1396
In-frame deletion, DNA mismatch repair and, 109:1691–srr
Infusates, lysosomal enzymes in pancreatitis and (rat), 109:573
Ingested agents, human spasmolytic polypeptide and, 108:108
Inhibition immunoperoxidase assay, primary sclerosing cholangitis and, 106:185
Inhibitory control, impaired, *Helicobacter pylori* in acid secretion and, 109:681
Inhibitory motor neurons, transmitters of, 108:556–srr
Injury, gastrointestinal, GI-safe derivatives of NSAIDs and (rat), 107:173
^{111}In-labeled resin, scintigraphic colonic transit studies and, 107:1271
Innervation, congenital esophageal stenosis and, 109:275–cr
iNOS gene, peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
Inositol, hepatic encephalopathy and, 107:1475
Inositol-1,4,5-triphosphate ($InsP_3$)
bile canalicular contraction and, 108:841
CCK-coupled intracellular signaling and, 106:763
EGF inhibits parietal cell function via PKC and, 110:469
Escherichia coli and, 106:1150
Inositol triphosphate (ITP), nitric oxide in gastric chief cells and (guinea pig), 109:1214
INR cells, GABA secretion from, 110:1595
In situ hybridization
corticotropin-releasing hormone and, 106:859
endothelin 1 in liver and, 110:534
fibrinogen/fibrin deposition and (rat), 108:1124
of GABA and gastrn in antrum (rat), 107:137
genetic hemochromatosis and, 108:2–tmig, 108:208
hypolactasia and, 107:54
IL-8 in HT-29 cells and, 108:653
iron overload effect on collagen expression and (rat), 107:1118
islet amyloid polypeptide and (mouse, rat), 107:712
keratinocyte growth factor in IBD and, 110:441
lactase gene and (rat), 106:1223
laminin receptor expression and (rat), 107:764
liver disease and, 108:145
MUC6 and Lewis antigen expression and, 109:723
MUC gene pancreatic expression and, 109:953
mucin and apomucin localization and, 107:28
mucin expression in villous adenoma and, 110:84
spasmolytic peptide and (rat), 106:336
In situ localization, of hepatocytic Na^+/taurocholate contransporting peptide (rat), 107:1781
Insulin
amylase inhibition and (dog), 108:1221
EM523 and (dog), 110:241
enterocyte response to (rat), 106:49
exocrine pancreatic secretion and (rat), 106:200
gastric emptying in diabetes and, 109:755
glucose effects on colon motility and, 108:310–tmig, 108:350
growth regulation of pancreatic duct cells and (guinea pig), 109:944–109:945, 1005–e
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
IGF-1 and (rat), 108:644
improves liver graft function (rat), 111:1071
intestinal glucose absorption and (rat), 110:1863
octreotide therapy and, 107:328–tmig, 107:379
pancreatic ischemia-reperfusion injury and (dog), 107:1125
rectoanal inhibitory reflex and, 108:1700
response of phenylalanine and leucine kinetics to in cirrhosis, 111:127
Insulin autoimmune syndrome, spontaneous hypoglycemia in alcoholic cirrhosis and, 109:1673–cr
Insulin growth factor II promoters (IGF-II), differential activation in Caco-2 cells during growth and differentiation, 114:1221
Insulin-like growth factor 1 (IGF-1)
binding sites, in colitis (rat), 108:644
correction of impaired intestinal sugar transport in cirrhosis (rat), 113:1180
effects on epithelial structure and function in parenterally fed jejunum (rat), 111:1493
hepatoprotective effects for carbon tetrachloride-induced cirrhosis (rat), 113:1682
human, enhanced small bowel growth in transgenic mice expressing (mouse), 112:444
Insulinoma, insulin autoimmune syndrome and, 109:1673–cr
Insulin receptor substrate 1, signal transduction, and ethanol-inhibited hepatocyte proliferation, 115:1558
Insurance carriers, use of medical practice guidelines, 108:925–paps
Integrin(s)
α, fetal colonic expression of, 110:58
α_6, in pancreatic cancer, 108:523
α6β1, in hepatocarcinoma, 115:433
α7β1, expression in intestinal cells and enterocytic differentiation, 113:1510
β_1, anoikosis and, 110:1681–tmig, 110:1776
eosinophil migration and, 108:409
gut homing, rapid resolution of chronic colitis with antibody to (cotton-top tamarin), 111:1373–rc
α4β7 in malignant lymphomatous polyposis and, 107:1519–cr
lamina propria mononuclear cell, 107:1364
laminin receptor expression and (rat), 107:764
receptors, in hepatic stellate cells, 110:1127
role in leukocyte-endothelial cell adhesion, 114:1066–srr
α6β1-Integrin receptor, in retinoid inhibition of adhesion to laminin in pancreatic carcinoma cells, 112:532
Intention-to-treat principle, Crohn's disease and, 108:1056
Intercellular adhesion molecule-1 (ICAM-1)
Crohn's disease and, 109:1029
eosinophil migration and, 108:409
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
Helicobacter pylori infection and, 108:65
hepatitis C virus and, 107:1457
neutrophil-mediated endothelial cell injury and, 110:21
NSAID gastropathy in arthritis and (rat), 109:1173
portal hypertension and (rat), 110:866
radiation-induced microvascular dysfunction and (rat), 108:1761
up-regulation, portal hypertension and (rat), 110:866
vascular adhesion protein 1 and, 110:522
Intercellular communication, gap junctions in gastric mucosa and, 109:1492
Interdigestive cycling, chronic pancreatitis and, 109:224

Interferon
autoimmune hepatitis and, 108:1770, 108:1942–e
IFN-α
2′,5′-adenylate synthetase and (rat), 108:1192
bile acids and (rat), 108:1192
changing prevalence of hepatitis C genotypes and, 108:581–rc
cholestasis and (rat), 108:1192
genomic variations in precore/core gene of hepatitis B virus and, 108:310–tmig, 108:505
HBeAg-positive chronic hepatitis B and, 108: 1–tmig, 108:165
Helicobacter pylori infection and, 108:65
hepatic iron concentration and, 108: 1104
for hepatitis B, chronic, long-term follow-up, 113:1660
hepatitis B-related glomerulonephritis and, 109:540
for hepatitis C, 106:248–cr, 106:558–tmig, 106:686, 107:635–tmig, 107: 805, 108:623–tmig, 108:789, 108: 945–ss
chronic, 113:372–tmig
efficacy, prediction of, 113:558
with normal ALT, 110:291–rc
NS5A sequences and, 111:1152–ss, 113:567, 115:796–c
outcomes, 115:501–ss, 115:1027–ss
and ribavirin, combined therapy, efficacy of, 111:1300
second cycle in, efficacy of, 113: 1654
viremia after therapy with, and prognosis for outcome in, 113: 1647
cost-effectiveness of single course of, 115:1027–ss
escalating dosage in, 109:156
mutations in NS5A region of hepatitis C and, 111:1152–ss, 113:567, 115:796–c
and ribavirin, combined therapy, 107:635–tmig, 107:812
hepatocellular carcinoma in hepatitis C-induced cirrhosis and, 110:2019–ss
immunoregulatory and anti-inflammatory effects, mechanisms of, 112: 1017–vidd
low-dose, decompensated liver disease and, 109:669–tmig, 109:908
natural killer cells and (rat), 108:1192
therapy for chronic hepatitis B in children, 114:988
TNF-α in hepatitis B and, 108:1337–tmig, 108:1453
IFN-β
Helicobacter pylori infection and, 108:65
for non-A, non B hepatitis, 107:805
IFN-α2a, for hepatitis C, pulse-treatment schedule, 107:328–tmig, 107:479
IFN-α2b, for hepatitis B, 110:313–ss
IFN-γ
autoimmune gastritis and (mouse), 107:1408, 110:1791
cystic fibrosis transmembrane regulator and, 109:630–ss
epithelial cell barrier integrity in presence of, IL-10 and, 113:151
Helicobacter pylori infection and, 108:65
inhibition of rotavirus entry into intestinal cells, 113:81
production
with gluten exposure in celiac disease, 115:519–tmig, 115:551
by intraepithelial lymphocytes, IL-15 and, 115:1439
staphylococcal enterotoxin B in (mouse), 106:450
in T cell-dependent liver injury initiated by con A (mice), 111:462
tumor necrosis factor α and, 106:1514
MHC class I and (rat), 107:781
Interfollicular area, lymphatic microvessels in (rat), 106:1548
Interleukin(s)
15, activity in rectal mucosa of IBD, 114: 1237
IL-1
antral G-cell function and (rabbit), 110:147
CGP 47969A and (rabbit), 109:812
colonic secretion and (rat), 106:1493
enterocolitis and (rat), 106:960
Escherichia coli enteritis and (rabbit), 106:306
nitric oxide inhibition of hepatocyte oxidative injury and (rat), 109:206
and rotavirus entry into intestinal cells, 113:81
and TNF, effects during acute pancreatitis (mouse), 113:1741
IL-1α
CGP 47969A and (rabbit), 109:812
immortalized murine biliary epithelial cells and (transgenic mice), 109: 1308
longitudinal muscle myenteric plexus and (rat), 107:691
monocyte chemoattractant protein 1 and (rat), 110:1870
mucosal proliferation in sepsis and (rat), 107:121
ulcerative colitis and, 106:557–tmig, 106:637
IL-1β
antral G-cell function and (rabbit), 110:147
and *cagA* gene and cytokine mRNA, 110:1744
C3 in exocrine pancreas and, 110:1919
collagenase secretion induced by, in intestinal smooth muscle cells, 113: 1924
colonic hypersecretion and (rat), 109: 483
functional impairment of enterochromaffin-like cells by (rat), 112:364
gastric emptying and (rat), 106:1568
HT-29 cells and, 108:653
in inflammatory bowel disease, 108:21, 108:284–e, 108:1338–tmig, 108: 1434, 110:1683
inhibition of collagen in intestinal smooth muscle cells, 110:344
interleukin 6 and (rat), 108:1720
longitudinal muscle myenteric plexus and (rat), 107:691
monocyte-chemoattractant protein 1 and, 108:40
myenteric plexus and (rat), 107:993
and neurotransmitter release from myenteric plexus (rat), 111:674
regulation of hepatocyte bile salt transporters (rodents), 111:193
and T-lymphocyte activation by intestinal smooth muscle cells, 112:1986
up-regulation of inducible nitric oxide synthase and superoxide dismutase in myenteric neurons (rat), 111:56
IL-2
acute pancreatitis and (mouse), 110:583
autoimmune gastritis and (mouse), 110:1791
chemotaxis of intraepithelial lymphocytes and, 109:1154
cirrhosis and, 107:789
for colon cancer, 107:1890–e
Crohn's disease and, 108:1338–tmig, 108:1396
cytochrome P450 and (rat), 109:1589
Helicobacter pylori infection and, 108:65
in inflammatory bowel disease, 106: 557–tmig, 106:637, 109:1359–srr, 110:1683
polymorphonuclear leukocyte margination and (rat), 108:393
sodium butyrate and (rat), 107:1697
ulcerative colitis-like disease and (mouse), 107:312–ss
vaccination with, in colon cancer (rat), 109:1414–tmig, 109:1555
IL-2β, ulcerative colitis and, 106:557–tmig, 106:637
IL-3
autoimmune gastritis and (mouse), 110:1791

eosinophilic gastroenteritis and, 110: 768, 110:952–e
IL-4
autoimmune gastritis and (mouse), 110:1791
and decay-accelerating factor gene expression in intestinal epithelial cells, 111:911
expression in Crohn's disease, 113:118
in inflammatory bowel disease, 108:21, 108:284–e, 110:1681–tmig, 110: 1683
IL-5
autoimmune gastritis and (mouse), 110:1791
eosinophilic gastroenteritis and, 110: 768, 110:952–e
IL-6
antral G-cell function and (rabbit), 110:147
APRF/Stat3 in liver regeneration and (rat), 110:1854
autoimmune gastritis and (mouse), 110:1791
and *cagA* gene and cytokine mRNA, 110:1744
cirrhosis and, 107:789
Helicobacter pylori infection and, 108:65
interleukin 1β and (rat), 108:1720
longitudinal muscle myenteric plexus and (rat), 107:691
mRNA, expression in small intestinal cell cultures, 111:8
myenteric plexus and, 107:993
production in gastric cancer, 107:543–cr
IL-7, and *cagA* gene and cytokine mRNA, 110:1744
IL-8
antral G-cell function and (rabbit), 110:147
and *cagA* gene and cytokine mRNA, 110:1744
CGP 47969A and (rabbit), 109:812
chemotaxis of intraepithelial lymphocytes and, 109:1154
cirrhosis and, 107:789
Helicobacter pylori infection and, 108:65
HT-29 cells and, 108:653
secretion, *C. difficile* toxin A and, 112: 1887
and somatostatin release from fundic D cells (dog), 112:136
stimulation from colonic epithelial cells by *Entamoeba histolytica* without parasite-enterocyte contact, 112:1536
IL-10
autoimmune gastritis and (mouse), 110:1791
and bicarbonate secetion in small intestine (rat), 111:936
and *cagA* gene and cytokine mRNA, 110:1744
chemotaxis of intraepithelial lymphocytes and, 109:1154
and chloride absorption and secretion in small intestine (rat), 111:936
and corticosteroids, in prevention of inflammation (rat), 115:807–tmig, 115:856
Crohn's disease and, 108:1338–tmig, 108:1396
effect on endotoxin-induced hepatic injury (mice), 111:736
and epithelial barrier integrity, 113: 151
hepatoprotective role in galactosamine/LPS liver injury (mouse), 112:935
inflammatory bowel disease and, 106: 557–tmig, 106:637, 108:1338–tmig, 108:1434, 109:1360–srr
and intestinal ion transport, 111:844–tmig
intravenous, in steroid-refractory Crohn's disease, 113:383
and ion transport in small intestine (rat), 111:936
and pancreatitis, 108:1917–rc
and pancreatitis (rat), 112:960
and T-cell activation, metalloproteinase production, and mucosal damage in intestinal inflammation, 115:573
IL-12, monocyte production and release in Crohn's disease intestinal lamina propria, 112:1169
in Whipple's disease, 113:442
IL-15
and intestinal epithelial cells, 111:1706–rc
and intraepithelial lymphocytes, 115: 1439
production, with gluten exposure in celiac disease, 115:519–tmig, 115:551
tumor necrosis factor α and, 106:1514
Interleukin receptors
IL-2R, blockade, and intestinal growth (rat), 111:37
IL-1R agonist, inflammatory bowel disease and, 108:21, 108:1434
IL-1R antagonist
in enterocolitis (rat), 106:960
gene, prediction of disease behavior in ulcerative colitis, 112:1845
isoforms, differential expression in intestinal epithelial cells, 115:1426
Intermediate filaments
in GI malignancies, 106:1326
myenteric neuronal (rat), 107:666
International challenges, American Gastroenterological Association, 111:1141–aga
International normalized ratio, orthotopic liver transplantation and, 109:1631
Internet, and gastroenterology, 114:5–ce
Interneurons
retrogradely labeled myenteric neurons and, 109:866
swallowing and, 109:1700–e
α-Internexin, myenteric neuronal (rat), 107:666
Intersititial matrix macromolecules, *Schistosoma mansoni* fibrosis and, 107:773
Intersititial pneumonitis, in primary biliary cirrhosis, 107:266–cr
Interstitial cell network, small intestine, heme oxygenase 2 in (mouse), 114:239–rc
Interstitial cells of Cajal
abnormality in infantile hypertrophic pyloric stenosis, 111:277–tmig
c-*kit* and, 111:492–srr
c-*kit* receptors and (rat), 109:456
development of, myenteric stem cell factor-expressing neurons and (mouse), 115:898
in Hirschsprung's disease, 111:901
in human colon, 111:901
in hypertrophic pyloric stenosis, 111:279
in infantile hypertrophic pyloric stenosis, 111:279
and inhibitory neurotransmission in lower esophageal and pyloric sphincters, 115:314
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
as pacemakers and mediators of neurotransmission in gastrointestinal tract, 111:492–srr
and peristalsis in small intestine (mouse), 114:724
ultrastructure at colonic submuscular border in patients with ulcerative colitis, 111:1447
Interstitial deletions, 5q–LOH in esophageal carcinoma and, 110:52
Interstitium, lymphocyte migration in Peyer's patches and (rat), 109:1113
Interventional gastroenterology, at crossroads, 107:294–vidd, 107: 306–e
Interventional radiology
at crossroads, 108:951–c
hepatopulmonary syndrome and, 109: 1010–e
Intervention therapy, interpretation of randomized trials and, 110:277–vidd
Intervillus space, jejunal, flow rate and, 108:983

Intestinal adaptation, molecular analysis in rat model, 115:1040–tmig, 115:1172, 115:1291–e
Intestinal adenomas, spontaneous, inhibition in Min mouse with aspirin (mouse), 114:873–rc
Intestinal brake, glucose as, 108:1616–tmig, 108:1700
Intestinal bypass, calcium supplementation and, 106:1162
Intestinal cell(s). *See also* Colonocytes; Epithelial cells, intestinal
colonic, interleukin 1 receptor antagonist isoforms in, 115:1426
integrin α7β1 expression, relation to enterocytic differentiation, 113:1510
mitochondrial respiration in, FK506 (tacrolimus) effects on, 115:67
phospholipase C activity required for EGFR-stimulated migration of, 114:493
role of Src tyrosine kinases in cell growth control, 114:1336–e
smooth muscle, 115:605
T-cell activation, cytokines and, 112:1986
Intestinal cell line
cytokine inhibition of rotavirus entry into, 113:81
HT-29, apical expression of asialoglycoprotein receptor in, 113:1501
TNF-α regulation of proliferation (mouse), 112:1231
Intestinal epithelial dysplasia, cell adhesion molecule distribution in infants with, 113:833
Intestinal epithelial tight junctions, physiological regulation of, 109:1391–e
Intestinal failure
clinical nutrition and, 106:1369–vidd
nonmalignant chronic, home parenteral nutrition and, 108:1005, 108:1302–e
Intestinal fatty acid-binding protein, as mesenteric infarction marker, 110:339
Intestinal fibrosis
bacterial stimulation of TGF-beta-1 in (rat), 114:519
TGF-beta-induced, 114:428–tmig
Intestinal fluid secretion, 112:1748–aga
Intestinal function
epidermal growth factor receptor kinase and (rat), 107:1278
glutamine dipeptide-supplemented parenteral nutrition and, 107:1595
Intestinal gas
abdominal symptoms due to, 115:519–tmig, 115:542
dynamics, and tolerance, 115:519–tmig, 115:542
Intestinal growth, epidermal growth factor and, 108:1330–c
Intestinal injury, AIDS-related cryptosporidiosis and, 108:957–tmig, 108:1075
Intestinal motility
abnormal in IBS, 111:1400–c
in childhood chronic intestinal pseudoobstruction, 108:1379
and fasting-related hyperbilirubinemia (rats), 111:217
Intestinal neoplasia, in vivo activation of mitogen-activated protein kinases (rat), 113:1589
Intestinal peristalsis, and cells of Cajal, 114:627–tmig
Intestinal permeability
Crohn's disease and, 108:2–tmig, 108:132
FK506 (tacrolimus) effects on, 115:67
overview of, 108:1566–srr
viewpoints, 112:669–c
Intestinal polyposis, aspirin and suppression of by targeted inhibition of cyclooxygenase 2, 113:1039–ss
Intestinal pseudo-obstruction, idiopathic, pathogenesis, DNA viruses in, 115:498–ss
Intestinal resection, total parenteral nutrition supplemented with short-chain fatty acid enhances functional adaptation, 112:792
Intestinal secretion
enterotoxin-induced, role of 5-hydroxytryptamine in (rat), 115:808–tmig, 115:883, 115:1009–e
and γ-aminobutyric acid, 111:1163–c
prostaglandin-induced, igmesine and (mouse), 115:520–tmig, 115:591
Intestinal sterilization, endotoxin production in alcohol-induced liver injury and (rat), 108:218
Intestinal transplantation
diagnosis of cytomegalovirus enteritis occurring after with DNA amplification, 112:1121
pathology of, 110:1820, 110:2009–e
Intestinal transport, fructose, facilitation of, 115:800–c
Intestinal trefoil factor
in mucus, 112:324–gn
recombinant, gastric injury and (rat), 110:489
Intestinal vessels, somatostatin receptors in, 106:951
Intestinal wall, TGF-β regulation of fetal collagen and, 110:92
Intestine
absorption of proline and leucine in chronically catheterized rats (rat), 113:865
acquired aganglionosis, and circulating autoantibodies with neoplasia or neural involvement, 112:1366–cr
adult and fetal, glial-derived neurotrophic factor in, 112:1381–rc
apoptosis in, 111:567–c
barrier function and EPEC, 113:1817–tmig
changing environment, 113:1402–e
cultured muscle, autocrine regulation of growth by growth factors, 113:817
cytokine modulation of fibroblast phenotype and epithelial-stroma interactions in (rat), 112:826
dual nature of colonic crypts, 111:533–ss
Fas and immunology of, 113:345–e
folate transport, cloning, expression, and distribution of complementary RNA, 112:783
gene therapy, 112:1753–e
glucose-stimulated sodium transport in during experimental cholera, 112:1529
5-HT receptors mediate peristaltic reflex induced by mucosal stimuli (guinea pig, human), 111:1281
immortalized epithelial cells, cell dynamics and differentation, 113:1198
infection with *Strongyloides stercoralis,* 114:6–im
lamina propria mononuclear cells, expression and release of IL-12 from in Crohn's disease, 112:1169
lymph, phenotypes of B and T cells, 112:163
nitric oxide synthase in resolving inflammation, 112:1022–rc
nonmitogenic actions of growth factors in physiology and pathophysiology, 112:225–srr
normal, integrins and, 107:1364
oligopeptide transporter, 113:322–srr
patterns of mRNA expression in uroguanylin and guanylin, 113:1000–rc
permeability of in celiac disease, 112:1064–tmig
persistent neuromuscular dysfunction after acute nematode infection (mouse), 113:1224
small and large, cholinergic neurons in, 111:401
Intestinofugal neurons, electrophysiology, shape, and chemistry of (guinea pig), 115:909
Intra-abdominal pressure, transient LES relaxations and, 109:1703–e

Intracellular adhesion molecule 1 (ICAM-1), in liver allografts, 107:1094
Intracerebral bleed, polycystic liver disease and, 108:487
Intracisternal injection
of apolipoprotein A-IV (rat), 107:1861–rc
medullary TRH in adative cytoprotection and (rat), 109:861
Intracranial hypertension, after hepatectomy (rat), 108:1097
Intraductal neoplasm, pancreatic, 107:1488
Intraductal papillary adenocarcinoma, Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221
Intraductal papillary-mucinous tumors, pancreatic, 110:1909
Intraduodenal fat, gastric acid secretion and, 107:1680
Intraepithelial leukocytes, bacterial antigens and (rat), 109:748
Intraepithelial lymphocytes
Fas-mediated cytotoxicity by in GVHD (mouse), 113:168
stimulation by mesenchymal cells, 113:144
Intragastric feeding, liver injury by alcohol blocked by antibiotics (rat), 108:218
Intragastric neutralization, epidermal growth factor stability in gastric juice and, 108:92
Intragastric pressure, nonulcer dyspepsia and, 107:596–ss
Intragastric volumes, transient LES relaxations and, 109:1703–e
Intrahepatic biliary epithelial cells, complementation of cystic fibrosis defect in, 108:584–rc
Intrahepatic cholangiocarcinomas (ICCs), Ki-*ras* and p53 protein expressions in, 109:1612
Intrahepatic collaterals, hepatic vein thrombosis and, 106:1042
Intrahepatic portosystemic shunt, biliary shunt fistula following placement, 111:1353–cr
Intralobular fibrosis, TGF-β and (mouse), 110:576
Intraluminal distention, in erosive esophagitis, 106:108
Intraluminal transducers, gastroesophageal reflux in ambulant subjects and, 108:83
Intramural nerve cell bodies, Mn-SOD/NAD diaphorase colocalization in gut and (rat), 109:1429
Intraportal lymphoid nodules, immune adhesion molecules and, 107:1457
Intrapulmonary vascular dilatation, contrast echocardiography and, 109:1028–tmig, 109:1283
Intrathecal administration, spinal, of opioid agonists (rabbit), 110:139
Intravascular mononuclear cells, Crohn's disease and, 109:1029
Intravenous contrast medium, in experimental pancreatitis, 107:320–c, 107:321–c
Intravital microscopy
duodenal mucus and alkali secretion and (rat), 109:1526
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
leukocyte adhesion and (rat), 109:1225
lymphocyte migration in Peyer's patches and (rat), 109:1113
neutrophil adhesion in cholestasis and (rat), 109:923
No/selectin interaction and, 107:1050
NSAID gastropathy in arthritis and (rat), 109:1173
Intrinsic factor-cobalamin receptor
Gräsbeck-Imerslund disease and, 108:1622
overexpression in Imerslund-Gräsbeck syndrome, 115:17367–cr
Introduction, 113:S1
Introns, CCK-A receptor abnormality and, 109:1375
Inulin
colonic permeation of (rat), 108:12
dietary stimulation of Bifidobacteria and, 108:958–tmig, 108:975
intestinal permeability and, 108:1569–srr
[^{3}H]Inulin, ileitis and (rabbit), 109:13
In vitro transcription/translation (IVTT) assay, for mutations in familial colon cancer, 109:1368–rc
In vivo gene transfer, in GI and liver diseases, 106:1077–srr
In vivo microscopy, prostaglandin E_2 in uremia and (rat), 107:1382
Iodoacetamide, experimental colitis induced by, 109:98
Ion-exchange chromatography
amino acid consumption test and, 106:488
gastric ethanol metabolism and (rat), 108:737
Ionic currents, modulation of by fluoxetine (human, dog), 110:1438
Ionizing radiation
in ion transport dysfunction (rat), 106:286–tmig
microvascular dysfunction and (rat), 108:1761
Ionophore, nitric oxide in gastric chief cells and (guinea pig), 109:1214
Ion permeabilities, ATP activates, in biliary epithelial cells, 107:236
Ion transport
gastric mucosal pH*i* regulation and *(Necturus),* 108:999
intestinal, and cytokines, 111:844–tmig
modulated by IL-10 in small intestine (rat), 111:936
in pancreatic ducts, β-adrenergic control of (rat), 115:714
Ion transport dysfunction, radiation-induced (rat), 106:286–tmig, 106:324
IRF 1 gene, 5q–LOH in esophageal carcinoma and, 110:52
Iris, and croos-reactive peptide in colon and ocular and joint tissue, 107:103
Iron
alcoholic liver disease and, 106:1095–srr
genetic hemochromatosis and, 108:208
hepatic concentration of, 106:674
hepatitis C therapy and, 108:1104
increased concentration in nonalcoholic steatohepatitis and increased fibrosis, 114:311
index, hepatic
in cirrhosis, 113:1052–c
utility in hereditary hemochromatosis, 114:1113–c
utility in patients with hereditary hemochromatosis, 113:1270
liver cell necrosis and, 108:264–srr
metabolism in health and disease, 108:1328–br
overload
in cirrhosis, 112:677–tmig
collagen expression and (rat), 107:1118
in liver, 114:233–tmig
long-term, antioxidant activity of silybin and (rat), 109:1941
serum
hemochromatosis and, 107:328–tmig, 107:453
nonalcoholic steatohepatitis and, 107:1103
Iron-deficiency anemia, *Helicobacter pylori* infection and, 115:268
Iron-nitrosyl complexes, mitochondrial (rat), 110:210
Iron regulatory factor, genetic hemochromatosis and, 108:2–tmig, 108:208
Irritable bowel syndrome
abnormal intestinal motility in, 111:1400–c
abuse and, 107:905–tmig, 107:1040
AGA position statement, 112:2118–aga

AGA technical review, 112:2120–aga
chemosensitivity in, 110:655–c
dyspepsia and, 109:671
expenditures for, 109:1725–tmig, 109:1736, 109:2029–e
fedotozine and (rat), 107:1327
and food allergy, role of anxiety-depression, 111:833–c
hyperalgesia of lumbar splanchnic afferent in, 107:1686
jejunal sensorimotor dysfunction in, 110:393
just a pain in the butt?, 107:1886–e
kapping visceral pain in patients with, 111:531–ss
lack of stability over time, 109:671
mechanical hypersensitivity in, 108:636, 108:927–e
model for abdominal pain in, 110:351
physician-patient interaction and, 109:1711–ss
rectal hyperalgesia and, 109:2–tmig, 109:40
induced by repetitive sigmoid stimulation, 112:55
rectal pain sensitivity as biomarker for, 115:1263–srr
scintigraphic colonic transit studies and, 107:1271
as sensitive bowel syndrome, 107:1581–tmig
visceral hyperalgesia and, 107:271–srr

Ischemia
bowel, T-cell lymphoma and, 110:985
cold
refrigerated donor livers and, 108:1337–tmig, 108:1510
role of reative oxygen intermediates in IL-10 release after (mice), 113:1701
colonic, reveals Buerger's disease, 110:900–cr
diffuse hemorrhagic gastroenteropathy and, 106:500–cr
effects on pancreas, 111:1033
endothelin 1 and (rat), 106:988
free radicals and (cat), 106:629
fructose-1,6-biphosphate and (rat), 108:1785
heat shock gene expression and (pig), 106:177
necrotizing enterocolitis and (piglet), 106:1215
pancreatic, hemodynamics of in cardiogenic shock (pig), 113:938
platelet activation and, 106:827–tmig, 106:840
small bowel, 110:339

Ischemia-reperfusion injury, 108:463
atrial natriuretic peptide prevents (rat), 106:143
complement activation and, 107:583–e
in liver allografts, 112:908
heat-shock protein 72 and (rat), 109:505
histamine receptors and (rat), 107:1297
induction of ferritin synthesis in (rat), 113:946
Kupffer cells and (rat), 109:189
liver allografts and, 107:1094
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
role of leukocyte-endothelial cell adhesion in, 114:1066–srr

Ischemic cholangiopathy, paroxysmal nocturnal hemoglobinuria and, 109:1338–cr

Ischemic hepatitis, obstructive sleep apnea and, 109:1682–cr

Islet amyloid polypeptide (IAPP), in gastric endocrine cells (mouse, rat), 107:712

Islet beta cells, pancreas, amylin secretion stimulated by pancreatic cancer cells, 114:130

Islet cell tumor, mechanism of gastric acid hypersecretion (rat), 113:1129

ISO_2, nitric oxide in ethanol-induced gastric mucosal injury and (rat), 108:58

Isoactin expression, in cultured intestinal smooth muscle cells, 115:605

Isoamylase, pancreatic hyperamylasemia and, 110:1905

Isobaric volume changes, functional dyspepsia and, 107:1345

3-Isobutyl-1-methylxanthine, altered cell ions in cystic fibrosis jejunum and, 110:411

2-(Methylamino)-isobutyric acid, hepatic system A activity and (rat), 106:480

Isoelectrofocusing, Gräsbeck-Imerslund disease and, 108:1622

Isoenzymes, protein kinase C during colon tumor development and, 110:1753

Isoforms
calmodulin-dependent protein kinase II, 109:1316
NHE-1, of Na^+/H^+ antiport (rat, rabbit), 109:1421

Isolated muscle bath studies, chronically denervated LES in achalasia and (opossum), 109:789

Isoleucine, refrigerated donor livers and, 108:1510

Isometric tension responses, lower esophageal sphincter pressure and (cat), 106:381

8-Isoprostaglandin F2a, increases portal pressure in normal and cirrhotic rats (rat), 112:208

Isoproterenol
ileal crypts and (mouse), 108:1345
lower esophageal sphincter function and (cat), 106:624

Isosorbide-5-mononitrate, effects compared with propranolol on first bleeding and long-term survival in cirrhosis, 113:1632

Israel, smoking in IBD and, 108:1616–tmig, 108:1683

Italy, hepatitis C virus in, 106:1603

Itraconazole, versus fluconazole, treatment of *Candida* esophagitis in AIDS, 111:1169

Japan
autoimmune hepatitis in, 106:1676–srr
hepatitis C virus in, 106:1596
organ transplantation in, 113:373–gn

Japanese population
anti-asialoglycoprotein receptor autoantibodies in, 107:799
HLA genes in Crohn's disease and, 109:1462
insulin autoimmune syndrome and, 109:1673–cr

Jaundice
cholangiocarcinoma in promary sclerosing cholangitis and, 107:537–cr
degree of in Alagille syndrome and abnormal lipid profiles, 111:1023
gut translocation and, 107:643
neutrophil adhesion in cholestasis and (rat), 109:923
reversible, in PBC due to hyperthyroidism, 106:1342–cr
viremia in hepatitis E infection and, 108:1–tmig

Jean's type 1 bulbar neurons, swallowing and, 109:1701–e

Jejunal feeding
in childhood chronic intestinal pseudoobstruction, 108:1379
continuous drip, childhood chronic intestinal pseudo-obstruction and, 108:1379

Jejunal-ileal transposition, enteroendocrine cell adaptation and (rat), 106:1576

Jejunal resection, structural/functional adaptation after (rabbit), 107:87

Jejunal sensorimotor dysfunction, in irritable bowel syndrome, 110:393

Jejunoileum
necrotizing enterocolitis and (piglet), 106:1215
resection, Menhaden oil and (rat), 106:94

Jejunostomy, octreotide therapy and protein metabolism in, 107:328–tmig, 107:379

Jejunostomy tubes
childhood chronic intestinal pseudo-obstruction and, 108:1379
use of, 108:1289–aga
Jejunum
absorption, of conjugated bile acids (guinea pig), 110:1098
alanine absorption by, 110:316–ss
bacterial modulation of endocrine cells and (rat), 107:1259
B-cell isotype response to bacterial load and, 109:819
bicarbonate secretion, Brunners glands and (rabbit, rat), 109:1160
bile acid transport in (rabbit), 110:459
calcium curent in (dog, human), 109:707
chemotaxis of intraepithelial lymphocytes and, 109:1154
cholera toxin and (rat), 108:2–tmig, 108:34
chronic diarrhea in HIV infection and, 110:30
circular smooth muscle cells, modulation of ionic currents in, 110:1438
cold pain stress and release of mast cell mediators into, 114:640
Cryptosporidium in (calf, human), 106:28
cystic fibrosis, in altered cell ions, 110:411
α-D-glucosidase inhibitors action on entry of free glucose into enterocytes (rat), 113:205
enterocytes in, mRNA distribution patterns in, 115:86
epidermal growth factor receptor kinase and (rat), 107:1278
flow rate and, 108:983
glucose-stimulated solute absorption and, 107:389
histamine receptors in intestinal repair and (rat), 107:1297
indomethacin-induced injury of (rat), 106:567
interleukins and, 107:993
lactate-anion exchanger in (rat), 106:559
mesalamine microgranule delivery in, 108:1427
motor disturbances after colonic antigen challenge (rat), 112:1996
mucosal proliferation in sepsis and (rat), 107:121
proximal, in hypolactasia, 107:54
rapid transepithelial antigen transport in (rat), 113:856
resection, epidermal growth factor and (rabbit), 107:87
short-chain fatty acids and (rat), 106:375
smooth muscle, myenteric denervation and (rat), 108:1629
sodium and water absorption from oral rehydration solution promoted by gum arabic in diarrhea (rat), 112:1979
sodium transport and (rat), 107:675
Jewish ethnicity
smoking in IBD and, 108:1616–tmig, 108:1683
ulcerative colitis and, 108:423
Joint disease, active, gut inflammation in spondyloarthropathy and, 110:1696
Joint tissue, common peptide among colon, eye and, 107:103
Julius M. Friedenwald Medal, 114:1326–aga
presentation of to Alan F. Hofmann, M.D., Ph.D, 107:1590–aga
presentation of to John T. Farrar, M.D., 109:1732
Juvenile polyposis tumor suppressor locus, deleted from nonepithelial cells in the lamina propria, 10q22, 112:1398–cr

K^+
ATP-activated conductances in biliary cells and, 107:236
Na^+ transport in proximal colon and, 106:125
pathophysiology of transport of, 107:548–srr
***K* agonist,** colonic distension and (dog), 107:1327
Kallikrein-kinin system activation, in granulomatous enterocolitis (rat), 110:1467
Karnovsky performance status, esophageal cancer and, 109:63
Kato III cells, *Helicobacter pylori* infection and, 108:65
K_{ATP} channels, in cirrhosis (rat), 106:1016
KCl_2, nerve damage in colitis and (rat), 109:718
Keratin, in GI malignancies, 106:1326
Keratinocyte growth factor (KGF)
ameliorates mucosal injury in colitis (rat), 110:1077
epithelial cell function and, 106:1254
inflammatory bowel disease and, 110:441
ulcer healing and (rat), 109:1068
Kernicterus, in adult heterozygous for Crigler-Najjar syndrome and homozygous for Gilbert-type genetic defect, 112:2099–cr
Kerosene, ingested, in evolution of esophagitis to squamous cell cancer, 110:904–cr
Ketogenesis
β-oxidation in Reye's syndrome and (rat), 107:517
citrullinemia and, 107:1154–cr
Ketoprofen, GI-safe derivatives of NSAIDs and (rat), 107:173
Ketotifen
gastric mucosal blood flow and (rat), 106:440
mast cell degranulation in colonic motility and (rat), 107:976
Kidney(s). *See also* Renal
cryoglobulinemia presenting after liver transplantation and, 110:265–cr
endothelin 1 and (rat), 108:1842
ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
misoprostol effects in cirrhosis and, 106:557–tmig, 106:658
pathophysiology in cirrhosis, 115:397, 115:406, 115:489–e
polycystic disease, association with pancreatic cystadenocarcinoma and malignant liver cysts, 112:2104–cr
prazosin and, 109:1257
transplantation
changing prevalence of hepatitis C genotypes and, 108:581–rc
fibrosing cholestatic hepatitis after, 107:1514–cr
infection outcome and, 109:1719–c
Wilson's disease and, 108:885–cr
Kidney beans, raw, small intestine exposure to (rat), 106:73
Kidney microsomal proteins
CYP2D6 antigenic sites and, 108:470
viral hepatitis and, 108:455
KiM1p, lipid islands in gastric mucosa and, 110:369
Kinases
EGF receptor, intestinal (rat), 107:1278
premalignant colon lesions and, 108:117, 108:291–e
Kinesin, hepatic, bile acid inhibition of (rat), 108:824
Kinetics
calcium transport in colon and, 109:876
crypt cell, calcium regulation of (mouse), 109:339–tmig, 109:498
Kinin B_1 receptor gene polymorphism, and inflammatory bowel disease, 115:1045–rc, 115:1286–e
Ki67 proliferation antigen, protein kinase C during colon tumor development and, 110:1753
Ki-*ras* mutations
codon 12, in duodenal juice in pancreatic cancer, 110:2–tmig, 110:221, 110:306–e
intrahepatic cholangiocarcinomas and, 109:1612
Klippel-Trénaunay-Weber syndrome, multiple focal nodular hyperplasia of liver and, 108:1256–cr

Knockout, inflammatory bowel disease and, 109:1359–srr
Knockout mice
Apc and *Dpc4*, 115:1598–ss
CFTR, MUCLIN expression in (mouse), 113:521
cholesterol 7α-hydroxylase, 115:1223
Crohn's disease and, 108:1338–tmig, 108:1396
$G\alpha_i2$, inflammatory bowel disease and, 109:1362–srr
interleukin 10 in IBD and, 108:1434
TGF-β/thrombospondin-1, 115:521–gn
KP1, lipid islands in gastric mucosa and, 110:369
K-*ras* gene
codon 12, point mutation in biliary tract tumors, 107:1147
colitis-associated neoplasias and, 108:383
colitis-associated neoplasms and, 107:420
colorectal aberrant crypt foci and, 108:434, 108:600–e
colorectal adenoma and, 108:1040
mutations
in chronic pancreatitis, 111:566–c, 113:593
detection of colon cancer, 112:1063–tmig
diagnostic utility of, 110:1329–tmig, 110:1587
in DNA extracted from plasma of patients with colorectal cancer, 112:1114
and G protein α subunit expression in colonic neoplasms (rat), 115:1494
identification of, 111:529–ss
in stool, colon cancer risk and, 110:1346
in stool and whole-gut lavage fluid, 112:1427–c
Krebs-Henseleit buffer, free radical production after cold storage and (rat), 108:1167
Krebs' solution, calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
Kupffer cells
alcohol-induced liver injury and (rat), 108:1–tmig, 108:218
antigen presentation and B7 expression by, 110:1175
betaine as osmolyte in (rat), 110:1543
cold ischemia/reperfusion injury and (rat), 109:189
cytokine-dependent molecules and, 107:1094
erythrophagocytosis, liver transplantation and, 110:1891
free radical production after cold storage and (rat), 108:1167, 108:1317–e
LAK cells and (rat), 109:1958
nitric oxide and (rat), 109:1958
nitric oxide derived from suppresses proliferation and induction of apoptosis in hepatoma cells (rat), 111:1059
sensitization and tolerance to endotoxin, caused by ethanol, 115:443, 115:494–e
TNF-α and, 108:1337–tmig, 108:1453

L-365,260
H_3 receptors and (dog, human, rat), 109:1566
lower esophageal sphincter relaxation and, 107:1059
stomach histidine decarboxylase and (rat), 109:1181
L-745,337, ulcer healing and, 109:524
La^{3+}, calcium transport in colon and, 109:876
Lactase
cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
deficiency, mosaic pattern in, 107:1–tmig, 107:54
expression and activity in children, malnutrition and, 112:742
gene, expression of (rat), 106:1223
genetically programmed down-regulation in children, 114:1221
persistence versus decline in adults, down-regulation after weaning and, 112:1506
regulation during development (rat), 112:803
regulatory mechanisms and, 106:1376–e
Lactase-phlorizin hydrolase
active sites, site-directed mutagenesis and (rat), 109:1234
activity, 106:1233
Lactase-phlorizin hydrolase/human growth hormone transgene, rat, expression on small intestinal villi (transgenic mice), 113:844
Lactate, FK506 and (rat), 109:107
Lactate-anion exchanger, in jejunal basolateral membrane (rat), 106:559
Lactate dehydrogenase (LDH)
cold ischemia/reperfusion injury and (rat), 109:189
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
ethanol-induced hepatotoxicity and, 109:555
ischemia/reperfusion injury and (rat), 106:143
***Lactobacillus,* with fermentation,** effect on methotrexate-induced enterocolitis (rat), 111:334
β-Lactoglobulin, intestinal permeability and, 108:1575–srr
Lactose
digestion capacity and, 106:1233
hydrolysis, small intestinal injury in giardiasis and (rat), 109:766
lactase-phlorizin hydrolase active sites and (rat), 109:1234
Lactulose
AIDS-related cryptosporidiosis and, 108:1075
bacterial adaptation in short bowel and, 109:1446
bacterial overgrowth and, 106:615
hypothermic cardiopulmonary bypass and, 106:318
intestinal permeability and, 108:132, 108:687, 108:1568–srr
Laënnec, René Théophile Hyacinthe, 115:1321
Lamellae, biliary, hepatic cytoprotection and (rat), 107:244
Lamellar dendrites, retrogradely labeled myenteric neurons and, 109:866
Lamina propria
acute self-limited colitis and, 107:755
cell migration in, in active IBD mucosa, via basement membrane pores, 115:807–tmig, 115:841
chemotaxis of intraepithelial lymphocytes and, 109:1154
Crohn's disease and, 108:1396
cryptosporidiosis with AIDS and, 108:627
cytokines and, 106:534–vidd
immunolocalization of duodenal proteins and (rat), 110:478
inflammatory bowel disease and, 107:755
inflammatory cells, cryptosporidiosis and (piglet), 108:1030
intestinal, expression and release of IL-12 from mononuclear cells of in Crohn's disease, 112:1169
juvenile polyposis tumor suppressor locus at 10q22 deleted from nonepithelilal cells in, 112:1398–cr
keratinocyte growth factor in IBD and, 110:441
Listeria monocytogenes and, 108:1338–tmig, 108:1396
lymphocytes, in inflammatory bowel disease, 106:596
monocyte-chemoattractant protein 1 and, 108:40
mononuclear cells, vasoactive intestinal polypeptide and, 106:576
T cells in recognizing antigens associated with astrovirus, 114:214–e
Lamina propria mononuclear cells (LPMNCs)
inflammatory bowel disease and, 108:21, 108:284–e

interleukin 4 in, and mucosal immune reactivity, 110:1683
interleukin 10 in, 108:1434
integrins and, 107:1364
ulcerative colitis and, 109:3, 109:307–e

Lamin B receptor, in primary biliary cirrhosis, autoantibodies against, 106:193

Laminin
A-chain isoforms of, 106:829
fetal colonic integrin expression and, 110:58
growth regulation of pancreatic duct cells and (guinea pig), 109:944
hepatocyte attachment to ECM and (rat), 106:473
integrin receptors and, 110:1127
myofibroblasts and (rat), 107:701
normal colonic epithelium and, 106:1242
receptor expression and (rat), 107:764
retinoids inhibit adhesion to in pancreatic carcinoma cells via α6-β1-integrin receptor, 112:532

Lamivudine
for chronic hepatitis B, 111:262–ss, 113:1258, 115:522–gn
for fibrosing cholestatic hepatitis, 115:177–cr

Lanreotide, cholangiocarcinoma and, 108:1908–rc

Lansoprazole
Helicobacter pylori and atrophic gastritis, 113:2018–c
treatment effect on gastric mucosa, 112:707

Laparoscopic biopsy, multiple focal nodular hyperplasia of liver and, 108:1256–cr

Laparoscopic cholecystectomy
ERCP and, 109:2–tmig, 109:252, 109:320–e
gallstone recurrence and, 106:1–tmig

Laparoscopic general surgery, technology assessment in, 110:915–srr

Laparoscopy
diagnostic, color atlas of, 108:1604–br
and tuberculosis peritonitis, 113:687–ss

Laparotomy
Ancylostoma caninum and, 106:1–tmig
arthritis in cholestasis and (rat), 107:1469
cisapride and, 106:924
elective, nasogastric decompression after, 110:645–ss
gut translocation and, 107:636–tmig
IL-6-producing gastric carcinoma and, 107:543–cr

Large intestine. *See also* Colon; Rectum
bicarbonate secretion from distal colon and (rat), 107:329
cancer, butyrate and cancer in colitis and (rat), 110:1727
dexamethasone-β-D-glucuronide and (rat), 108:1688
dietary stimulation of Bifidobacteria and, 108:975
endocrine cells and (db/db mice), 108:967
Sandhoff disease and, 106:775–cr
substance P receptors in IBD and, 109:850

Lariat regions, CCK-A receptor abnormality and, 109:1375

Laryngeal closure, tracheostomy and, 108:1357

Laryngeal disease, cormorbid occurrence with esophagitis in U.S. military veterans, 113:755

Laryngeal nerve, transient LES relaxations and, 109:1705–e

Laryngitis, reflux, 109:1575

Larynx
papilloma-carcinoma sequence in, 108:550–cr
tumors of, HPV in, 107:1–tmig
vocal cord closure during deglutition and, 109:843

Laser-Doppler flowmetry
gastric mucosal blood flow and (rat), 106:440
hypothermic cardiopulmonary bypass and, 106:318
prostaglandin E_2 in uremia and (rat), 107:1382
secondary biliary cirrhosis and (rat), 108:1183

Laser-induced fluorescence endoscopy, detection of dysplasia in Barrett's esophagus, 111:1–tmig, 111:93

Laser-induced fluorescence spectroscopy, for esophageal cancer, 110:643–ss

Laser irradiation, in photodynamic therapy for esophageal cancer, 108:310–tmig, 108:337

Laser treatment, endoscopic, mucin expression in villous adenoma and, 110:84

Latency
esophageal EMG modulation and, 109:1437
swallowing and, 109:1701–e

Latent TGF-β_1-binding protein (LTBP), pancreatitis and, 108:1873

Lauric acid, diacylglycerols and, 106:883

Lavage fluid, whole-gut, K-*ras* mutations in, 112:1427–c

Laxatives, in fecal Na^+ and K^+ excretion, 108:752

LDL receptor deficiency, gene therapy and, 106:1079–srr

Leakage
cell protein, ethanol-induced damage in gastric mucosal cells and (rat), 107:907
macrovascular protein (rat), 107:70

Lecithin
alcoholic liver disease and, 106:1085–srr
calcium binding in model bile and, 107:831

Lectin phytohemagglutinin, trefoil peptides and (rat), 109:516

Lectins
in colon cancer, 106:85, 106:117
peanut, and rectal epithelial cell proliferation, 114:1–tmig, 114:44
in tumor biology, 113:2003–e

Leeks, stomach cancer and, 110:12

Left-sided delay, scintigraphic colonic transit studies and, 107:1271

Leiden factor V, and small bowel infarction, 113:322–cr

Lens culinaris agglutinin A-reactive α-fetoprotein (AFP-L3), prognostic significance in HCC, 111:996

Leptin
in alcoholic cirrhosis, gender-related changes in, 115:947
and gut, 115:997
and human obesity, 112:1065
and liver, 115:997
metabolic effects of, 115:997

Leptin gene, mutation causes human equivalent of ob/ob obese mouse, 113:737–gn

LES. *See* Lower esophageal sphincter

Lesion, preneoplastic, progression to advanced gallbladder cancer, 111:232

Lethal shock syndrome, T cell-dependent liver injury and (mouse), 109:166

fat, in carcinoid diarrhea, 110:405
tropical, intestinal permeability and, 108:1575–srr
Vitamin D, low bone density in Crohn's disease and, 107:905–tmig

Malaria, intestinal permeability and, 108:1574–srr

Malignancy. *See* Cancer

Malignant lymphomatous polyposis, $\alpha 4\beta 7$ in, 107:1519–cr

Mallory bodies, anti-hydroxyethyl free radicals in alcoholic cirrhosis and, 108:1–tmig, 108:201

Malnutrition
AGA medical position statement for management in HIV infection, 111:1722–aga
and cirrhosis, 111:252–e
in cirrhosis, 106:1404–tmig
effects on lactase expression and activity in children, 112:742
functional tests for, 106:1365–vidd

Malondialdehyde
hepatocyte oxidative injury and (rat), 109:206
liver cell necrosis and, 108:257–srr

Malondialdehyde-acetaldehyde protein adducts, and autoimmunity in alcoholic liver disease (rat), 115:520–tmig, 115:686

MALT lymphoma
gastric, 112:1431–tmig
Helicobacter pylori strains expressing CagA protein and, 112:1482
pathogenesis as an antigen-dependent process, 113:1810
p16 tumor suppression gene in, deletion analysis of, 112:1871

Maltoma, gastric, with M proteins in serum and gastric juice, 114:1352–c

Mammals, sp60 expression and, 108:75

Managed care
organizations, use of medical practice guidelines, 108:925–paps
successful practice in, 111:516–aga

Mandibular lymphadenopathy, colonic sarcoidosis and, 108:1556–cr

Manganese, in chronic liver disease, 106:1068–cr

Manganese superoxide dismutase (MnSOD)
acute colitis and (rat), 109:801
glucocorticoids and (rat), 107:1663
and NAD diaphorase, colocalization in gut (rat), 109:1429

NADH diaphorase colocalization in gut and (rat), 109:1429
Mannitol
AIDS-related cryptosporidiosis and, 108:1075
bacterial overgrowth and, 106:615
cholera toxin and (rat), 108:34
dexamethasone and (rat), 106:35
intestinal permeability and, 108:132, 108:687, 108:1569–srr
neuronal involvment in toxin effects on ileum and myeloperoxidase (rat), 107:657
paracellular transport of (rat), 109:1207
tumor necrosis factor α and, 106:1514
[^{3}H]Mannitol
ileitis and (rabbit), 109:13
trefoil peptides and (rat), 109:516
Mannose
aminopeptidase N in small intestine and (fetal pig), 109:1039
inflammatory bowel disease and, 108:21
paracellular transport of (rat), 109:1207
Manometry
ambulatory, prolonged, late radiation enteropathy and, 109:1078
anorectal function and, 108:990
antroduodenal
childhood chronic intestinal pseudo-obstruction and, 108:1379
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
and nicotine effects on EGG and antral motility, 110:3
Barrett's esophagus and, 107:945
childhood chronic intestinal pseudo-obstruction and, 108:1379
chronically denervated LES in achalasia and (opossum), 109:789
cisapride and, 106:916
duodenal brake and, 110:740
duodenojejunal, ambulant, jejunal sensorimotor dysfunction in IBS and, 110:393
erosive esophagitis and, 106:108
esophageal
clinical use of, 107:1865–paps
hemoglobin effects on esophageal motor function and, 109:1241
perspectives on, 109:2053–c
esophageal sensitization in noncardiac pain and, 108:311
esophagogastroduodenal, rumination syndrome and, 108:1024
gastroduodenal, rumination syndrome and, 108:1024
gastroduodenojejunal, applications of, 115:747–srr
hemoglobin effects on esophageal motor function and, 109:1241
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
late radiation enteropathy and, 109:1078
lower esophageal sphincter pressure and (cat), 106:381
lower esophageal sphincter tone and, 108:441
and nicotine effects on EGG and antral motility, 110:3
oral-pharyngeal dysphagia in Parkinson's disease and, 110:383
perfusion, in erosive esophagitis, 106:108
perspectives on, 109:2053–c
pharyngeal, oral-pharyngeal dysphagia in Parkinson's disease and, 110:383
pharyngeal swallow and, 107:396
postoperative ileus and, 106:827–tmig, 106:924
rumination syndrome and, 108:957–tmig, 108:1024
sphincter of Oddi dysfunction and, 108:242–cr
stationary perfused, transient LES relaxations and, 109:1704–e
strain-gauge, tongue force modulation and, 108:1418
tongue force modulation and, 108:1418
transient LES relaxations and, 109:1704–e
Manometry-barostat assembly, postprandial colonic hypertonic response and, 106:1184
Manson, Sir Patrick, and *Schistosoma mansoni,* 114:114
M15 antagonist, galanin effect on smooth muscle cells and, 108:3
M35 antagonist, galanin effect on smooth muscle cells and, 108:3
Mantle cells, non-Hodgkin's lymphoma and, 107:1519–cr
Manual evacuation, after posterior rhizotomy, 108:990
Markov chain analysis, ulcerative colitis course and, 107:3
Mass-forming-type tumors, intrahepatic cholangiocarcinomas and, 109:1612
Mass spectrometry, platelet-activating factor and, 106:1301
Mass spectroscopy
epidermal growth factor stability in gastric juice and, 108:92
quinolinic acid and, 108:818
Mast cell(s)
bactericidal activity of, 107:893–ss
effect of *Clostridium difficile* toxin A on (rat), 111:409
esophageal blood flow and (opossum), 110:121
gastric inflammation and (mouse), 110:1482
gastric mucosal blood flow and (rat), 106:286–tmig, 106:440
in gastritis with or without *Helicobacter pylori* infection, 113:746
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
interleukin 1 and (rat), 106:1493
intestinal
activation by cold pain stress, 114:640
regulation by cerebral thyrotropin-releasing hormone (rat), 111:1465
involvement in *Clostridium difficile*-induced enteritis, 114:956
long-term antigen challenge and progressive degranulation (rat), 111:1516
neuronal involvment in toxin effects on ileum and (rat), 107:657
radiation-induced ion transport dysfunction and (rat), 106:286, 106:324
TNF-α production dependent on, in allergic gastric inflammation (mouse), 113:1560
Mast cell mediators, cold pain stress and release into the jejunum, 114:640
Mast cell protease II (RMCPII), neuronal involvement in toxin effects on ileum and (rat), 107:657
Mastication, salivary esophagoprotection and, 110:675
Mastocytosis, systemic, 109:1677–cr
Mastomys natalensis
ECL-like carcinoid tumor of, 109:341
experimental model for study of ECL, 111:781–srr
Math testing, acute stress reactions and, 106:1403–tmig, 106:1477
Matrigel, growth regulation of pancreatic duct cells and (guinea pig), 109:944
Matrix, gallbladder mucin, calcium phosphate precipitation and (bovine), 109:1661
Matrix metalloproteinase
production in intestinal inflammation, effects of IL-10 on, 115:573
secretion, and tumor spread in hepatocellular carcinoma, 112:1271
Matrix-producing cells, fibrinogen/fibrin deposition and (rat), 108:1124
Maximum velocity values, calcium transport in colon and, 109:876
Mayo Clinic risk score, primary biliary cirrhosis and (rat), 107:1570–c
McBurney, Charles, and McBurney's point, 114:639
McBurney's point, 114:639
***MCC/APC,* allelic deletions in stomach cancer,** 106:1584

M cells
epithelial cells, 111:1163–c
villin expression in (mouse), 110:515
***mdr2* gene,** knockout for, effects of ursodeoxycholate and cholate feeding on liver disease in FVB mice with, 111:165
***mdr2* knockout mice,** reduced plasma cholesterol and increased fecal sterol loss in (mouse), 114:1024
***mdr2 p*-glycoprotein gene,** disrupted, biliary protein secretion and (mouse), 109:1997
Meals. *See also* Diet(s)
amylase inhibition and (dog), 108:1221
carcinoid diarrhea and, 110:405
distension and, 108:330
integrated response to, 110:961–br
jejunal sensorimotor dysfunction in IBS and, 110:393
labeled, mesalamine ingestion with, 108:1338–tmig, 108:1427
rumination syndrome and, 108:1024
semisolid test, [^{13}C]acetate breath test for gastric emptying and, 108:957–tmig, 108:1048
standardized
carcinoid diarrhea and, 110:405
gastroesophageal reflux in ambulant subjects and, 108:83
jejunal sensorimotor dysfunction in IBS and, 110:393
Mean arterial pressure (MAP)
normalization of nitric oxide production in cirrhosis and (rat), 109:1624
prazosin and, 109:1257
Measles virus, Crohn's disease and, 108:623–tmig, 108:911–srr, 108:1396
Meat inspection, and bacterial infection, 112:4–gn
Mechanical stress, Crohn's disease and, 108:911–srr
Mechanoreceptor, duodenal, 106:583

thiol, acute pancreatitis and, 107:888–e
Metal-catalyzed decomposition, liver cell necrosis and, 108:257–srr
Metalloprotease, tissue inhibitor of, FK506-enhanced fibrogenesis and (rat), 107:492
Metalloproteinases
active matrix, enhanced secretion and tumor spread in hepatocellular carcinoma, 112:1271
role in differential expression of L-selectin in intestinal lymphocytes (mouse), 114:965
tissue inhibitor of, 110:821
Metal storage diseases, liver cell necrosis and, 108:264–srr
Metaphase arrest index, hypergastrinemia effect on gastrin receptor expressing HHC and (athymic rat), 109:1415
Metaplasia
duodenal gastric, in *Helicobacter pylori*—positive patients, 113:741
of gastric cardia, inflammation and, 115:1306–c
intestinal, 110:614–srr
adherence of *Helicobacter pylori* to in gastric mucosa, 111:1206
gap junctions in gastric mucosa and, 109:1492
pelvic ileal pouches and, 107:435
Metastases
angiostatin and, 108:1946–ss
and CD44-mRNA in colorectal cancers and adenomas, 110:362
colon cancer
inhibition of (nude mice), 108:172
sialylation of mucin-associated carbohydrate structures in, 110:1354
IL-6-producing gastric carcinoma and, 107:543–cr
α_6-integrin in pancreatic cancer and, 108:523
intraductal papillary-mucinous tumors of pancreas and, 110:1909
liver, urokinase and, 107:1449, 107:1555–e
lymph node, malignant colorectal polyps and, 108:1657
microsatellite instability in stomach cancer and, 110:38
neuropeptide receptors in peritumoral vessels and, 110:1719
small heparocellular carcinoma and, 108:768
in small hepatocellular carcinoma, genetic regulation of, 107:327–tmig, 107:486
Zollinger-Ellison syndrome and, 108:1637
Metastasis-supressor gene, *nm23-H1* as, 107:327–tmig, 107:486
Metastatic potential, use of Lewis^x-related epitope in gastric carcinomas as indicator, 111:1433
Met-enkephalin, neuronal coding in human ileum and, 107:680
Methacholine, H_3 receptors and (dog, human, rat), 109:1566
Methionine
alcoholic liver disease and, 106:1085–srr
HepG2 cells and, 108:515
labeled, hepatitis B virus and, 106:664
refrigerated donor livers and, 108:1510
[^{35}S]Methionine
aminopeptidase N in small intestine and (fetal pig), 109:1039
gastric H^+,K^+-ATPase turnover and (rat), 109:1134
Methionine adenosyltransferase
and liver disease, 114:403–e
regulation by hypoxia in hepatocytes (rat), 114:364
Methotrexate
Crohn's disease and, 108:1936–e
effect of *Lactobacillus* fermentation on enterocolitis induced by (rat), 111:334
intestinal permeability and, 108:1576–srr
for primary sclerosing cholangitis, 106:286–tmig
pulse therapy, for primary sclerosing cholangitis, 107:1570–c
for ulcerative colitis, 110:1329–tmig, 110:1416, 110:1652–e
Whipple's disease and, 106:782–cr
Methotrexate pneumonitis, in primary biliary cirrhosis, 107:266–cr
6-Methoxy-*N*-(3-sulfopropyl)-quinolinium, CF-IBE cells and, 108:584–rc
6-Methoxy-quinolyl-acetoethyl ester, colonic Cl^- secretion in cystic fibrosis and, 107:950
***N*-Methyl-D-aspartate (NMDA),** nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
Methylazoxymethanol, hypergastrinemia in colon cancer and (rat), 108:1068
3-0-Methyl-D-glucose
hypothermic cardiopulmonary bypass and, 106:318
transport, jejunal resection and (rabbit), 107:87
Methylene blue, toxic oil syndrome and, 106:691
Methylglyoxal bis(guanylhydrazone), hepatocyte proliferation and (rat), 106:1024
***N*$^\alpha$ Methyl histamine,** *Helicobacter pylori* infection and, 108:958–tmig, 108:959
(r)-α-Methylhistamine, H_3 receptors and (dog, human, rat), 109:1566
Methylprednisolone
in glucocorticoid prodrugs (rat), 106:405
hepatitis C replication after liver transplantation and, 110:167
Methyl *tert*-butyl ether, comparison with ethyl proprionate for dissolution of gallstones, 113:232
2-Methylthioadenosine triphosphate (2-MeSATP), PGE_2 in NANC neurotransmission and (rabbit), 110:129
Metronidazole
Crohn's disease and, 108:1615–tmig, 108:1617, 108:1935–e
effect of omeprazole on distribution in gastric juice, 111:358
fermentation and (rat), 107:637
leukocyte adhesion and, 106:1271
resistance to, in *Helicobacter pylori,* 115:1272–vidd, 115:1278–vidd
Metronidazole *Helicobacter pylori*—associated gastric lymphoproliferative disease in a child and, 109:973–cr
PAF-induced intestinal injury and (rat), 109:83
Mexico, hepatitis E virus infection and, 108:1–tmig
MIA PaCa-2 cells, C3 in exocrine pancreas and, 110:1919
MIB-1 monoclonal antibody, pelvic ileal pouches and, 107:435

Micelles, calcium binding in model bile and, 107:831
Michaelis constant
calcium transport in colon and, 109:876
organic anion transport protein and, 109:1274
Microadenomas, ileal, in adenomatosis coli, 109:374
Microcirculation
endothelin 1 in liver and, 110:534
hepatic (rat), 107:460
mast cell regulation of esophageal blood flow and (opossum), 110:121
Microelectrodes
duodenal mucus and alkali secretion and (rat), 109:1413–tmig, 109:1526
gastric mucosal pH and (rat), 107:1–tmig, 107:180
intracellular, HCl in esophageal cells and (rabbit), 108:662
liquid sensor, gastric mucosal pH*i* regulation and (*Necturus*, 108:999
Microflora
altered, esophageal infections and, 106:510–srr
endocrine cells and (rat), 107:1259
feeding, 108:958–tmig, 108:975
intestinal motility and, 109:1078
Microgranules, mesalamine, 108:1338–tmig, 108:1427
Microinfarction, platelet activation and, 106:827–tmig, 106:840
Microinjection, pancreatic polypeptide and (rat), 108:1517
Microlithiasis, pathogenesis of, 115:124
Microlymphotoxicity technique, chronic viral hepatitis and, 108:157
Micrometastases
bone marrow, in colon cancer, 109:1413–tmig, 109:1535
hepatic
inhibition in colon cancer (nude mice), 108:172
inhibition of (SCID mice), 109:1950
in hepatocullular carcinoma, 107:1257–tmig, 107:1425
Micronodular cirrhosis, nonalcoholic steatohepatitis and, 107:1103
Microorganisms
Crohn's disease and, 108:1338–tmig, 108:1396
Hsp60 expression and, 108:75
Microplate enzyme-linked immunosorbent assay, anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
Microsatellite(s)
and allelic loss and α-fetoprotein level in HCC, 110:184
DNA markers, HNPCC syndrome and, 109:1688–srr
instability
colitis-associated neoplasms and, 107:420
colon cancer and, 109:465, 109:611–e, 109:1765
in colorectal adenomas, 112:1432–tmig, 112:1515
marker loci, rat homologue of Wilson's disease gene and, 107:1189–rc
5q-LOH in esophageal carcinoma and, 110:52
in stomach cancer, 110:38
TNF, Crohn's disease and, 110:974–tmig, 110:1053
Microscopic image analysis, bile canalicular contraction and, 108:841
Microscopy
β-oxidation in Reye's syndrome and (rat), 107:517
bicarbonate in gastric mucosal repair and (cat), 107:149
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
nitric oxide/selectin interaction and, 107:1050
pancreatic ductal carcinoma and, 107:219
prostaglandin E_2 in uremia and (rat), 107:1382
Microsomal antibodies
CYP2D6 antigenic sites and, 108:470
viral hepatitis and, 108:455
Microsomal proteins, anti-hydroxyethyl free radical-modified albumin and, 108:1–tmig, 108:201
Microsomal steroid hydroxylation, pretranslational down-regulation of CYP 2C11 and 3A2 and (rat), 109:198
Microsomal vesicles, hepatic, UDP-glucuronic acid and (rat), 108:183
Microsomes
alcoholic liver disease and, 106:1085–srr
epoxide hydrolase and (mouse), 106:464
Microspheres
bicarbonate in gastric mucosal repair and (cat), 107:149
radiolabeled, nitric oxide synthase in portal hypertension and (rat), 108:1487
Microsporidia, HIV-associated necrotizing cholangitis and, 108:247–cr
Microsporidiosis
chronic diarrhea in HIV infection and, 110:30
thalidomide therapy for, 112:1823
Microtubule(s)
cytochrome P4502B traffic and (rat), 108:1110
vesicle targeting to apical domain and (rat), 109:1600
Microtubule affinity binding, kinesin inhibition and (rat), 108:824
Microvascular dysfunction, leukocyte-endothelial cell adhesion and (rat), 108:1761
Microvascular endothelium, mesenteric, Crohn's disease and, 108:911–srr
Microvascular hyperemia, absorptive, 108:1599–ss
Microvascular protein leakage, *Helicobacter pylori* in (rat), 107:70
Microvillar fractions, aminopeptidase N in small intestine and (fetal pig), 109:1039
Microvilli, enlargement and reorganization of (rat), 106:73
Microvillus inclusion disease, intestinal transplantation for, 106:771–cr
Microwave coagulation therapy, for hepatocellular carcinoma, 110:507, 110:1330–tmig
Midazolam, conscious sedation for gastroscopy and, 108:697, 108:932–e, 109:1405–c
Midgut carcinoid flush, biogenic amines and, 108:743
Migrating action potential complexes (MAPCs), cholera toxin secretion and, 108:287–e
Migrating motor complex (MMC)
childhood chronic intestinal pseudo-obstruction and, 108:1379
chronic pancreatitis and, 109:224
cisapride and, 106:916
food protein-induced anaphylaxis and (rat), 106:1505
intestinal, late radiation enteropathy and, 109:1078
and nicotine effects on EGG and antral motility, 110:3
postoperative ileus and, 106:827–tmig, 106:924
vagus, motilin and, 107:1912–c
Migration
chemotaxis of intraepithelial lymphocytes and, 109:1154
eosinophil, 108:409
hepatic stellate cells, role of focal adhesion kinase and phospholipase C-γ in, 112:522
lymphocyte, in Peyer's patches (rat), 109:1113
transendothelial, Crohn's disease and, 109:1029
Milk, heartburn and, 108:125
***Min* adenomas,** elevated cyclooxygenase-2 levels in (mouse), 111:1134–rc
Mineralization, low bone density in Crohn's disease and, 107:905–tmig, 107:1031
Mismatch repair function, neoplasia in ulcerative colitis and, 110:1322–c

Mismatch repair genes, colon cancer and, 109:1368–rc
Misoprostol
kidney in cirrhosis and, 106:557–tmig, 106:658
reduces serious gastrointestinal complications, 110:958–ss
secondary biliary cirrhosis and (rat), 108:1183
ulcer healing and, 109:524
Missense mutations
Barrett's esophagus and, 107:1012
DNA mismatch repair and, 109:1691–srr
genomic variations in precore/core gene of hepatitis B virus and, 108:310–tmig, 108:505
p53 protein in hepatocellular carcinoma and, 108:1176
Miss rates, colonoscopy for adenomas, determination by back-to-back colonoscopies, 112:24
Mistletoe, in liver disease, 106:285–tmig
Mitochondria
antibodies against, in primary biliary cirrhosis, 106:193
β-oxidation in Reye's syndrome and (rat), 107:517
copper toxicosis and, 107:1788
cystic fibrosis transmembrane conductance regulator and (rat, human), 108:1016
dysfunction in hepatocytes caused by drug-induced steatohepatitis (rat), 114:764
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
ethanol-induced glutathione depletion in, and TNF cytotoxicity (rat), 115:1541
FK506 and (rat), 109:107
fructose-1,6-biphosphate and (rat), 108:1785
hepatic, nitric oxide and (rat), 110:210
hydroperoxides and (rat), 109:1249
liver cell necrosis and, 108:258–srr
tacrine and (human, rat), 110:1878
vitamin E reduced oxidant injury to caused by TCDC (rat), 114:164
Wilson's disease and, 107:1788
Mitochondrial DNA (mtDNA), hepatic
deletion in alcoholics, 108:193
premature oxidative aging of in Wilson's disease, 113:599
Mitochondrial membrane permeability transition (MMPT)
hepatocyte adaptation to (rat), 115:520–tmig, 115:693, 115:783–e
liver cell necrosis and, 108:258–srr
Mitogen-activated protein kinase (MAPK)
activation by TGF-alpha in wounded intestinal epithelial cells (rat), 114:697
induction of signal transduction pathway during gastric ulcer healing (rat), 114:706
in vivo activation in intestinal neoplasia (rat), 113:1589
Mitogenicity
endothelin 1 in liver and, 110:534
pancreatic thread protein and, 110:1208
Mitogenic properties, epidermal growth factor stability in gastric juice and, 108:92
Mitosis
CCK-A receptor in pancreatic growth and (rat), 107:1135
hepatocellular DNA synthesis and (rat), 108:477
laminin receptor expression and (rat), 107:764
quiescence in intestinal stem cells and (rat), 107:1319
shock wave cavitation and, 106:937
Mixed culture, intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
Mixed polyposis syndrome, hereditary, clinical and molecular features, 112:327
MK-591, leukotriene biosynthesis inhibitor, multicenter trial of in ulcerative colitis, 112:725
MK-678, cholangiocarcinoma and, 108:1908–rc
***MLH1* gene**
DNA mismatch repair and, 109:1689–srr
hereditary nonpolyposis rectal cancer and, 110:657–tmig, 110:682, 110:943–e
***MLH1* mutations,** in hereditary nonpolyposis colorectal cancer, 115:809–gn
Model bile, calcium binding in, 107:831
Modified tumor cells, vaccination by (rat), 109:1414–tmig, 109:1555
Molecular evolutionary virology, hepatitis C virus and, 107:1181–vidd
Molecular fingerprints, adenoma-carcinoma progression in HNPCC and, 109:73
Molecular genetic profiles (MGPs), of colitis-associated neoplasms, 107:420
Molecular genetics, in gastroenterology, 110:2015–e
Molecular life cycle, of bilirubin, 110:1682–tmig, 110:2013–e
Molecular mechanisms
of cell volume regulation, 107:1906–ss
of physiological tight junction regulation, 109:1392–e
Molecular test, for pancreatic cancer, 110:2–tmig, 110:221, 110:306–e
Monensin, cytochrome P4502B traffic and (rat), 108:1110
Monoamine oxidase (MAO), genetic aspects of alcoholism and, 107:575–vidd
Monoclonal antibodies
antral G-cell function and (rabbit), 110:147
bone marrow micrometastases in colorectal cancer and, 109:1535
cA2 anti-TNF chimeric, Crohn's disease and, 109:1–tmig, 109:129
Crohn's disease and, 109:1–tmig, 109:129
gap junctions in gastric mucosa and, 109:1492
IL-2 effects on cytochrome P450 and (rats), 109:1589
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
LK1 and LK2, sp60 expression and, 108:75
neutrophil-mediated endothelial cell injury and, 110:21
NSAID gastropathy in arthritis and (rat), 109:1173
sialosyl-Tn antigen in ulcerative colitis and, 110:694
vascular adhesion protein 1 and, 110:522
Monoconjugates, bilirubin in cholesterol pellets and, 110:607
Monocyte(s)
inflammatory bowel disease and, 108:21, 108:284–e
interleukin 10 in IBD and, 108:1434
monocyte-chemoattractant protein 1 in IBD and, 108:40
opioid binding in cholestasis and (rat), 108:1479
TNF-α and, 108:1337–tmig, 108:1453
Monocyte-chemoattractant protein 1 (MCP-1)
fat storing cells and (rat), 110:1870
in inflammatory bowel disease, 108:40
Monocyte homing, in Crohn's disease, 109:1027–tmig
Monolayer growth, pancreatic duct cells and (guinea pig), 109:944
Mononuclear cell(s)
and *cagA* gene and cytokine mRNA, 110:1744
gut immunity, recirculation, and homing, isograft studies of (murine), 112:1241
Hsp60 expression and, 108:75
intestinal lamina propria, expression and release of IL-12 in Crohn's disease, 112:1169

intestinal transplant pathology and, 110: 1820
mast cell recruitment of during IgE-mediated gastritis (mouse), 110:1482
monocyte-chemoattractant protein 1 and, 108:40
murine autoimmune gastritis and (mouse), 110:1791

Mononuclear cell infiltrates, Crohn's disease and, 109:1029

Mononuclear phagocytes
Helicobacter pylori urease stimulates activation, 111:419
interleukin 4 in IBD and, 108:21, 108: 284–e
interleukin 10 in IBD and, 108:1434

Monosaccharides
hypothermic cardiopulmonary bypass and, 106:318
intestinal permeability and, 108:1569–srr

Monozygotic twins, genetic aspects of alcoholism and, 107:572–vidd

Montreal, asymptomatic hepatitis B virus carriers in, 106:1000

Morbidity, compensated cirrhosis type C, retrospective follow-up study, 112: 463

Morphine
colorectal distension and (rabbit), 110:139
effect on transient lower esophageal sphincter relaxation, 113:409
in gallbladder filling and emptying (dog), 106:1652
and GERD, 113:371, 113:409

Morphology
colorectal hyperplastic polyps and, 109: 1468
ileitis and (rabbit), 109:13
lipid islands in gastric mucosa and, 110: 369
pelvic ileal pouch and, 109:1090

Morphometry, growth regulation of pancreatic duct cells and (guinea pig), 109:944

Mortality rates
childhood chronic intestinal pseudo-obstruction and, 108:1379
colon cancer, 109:1188, 109:1389–e
compensated cirrhosis type C, retrospective follow-up study, 112:463
hereditary nonpolyposis colorectal cancer and, 108:1405
infection in bleeding cirrhotic patients and, 108:1828
nonmalignant chronic intestinal failure and, 108:1005, 108:1302–e
polycystic liver disease and, 108:309–tmig, 108:487
for ulcerative colitis, 107:3

Mosaic regulation, of lactase in adult-type hypolactasia, 107:1–tmig, 107:54

Motilide, stimulatory mechanism of contractions in posprandial stomach (conscious dog), 109:1513

Motilin
agonist, pancreatic hormone release and (dog), 110:241
bacterial modulation of endocrine cells and (rat), 107:1259
effect on calcium-activated potassium channels in colonic myocytes (rabbit), 114:748
EM523 and (dog), 110:241
exogenous, stimulates endogenous release of motilin through muscarinic pathways (dog), 111:1456
in gallbladder filling and emptying (dog), 106:1652
lower esophageal sphincter function and (cat), 106:624
migrating motor complex and, 107:1912–c
phase III activity and (dog), 106:1533
receptors, on pyloric muscle (rabbit), 111: 682

Motility
antroduodenal, chronic pancreatitis and, 109:224
Atlas of Gastrointestinal Motility in Health and Disease, 107:317
colonic
capsaicin and (conscious dog), 109: 1197
hyperglycemia and, 108:309–tmig, 108:350
mast cell degranulation and (rat), 107: 976
sleep patterns and, 107:1372, 107: 1548–e
toxin A and (Rabbit), 109:348
diabetes and, 107:403, 107:581–e
disorders
gastroenterological, 112:1785–ce
prokinesia and, 106:1112–e
task force on training in, 110:1274–aga
esophageal, in preterm neonates, 109: 1757
gallbladder, cholecystectomy and, 108: 1332–c
gastric
fedotozine and (dog), 107:1327
gastric emptying and (rat), 107:1561–ss
nicotine and, 107:864–srr
gastrointestinal
measurement in GI laboratory, 115: 747–srr
normal and disturbed, 106:271–br
gut, physiological imaging of, 107:309–ss
intestinal
in childhood chronic intestinal pseudo-obstruction, 108:1379
late radiation enteropathy and, 109: 1078
mast cell degranulation and (rat), 107:976
patterns
antropyloric modulation of transpyloric flow and (pig), 107:37
in vitro ileal (rat), 106:649
postprandial, and role of malabsoprtion in chronic pancreatitis, 112:1617
tachykinins and (rat), 107:94
upper gut, intraileal carbohydrate and (dog), 109:1977

Motility assay, kinesin and (rat), 108: 824

Motoneurons
esophageal premotor, pseudorabies virus and, 107:728
nitric oxide synthase in esophageal peristalsis and (rat), 108:367

Motor cycles, chronic pancreatitis and, 109:224, 109:316–e

Motor disturbances, gastric, fedotozine and (dog), 107:1327

Motor dysfunction, jejunal sensorimotor dysfunction in IBS and, 110:393

Motor function
esophageal, recombinant human hemoglobin and, 109:1027–tmig, 109:1241
postprandial, gallbladder and, 109:582
vasoactive intestinal contractor and (opposum), 107:1621

Motor mechanisms, gastric emptying in diabetes and, 109:755

Motor neurons
esophageal, swallowing and, 109:1700–e
excitatory and inhibitory, characterization for lower esophageal sphincter (guinea pig), 111:108

Motor patterns, intestinal, Gram-negative bacilli and, 109:1078

Mouse, history of in gastrointestinal research, 113:1431–ce

Mouse mammary tumor virus (MMTV) superantigens, autoimmune gastritis and (mouse), 107: 924

***mpr2* gene,** conjugate export pump encoded by, osmodependent dynamic localization in hepatocyte canalicular membrane (rat), 113:1438

M proteins, gastric maltoma with, 114: 1352–c

MR2266, colorectal distension and (rabbit), 110:139

Mrp2, expression in canalicular cholestasis (rat), 113:255

***MSH2* gene**
DNA mismatch repair and, 109:1689–srr

germline substitution in ulcerative colitis neoplasia and, 109:151
***MSH2* mutations,** in hereditary nonpolyposis colorectal cancer, 115:809–gn
^{99}mTc-diethylenetriamine pentacetate, FK506 and (rat), 109:107
MTX. *See* Methotrexate
***MUC* genes**
Lewis antigen expression and, 109:723, 109:999–e
localization of expression, 109:735, 109:999–e
pancreatic expression, 109:953
***MUC1* gene,** in human gastrointestinal tissue, 107:160
***MUC2* gene**
in human gastrointestinal tissue, 107:160
mRNA localization and, 107:28
***MUC3* gene,** mRNA, localization and, 107:28
***MUC5AC* gene,** in rectosigmoid villous adenoma, 110:1–tmig, 110:84
***MUC5C* gene,** in human gastrointestinal tissue, 107:160
***MUC5B* gene,** in human gastrointestinal tissue, 107:160
Mucin
calcium and protein kinase C in regulation of secretion in gallbladder epithelial cells, 112:978
calcium phosphate precipitation and (bovine), 109:1661
carbohydrate structures associated with, in colon cancer metastasis, 110:1354
colon cancer and, 106:285–tmig, 106:353, 106:389
colonic biosynthesis of, 107:1352
esophageal secretion and, 106:973
gallbladder epithelial cells and (dog), 109:264
gallbladder secretion of, bile salts and, 110:325–c
gland-type gastric, aberrant expression in *Helicobacter pylori*—infected epithelium, 113:455
intraductal papillary-mucinous tumors of pancreas and, 110:1909
pancreas and, 106:1054
pelvic ileal pouch and, 107:435, 109:1090
salivary esophagoprotection and, 110:675
Mucin glycoproteins, trefoil peptides and (rat), 109:516
Mucinous carcinomas, *MAGE* genes and, 109:1522
Mucinous cystadenoma, appendiceal, in ulcerative colitis, pathological and molecular features, 115:1566–cr
Mucinous tumors, pancreatic cyst fluid analysis and, 108:958–tmig, 108:1230
Mucins, LS174T colon cancer, interaction with *Entamoeba histolytica,* 111:1484
MUCLIN, expression in CFTR knockout mice (mouse), 113:521
Mucosa
ablation using PDT, 5–aminolevulinic acid as PDT agent, 114:604–e
colonic
Clostridium difficile toxin A and, 112:1782–tmig
epithelial cell folate depletion in neoplastic, 112:1163
in inflammatory bowel disease, 110:975
cytokine production, with gluten exposure in celiac disease, 115:519–tmig, 115:551
cytokine profiles of macrophages from in IBD, 112:1493
damage, in intestinal inflammation, effects of IL-10 on, 115:573
differential expression of L-selectin (mouse), 114:965
esophageal. *See* Esophageal mucosa
gastric. *See* Gastric mucosa
gastroduodenal, deranged hydrophobic barrier of after parenteral nonsteroidal anti-inflammatory drugs (rat), 112:1931
healing in Crohn's disease, 114:419–c
Helicobacter pylori
effect on acid and gastrin, 113:S43
and inflammatory response, 113:S35
ileal, adherent *Escherichia coli* strains in, and Crohn's disease, 115:1405
immune reactivity, interleukin 4 and, 110:1683
inflammation of, activated nuclear factor κB in, 115:357
intestinal, proinflammatory cytokines module expression in mesenchymal cells of, 114:1244
mechanisms of damage by *Helicobacter pylori,* 113:S31
pelvic pouch, neoplastic transformation of in ulcerative colitis, 112:1487
rectal, IL-15 activity in IBD, 114:1237
repair, human spasmolytic polypeptide and, 108:108
secretory reflexes, overview of, 110:2021–ss
surface, colonic permeation of inulin and (rat), 108:12
T cell-mediated changes in, in acute graft-versus-host disease (mouse), 115:1205
thickening, dietary ammonium-induced hypergastrinemia and (rat), 108:320
Mucosal absorption, impaired, small intestinal injury in giardiasis and (rat), 109:766
Mucosal adaptation
Menhaden oil and (rat), 106:94
pelvic ileal pouch and, 109:1090
Mucosal architectural alterations, in Crohn's disease, 108:376
Mucosal barrier
gastric, gastric, gastric phospholipids, 107:327–tmig, 107:362
intestinal, adherent bacteria and, 106:255–e
Mucosal biopsy
of colitis, 107:635–tmig, 107:755
gastrointestinal tract, 113:1045–br
Mucosal breaks, assessment of number in esophagitis, 111:85
Mucosal homing receptor, in malignant lymphomatous polyposis, 107:1519–cr
Mucosal immunity
anatomical structures involved in, 115:1414, 115:1591–e
and appendectomy and colitis, 112:1766–ss
B-cell isotype response to bacterial load and, 109:819
to cryptosporidiosis, 108:624–tmig, 108:627
role of bacterial induction of inducible nitric oxide synthase, 114:93
Mucosal inflammatory secretion, gallbladder, nitric oxide and (cat), 110:329–tmig, 110:598
Mucosal proliferation, in sepsis (rat), 107:121
Mucosal protection
epidermal growth factor in experimental colitis and (rat), 107:12
and interleukin 1 receptor antagonist isoforms in intestinal epithelial cells, 115:1426
Mucosal septal pouch, proximal stomach excluded by (pig), 107:37
Mucus
discharge, rectal, Crohn's disease positive for pANCA and, 110:1810
gel layer, gastric mucosal pH and (rat), 107:1–tmig, 107:180
gel thickness, central vagal activation in stomach and (rat), 112:409
secretion
duodenal (rat), 109:1413–tmig, 109:1526
nicotine and, 107:864–srr
Mucus cells, antral, *MUC6* and Lewis antigen expression and, 109:723
Mucus neck cells
gastric, pancreatic secretory trypsin inhibitor and, 106:735
HB-EGF in gastric mucosa and, 109:1051
Muir-Torré syndrome, DNA mismatch repair and, 109:1693–srr

Multibillion dollar problem, irritable bowel syndrome as, 109:2029–e
Multidrug resistance protein, increased levels in lateral membranes of hepatocyte-derived cells, 112:511
Multifocal stenosing ulcerations, small intestinal, vasculitis and, 110:1628–cr
Multihit model of carcinogenesis, in pancreatic carcinoma, 106:1645
Multilamellae, biliary, hepatic cytoprotection and (rat), 107:244
Multilumen tube, mesalamine microgranule delivery in, 108:1338–tmig, 108:1427
Multiorgan failure, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
Multiparameter flow cytometry, K-*ras*-2 mutations in colon cancer and, 108:1040
Multiple endocrine neoplasia type 1 (MEN-1)
gene locus, in pathogenesis of type II gastric carcinoids, 113:773
Zollinger-Ellison syndrome and, 108:1637
Multiple focal nodular hyperplasia, of liver, 108:1256–cr
Multiple lymphomatous polyposis
gastrointestinal tract, prospective clinicopathologic study, 112:7
primary gastrointestinal T-cell lymphoma resembling, 111:778–cr
Multiploidy, crypt-isolation technique and, 106:100
Multislice coronal echoplanar images, axially reformatted, vocal cord closure during deglutition and, 109:843
Multivariate logistic regression analysis
Helicobacter pylori in gastric cancer subtypes and, 109:885
refractory peptic ulcers and, 109:1124
Muscarinic blockage, colonic relaxation and (dog), 106:606
Muscarinic pathways, and stimulation of exogenous motilin release (dog), 111:1456
Muscarinic receptors
calcium signals in gastric endocrine cells and, 110:1835
EGF inhibits parietal cell function via PKC and, 110:469
gallbladder and, 108:1329–c
gallbladder and (guinea pig), 107:631–c
inflammatory modulation of activation in circular muscle cells of ileum (dog), 112:864
M1, transient LES relaxations and, 109:1705–e
M_3, and acetylcholine-induced calcium signal along colonic crypt axis (rat), 115:1131
Muscle
circular
cholecystokinin A and B/gastrin and (dog), 107:905–tmig, 107:1019
fetal colonic integrin expression and, 110:58
esophageal, HRES/manometry and, 109:832
intestinal, 5-hydroxytryptamine receptors in, 109:1791
smooth. *See* Smooth muscle
striated, pharyngeal water stimulation inhibits peristalsis and, 110:419
Wilson's disease and, 108:885–cr
Muscle cells
cultured intestinal, autocrine regulation of growth by growth factors, 113:817
smooth, innervation by interstitial cells of Cajal, 111:492–srr
Muscularis mucosae, fetal colonic integrin expression and, 110:58
Muscularis propria
colonic
IGF-1 and (rat), 108:644
toxic megacolon and, 109:1497
TGF-β regulation of fetal collagen and, 110:92
Mutagenesis, site-directed, lactase-phlorizin hydrolase active sites and (rat), 109:1234
Mutation(s)
compound missense, in sodium/D-glucose cotransporter, and trafficking defects, 112:1206
gene
Barrett's esophagus and, 107:1012
fibrosing cholestatic hepatitis after renal transplantation and, 107:1514–cr
p53 gene, in colorectal carcinoma, 107:1571–c
genomic variations in precore/core gene of hepatitis B virus and, 108:310–tmig, 108:505
Ki-*ras*, in chronic pancreatitis, 111:566–c
Mutation analysis, hereditary nonpolyposis colorectal cancer and, 110:973–tmig, 110:1020
Mutation cluster region, esophageal cancer and, 107:1759
Myalgias, mesalamine and, 108:1889–cr
Mycobacteria, sp60 expression and, 108:75
Mycobacterial heat shock protein, intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
***Mycobacterium avium* intracellulare complex (MAC),** esophageal infections and, 106:523–srr
Mycobacterium tuberculosis
esophageal infections and, 106:522–srr
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
Myelin basic protein, cholecystokinin-coupled intracellular signaling and, 106:763
Myeloperoxidase
CGP 47969A and (rabbit), 109:812
dexamethasone-β-D-glucuronide and (rat), 108:1688
epidermal growth factor in experimental colitis and (rat), 107:12
glucocorticoid prodrugs and (rat), 106:405
hypoxia-induced intestinal injury and (rat), 106:346
nerve damage in colitis and (rat), 109:718
pancreatitis and (rat), 108:1855
radiation-induced ion transport dysfunction and (rat), 106:324
sulfhydryl blocker-induced colitis and, 109:98
trinitrobenzenesulfonic acid and (rat), 110:780
Myenteric denervation, calcium metabolism and (rat), 108:1629
Myenteric nerves
cytokine-mediated changes in (rat), 109:1852
histological features in early achalasia, 111:648
LIF mediates cytokine-induced suppression of neurotransmitter release (rat), 111:674
Myenteric neurons
colon, polarity of neurochemically defined, 113:497
distribution and pharmacology of purinergic fast excitatory postsynaptic potentials in (guinea pig), 113:1522
loss
chronically denervated LES in achalasia and (opossum), 109:789
experimental colitis and (rat), 109:669–tmig, 109:718
MnSOD induction in acute colitis and (rat), 109:801
retrogradely labeled, 109:866
retrogradely labeled, morphology and projections of, 109:866
Myenteric plexus
gastric, impaired nitric oxide synthase expression in spontaneous diabetes (rat), 113:1535
IL-1β suppresses neurotransmitter release from via LIF induction (rat), 111:674

interleukin effects on noradrenergic nerves in (rat), 107:993
neurons (MPN), up-regulation of iNOS and SOD by colitis and IL-1β (rat), 111:56
nitric oxide in primate colitis and (rhesus macaque), 108:705
stem cell factor-expressing neurons, identification of (mouse), 115:898
vasoactive intestinal polypeptide and (opossum), 106:1467
Mylohyoid muscle, swallowing and, 109:1701–e
Myocardial muscle, Wilson's disease and, 108:885–cr
Myocytes, colonic, effect of motilin and erythromycin on calcium-activated potassium channels in (rabbit), 114:748
Myoelectrical activity
gastric, hyperglycemia and, 107:1390
mast cell degranulation in colonic motility and (rat), 107:976
Myoelectric complexes, colonic, neural control of (mouse), 108:1371
Myoelectric effects, of smoking, 110:3
Myofibroblasts
colon cancer cells and (rat), 107:701, 107:881
FGF-2 and, 109:1986
TGF-β1 and, 109:1986
transin secretion and (rat), 109:889
***myo*-inositol m,** in hepatic encephalopathy, 107:1475
Myosin, bile canalicular contraction and, 108:841
Myosin I, association with zymogen granule membranes in pancreatic acinar cells (rat), 113:649
Myristic acid, diacylglycerols and, 106:883
Mz-ChA-1 cells
ATP-activated conductances in, 107:236
calmodulin-dependent protein kinase II isoforms and, 109:1316
ursodeoxycholate and, 109:965

Na^+
acute colitis and (rat), 106:1190
bicarbonate secretion from distal colon and (rat), 107:329
calcium transport in colon and, 109:876
eicosanoid production and (dog), 106:297
enteric cryptosporidiosis and, 106:28
L-glutamine and, 106:1698–e
misoprostol and, 106:658
propionate-induced changes in intracellular pH and (rabbit), 107:347
transport, in proximal colon, 106:125
Na^+ bile acid cotransporter, in extrahepatic cholestasis (rat), 110:199
Nabumetone, ulcer healing and, 109:524
***N*-Acetyl penicillamine,** nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
NAD, PARP inhibitors and, 109:472
NADP diaphorase
congenital esophageal stenosis and, 109:275–cr
MnSOD colocalization in gut and (rat), 109:1429
nitric oxide in experimental alcoholic liver disease and (rat), 109:899
nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
NADPH
nitric oxide synthase and (opossum), 106:1444
nitric oxide synthase in esophageal peristalsis and (rat), 108:367
NADPH diaphorase
neuronal coding in human ileum and, 107:680
nitric oxide in primate colitis and (rhesus macaque), 108:705
nitric oxide synthase-related activity of, 107:968
$NaHCO_3$
epidermal growth factor stability in gastric juice and, 108:92
gustatory stimulation during sleep and (dog), 107:650, 107:879–e
Na^+/HCO_3^- cotransport, pancreatic H^+/HCO_3^- secretion and (pig), 108:850
Na^+/H^+ exchange
in biliary cirrhosis (rat), 107:468
in cryptosporidiosis (piglet), 106:1418
hepatocellular, regulation of, 108:305–c
Naive T cells, in Crohn's disease, 109:1029
Na^+,K^+ ATPase
hepatocyte, regulation by endotoxin (rodents), 111:193
insulin and (rat), 106:200
Naloxone, colorectal distension and (rabbit), 110:139
Naltrexone
opioid binding in cholestasis and (rat), 108:1479
treatment, cholestatic pruritus, 113:1264
Naltrindole, colorectal distension and (rabbit), 110:139
L-NAME. *See* N^G-Nitro-L-arginine methyl ester (L-NAME)
NaOH cell maceration, colorectal hyperplastic polyps and, 109:1468
Nasal breathing, gustatory stimulation during sleep and (dog), 107:650, 107:879–e
Nasoenteric tubes, technical review of, 108:1283–aga
Nasogastric decompression, after laparotomy, 110:645–ss
Nasogastric tube, Crohn's disease and, 108:957–tmig
Nasogastric tube feeding, versus percutaneous endoscopic gastrostomy, 111:827–ss
Natriuresis
adenosine-1 receptor antagonism and, in cirrhosis, 115:406
after transjugular intrahepatic portosystemic shunt, 112:899
Natriuretic action, misoprostol and, 106:658
Natriuretic peptide, stimulates cGMP production in biliary epithelial cells, 114:782
Natural host pathogen model, therapeutic immunization against *Helicobacter mustelae* and, 110:1770
Natural killer (NK) cells
interferon α and (rat), 108:1192
remodeling hypergastrinemia model and, 109:1407–c
SF-25 monoclonal antibody and (nude mice), 108:172
Nausea, functional dyspepsia and, 107:1258–tmig
***n*-Butyrate,** colonocyte metabolism and (germfree rat), 109:1890
Nd:YAG laser therapy, for esophageal cancer, 109:63
Neck glands, *MUC6* and Lewis antigen expression and, 109:723
Necroinflammation, in steatohepatitis, role of lipid peroxidation, 114:842–e
Necrosis
CGP 47969A and (rabbit), 109:812
hepatic
germander and (mouse), 106:285–tmig, 106:464
immunostaining for membrane attack complex of complement and, 108:309–tmig, 108:495
hepatitis C virus and, 107:1457
hepatocellular, cytoprotection and (rat), 107:244
hepatocyte, mitochondrial membrane permeability transition and (rat), 110:558, 115:520–tmig, 115:693, 115:783–e
HIV-associated necrotizing cholangitis and, 108:247–cr
IL-10 in pancreatitis and, 108:1917–rc
liver cell, 108:252–srr
pancreatic, contrast medium injury and (rat), 106:207, 1106:260–e
pancreatic duct obstruction and (opossum, rat), 110:875
platelet-activating factor and (rat), 109:83

relationship to organ failure in severe acute pancreatitis, 113:899
Necrosis-fibrosis sequence
pancreatic fibrosis induced by TGF-β and (mouse), 110:576
in pathogenesis of alcoholic chronic pancreatitis, 111:258–e
Necrotizing cholangitis, HIV-associated, *Septata intestinalis* in, 108: d247–cr
Necrotizing enterocolitis, animal model of (piglet), 106:1215
***Necturus* gastric mucosa,** pH*i* regulation and, 108:999
Negative feedback regulation
of cholesterol 7α-hydroxylase, 108:533
of gastric acid secretion, 107:1610
of pancreatic exocrine secretion, 107:1828
Nematode infection, acute, persistent intestinal neuromuscular dysfunction after (mouse), 113:1224
Neoangiogenesis, in chronic viral hepatitis, 108:231
Neocate formulas, eosinophilic esophagitis and, 109:1503
Neoformation, of liver epithelial cells, 110:1311–e
Neomycin
intestinal permeability and, 108:1574–srr
liver injury by alcohol blocked by (rat), 108:218
PAF-induced intestinal injury and (rat), 109:83
Neonatal model, of giardiasis (rat), 109: 766
Neonates
esophageal motility in, 109:1757
liver development in, pancreatic enzymes and, 108:1236
microvillus inclusion disease and, 106: 771–cr
Neoplasia
balloon cytology detection of in Barrett's esophagus, 112:2138–e
multifocal, involving colon and appendix, in ulcerative colitis, 115:1566–cr
in pelvic ileal reservoir, 109:1090, 109: 1381–e
small intestine, role of cadherins, 111: 261–ss
in ulcerative colitis, mismatch repair function and, 110:1322–c
Neoplasms
colitis-associated, 107:420
ulcerative colitis, mutation of TGF-βI type II receptors in, 112:40
Neoplastic potential, multiple hyperplastic stomach polyps, 112:561
Nephelometry, calcium phosphate precipitation and (bovine), 109:1661
Nerve damage, in colitis (rat), 109:669–tmig, 109:718
Nerves
functional dyspepsia and, 107:1345
hepatorenal, portal insulin in intestinal glucose absorption and (rat), 110: 1863
nitric oxide-related sites contain NPY and, 107:968
pancreatic ductal carcinoma and, 107:219
somatic nociceptive reflex and, 107:985
Nestin, myenteric neuronal (rat), 107:666
Neural circuit, brainstem, nitric oxide synthase in (rat), 108:367
Neural control, of intestinal amino acid absorption, 110:315–ss
Neural emergency system
capsaicin-sensitive afferent nerves as, 114: 823–srr
in stomach, 114:823–srr
Neural function, altered in acute colitis (rat), 112:156
Neural inhibition, tonic, ileal motility patterns and (rat), 106:649
Neural pathways, transient LES relaxations and, 109:605–srr
Neural reflex
capsaicin in colonic activity and (conscious dog), 109:1197
glucose effects on colon motility and, 108: 350
Neural tube, ventral, cells of seed development GI tract (chicken), 114:878–rc
Neuroblastoma, vasoactive intestinal polypeptide and (opossum), 106: 1467
Neuroendocrine cells, GABA secretion from, 110:1595
Neuroendocrine gastroenteropancreatic tumors, somatostatin receptor scintigraphy with, 115: 1025–ss
Neuroendocrine secretion, guanylin stimulation of in pancreatic cells, 114:791
Neuroendocrine tumors, gut, diagnosis, 112:583–vidd
Neurofilament proteins, enteric inhibitory neurons and, 108:554–srr
Neurogenic control, of myoelectric complexes (mouse), 108:1371
Neurogenic reflexes, transient LES relaxations and, 109:1705–e
Neuroimmune communication, in colonic submucous plexus, after *Trichinella spiralis* infection (guinea pig), 107:1602
Neuroimmune regulation, mast cells and (rat), 106:286–tmig, 106:324
Neurokinin
inhibits gastrin secretion in antrum (pig), 111:925
receptors, viscerosensitivity and (rat), 107:94
Neurokinin A, colonic hypersecretion and (rat), 109:483
Neurokinin 1 receptors, EM523 and (dog), 109:1513
Neurokinin 2 antagonist, colonic relaxation and (dog), 106:606
Neurological defects, Smith-Lemli-Opitz syndrome and (rat), 109:1301
Neurological deficits, in cirrhotic patients on hepatic encephalopathy treatment, 111:256–e
Neuromedin C, antral G-cell function and (rabbit), 110:147
Neuromuscular communication, hemoglobin effects on esophageal motor function and, 109:1241
Neuromuscular dysfunction, intestinal, persistent after acute nematode infection (mouse), 113:1224
Neuromuscular function, glucose effects on colon motility and, 108: 350
Neuronal antibodies, antimyenteric, and motility, 114:421–c
Neuronal coding, in human ileum, 107: 680
Neurons
capsaicin in colonic activity and (consious dog), 109:1197
cholecystokinin A and B/gastrin and (dog), 107:905–tmig, 107:1019
cholinergic in large and small intestine, 111:401
chronically denervated LES in achalasia and (opossum), 109:789
CPG, swallowing and, 109:1700–e
enteric neurotransmitters and, 108:554–srr
esophageal EMG modulation and, 109: 1437
esophageal premotor, pseudorabies virus and, 107:728
GABA-induced ileal electrolyte transport and, 110:498
gastrin protection and (rat), 109:89
intestinofugal, electrophysiology, shape, and chemistry of (guinea pig), 115: 909
intramural, deglutitive inhibition and, 106:827–tmig, 106:875
MnSOD induction in acute colitis and (rat), 109:801
myenteric
expressing stem cell factor, identification of (mouse), 115:898
intermediate filament proteins and (rat), 107:666

nitric oxide synthase
in dorsal motor nucleus of vagus and (cat), 109:1484
in esophageal peristalsis and (rat), 108:367
rectoanal inhibitory reflex and, 108:1700
retrogradely labeled, 109:866
substance P receptors in IBD and, 109:850
toxin effects on ileum and (rat), 107:657
visceral hyperalgesia and, 107:271–srr

Neuron-specific enolase, congenital esophageal stenosis and, 109:275–cr

Neuropathic dysmotility, cisapride and, 106:827–tmig, 106:916

Neuropathy
diabetic, gastrointestinal motility and, 107:403, 107:581–e
glucose effects on colon motility and, 108:309–tmig, 108:350

Neuropeptides
achalasia and, 106:1397–c
intestine and, 106:827–tmig, 106:859, 106:951
mast cell degranulation in colonic motility and (rat), 107:976
neuronal coding in human ileum and, 107:680

Neuropeptide Y
dorsal vagal complex, stimulation of bicarbonate-dependent bile secretion (rat), 112:1673
neuronal coding in human ileum and, 107:680
nitric oxide synthase-related NADPH diaphorase activity and, 107:968

Neuropsychiatric profile, liver cirrhosis, 111:147

Neurotensin
amylase inhibition and (dog), 108:1221
gastric emptying in diabetes and, 109:755

Neurotoxicity, manganese, 106:1068–cr

Neurotoxins
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
mast cell regulation of esophageal blood flow and (opossum), 110:121
sensory, cholecystokinin-stimulated pancreatic enzyme secretion and (rat), 107:525

Neurotransmission
inhitory in lethal spotted mutant mice, model for Hirschsprung's disease, 112:1575
interstitial cells of Cajal as pacemakers and mediators of in gastrointestinal tract, 111:492–srr

Neurotransmitter
congenital esophageal stenosis and, 109:275–cr
enteric, 108:554–srr
ileal crypts and (mouse), 108:1345
inhibitory, colonic myoelectric complexes and (mouse), 108:1371
longitudinal muscle myenteric plexus and (rat), 107:691

Neurotransmitter release, cytokine-induced, mediated by LIF in myenteric nerve (rat), 111:674

Neurotrophic factor, glial-derived, in adult and fetal intestine and in Hirschsprung's disease, 112:1381–rc

Neurotrophins, enteric, localization of, 110:756

Neutral protease, urokinase secretion and, 107:410

Neutral red, mitochondrial toxicity of tacrine and (human, rat), 110:1878

Neutral tasks, relaxation training for gastroesophageal reflux disease and, 107:61

Neutropenia, sulfasalazine and, 106:1429

Neutrophil(s)
activation during liver transplantation, 114:1009
acute colitis and (rabbit), 106:1208
adhesion, cholestasis and (rat), 109:923
chemoattractant production reduced by neutrophil elastase inhibitor after ischemia-reperfusion in liver, 112:551
diffuse hemorrhagic gastroenteropathy and, 106:500–cr
endothelial cell injury mediated by, 110:21
in experimental pancreatitis, 111:1081
free radical and (cat), 106:629
gastric erosive damage and (rat), 109:1027–tmig, 109:1225
generation of free radicals in mesenteric microcirculation after radiation (rat), 111:981
impaired microbicidal activity in cholestasis (rat), 112:1692
indomethacin-induced enteropathy and (rat), 106:567
inflammatory diarrhea and (rabbit), 106:1403–tmig, 106:1554
ischemia/reperfusion injury and (rat), 109:505
mast cell recruitment of during IgE-mediated gastritis (mouse), 110:1482
migration across intestinal epithelium, 113:1489
nonalcoholic steatohepatitis and, 107:905–tmig
opioid binding in cholestasis and (rat), 108:1479
platelet activation and, 106:827–tmig, 106:840

Neutrophil-activating cytokine, in HT-29 cells, 108:653

Neutrophil autoantibodies, in primary sclerosing cholangitis and ulcerative colitis, 107:328–tmig, 107:532, 107:586–e

Neutrophil elastase inhibitor, reduction of neutrophil chemoattractant production after ischemia-reperfusion in liver, 112:551

Neutrophil-endothelial cell interactions, *Helicobacter pylori* and, 107:70

Neutrophilic inflammation, pelvic ileal pouches and, 107:435

Neutrophil infiltrates, *Helicobacter pylori* infection and, 108:65

NH_4^+, Na^+ transport in proximal colon and, 106:125
Nicotinamide, cell death and, 109:472
Nicotinamide adenine dinucleotide, alcoholic liver disease and, 106:1085–srr
Nicotine
gastric mucosa and, 107:864–srr
ileal crypts and (mouse), 108:1345
Nicotinic blockade, colonic relaxation and (dog), 106:606
Nicotinic ganglionic receptors, fedotozine modulation of colonic distension and (dog), 107:1327
Nifedipine
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
colonic myoelectric complexes and (mouse), 108:1371
myenteric denervation of jejunum and (rat), 108:1629
Nissen fundoplication
eosinophilic esophagitis and, 109:1503
esophageal pH recording and, 110:1989–aga
fate of, 106:1391–ss
Nitrate
and nitric oxide in gallbladder mucosal inflammatory secretion (cat), 110: 598
plasma levels, GI-safe derivatives of NSAIDs and (rat), 107:173
urinary, as bacterial translocation marker (rat), 107:47
Nitration
cellular proteins, association of nitric oxide with, 111:871
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
Nitric acid, deglutitive inhibition and, 106:827–tmig, 106:875
Nitric oxide (NO)
and acute tissue damage, 113:1405–e
alcoholic liver disease and (rat), 109:899
ANP/VIP in cecal smooth muscle and (guinea pig), 109:1105
association with formation of peroxynitrite and nitration of cellular proteins, 111:871
biosynthesis, cyclooxygenase blockade in portal hypertension and (rat), 110: 1529
calcium and injury to gastric mucosal cells by (rat), 111:65
chief cells and (guinea pig), 109:1214
chronically denervated LES in achalasia and (opossum), 109:789
colonic hypersecretion and (rat), 109:483
colonic myoelectric complexes and (mouse), 108:1371
colonic relaxation and (dog), 106:606
EGF stimulation of generation from gastric epithelial cells (guinea pig), 111: 945
endothelial-derived, P-selectin and, 107: 1050, 107:1199–e
and endothelial nitric oxide synthase and portal hypertension, 112:1767–ss
endothelin 1 in cirrhosis and (rat), P-selectin and, 107:1085
enteric inhibitory neurons and, 108:554–srr
and esophageal peristalsis, 115:1374
ethanol-induced gastric mucosal injury and (rat), 108:58
gastric alkaline response and (rat), 106: 367
gastrin protection and (rat), 109:89
and *Helicobacter pylori,* 111:1406–tmig
hepatic mitochondria and (rat), 110:210
hepatic reperfusion injury and (rat), 108: 463, 108:603–e
hepatocellular signal transduction and, 108:841
hepatocyte oxidative injury and (rat), 109: 206
and hepatopulmonary syndrome, 113: 682–e
histamine ileal vasodilatory mechanisms and (guinea pig), 108:712
HLA-B27 transgenic rats and, 109:2–tmig, 109:142
hypoxia-induced intestinal injury and (rat), 106:346
inactivation, splanchnic vasodilation in portal hypertension and (rat), 110: 974–tmig, 110:1156
inflammatory bowel disease and, 114: 601–e
inhibits intestinal secretion by *Clostridium difficile* toxin A (rat), 111:409
and intestinal epithelia, 114:598–e

Kupffer cells and (rat), 109:1958
supression of proliferation and induction of apoptosis in hepatoma cells, 111:1059
lower esophageal sphincter relaxation and, P-selectin and, 107:1059
mast cell regulation of esophageal blood flow and (opossum), 110:121
mucosal inflammatory secretion and (cat), 110:329–tmig, 110:598
neuronal coding in humal ileum and, 107:680
pancreas and (cat), 108:1215
pancreatitis and (rat), 108:1855
pepsinogen secretion and (guinea pig), 108:1709
in portal hypertension (rat), 111:727
primate colitis and (rhesus macaque), 108:705
recombinant human hemoglobin and, 109:1027–tmig, 109:1241
reduced production in endothelial cells in cirrhotic liver (rat), 114:344
and T-cell migration in Peyer's patches and villous submucosa (rat), 115:618
transient lower esophageal sphincter relaxations and, 109:1705–e, 115:1374
urinary nitrate derived from, as bacterial translocation marker (rat), 107:47

Nitric oxide synthase
activity, in proximal versus distal colon (rat), 115:1504
congenital esophageal stenosis and, 109:275–cr
endothelial
and nitric oxide and portal hypertension, 112:1767–ss
in pathogenesis of hepatopulmonary syndrome (rat), 113:606
esophageal (opossum), 106:1444
esophageal peristalsis and (rat), 108:367
expression and activity in macrophage cell line stimulated by *Helicobacter pylori* (mouse), 111:1524
expression in colonic epithelium in IBD, 111:871
ileitis and (guinea pig), 109:1475
impaired expression in the gastric myenteric plexus of spontaneous diabetes (rat), 113:1535
inducible
bacterial induction in cultured intestinal epithelial cells, 114:93
in cirrhosis (rat), 112:2056
inhibition ameliorates endotoxin-induced gut mucosal barrier dysfunction (rat), 113:1246
inhibition
of augments intestinal effects of *C. difficile* toxin A (rat), 111:409
differential effects on endotoxin-induced liver damage (rat), 113:1323
duodenal mucus and alkali secretion and (rat), 109:1526
mRNA, in proximal versus distal colon (rat), 115:1504
neuropeptide Y and, 107:968
nitric oxide in gastric chief cells and (guinea pig), 109:1214
overexpression in portal-hypertensive stomach (rat), 112:1920
and peritonitis, 114:185–srr
portal hypertension and (rat), 108:1487
in resolving intestinal inflammation, 112:1022–rc
sulfhydryl blocker-induced colitis and, 109:98
toxic megacolon and, 109:1413–tmig, 109:1497
up-regulation by colitis and IL-1β in myenteric neurons (rat), 111:56

Nitrinergic denervation, congenital esophageal stenosis and, 109:275–cr

Nitrite
hepatic reperfusion injury and (rat), 108:463
and nitric oxide in gallbladder mucosal inflammatory secretion (cat), 110:598
plasma levels, GI-safe derivatives of NSAIDs and (rat), 107:173

Nitrofenac
induction of enteropathy, 112:1–tmig
ulcer healing and, 109:524

Nitrogen
balance, fermentation and (rat), 107:637
dietary stimulation of Bifidobacteria and, 108:975
nutritional support of, 107:594–ss

Nitrogen metabolites, secretory diarrhea and, 109:2019–srr

Nitrogen oxide, GI-safe derivatives of NSAIDs and (rat), 107:173

Nitroglycerin, topical, for pain relief in acute esophagitis, 107:1215–c

Nitroimidazoles, resistance to, in *Helicobacter pylori,* 115:1272–vidd, 115:1278–vidd

N^G-Nitro-L-arginine methyl ester (L-NAME)
bacterial translocation and, 107:47
colonic relaxation and (dog), 106:606
endothelin 1 in cirrhosis and (rat), 107:1085
hepatic reperfusion injury and (rat), 108:463
hypoxia-induced intestinal injury and (rat), 106:346
lower esophageal sphincter relaxation and, 107:1059
mast cell regulation of esophageal blood flow and (opossum), 110:121
nitric oxide and (rat), 106:367
in cirrhosis, 109: 1414–tmig, 109:1624
in experimental alcoholic liver disease, 109:899
nitric oxide/selectin interaction and, 107:1050
nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
pancreatitis and (rat), 108:1855
sulfhydryl blocker-induced colitis and, 109:98

***S*-Nitroso-*N*-acetyl penicillamine,** nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484

***S*-Nitroso-albumin,** hepatocyte oxidative injury and (rat), 109:206

Nitrotyrosine
expression in colonic epithelium in IBD, 111:871
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475

Nitrovasodilators
nitric oxide in gastric chief cells and (guinea pig), 109:1214
secondary biliary cirrhosis and (rat), 108:1183
treatment, portal hypertension, 113:1794–e

Nitroxybutyl moiety, incorporation of into NSAIDs (rat), 107:173

NK1 and NK2 receptors, colonic hypersecretion and (rat), 109:483

NK1 antagonists, mast cell degranulation in colonic motility and (rat), 107:976

***nm23-H1* gene n,** in small hepatocuellular carcinoma, 107:327–tmig, 107:486

NO. *See* Nitric oxide

Nociception, colon, role of kgr;-opioid receptors in modulation (rat), 111:968

Nociceptive reflex, gastric distension and, 107:985

Nociceptors, cutaneous, esophageal sensitization in noncardiac pain and, 108:311

Nocistatin, peptide identified in bovine brain, 114:1122–gn

Nocodazole
cytochrome P4502B traffic and (rat), 108:1110
vesicle targeting to apical domain and (rat), 109:1600

Nocturnal arousals, colonic motility and, 107:1372

Nocturnal blood oxygen desaturation, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
Nodules
cirrhotic, neoplasia and, 107:1581–tmig, 107:1805
lymphoid, immune adhesion molecules and, 107:1457
macroregenerative, detection with ultrasonography in cirrhosis, 112:1617
satellite, hepatocellular carcinoma and, 107:1257–tmig, 107:1425
NOLA, colonic myoelectric complexes and (mouse), 108:1371
Nonabsorptive cells, genetic hemochromatosis and, 108:2–tmig, 108:208
Nonadrenergic noncholinergic nerves, in proximal versus distal colon (rat), 115:1504
Nonadrenergic noncholinergic neurotransmitters, lower esophageal sphincter and, 106:1397–c
Nonadrenergic noncholinergic relaxations, gastric, PGE_2 in (rabbit), 110:129
Nonalcoholic steatohepatitis
expanded view of, 107:905–tmig, 107:1103
increased iron concentration and increased fibrosis, 114:311
iron overload in liver, 114:233–tmig
prognosis in, 108:1607–c
Noncardiac pain, 112:309–ss
esophageal sensitization in, 108:311
omeprazole test in, 115:42, 115:222–e
visceral hperalgesia and, 107:271–srr
Nondegraded radiolabeled chelates, intestinal permeability and, 108:1569–srr
Nonelemental formulas, for Crohn's disease, 108:1056
Nongranulomatlous chronic idiopathic enterocolitis, corticosteroid therapy, 111:629
Non-Hodgkin's lymphoma
gastrointestinal involvement in, 106:846
α4β7 in malignant lymphomatous polyposis and, 107:1519–cr
Non-insulin-dependent diabetes mellitus (NIDDM), gastric emptying in diabetes and, 109:755
Nonlysosomal proteolysis, glycine cytoprotection and (rat), 106:168
Non-outcomes research, outcomes research and, 109:304–aga
Nonoxidative metabolism, alcoholic liver disease and, 106:1094–srr
Nonparenchymal cells
hepatic, nitric oxide in experimental alcoholic liver disease and (rat), 109:899
iron overload effect on collagen expression and (rat), 107:1118
Nonresectable cholangiocarcinoma, photodynamic therapy, 114:536
Nonsense mutations
Barrett's esophagus and, 107:1012
DNA mismatch repair and, 109:1691–srr
in hepatitis B virus, 106:243–cr
Nonsmoking behavior, primary sclerosing cholangitis and, 110:1496, 110:1503, 110:1656–e
Nonsterilized knives, in hepatitis C virus transmission, 106:1596
Nonsteroidal anti-inflammatory drugs (NSAIDs)
arthritis and, 109:614–e
associated gastroduodenal ulceration, treatment and maintenance with famotidine, 112:1817
for biliary colic, 113:1–tmig
and colon cancer prevention, 110:1323–c, 114:1096–e
and colorectal cancer prevention, 113:1992–vidd, 113:1999–e
combination with phospholipid prodrugs, reduced gastrointestinal toxicity (rat), 111:990
cyclooxygense and, 107:1183–rc
decreasing the risk-benefit ratio of, 111:844–tmig
enteropathy and (rat), 106:567
familial adenomatous polypsosis and, 106:362
and gastroenteropathy, 112:1000–srr
gastropathy and, 106:1726–c
gastropathy and (rat), 108:393
arthritis and, 109:1173
GI-safe derivatives of (rat), 107:173
induction of enteropathy, 112:1–tmig
inhibition of colorectal tumorigenesis, mechanism underlying, 115:1599–ss
intestinal permeability and, 108:1573–srr
leukocyte adhesion and (rat), 109:1027–tmig, 109:1225
nitric oxide-releasing, ulcer healing and, 109:109:340–tmig, 109:340–tmig, 109:524, 109:614–e
parenteral, deranged hydrophobic barrier of gastroduodenal mucosa after (rat), 112:1931
permeability, bacteria, and enterohepatic circulation and (rat), 112:109
prescribing with antisecretory agents, 111:1145–e
ras, colonic cell growth, and apoptosis and, 113:1817–tmig
refractory peptic ulcers and, 109:1124
and risk of colorectal adenomas, 114:441
safer versions, 112:679–gn
and small intestinal injury (rat), 115:1476
sporadic colorectal adenomas and, 108:1310–e
trials of, 110:654–c
ulcers from, prevention with famotidine, 112:2143–e
Nonulcer dyspepsia
gastric barostat and, 107:596–ss
visceral hyperalgesia and, 107:271–srr
Noradrenaline
ileal crypts and (mouse), 108:1345
nerve damage in colitis and (rat), 109:718
Noradrenergic nerves, in myenteric plexus (rat), 107:993
Nor-binaltorphimine hydrochloride, fedotozine modulation of colonic distention and (dog), 107:1327
Norepinephrine
interleukins and (rat), 107:993
jejunal sodium transport and (rat), 107:675
midgut carcinoid flush and, 108:743
preascitic cirrhosis and, 108:1820
Sandhoff disease and, 106:775–cr
North Americans
anti-asialoglycoprotein receptor autoantibodies in, 107:799
asymptomatic hepatitis B virus carriers and, 106:1000
Northern blot analysis
angiogenesis in pancreatic cancer and (Syrian hamster), 108:1526
APRF/Stat3 in liver regeneration and (rat), 110:1854
butyrate and, 107:499
C3 in exocrine pancreas and, 110:1919
α-5(IV) collagen chain in fetal small intestine and, 107:957
cyclooxygenase 2 up-regulation in colorectal cancer and, 107:1183–rc
fibrinogen/fibrin deposition and (rat), 108:1124
FK506-enhanced fibrogenesis and (rat), 107:492
glutamine synthetase and, 106:1312
growth factors in ulcer healing and, 109:1068
HB-EGF in gastric mucosa and, 109:1051
HISM cell collagen increased by steroids and, 109:1457
IGF-1 binding sites in colitis and (rat), 108:644
IL-8 in HT-29 cells and, 108:653
iron overload effect on collagen expression and (rat), 107:1118
laminin receptor expression and (rat), 107:764
MHC class I and (rat), 107:781
MnSOD induction in acute colitis and (rat), 109:801

monocyte chemoattractant protein 1 and (rat), 110:1870
MUC gene pancreatic expression and, 109:953
mucin and apomucin localization and, 107:28
nm23-H1 gene in small hepatocellular carcinoma and, 107:486
organic anion transport protein and, 109:1274
PDGF in liver fat-storing cells and, 107:1110
retinoids in pancreatic cancer and, 109:1646
Schistosoma mansoni fibrosis and, 107:773
spasmolytic peptide and (rat), 106:336
tissue inhibitor of metalloproteinases 1 and 2 and, 110:821
transin secretion and (rat), 109:889

Northern Europe, autoimmune hepatitis and, 106:1321

Norwalk virus, diarrhea after marrow transplantation and, 107:1398

NOS. *See* Nitric oxide synthase

Notching, colorectal hyperplastic polyps and, 109:1468

Notice of Duplicate Publication, 107:1213

Nuclear pore complexes, nucleoporin p62 and, 110:840

Nuclear receptor expression, retinoids in pancreatic cancer and (nude mice), 109:1646

Nuclear run-on analysis, bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208

Nucleation
biliary low-density particle and, 110:1936
cholesterol crystals and, 108:1882
octreotide and (prairie dog), 108:1547
ursodeoxycholic acid and, 110:1225

Nucleation promoter, pronase resistance of cholesterol pronucleators and, 110:1926

Nucleation time, octreotide-associated gallstones and (rat), 107:1503

Nucleophiles, lactase-phlorizin hydrolase active sites and (rat), 109:1234

Nucleoporin p62, as marker for primary biliary cirrhosis, 110:840

Nucleoproteins, alcoholic liver disease and, 106:1096–srr

Nucleotides
extracellular, ATP-activated conductances in biliary cells and, 107:236
immunonutrition and, 109:1713–ss
metabolism, by parietal cells, 115:501–ss
protein synthesis and (rat), 110:1760

Nucleus
cellular, ethanol-induced damage in gastric mucosal cells and (rat), 107:907
of the solitary tract, nitric oxide synthase in esophageal peristalsis and (rat), 108:367

Nucleus ambiguus
nitric oxide synthase in esophageal peristalsis and (rat), 108:367
pseudorabies virus in, 107:728
swallowing and, 109:1700–e

Nude mice
inhibition of liver metastases of colon cancer in, 108:172
retinoids in pancreatic cancer and (nude mice), 109:1646

Nutrition
and gastroenterologist, last 100 years, 113:675–aga
modern, in health and disease, 106:1721–br
task force on training in, 110:1293–aga

Nutritional status
bacterial lipase and, 107:231
chemotherapy and, 107:594–ss
gut translocation and, 107:643
of HIV patients, 107:1208–ss

Nutritional supplements, 108:1296–aga

Nutritional support
as determinant of clinical outcome in burn patients, 111:1393–e
enteral nutrition and, 108:1281–aga
postoperative, for patients with gastrointestinal malignancy, 115:1299–ss

O_2^+, heat shock gene expression and (pig), 106:177

Oat bran, dietary, diacylglycerols and, 106:883

Oatmeal, [^{13}C]acetate breath test for gastric emptying and, 108:1048

Obesity
amylase inhibition and (dog), 108:1221
CCK-A receptor abnormality and, 109:1375
cholecystokinin and, 106:1451
intestinal permeability and, 108:1575–srr
ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
and leptin, 112:1065–gn
liver disease in, leptin and, 115:997
nonalcoholic steatohepatitis and, 107:905–tmig, 107:1103
transaminase values in subclinical Addison's disease and, 109:1324–cr

Obliterative arteriopathy, intestinal transplant pathology and, 110:1820

ob/ob obese mouse, human equivalent, 113:737–gn

Obstructive jaundice, neutrophil adhesion in cholestasis and (rat), 109:923

Obstructive sleep apnea, ischemic hepatitis and, 109:1682–cr

Occlusion, IPS and, 108:1143

Octreoscan scintigraphy, preoperative detection of duodenal gastrinomas and peripancreatic lymph nodes, 111:845

Octreotide
cholangiocarcinoma and, 108:1908–rc
colonic injection of glycerol in IBS and, 110:351

gallbladder absorption and (prairie dog), 108:1547
gallstones and, 107:1258–tmig, 107:1503
for hepatocellular carcinoma, 115:1298–ss
HIV-associated diarrhea and, 108:1616–tmig, 108:1753, 108:1939–e
inhibition of tumor cell kinetics and serum insulin growth factor I levels by in colorectal cancer, 113:767
jejunostomy and, 107:328–tmig, 107:379
Octreotide suppression test, prediction of outcome from antrectomy in gastric carcinoid tumor, 114:817–cr
Ocular lesions, colonic sarcoidosis and, 108:1556–cr
Ocular tissue, common peptide among colon, joint and, 107:103
Odansetron, mast cell degranulation in colonic motility and (rat), 107:976
Odynophagia, endoscopy compared to fluconazole in AIDS and, 110:1803
Ofloxacin, oral
versus intravenous cefotaxime in spontaneous bacterial peritonitis, 111:1011
treatment of spontaneous bacterial peritonitis with, 111:1147–e
Okadaic acid, increases intestinal epithelial paracellular permeability, 112:100
Okamoto's classification, hepatitis C virus and, 106:1603
Oleate, duodenal brake and, 110:740
[^{3}H]Oleate, fatty acid uptake during starvation and (rat), 107:1415
Oleic acid
diacylglycerols and, 106:883
trefoil peptides and (rat), 109:516
[1-^{14}C]Oleic acid, β-oxidation in Reye's syndrome and (rat), 107:517
Oleylanilide, toxic oil syndrome and, 106:691
2′,5′-Oligoadenylate synthetase, interferon α and, 108:165, 108:1192
Oligofructose, in dietary stimulation of Bifidobacteria, 108:958–tmig, 108:975
Oligonucleosome, pancreatic duct obstruction and (opossum, rat), 110:875
Oligonucleotide probes
HLA genes in Crohn's disease and, 109:1462
ICAM-1 gene and, 109:440
MUC gene pancreatic expression and, 109:953
primary sclerosing cholangitis and, 106:161
Oligopeptide transporter, intestinal, 113:332–srr
Oligosaccharides, intestinal permeability and, 108:1568–srr
OLT. ***See*** **Orthotopic liver transplantation**
Omentum, and peritonitis, 114:185–srr
Omeprazole
bacterial overgrowth and, 106:557–tmig, 106:615
for benign esophageal stricture, 107:1257–tmig, 107:1312
continuous infusions of, 106:60
for duodenogastrpesophageal reflux, 107:636–tmig, 107:747
effect on distribution of metronidazole, amoxicillin, and clarithromycin in gastric juice, 111:358
efficacy of and *Helicobacter pylori* infection, 111:1401–c
epidermal growth factor stability in gastric juice and, 108:92
and erosive esophagitis, 106:108, 108:613–ss
gastric ethanol metabolism and (rat), 108:737
gastric H^+,K^+-ATPase turnover and (rat), 109:1134
gastric mucosal pH and (rat), 107:1–tmig
gastroesophageal reflux disease and, 108:303–c, 108:1958–c
Helicobacter felis and, 108:1386
Helicobacter pylori and, 107:636–tmig, 107:738, 107:1573–correction, 108:1338–tmig, 108:1412
Helicobacter pylori augments pH-increasing effect of in duodenal ulcer, 110:725
hypergastrinemia in colon cancer and (rat), 108:1068
induces high intraglandular pressure in gastric mucosa (rat), 112:1221
nocturnal gastric acid breakthrough on, control by ranitidine, 115:1335
pancreastatin and (rat), 108:1445
for peptic stricture disease, 106:907
in prevention regimen for colon cancer, 110:1323–c
for reflux esophagitis, 107:1257–tmig, 107:1305, 107:1545–e, 107:1549–e
refractory peptic ulcers and, 109:1027–tmig
remodeling hypergastrinemia model and, 109:1407–c
safety of, 106:1400–c
test course in noncardiac chest pain, 115:42, 115:222–e
transient LES relaxations and, 109:608–srr
3-O-Methyl-glucose, active transport of by small intestine (rat), 110:1664–ss
Oncogenes
in biliary tract tumors, 107:1147
colon cancer staging and, 106:2–tmig, 106:42
c-*jes.* premalignant colon lesions and, 108:117, 108:291–e
DNA mismatch repair and, 109:1685–srr
pancreatic carcinoma and, 106:1645
premalignant colon lesions and, 108:108:117, 291–e
v-*jes.* premalignant colon lesions and, 108:117
Oncology, 113:693–br
Ondansetron
antiemetic effects, mechanism of action, 115:1606–c
in carcinoid diarrhea, 106:1184
Onions, reduced stomach cancer risk and, 110:2–tmig, 110:12
ONP-gal hydrolase, lactase-phlorizin hydrolase active sites and (rat), 109:1234
ONP-glc, lactase-phlorizin hydrolase active sites and (rat), 109:1234
Ontogenic regulation, of phospholipase C-γ1 (rat), 107:109
Oocysts, fecal, AIDS-related cryptosporidiosis and, 108:1075
Open food challenges, eosinophilic esophagitis and, 109:1503
Opioid(s)
in cholestasis, 108:1479, 108:1582–vidd
exogenous, modulation of visceral noxious information (rabbit), 111:78
nocistatin identified in bovine brain, 114:1122–gn
spinal, colorectal distension and (rabbit), 110:139
κ-Opioid agonist, aquaretic effect in cirrhosis, 109:217
Opioid receptors
in modulation
of nociception in colon (rat), 111:968
of visceral noxious information (rabbit), 111:78
Optical biopsy, with optical coherence tomography, 115:497–ss
Optical coherence tomography, optical biopsy with, 115:497–ss
Oral cavity, tumors of, HPV in, 107:1–tmig
Oral content clearance, pharyngeal swallow and, 107:396
Oral contraceptives, and smoking as risk factors for Crohn's disease relapse, 114:1143
Oral delivery system, novel, quiescence in intestinal stem cells and (rat), 107:1319
Oral-pharyngeal dysphagia, in Parkinson's disease, 110:383
Oral pressures, ileal motility patterns and (rat), 106:649

Oral rehydration
enhancement of clinical efficacy, role of low osmolality, 114:197–vidd
short bowel syndrome and, 106:1369–vidd
Oral rehydration solutions
efficacy, colonic short-chain fatty acid production and, 115:512–c
sodium and water absorption from promoted by gum arabic in diarrhea (rat), 112:1979
Oral vaccination, as *Helicobacter pylori* therapy, 109:2–tmig, 109:115
Orange juice, heartburn and, 108:2–tmig, 108:125
Orexins, appetite stimulants, 114:869–gn
Organ failure, relationship to necrosis in severe acute pancreatitis, 113:899
Organic acids, ketogenesis impairment in cirtullinemia and, 107:1154–cr
Organic anions, hepatocyte transport, impaired uptake and secretion in endotoxemic rats (rat), 112:214
Organic anion transport protein
and amino acids, 109:1274
hepatic, 109:1274
Organogenesis, colonic, α-integrin and, 110:58
Organotypic culture, retrogradely labeled myenteric neurons and, 109:866
Orient, hepatitis C in fulminant viral hepatitis and, 107:2–tmig, 107:189
Ornipressin, in treatment of hepatorenal syndrome, 115:503–ss
Ornithine, refrigerated donor livers and, 108:1510
Ornithine decarboxylase
enterocytes and (rat), 106:49
hepatocyte proliferation and (rat), 106:1024
histamine receptors in intestinal repair and (rat), 107:1297
Ornithine transcarbamylase deficiency, heterozygous, 109:282–cr
Orogastric administration, medullary TRH in adaptive cytoprotection and (rat), 109:861
Oropharyngeal accommodation, and swallow volume, 111:297
Oropharyngeal flora, esophageal infections and, 106:522–srr
Oropharyngeal osmoreceptors, in liver cirrhosis, 106:678
Oropharyngeal pressure, tongue force modulation and, 108:1418
Oropharynx
gustatory stimulation of during sleep (dog), 107:650, 107:879–e
three-dimensional reconstructions, 111:297
Orthotopic liver transplantation
for chronic hepatitis with common variable immunodeficiency, 108:d879–cr
hepatitis C after, 112:575
hepatitis C replication and genotype after, 110:2–tmig, 110:167
massive ascitic fluid loss and coagulation disturbances after, 109:1631
PGE_1 administration after, 111:701
Osmolality
low, and clinical efficacy of oral rehydration therapy, 114:197–vidd
of popular beverages, heartburn and, 108:2–tmig, 108:125
Osmolarity, intestinal permeability and, 108:1570–srr
Osmolyte, betaine as (rat), 110:1543
Osmoreceptors, hepatic, in cirrhosis, 106:678
Osmosis, hepatic glucuronidation and (rat), 108:183
Osmotic fluid retention, intestinal permeability and, 108:1570–srr
Osteocalcin, osteopenia and, 108:417
Osteomalacia, in inflammatory bowel disease, 108:417
Osteonectin, gene, *Schistosoma mansoni* fibrosis and, 107:773
Osteopenia
celiac disease and, 109:122
in Crohn's disease, 107:905–tmig, 107:1031
in inflammatory bowel disease, 108:417
Osteoporosis, assessment of risk of in children with IBD, 114:893
Ouabain
gastric mucosal pH*i* regulation and *(Necturus),* 108:999
insulin and (rat), 106:200
Outcome measurement, interpretation of randomized trials and, 110:278–vidd
Outcomes research, 109:302–aga
Outflow, gastric, duodenal brake and, 110:740
Oval cells, hepatocyte differentiation from (rat), 110:1182, 110:1311–e
Overlap, irritable bowel syndrome/dyspepsia and, 109:671
Over-the-counter medications, alcoholic liver disease and, 106:1085–srr
Overview, 113:S3
22-Oxa-1,25-dihydroxyvitamin D_3, effect on pancreatic cancer cell lines, 110:1605
Oxalate precipitation, *Escherichia coli* and, 106:1150
Oxidant(s), activated leukocytes as major source of in mesentery after abdominal irradiation (rat), 111:981
Oxidant injury
to Caco-2 cells, 107:80
glutathione and (rat), 106:1199
to hepatic mitochondria (dog), 107:1788
hepatocyte, nitric oxide and (rat), 109:206
Oxidant stress, role in pathogenesis of bile acid hepatic toxicity, 114:164
Oxidation
colonocytes and (rat), 106:423
lipid islands in gastric mucosa and, 110:369
Oxidative damage, hepatic mitochondrial DNA deletion in alcoholics and, 108:193
Oxidative stress
iver cell necrosis and, 108:255–srr
mitochondrial membrane permeability transition and (rat), 110:558
and role of pancreatitis-associated protein against apoptosis during, 114:808
L-2-Oxothiazolidine-4-carboxylate, effect in cerulein pancreatitis (mouse), 112:1681
L-2-Oxothiazolidine 4-carboxylic acid, cerulein-induced cysteine depletion and (mouse), 107:824
OX40-OX40L interactions, and intestinal manifestations of graft-versus-host disease (mouse), 115:1205
Oxygen
hepatic reperfusion injury and (rat), 108:463
liver cell necrosis and, 108:260–srr
reactive intermediates, in IL-10 release after cold liver ischemia and reperfusion (mice), 113:1701
sensitivity of propranolol clearance to reduced delivery of in cirrhotic liver (rat), 111:1039
theophylline clearance in cirrhosis and (rat), 108:1504
Oxygenation, hepatopulmonary syndrome and, 109:978, 109:1009–e
Oxygen desaturation, nocturnal blood, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
Oxygen radicals
alcoholic liver disease and, 106:1085–srr
liver reimplantation and (rat), 108:1167, 108:1317–e
MnSOD induction in acute colitis and (rat), 109:801
monocyte chemoattractant protein 1 and (rat), 110:1870
photodynamic therapy for esophageal cancer and, 108:310–tmig, 108:337
Oxygen saturation, endothelin 1 and (rat), 106:988
Oxygen tension, liver injury by alcohol blocked by antibiotics (rat), 108:218

Oxyntic mucosa, ECL cell response to gastrin and (rat), 107:2–tmig, 107:18
Oxyntomodulin, stimulation of intestinal glucose uptake (rat), 112:1971

p16
deletion analysis in gastrointestinal mucosa-associated lymphoid tissue lymphomas, 112:1871
inactivation, during neoplastic progression in Barrett's esophagus, 115:1311–tmig, 115:1381
promoter hypermethylation, during neoplastic progression in Barrett's esophagus, 115:1311–tmig, 115:1381
tumor suppressor gene, deletion analysis in gastrointestinal mucosa-associated lymphoid tissue lymphomas, 112:1871
p21*waf1*, role in growth and differentiation of Caco-2 cells, 114:503
***p53* gene**
antibodies to
in Barrett's esophagus, 115:19
in esophageal carcinoma, 115:19
Barrett's adenocarcinoma and, 106:1589
cell cycle and, 106:1708–e
colitis-associated neoplasms and, 107:420
colon cancer staging and, 106:2–tmig, 106:42
colorectal carcinoma and, 107:1571–c
GI cancers and, 106:1403–tmig
mutation
in childhood hepatocellular adenoma in familial adenomatous polyposis, 112:919
p53 protein accumulation and, 108:1176
pancreatic cancer and, 106:1645
serum antibodies to in Zollinger-Ellison syndrome, 114:1–tmig, 114:37
stomach cancer and, 106:1584
ulcerative colitis tumorigenesis and, 107:369
in verrucous squamous cell carcinoma of esophagus, 110:904–cr
p53 protein
colorectal aberrant crypt foci and, 108:434
European hepatocellular carcinoma and, 108:1176
immunoreactivity, in Barrett's esophagus, 107:1012
p53 protein expressions, intrahepatic cholangiocarcinomas and, 109:1612
p53 tumor cells, killed selectively by smart virus, 113:374–gn
p70 S6K kinase, in CCK-stimulated protein synthesis by pancreatic acini (rat), 115:520–tmig, 115:733
Pacemakers
interstitial cells of Cajal as in gastrointestinal tract, 111:492–srr
rhythm, myoelectrical activity in hyperglycemia and, 107:1390
Pachydermoperiostosis, and Crohn's disease, new syndrome of, 112:241–cr

TGF-β and (mouse), 110:576
Pancreatitis-associated protein
localization during bile salt-induced pancreatitis, 112:543

and pancreatic cell protection against apoptosis during oxidative stress, 114:808
in test for pancreatitis, 106:557–tmig, 106:728

Pancreatobiliary secretions, effect of wheat amylase inhibitors on, 111:1313

Pancreatoduodenectomy, for chronic pancreatitis, 115:237

Paneth cells
hyperplasia, pelvic ileal pouches and, 107:435
ileal crypts and (mouse), 108:1345
and innate immunity in crypt microenvironment, 113:1779–vidd
role, 114:1343–ss

P-40 antigen, primary sclerosing cholangitis and, 106:1–tmig, 106:185

Papillary hyperplasia, *MUC* gene pancreatic expression and, 109:953

Papillary stenosis, endoscopic sphincterotomy and, 110:894

Papillomavirus
esophageal infections and, 106:521–srr
esophageal papilloma and, 108:550–cr
esophageal squamous cell carcinoma and, 108:1605–c

Paracancerous lesions, gap junctions in gastric mucosa and, 109:1492

Paracellular barrier, pancreatitis and (rat), 108:1863

Paracellular intestinal transport, of six-carbon sugars (rat), 109:1207

Paracellular pathway, involvement in enterotoxic effect of zonula occludens toxin on small intestine (rabbit), 112:839

Paracellular permeability, inflammation and (rabbit), 109:13

Paracentesis
circulatory dysfunction induced by, effect on hepatic hemodynamics in cirrhosis, 113:579
large-volume, acute hemoperitoneum after, 113:978–cr
treatment, cirrhosis with ascites, 111:1002

Paracetamol, refractory peptic ulcers and, 109:1124

Paracrine effect
GABA in stomach mucosa and (rat), 107:137
intestinal secretion and, 107:1206–ss
short-loop, PDGF in liver fat-storing cells and, 107:1110

Paracrine factor, endothelin 1 in liver and, 110:534

Paracrine pathways
HB-EGF in gastric mucosa and, 109:1051
H_3 receptors and (dog, human, rat), 109:1566

Paraesophageal varices, seen by endosonography predict recurrence of esophageal varices and bleeding, 112:1811

Paraffin-embedded tissue
hepatic iron concentration in, 106:674
MUC gene pancreatic expression and, 109:953

Paraffin oil, colonic injection of glycerol in IBS and, 110:351

Parafollicular microlymphatics, lymphocyte migration in Peyer's patches and (rat), 109:1113

Parainfluenzavirus, Crohn's disease and, 108:1396

Parametric images, colonic transit and, 107:1271

Parasite loads, small intestinal injury in giardiasis and (rat), 109:766

Parasitic infections
Ancylostoma caninum and, 106:3
esophageal infections and, 106:523–srr
mast cells in, 106:286–tmig

Parathyroid hormone
celiac disease and, 109:122
osteopenia and, 108:417

Parenchyma
hypoechoic nodular pattern and, 108:1778
small hepatocellular carcinoma and, 108:768

Parenchymal cells, iron overload effect on collagen expression and (rat), 107:1118

Parenteral nutrition
chemotherapy and, 107:594–ss
childhood chronic intestinal pseudo-obstruction and, 108:1379
and cholestasis, 111:572–tmig
clinical nutrition and, 106:1395–br
complications of, 109:1408–c
effects of insulin-like growth factor I on epithelium in jejunum (rat), 111:1501
glutamine and, 107:429, 108:1961–c
glutamine dipeptide and, 107:1595
home therapy, 109:355
hyperammonemic coma and, 109:282–cr
microvillus inclusion disease and, 106:771–cr
modification of glucose and glutamine metabolism by in enterocytes (rat), 112:429
total, supplemented with short-chain fatty acid enhances functional adaptation after intestinal resection, 112:792

Parietal cells
autoimmune gastritis and (mouse), 107:1408
gastrin and (rabbit, rat), 109:1060
gastrin signaling in, 115:93
HB-EGF in gastric mucosa and, 109:1051
MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
nucleotide metabolism in, 115:501–ss
receptors, gastrin binding to, 107:2–tmig

Parkinson's disease, oral-pharyngeal dysphagia in, 110:383

Paromomycin, AIDS-related cryptosporidiosis and, 108:957–tmig, 108:1075

Parotid acinar cells, vesicle-associated membrane protein family proteins in (rat), 111:1661

Paroxysmal nocturnal hemoglobinuria, cholangitis and, 109:1338–cr

Pars esophagea, gastric ulcer disease of, association with *Helicobacter heilmannii* (swine), 111:19

Particle bombardment, in vivo gene transfer and, 106:1077–srr

Passive absorption, of small solutes, glucose in, 107:389

Passive cooling, ischemia/reperfusion injury and (rat), 109:505

Passive distension, esophageal, HRES/manometry and, 109:832

Patch clamp techniques
calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
ursodeoxycholate and, 109:965

Patent ductus venosus, familial, 110:1964–cr

Pathogens, bacterial, host resistance to, 107:906–tmig, 107:915, 107:950

Pathology, task force on training in, 110:1296–aga

Pathophysiology, functional gastrointestinal disorders and, 109:1404–br

Patient reporting, reliability of, 108:1959–c

Paucity, bile duct, 107:1844–cr

Pavlov, Ivan Petrovich, 115:0000

Pavlov pouch, phase III activity and (dog), 106:1533

Paw edema mode, GI-safe derivatives of NSAIDs and (rat), 107:173

PB1.3 monoclonal antibody, nitric oxide/selectin interaction and, 107:1050

Pco_2 electrodes, bicarbonate in gastric mucosal repair and (cat), 107:149

P-C type anomaly, anomalous arrangement of pancreaticobiliary duct and, 110:1614

PD 134308, stomach histidine decarboxylase and (rat), 109:1181

PD 135158, stomach histidine decarboxylase and (rat), 109:1181
PD 136450, stomach histidine decarboxylase and (rat), 109:1181
Peanut agglutinin (PNA), in colon cancer, 106:85, 106:117
Peanuts, and rectal proliferation, 114:1–tmig, 114:44
Pearson bone marrow-pancreas syndrome, hepatic mitochondrial DNA deletion in alcoholics and, 108:193
Pediatric gastroenterology
postgraduate training programs in, 115:455
task force on training in, 110:1295–aga
Pefloxacin, in severe acute pancreatitis, trial of, 115:1513
Pellets, cholesterol, bilirubin in (swine), 110:607
Pelvic ileal reservoir, pouchitis and neoplasia in, 109:1090, 109:1381–e
Pelvic nerve afferents, opioid effects on (rat), 111:968
Pelvic pouch(es)
ileal
early morpholoical changes in, 107:435
surface density, 109:1090
malignant transformation in ulcerative colitis, 112:1432–tmig
mucosa, neoplastic transformation of in ulcerative colitis, 112:1487
Penicillamine, nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
Pentagastrin
apolipoprotein A-IV and (rat), 109:1583
gastric mucosal pH and (rat), 107:1–tmig, 107:180
octreotide therapy and, 107:379
Pentane, liver cell necrosis and, 108:257–srr
Pentasa
Crohn's disease and, 108:310–tmig, 108:345, 108:1936–e
oral microgranules, intestinal delivery of, 108:1338–tmig, 108:1427
Pentoxifylline, polymorphonuclear leukocyte margination and (rat), 108:393
Pepsin
bFGF-CS23 and (rat), 106:1106–rc
effects of aging on secretion of, 110:1043
epidermal growth factor stability in gastric juice and, 108:92
esophageal mucosal injury and, 108:1897–srr
esophageal secretion and, 106:973
fetal gastric mucosa and, 108:1650
human spasmolytic polypeptide and, 108:108
secretion, nicotine and, 107:864–srr
Pepsinogen
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
gastric chief cells and (guinea pig), 109:1214
leukotrienes and (guinea pig), 108:1709
secretion in gastric chief cells modulated by EGF (guinea pig), 111:945
Pepsinogen A, gastric cancer and, 107:1257–tmig, 107:1335
Pept-1, in intestine, 113:322–srr
Peptic stricture
esophageal pH recording and, 110:1989–aga
medical therapy for, 106:907
Peptic ulcer disease
alternative management strategies for, 110:1314–ss
bleeding, adrenaline plus thrombin endoscopic injection, 111:623
cagA, *vacA*, and *iceA* genotypes of *Helicobacter pylori* and, 115:58
complicated, role of *Helicobacter pylori*, 113:S78
duodenal, *Helicobacter pylori* and, 108:1338–tmig, 108:1412, 111:391
gastric
growth factors and (rat), 109:1068
lack of somatostatin receptors and (rat), 107:339
recurrence after *Helicobacter pylori* eradication, 110:1244–srr
secondary biliary cirrhosis and (rat), 108:1183
transient LES relaxations and, 109:1704–e
gastric phospholipids and *Helicobacter pylori*, 112:1056–c
heterogeneous *Helicobacter pylori* isolates from family members with, 111:638
medical progress, 113:1031–aga
possible treatment with EGF, 111:1–tmig
prevention of, after eradication of *Helicobacter pylori*, 113:1082
recurrence after surgery due to aspirin, 114:883
recurrent bleeding, 114:846–ss
refractory, risk factors for, 109:1027–tmig, 109:1124, 111:267–c
vaccination for (mouse), 107:906–tmig, 107:1002
Peptide(s)
bacterial modulation of endocrine cells and (rat), 107:1259
gut, biochemistry and (rat) physiology of, 107:1567–br
mucin biosynthesis and, 107:1352
regulatory, 112:2111–aga
role as substrate in oral rehydration therapy, 114:197–vidd
shared and unique, in colon, eye, and joint, 107:103
Peptide growth factors, salivary esophagoprotection and, 110:675
Peptide histidine isoleucine, ANP/VIP in cecal smooth muscle and (guinea pig), 109:1105
Peptidergic denervation, congenital esophageal stenosis and, 109:275–cr
Peptide transport, resistance to tissue damage in small intestine (rat), 114:714
Peptide tyrosine-immunoreactive cells, in GI mucosa and (db/db mice), 108:967
Peptide YY (PYY)
amylase inhibition and (dog), 108:1221
and fat-induced ileal brake (dog), 110:1491
gastric emptying in diabetes and, 109:755
haloperidol sensitivity of inhibition of prostaglandin-induced intestinal secretion, 112:1520
inhibits function of gastric enterochromaffin-like cells (rat), 112:127
islet amyloid polypeptide and (mouse, rat), 107:712
jejunoileal resection and (rat), 106:94
medullary TRH in adaptive cytoprotection and (rat), 109:861
octreotide therapy and, 107:328–tmig, 107:379
Peptidoglycan-polysaccharide complexes, and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
Peptidylglycine α-amidatingdmonooxygenase (PAM), colon cancer and, 109:1385–e
Perception
conscious, visceral hyperalgesia and, 107:271–srr
gastric distension and, 108:330
gut distension and, 108:680
irritable bowel syndrome and, 108:636, 108:927–e
pain, sexual abuse history and, 108:d1945–ss
rectal distension, glucose and, 108:1616–tmig, 108:1700
responses to intestinal distension, 109:1742
symptom, gastroesophageal reflux disease and, 108:1739
Percutaneous endoscopic gastroscopy, LES pressure and, 106:2–tmig, 106:13

Percutaneous endoscopic gastrostomy, versus nasogastric tube feeding, 111:827–ss
Percutaneous intervention, TIPS and, 108:1143
Perforated whole-cell patch-clamp recordings, calcium currents in jejunal circular smooth muscle cells and (dog, human), 109:707
Perforation
esophageal, gastrografin for, 108:618–c
upper and lower gastrointestinal tract, evidence of aspirin use, 112:683
Perforin, expression by colon T cells, in inflammatory bowel disease (mouse), 115:849
Perfused sleeve sensor, gastroesophageal reflux in ambulant subjects and, 108:83
Perfusion
calcitonin gene-related peptide and (rat), 109:701
liver effect of fasting on uptake of bilirubin and sulfobromophthalein during (rat), 113:1707
prazosin and, 109:1257
small intestinal injury in giardiasis and (rat), 109:766
transin secretion and (rat), 109:889
Perfusion chamber, calcium signals in gastric endocrine cells and, 110:1835
Perfusion manometry, in erosive esophagitis, 106:108
Periampullary cancer, chronic pancreatitis and (cat, human), 109:1639
Peribiliary plexus, in biliary cirrhosis (rat), 111:1118
Pericentral necrotic areas, hepatic (rat), 108:1124
Pericholangitis, liver failure due to hepatitis C and, 106:248–cr
Pericryptal fibroblasts, colon cancer cells and (rat), 107:701, 107:881
Pericytes
endothelin 1 in liver and, 110:534
lipid islands in gastric mucosa and, 110:369
liver-specific, platelet-activating factor and, 106:1301
Periductal extension, intrahepatic cholangiocarcinomas and, 109:1612
Perifollicular area, lymphatic microvessels in (rat), 106:1548
Perilobular fibrosis, TGF-β and (mouse), 110:576
Perineural extension, of pancreatic adenocarcinoma, 107:219
Perinuclear antineutrophil cytoplasmic antibodies (pANCA)
in Crohn's disease, 110:1810
in primary sclerosing cholangitis and ulcerative colitis, 107:328–tmig, 107:532, 107:586–e
Perinuclear staining
antineutrophil cytoplasmic antibodies and, 108:1159
MUC6 and Lewis antigen expression and, 109:723
Perioperative nutrition
clinical nutrition and, 106:1370–vidd
major pancreatic resection and, 109:628–ss
Periorbital swelling, colonic sarcoidosis and, 108:1556–cr
Peripancreatic lymph nodes, preoperative detection of by somatostatin receptor scintigraphy, 111:845
Peripheral blood lymphocytes
primary sclerosing cholangitis and, 106:160
VCAM-1 in chronic viral hepatitis and, 108:231
Peripheral blood mononuclear cells
cow's mild allergy and, 106:1514
Crohn's disease and, 109:1029
GB virus C RNA in from patients with hepatitis B, C, and D, 113:573
hepatitis C virus and, 107:1443
ulcerative colitis and, 109:3, 109:307–e
Peripheral monocytes
inflammatory bowel disease and, 108:21, 108:284–e
interleukin 10 in IBD and, 108:1434
Peripheral sensory afferent nerve endings, calcitonin gene-related peptide and (rat), 109:701
Peripheral tissue irritation, visceral hyperalgesia and, 107:271–srr
Peripherin, myenteric neuronal (rat), 107:666
Periportal hepatitis, autoimmune hepatitis and, 108:1159
Perisinusoidal cells, liver disease and, 108:145
Peristalsis
in erosive esophagitis, 106:108
esophageal
HRES/manometry and, 109:832
primary, nitric oxide and, 115:1374
transient LES relaxations and, 109:1703–e
hemoglobin effects on esophageal motor function and, 109:1241
hiatus hernia and, 109:1818
intestinal, and cells of Cajal, 114:627–tmig
pharyngeal water stimulation inhibits, 110:419
small intestine, and interstitial cells of Cajal (mouse), 114:724
timing, propagation, coordination, and effect of esophageal shortening during, 112:1147
Peristaltic reflex
esophageal, nitric oxide synthase in (rat), 108:367
glucose effects on colon motility and, 108:350
induced by mucosal stimuli, mediated by 5-HT receptors (guinea pig, human), 111:1282
triggering, by 5-HT_4 receptor agonists (guinea pig, human, rat), 115:370
Peritoneal carcinomatosis
colon cancer, immunotherapy for (rat), 107:1697
vaccination by modified tumor cells and (rat), 109:1555
Peritoneal mesothelial cells, in peritonitis, 114:185–srr
Peritoneum
defense systems, 114:185–srr
involvement in colon cancer, 113:1812–c
pathobiology, 114:185–srr
prognostic importance of involvement in colonic cancer, 112:1096
Peritonitis
acute-phase response, 114:185–srr
arachidonic acid metabolism, 114:185–srr
bacterial, inducible nitric oxide synthase induction in macropages is host defense response to prevent (rat), 112:2056
and *Bacteroides fragilis,* 114:185–srr
intravenous cefotaxime versus oral oflaxacin, 111:1011
oral antibiotic therapy for, 111:843–tmig
pathobiology, 114:185–srr
role of adjuvant substances, 114:185–srr
spontaneous bacterial
cost-analysis of prophylactic antibiotics, 113:1289
treatment with oral ofloxacin, 111:1147–e
tuberculosis, and laparoscopy, 113:687–ss
Peritumoral vessels, neuropeptide receptors in, 110:1719
Perivenular mast cells, *Helicobacter pylori*-induced microvascular protein leakage and (rat), 107:70
Permeability
colonic, inulin and (rat), 108:12
epithelial, *Bacteroides fragilis* enterotoxin and, 110:1429
gastric, in celiac disease, 112:314–c
gastrointestinal, in celiac disease, 112:1129, 114:226–c
gut, increased in nonanorectic, nonweight-losing tumor-bearing rats, 112:118
intestinal

in Crohn's disease, 110:1330–tmig, 110:1395
Crohn's disease and, 108:2–tmig, 108:132
cryptosporidiosis and (piglet), 108:1030
dexamethasone and (rat), 106:35
FK506 and (rat), 109:107
flow rate and, 108:983
hypothermic cardiopulmonary bypass and, 106:318
overview of, 108:1566–srr
tight junction, 109:1393–e
viewpoints in, 110:967–c
in nonsteroidal anti-inflammatory drug enteropathy (rat), 112:109
paracellular
increased in intestinal epithelium by okadaic acid, 112:100
inflammation and (rabbit), 109:13
pancreatitis and (rat), 108:1863
transport of six-carbon sugars and (rat), 109:1207
ratios, lactulose/mannitol (cat, human, rodent), 108:687
region, in gastrointestinal tract, 114:2–tmig
site-specific alterations of in gastrointestinal tract, 114:83
small intestine, increased in families with Crohn's disease, 113:802
tight-junctional, increased in hepatocytes in experimental colitis (rat), 113:1347

Permselectivity, colonic permeation of inulin and (rat), 108:12

Pernicious anemia, gastrin biosynthesis in antrum of patients with, 112:733

Peroxisomal proliferator-activated receptor γ, activation, antiproliferative effects in colon cancer cells, 115:1049–rc, 115:1283–e

Peroxyl radicals, liver cell necrosis and, 108:257–srr

Peroxynitrite
activation of poly(ADP-ribose) synthase in enterocytes, 114:510
apoptosis induced by in mediated by mesalamine in intestinal epithelial cells, 113:1480
association of nitric oxide with formation of, 111:871
hepatic reperfusion injury and (rat), 108:463, 108:603–e
ileitis and (guinea pig), 109:1475

Pertussis toxin, EGF inhibits parietal cell function via PKC and, 110:469

Peru, *Helicobacter pylori* in drinking water in, 110:973–tmig, 110:1031

Peutz-Jeghers syndrome (PJS)
gene, cloning of, 115:790–ss
role of tumor suppressor gene, 114:429–gn

P300 event-related potential, genetic aspects of alcoholism and, 107:575–vidd

Peyer's patches
enhanced lymphocyte interaction in postcapillary venules of during fat absorption (rat), 112:813
integrins and, 107:1364
lymphatic microvessels in (rat), 106:1548
lymphocyte migration in (rat), 109:1113
T-cell migration in, nitric oxide and (rat), 115:618
villin in M cells and (mouse), 110:515

PG-APS, in enterocolitis (rat), 106:960

PG-PS enterocolitis, experimental, 109:1353–srr

pH
calcitonin gene-related peptide and (rat), 109:701
calcium transport in colon and, 109:876
duodenogastroesophageal reflux and, 107:636–tmig, 107:747
effects on metabolism, urease activity, and survival of *Helicobacter pylori*, 115:628
environmental, effect on proton motive force of *Helicobacter pylori*, 111:886
epidermal growth factor stability in gastric juice and, 108:92
esophageal
guidelines on use of recording, 110:1981–aga, 110:1982–aga
mucosal injury and, 108:1897–srr
sensitization in noncardiac pain and, 108:311
transient LES relaxations and, 109:1703–e
gastric mucus (rat), 107:1–tmig, 107:180
gastroesophageal reflux in ambulant subjects and, 108:83
heartburn and, 108:2–tmig, 108:125
Helicobacter pylori and, 108:1338–tmig, 108:1412
interstitial, in chronic pancreatitis (cat, human), 109:1413–tmig, 109:1639
intracellular
and colonic absorption, 111:1358
proximal colon, polarized effects of short-chain fatty acids on (rabbit), 114:737
late radiation enteropathy and, 109:1078
Na^+/H^+ exchange and (rat), 107:468
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
omeprazole and, 107:636–tmig, 107:738, 110:725
pancreatic H^+/HCO_3^- secretion and (pig), 108:850
pharyngeal acid reflux and, 109:1575
propionate-induced changes in (rabbit), 107:347
salivary esophagoprotection and, 110:675
-sensitive capsule, scintigraphic colonic transit studies and, 107:1271
stomach surface cell, increased by central vagal activation (rat), 112:409
transient LES relaxations and, 109:1704–e
trefoil peptides in gastric injury and (rat), 110:489

pH*i*
gastric mucosal (*Necturus*), 108:999
HCl in esophageal cells and (rabbit), 108:662

Phagocytosis
graft-vs.-host hemolysis after liver transplantation and, 110:1891
inflammatory bowel disease and, 108:21
interleukin 10 in IBD and, 108:1434
mast cell, of FimH-expressing enterobacteria, 107:893–ss

Pharmaceutical companies, megamergers and drug development, solitarial premotor neurons projections in and swallowing (rat), 114:631–gn
Pharynx, 114:1268

Pharmacology
gastric mucosa, 111:521–e
of motility disorders, 106:1112–e
nutritional, 106:1366–vidd

Pharmacotherapy, gastrointestinal, 106:271–br

Pharyngeal acid reflux, distribution of, 109:1575

Pharyngeal contractions, transient LES relaxations and, 109:1703–e

Pharyngeal manometry, oral-pharyngeal dysphagia in Parkinson's disease and, 110:383

Pharyngeal swallow, threshold volume triggering, 107:396

Pharyngeal water stimulation
inhibits peristalsis, 110:419
of lower esophageal sphincter, 108:441

Pharyngoesophageal nerve, swallowing and, 109:1701–e

Pharynx
coordination of bolus transit with deglutitive glottal function during eating, 112:73
gastroesophageal reflux in ambulant subjects and, 108:83
stimulation with water induces relaxation of lower esophageal sphincter, 111:378
transient LES relaxations and, 109:604–srr

Phase III activity, vagal inhibition of by gastric acid (dog), 106:1533

PHAS-I, in CCK-stimulated protein synthesis by pancreatic acini (rat), 115:520–tmig, 115:733
Phasic contractions, proximal stomach gastric emptying in diabetes and, 109:755
Phenamil, Na^+ transport in proximal colon and, 106:125
Phenelzine, Crohn's disease remission with, 115:1034–c
Phenolphthalein, in fecal Na^+ and K^+ excretion, 108:752
Phenol red methylcellulose method, gastric emptying and (rat), 106:1568
Phenolsulfonpthalein, taurocholate and (rat), 106:866
Phenol transferase, lobular distribution in liver (rats, human), 111:472
Phenotypes
apolipoprotein E, 110:1682–tmig, 110:1785, 110:2007–e
cell, and homeodomains, 113:680–e
chronic viral hepatitis and, 108:157
Crohn's disease and, 109:1029
intestinal permeability in, 108:132
positive for pANCA, 110:1810
T-cell function in, 110:1008
intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
replication error-positive, 110:38
Phentolamine, colonic relaxation and (dog), 106:606
Phenylalanine (Phe), response of kinetics of to branched chain amino acids and insulin in cirrhosis, 111:127
Phenylalanine hydroxylase (PAH) deficiency, gene therapy and, 106:1080–srr
Phenylephrine, trial natriuretic peptide in hepatic vasodilation and (rat), 108:803
p185^{HER}-2/neu, correlation of expression of stage of disease and survival in colorectal cancer, 112:1103
Phlorizin
binding, jejunal resection and (rabbit), 107:87
cryptosporidiosis and (piglet), 108:1030
Phloroglucinol, colonic injection of glycerol in IBS and, 110:351
Phorbol ester, vascular adhesion protein 1 and, 110:522
Phorbol myristate acetate (PMA)
IL-8 in HT-29 cells and, 108:653
MHC class I and (rat), 107:781
PDGF in liver fat-storing cells and, 107:1110
Phorone, glutathione depletion and (mouse), 106:464
Phosphate
calcium phosphate precipitation and (bovine), 109:1661
cholangiocarcinoma and, 108:1908–rc
chronic alcohol abuse and, 108:776
gastrin stimulation of parietal cells and (rabbit, rat), 109:1060
osteopenia and, 108:417
Phosphate-buffered saline (PBS), quiescence in intestinal stem cells and (rat), 107:1319
Phosphatidate phosphohydrolase, genetic aspects of alcoholism and, 107:577–vidd
Phosphatidylcholine
in adaptive cytoprotection (rat), 107:720
egg, ursodeoxycholic acid and, 106:1333
against fibrosis and cirrhosis (baboon), 106:152, 106:257–e
gallbladder emptying and, 108:1882
Helicobacter pylori and, 107:362
and hepatic cytoprotection by biliary cholesterol and phospholipid (rat), 107:244
polyunsaturated, prevents stricture formation (rat), 110:1093
Phosphatidylethanolamine
Helicobacter mustelae and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Helicobacter pylori and, 107:362
Phosphatidylinositol, *Helicobacter pylori* and, 107:362
Phosphatidylinositol-4,5-biphosphate, and ontogenic regulation of phospholipase C-γ1 (rat), 107:109
Phosphatidylinositol 3-kinase
in CCK-stimulated protein synthesis by pancreatic acini (rat), 115:520–tmig, 115:733
and ontogenic regulation of phospholipase C-γ1 (rat), 107:109
regulation of endocytic-transcytotic pathways and bile secretion by (rat), 113:954
required for PDGF actions in hepatic stellate cells, 112:1297
Phosphocreatine, liver regeneration and (transgenic mouse), 110:1166
Phosphodiesterase inhibitor
altered cell ions in cystic fibrosis jejunum and, 110:411
colonic permeation of inulin and (rat), 108:12
Phosphodiesters, chronic alcohol abuse and, 108:776
Phospholipase A2, biliary group II, increased in patients with multiple cholesterol stones, 112:2036
Phospholipase C, activity required for EGFR-stimulated intestinal cell migration, 114:493
Phospholipase C-γ, in adhesion and migration of hepatic stellate cells, 112:522
Phospholipase C-γ1, ontogenic regulation of (rat), 107:109
Phospholipase C-β_1, bombesin-induced activation in pancreatic acinar cells inhibited by EFG (rat), 113:1747
Phospholipid prodrugs, combination with NSAID, reduced gastrointestinal toxicity (rat), 111:990
Phospholipids
in adaptive cytoprotection (rat), 107:720
alcoholic liver disease and, 106:1085–srr
apoptosis and, 108:304–c
biliary, hepatic cytoprotection by (rat), 107:244
gastric, of peptic ulcer and *Helicobacter pylori,* 112:1056–c
gastric mucosal, *Helicobacter pylori* and, 107:327–tmig, 107:362
HepG2 cells and, 108:515
immunolocalization of duodenal proteins and (rat), 110:478
intestinal absorption of bile acids and (rabbit), 110:459
octreotide-associated gallstones and (rat), 107:1503
trinitrobenzenesulfonic acid and (rat), 110:780
Phosphomonoesters, chronic alcohol abuse and, 108:776
Phosphorus, altered cell ions in cystic fibrosis jejunum and, 110:411
Phosphorylation
cystic fibrosis rectal mucosa and, 106:890
epidermal growth factor receptor kinase and (rat), 107:1278
fructose-1,6-biphosphate and (rat), 108:1785
heat shock protein 27, cholecystokinin stimulation of in pancreas (rat), 112:1354
IL-8 in HT-29 cells and, 108:653
tyrosine, and ontogenic regulation of phospholipase C-γ1 (rat), 107:109
Photodynamic ablation, 5–aminolevulinic acid for dysplasia in Barrett's esophagus, 114:448
Photodynamic therapy
eradication of Barrett's esophagus, 112:2156–ss
for esophageal cancer, 108:310–tmig, 108:337, 108:593–e, 109:63, 109:1406–c
gastroenterological applications, 114:604–e

for nonresectable cholangiocarcinoma, 114:536
in patients with gastrointestinal malignancies, 114:427–tmig
Photomultiplier tube, free radical production after cold storage and (rat), 108:1167
Phrenic ampulla, distal esophagus or hiatus hernia, 109:1715–ss
Phylogenetic analysis, HCV genotyping and, 108:1088
Physical abuse. *See also* Abuse
gastrointestinal symptoms and, 107:905–tmig, 107:1040
Physical activity
gastroesophageal reflux in ambulant subjects and, 108:83
increases portal pressure in cirrhosis and portal hypertension, 111:1300
low bone density in Crohn's disease and, 107:1031
Physician-patient interaction, irritable bowel syndrome and, 109:1711–ss
Physician speciality, and cost-effectiveness of care of diverticulitis, 112:2147–e
Physiological regulation
gastrin processing and, 109:1386–e
of intestinal epithelial tight junctions as consequence of Na^+-coupled nutrient transport, 109:1391–e
Physiology
clinical GI, for exam taker, 107:1212–br
of gut peptides, 107:1567–br
Physistoxin-1, diarrheic shellfish poisoning, 112:1–tmig
Phytohemagglutinin (PHA)
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
raw kidney beans in small intestine and (rat), 106:73
Pickwickian syndrome, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr
Picobirnavirus, diarrhea after marrow transplantation and, 107:1398
Picrotoxinin, GABA-induced ileal electrolyte transport and, 110:498
Piercing injury, upper endoscopy and, 106:788–srr
Pigmentation, of gallstones (swine), 110:607
Pirenzipene, transient LES relaxations and, 109:1705–e
Piroxicam, regional chemoprevention of colon cancer and (rat), 109:1167
Pituitary adenylate cyclase-activating peptide, stimulates secretion of secretin and cholecystokinin, 114:1054
Placebo
budesonide for Crohn's disease and, 110:45, 110:299–e
cyclosporine for Crohn's disease and, 109:774
familial adenomatous polyposis and, 109:994–rc
tamoxifen in hepatocellular carcinoma and, 109:917
Placebo response, quantification of in ulcerative colitis, 112:1854
Plasma
apolipoprotein E phenotype in colon cancer and, 110:1785
budenoside in ulcerative colitis and, 110:1713
coagulation, orthotopic liver transplantation and, 109:1631
fresh frozen
clotting factors in, 115:800–c
orthotopic liver transplantation and, 109:1631
heterozygous ornithine transcarbamylase deficiency and, 109:282–cr
liver injury by alcohol blocked by antibiotics (rat), 108:218
neutrophil adhesion in cholestasis and (rat), 109:923
normalization of nitric oxide production in cirrhosis and (rat), 109:1624
prazosin and, 109:1257
quinolinic acid and, 108:818
Plasma amino acid consumption test, overview of, 107:1910–c
Plasma antidiuretic hormone, RU 51599 and, 109:217
Plasma cells, lipid islands in gastric mucosa and, 110:369
Plasmacytosis
basal, inflammatory bowel disease and, 107:755
IL-6-producing gastric carcinoma and, 107:543–cr
Plasma expanders, efficacy in preventing post paracentesis circulatory dysfunction in cirrhotic patients, 111:1002
Plasma membrane
calpain activation during oxidative stress and (rat), 110:1897
colonocyte, Na^+ movement across, 106:125
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
fatty acid uptake during starvation and (rat), 107:1415
hepatocyte
cytochrome P4502B traffic and (rat), 108:1110
Na^+/H^+ exchange and (rat), 107:468
vesicles
cholestasis and (rat), 107:255
hepatic system A activity and (rat), 106:480
targeting to apical domain and (rat), 109:1600
Plasmapheresis, cryoglobulinemia presenting after liver transplantation and, 110:265–cr
Plasminogen activator inhibitor (PAI)
in colorectal cancer liver metastasis, 107:1449, 107:1555–e
type 1
butyrate inhibition of urokinase secretion and, 107:410
expression in hepatic stellate cells (rat), 111:745
Platelet-activating factor
acetylhydrolases, in Caco-2 cells, 109:1826
antagonist, trial in treatment of ulcerative colitis, 115:1311–tmig, 115:1340
endogenous bacterial toxins and (rat), 109:83
in eosinophil migration across epithelium, 108:409
Escherichia coli enteritis and (rabbit), 106:306
in experimental pancreatitis, 111:1081
food protein-induced anaphylaxis and (rat), 106:1505
hypoxia-induced intestinal injury and, 106:346
leukocyte adhesion and (rat), 109:1225
liver fat-storing cells and, 106:1301
in pathogenesis of ulcerative colitis, 115:1311–tmig, 115:1340
receptors, desensitization of (guinea pig), 108:1666
Platelet-activating factor acetylhydrolase, effects on two models of experimental pancreatitis (rat, opossum), 115:1238
Platelet-derived growth factor (PDGF)
A and B, liver disease and, 108:145
gastric epithelial restoration and (rabbit), 110:775
in liver fat-storing cells, 107:1110
phosphatidylinositol 3-kinase required for actions of in hepatic stellate cells, 112:1297
Platelet-poor plasma, midgut carcinoid flush and, 108:743
Platelets
aggregation of, GI-safe derivative of NSAIDs and (rat), 107:173
alcoholism and, 107:575–vidd
depletion of, ischemia-reperfusion injury and (dog), 107:1125

Helicobacter pyloir-induced microvascular protein leakage and (rat), 107:70
in inflammatory bowel disease, 106:827–tmig, 106:840
refractory peptic ulcers and, 109:1027–tmig, 109:1124
PLC/PRF/5 cells, activin-follistatin system in, 108:834
Pleural effusion, polycystic liver disease and, 108:487
Ploidy
familial adenomatous polyposis and, 109:994–rc
microsatellite DNA markers and, 109:1690–srr
***PMS1* gene,** DNA mismatch repair and, 109:1689–srr
***p15/MTS2*, loss of in pancreatic tumors,** 110:1215
***p16/MTS1*, loss of in pancreatic tumors,** 110:1215
PNAd antigen, in inflammatory bowel disease, 106:596
Pneumatosis cystoides intestinalis, breath H_2 excretion and, 108:1560–cr
Pneumohydraulic water-perfused sleeve device, miniaturized, transient LES relaxations and, 109:1704–e
Pneumonia
iver transplantation for chronic hepatitis with common variable immunodeficiency and, 108:879–cr
percutaneous endoscopic gastroscopy and, 106:2–tmig, 106:13
Pneumonitis, interstitial, in primary biliary cirrhosis, 107:266–cr
***pnm23-H1* gene,** *nm23-H1* gene in small hepatocellular carcinoma and, 107:486
Point mutations
in biliary tract tumors, 107:1147
DNA mismatch repair and, 109:1685–srr
Ki-*ras*, intrahepatic cholangiocarcinomas and, 109:1612
Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221
p53 protein in hepatocellular carcinoma and, 108:1176
Polarity
immortalized murine biliary epithelial cells and (transgenic mice), 109:1308
retrogradely labeled myenteric neurons and, 109:866
Policy and Position Statement
American Gastroenterological Association policy statement on the use of medical practice guidelines by managed care organizations and insurance carriers, 108:925
Gastroenterology Leadership Council statement regarding the subspecialty match, 107:590
Poligeenan-induced colitis, experimental, 109:1350–srr
Polyacrylamide gel electrophoresis
HISM cell collagen increased by steroids and, 109:1457
nucleoporin p62 and, 110:840
5q-LOH in esophageal carcinoma and, 110:52
TGF-β regulation of fetal collagen and, 110:92
Polyamines
enterocytes and (rat), 106:49
hepatocyte proliferation and (rat), 106:1024
Polyarteritis nodosa, diagnosis of, 115:1044–im
Polycentric origin, colorectal hyperplastic polyps and, 109:1468
Polyclonal antiserum, mucin biosynthesis and, 107:1352
Polycystic kidney disease, adult, adenoma of ampulla of Vater and, 109:2007–cr
Polycystic liver disease, liver resection and cyst fenestration in, 108:309–tmig, 108:487
Polyethylene glycol (PEG)
bacterial adaptation in short bowel and, 109:1446
colonic hypersecretion and (rat), 109:483
intestinal permeability and, 108:1568–srr
Polymerase chain reaction (PCR). *See also* Reverse transcriptase polymerase chain reaction
adenoma-carcinoma progression in HNPCC and, 109:73
analysis of CSF for staging and monitoring Whipple's disease, 113:434
angiogenesis in pancreatic cancer and (Syrian hamster), 108:1526
bacterial colonization of cholesterol gallstones and, 108:624–tmig
Barrett's adenocarcinoma and, 106:1589
Barrett's esophagus and, 107:1012
and *cagA* gene and cytokine mRNA, 110:1744
CCK-A receptor abnormality and, 109:1375
and CD44-mRNA in colorectal cancers and adenomas, 110:362
changing prevalence of hepatitis C genotypes and, 108:581–rc
C3 in exocrine pancreas and, 110:1919
α-5(IV) collagen chain in fetal small intestine and, 107:957
colon cancer staging and, 106:2–tmig, 106:42
colorectal aberrant crypt foci and, 108:434
corticotropin-releasing hormone and, 106:859
cryoglobulinemia presenting after liver transplantation and, 110:265–cr
cytokines in longitudinal muscle myenteric plexus and (rat), 107:691
early detection of CMV enteritis, 112:1063–tmig
Echinococcus multilocularis infection and, 109:596–cr
endothelin receptors and (guinea pig), 108:51
hepatic mitochondrial DNA deletion in alcoholics and, 108:193
hepatitis B core promoter sequence analysis and, 109:1618
hepatitis B virus and, 108:1810
hepatitis C virus and, 106:994, 106:1048, 106:1072–cr, 106:1672–cr, 108:789
hepatitis D virus and, 108:623–tmig, 108:796
hepatitis E virus and, 108:225
HLA genes in Crohn's disease and, 109:1462
HPV in esophagus squamous cell carcinoma, 107:128
human papillomavirus DNA and, 109:1876
ICAM-1 gene and, 109:440
IFN therapy in chronic hepatitis C with normal ALT and, 110:291–rc
IL-10 in IBD and, 108:1434
IL-10 in pancreatitis and, 108:1917–rc
interleukins in cirrhosis and, 107:789
intrahepatic cholangiocarcinomas and, 109:1612
Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221
K-*ras*-2 mutations in colon cancer and, 108:1040
liver failure due to hepatitis C and, 106:248–cr
MAGE genes in gastric carcinoma and, 109:1522
microsatellite instability in colon cancer and, 109:465, 109:611–e
microsatellite instability in stomach cancer and, 110:38
monocyte-chemoattractant protein 1 in IBD and, 108:40
nitric oxide in primate colitis and (rhesus macaque), 108:705
organic anion transport protein and, 109:1274

prednisone in chronic hepatitis C and, 107:196
primary sclerosing cholangitis and, 106:160
5q-LOH in esophageal carcinoma and, 110:52
ras mutations in biliary tract tumors and, 107:1147
somatostatin receptor subtype on ECL cells and (rat), 107:1067
TGF-β1 and, 108:1873
in Whipple's disease, 110:1735

Polymeric enteral diets, in Crohn's disease, 106:1393–ss

Polymorphisms
and allelic loss and α-fetoprotein level in HCC, 110:184
apolipoprotein E and gallstones, 111:1609
apolipoprotein E phenotype in colon cancer and, 110:1785, 110:2006–e
genetic, in alcoholic liver disease, 107:1258–tmig, 107:1430
glutathione *S*-transferase M1, hepatocellular carcinoma susceptibility and, 109:1266
ICAM-1 gene, 109:440
intrahepatic cholangiocarcinomas and, 109:1612
Ki-*ras* mutations in duodenal juice in pancreatic cancer and, 110:221
lactase, 106:1233
T-cell receptor constant β germline gene, 106:1321

Polymorphonuclear cells, migration, in active IBD mucosa, 115:807–tmig, 115:841

Polymorphonuclear infiltrates, severe alcoholic hepatitis and, 110:1847

Polymorphonuclear leukocyte, and *cagA* gene and cytokine mRNA, 110:1744

Polymorphonuclear leukocyte margination, NSAID gastropathy and (rat), 108:393

Polymyxin B
liver injury by alcohol blocked by (rat), 108:218
PAF-induced intestinal injury and (rat), 109:83

Polypectomy, malignant colorectal polyps and, 108:1615–tmig, 108:1657

Polypeptide hormones, colon cancer and, 109:1384–e

Polypoid mass, Barrett's esophagus and, 108:1894–cr

Poly(adenosine diphosphate ribose) polymerase (PARP), cell death and, 109:472

Polyposis, malignant lymphomatous, 107:1519–cr

Polyps
adenomatous
first-degree relatives and, 109:783
stool decay-accelerating factor in colorectal cancer and, 109:826
colonic
adenomatous, inward growth, 111:1425
counts, cancer risk in familial adenomatous polyposis and, 110:1028
DNA aneuploidy in colorectal adenomas and, 109:1098
fecal occult blood testing and, 106:277–c
gold standard for, 112:292–e
high-resolution chromoendoscopy for, 110:1253–rc
hyperplastic, 113:371–tmig
malignant, 108:1615–tmig, 108:1657, 109:1725–tmig, 109:1801, 109:2034–e
medical therapy for, 106:285–tmig, 106:362
peanut lectin in, 106:117
sporadic, sulindac and, 108:1083, 108:1311–e
stool decay-accelerating factor in colorectal cancer and, 109:826
colorectal
adenomatous, stool decay-accelerating factor in colorectal cancer and, 109:826
computed tomographic colography for detection of, 110:284–rc
DNA aneuploidy in colorectal adenomas and, 109:1098
hyperplastic, histogenesis of, 109:1468
malignant, 108:1615–tmig, 108:1657, 109:1725–tmig, 109:1801, 109:2034–e
sulindac for, 107:854–cr
computed tomographic colography for detection of, 110:284–rc
counts, and cancer risk in familial adenomatous polyposis, 110:1028
in Cowden disease, mutational abrogation of *PTEN/MMAC1* and, 115:1084
cyclin D1 and, 110:669
of fundic gland, gastric adenocarcinoma in patients with attenuated adenomatous polyposis coli, 113:659–cr
hereditary nonpolyposis colorectal cancer and, 108:1337–tmig, 108:1405, 108:1590–e
hyperplastic
colonic, 113:371–tmig
colorectal, histogenesis of, 109:1468
dietary intake and lifestyle risk factors, 113:423
multiple gastric, clonality and neoplastic potential of, 112:561
occurrence and recurrence, 108:309–tmig, 108:402
proximal, adenomatous polyp risk and, 109:783
pyogenic granuloma in Barrett's esophagus and, 108:1894–cr
small, 113:1413–ss
ulcerative colitis and, 108:1361

Polysomes, nucleotides in protein synthesis and (rat), 110:1760

Polysomnography, ischemic hepatitis due to obstructive sleep apnea and, 109:1682–cr

Poly(ADP-ribose) synthase, activation and increased permeability induced by peroxynitrite in Caco-2BBe cells, 114:510

Polytherapy, *Helicobacter pylori,* and pharmacology of gastric mucosa, 111:521–e

Polyunsaturated fatty acids (PUFAs)
cytotoxicity to Caco-2 cells, 107:80
liver cell necrosis and, 108:257–srr

Polyurethane catheters, parenteral nutrition complications and, 109:1409–c

Polyvinylpyrrolidine, intestinal permeability and, 108:1569–srr

Pooled plasma derivatives, viral hepatitis and, 110:1307–e

Population-based cohort study
of Crohn's disease and cancer, 107:1675
inflammatory bowel disease and, 110:1339

Pore, colonic, colonic permeation of inulin and (rat), 108:12

Porphyrin, in photodynamic therapy for esophageal cancer, 108:310–tmig, 108:337

Portacaval anastomosis, brain edema and intracranial hypertension after (rat), 108:1097

Portal blood flow, increased, in cirrhosis (rat), 107:460

Portal decompression, hepatopulmonary syndrome and, 109:978

Portal hemodynamics, hepatic arterial resistance and, 108:1152

Portal hypertension
after transjugular intrahepatic portosystemic shunts, 112:889
anorectal variceal bleeding and, 107:1165–cr
blood hemoglobin and (rat), 110:974–tmig, 110:1156
central blood volume and (rat), 110:193
colonic angiodysplasia-like lesions in, bleeding from, TIPS for, 115:167–cr
cyclooxygenase blockade and (rat), 110:1529

endothelin 1 and, 110:534
gastric angioarchitecture in (rat), 106:702
hepatopulmonary syndrome and, 109:978
ICAM-1 and (rat), 110:866
improvement wtih abstinence from alcohol, 111:572–tmig
intestinal permeability and, 108:1576–srr
medical treatment of, 115:116, 115:230–e
nitric oxide and β-adrenoceptors in (rat), 111:727
nitric oxide synthase and (rat), 108:1487
nitric oxide synthase and nitric oxide, 112:1767–ss
nitric oxide synthase in esophageal mucosa and (rat), 110:549
physical exercise increases portal pressure, 111:1300
protein-losing enteropathy caused by, treatment with transjugular intrahepatic portosystemic shunt, 111:1679–cr
role of endothelium in abnormal responses of mesenteric vessels (rat), 111:1627
secondary biliary cirrhosis and (rat), 108:1183
splanchnic blood flow and portal pressure increased by blood in the gastric lumen (rat), 111:1103
TIPS versus surgical decompression, 112:1768–ss
TNF-α and (rat), 108:761
treatment with β-adrenegergic blockers and nitrovasodilators, 113:1794–e

Portal hypertensive gastropathy, antral vascular ectasia and, 108:138

Portal-hypertensive stomach, nitric oxide synthase overexpression in (rat), 112:1920

Portal hypertensive vasculopathy, mucosal vascular ectasias and, 109:333–c

Portal pressure
endothelin 1 and (rat), 108:1842
pharmacological reduction for prevention of variceal hemorrhage, 112:1770–ss
preoperative, prognostic value in surgical resection of HCC in cirrhotics, 111:1018
response of to β-blockade in cirrhotic patients with and without varices, 112:2012

Portal tracts, neoangiogenesis in, 108:231

Portal vascular supply, incomplete septal cirrhosis and, 106:459

Portal vein
blood, β-carotene absorption and (ferret), 108:719
normal and cirrhotic, pressure increased by 8-isoprostaglandin G2a (rat), 112:108
producer of TNF-α in regenerating liver (rat), 112:2089
thrombosis, hepatic arterial resistance and, 108:1152

Portal vessels, complement-regulatory protein expression in liver and, 107:505

Portasystemic encephalopathy, NMR spectroscopy, 112:1758–e

Portosystemic collaterals, hepatic vein thrombosis and, 106:1042

Portosystemic shunt, anorectal variceal bleeding and, 107:1165–cr

Position
gastroesophageal reflux in ambulant subjects and, 108:83
pharyngeal swallow and, 107:396

Position statement, on clinical use of esophageal manometry, 107:1865–paps

Positive feedback mechanism, leukotriene C_4 synthesis and (rat), 108:1793

Positron emission tomography (PET)
as diagnostic tool in Wilson's disease, 114:227–c
identification of brain loci processing esophageal sensation, 113:50

Postcapillary venules
Helicobacter pylori-induced microvascular protein leakage and (rat), 107:70
mesenteric, NSAID gastropathy in arthritis and (rat), 109:1173
metranidazole and, 106:1271
radiation-induced microvascular dysfunction and (rat), 108:1761

Postcibal epigastric fullness, gastric distension and, 108:330

Postcibal perception, nonulcer dyspepsia and, 107:596–ss

Postgraduate training programs, in gastroenterology, 111:537, 115:455

Postmenopausal women, nucleation of biliary cholesterol, arachidonate, prostaglandin E_2, and glycoproteins in, 112:1278

Postprandial colonic hypertonic response, in carcinoid diarrhea, 106:1184

Postprandial conditions
bacterial lipase and, 107:231
myoelectrical activity in hyperglycemia and, 107:1390

Postprandial contractions, EM523 and (dog), 109:1513

Postprandial emptying, of donor gallbladder in liver transplantation, 107:636–tmig, 107:847

Postprandial fullness, functional dyspepsia and, 107:1258–tmig

Postprandial hyperglycemia, gastric emptying in diabetes and, 109:755

Postprandial motor function, gallbladder and, 109:582

Postprandial motor pattern, jejunal sensorimotor dysfunction coping style in IBS and, 110:393

Postprandial pancreaticobiliary secretion, intraileal carbohydrate regulates (dog), 109:1977

Postprandial release, of gastrin, 107:1610

PO1 strain, small intestinal injury in giardiasis and (rat), 109:766

Postreperfusion, endothelin 1 and (rat), 106:988

Postreperfusion biopsy specimens, liver allograft, cytokinedependent mulecules in, 107:1094

Posttranscriptional control, laminin receptor expression and (rat), 107:764

Posttranslational processing, gastrin, 109:1384–e

Posttransplant lymphoproliferative disorder, intestinal transplant pathology and, 110:1820

Posture, transient LES relaxations and, 109:605–srr

Potassium
altered cell ions in cystic fibrosis jejunum and, 110:411
calcium transport in colon and, 109:876
gallbladder contractility defect and (ground squirrel), 110:251
HCl in esophageal cells and (rabbit), 108:662
induction of fecal excretion of, 108:752
pathophysiology of transport of, 107:548–srr

Potassium channel, CGRP activation of and protection of gastric mucosa (rat), 114:71

Potassium chloride
intestinal permeability and, 108:1569–srr
myenteric denervation of jejunum and (rat), 108:1629
nerve damage in colitis and (rat), 109:718

Potassium index, in nonalcoholic cirrhosis, 106:1611

Potato starch, colon cancer and, 110:508

Pouchitis
after ileal pouch-anal anastomosis, 107:1856–vidd

benefits of smoking and nicotine, 112: 1048–ss
a clarification, 109:1022–c
in pelvic ileal reservoir, 109:1090, 109: 1381–e

Poultry inspection, and bacterial infection, 112:4–gn

pp60*c-src*, overexpression in colon epithelial cells elicits invasive behavior in (rat), 114:1287

P_2 purinergic receptor, mucous glycoprotein secretion and (rabbit), 106: 1485

Prazosin, portal hypertension and, 109: 1028–tmig, 109:1257

Preascitic cirrhosis, sodium handling and, 108:1820

Precancerous lesions
gap junctions in gastric mucosa and, 109: 1492
hepatocellular carcinoma, clonal analysis of, 111:455

Precancerous state, gastric epithelial, 107:1257–tmig, 107:1288, 107: 1543–e

P55 receptors, antral G-cell function and (rabbit), 110:147

P75 receptors
antral G-cell function and (rabbit), 110: 147
TNF-α, in hepatitis B virus, 108:1337–tmig, 108:1453

Precipitation, calcium phosphate (bovine), 109:1661

Precore/core gene, of hepatitis B virus, 108:310–tmig, 108:505

Precore mutations
fibrosing cholestatic hepatitis after renal transplantation and, 107:1514–cr
in progressive hepatitis B virus, 106:243–cr

Precore regions, of hepatitis B virus, 107:1774

Prednisolone
for Crohn's disease, 107:327–tmig, 107: 357, 110:657–tmig, 110:688
fibrosing cholestatic hepatitis after renal transplantation, 107:1514–cr
for severe alcoholic hepatitis, 110:1847
for ulcerative colitis, 110:1682–tmig, 110:1713

Prednisone
in chronic hepatitis C, 107:2–tmig, 107: 196
colonic sarcoidosis and, 108:1556–cr
for intestinal graft-versus-host disease, 115:28, 115:220–e
ulcerative colitis and, 108:1889–cr

Preeclampsia, liver hemorrhage and, 106:1668–cr

Preempt, Salmonella spray for chickens, 114:1121–gn

Pregnancy
bile acid metabolism and, 106:820–c
liver hemorrhage and preeclampsia and, 106:1668–cr
and mesalamine treatment of IBD, 114:1–tmig
recurrent familial cholestasis disclosed by, 114:1354–c
recurrent familial prolonged intrahepatic cholestasis of associated with chronic liver disease, 113:966–cr
safety of mesalamine for treatment of IBD during, 114:23
transient LES relaxations and, 109:1704–e

Premature truncation
colon cancer and, 109:1368–rc
DNA mismatch repair and, 109:1691–srr

Premenopause, diacylglycerols and, 106:883

Premotor neurons
esophageal, pseudorabies virus and, 107: 728
nitric oxide synthase in esophageal peristalsis and (rat), 108:367

***Pre-NBF*, cystic fibrosis rectal mucosa and,** 106:890

Preprogastrin, colon cancer and, 109: 1385–e

Preservation fluid, refrigerated donor livers and, 108:1337–tmig, 108: 1510

Preservation injury, intestinal transplant pathology and, 110:1820

PreS mutation, in chronic hepatitis B, leads to virus retention and misassembly, 113:1976–cr

Pressure changes, esophageal, HRES/manometry and, 109:832

Pressure-volume relationships, rectoanal inhibitory reflex and, 108: 1700

Preswallowing activity, type 1 neurons and, 109:1701–e

Preterm neonates, esophageal motility in, 109:1757

Pretranslational down-regulation, of CYP 2C11 and 3A2 (rat), 109:198

Prevention regimen, for colon cancer, 110:1323–c

Prickle cells, ballooned, oral hairy leukoplakia and, 106:506–cr

Primary biliary cirrhosis
autoimmune cholangiopathy and, 107: 1839–cr
biliary epithelial cell plasma membrane antigen in, 113:1727
carbonic anhydrase antibodies and, 108: 1802
colchicine and, 108:1199, 108:1470, 108: 1592–e
genetics of, 106:1676–srr
hyperthyroidism and, 106:1342–cr
Mayo risk score and (rat), 107:1570–c
methotrexate pneumonitis in, 107:266–cr
nuclear envelope proteins in, 106:193
nucleoporin p62 as marker of, 110:840
pyruvate dehydrogenase and, 108:1802
randomized controlled trials of ursodeoxycholic acid, 113:884
treatment
of osteopenia in, 113:219
with UDCA, 113:735–tmig
UGT and, 108:1464
ursodeoxycholic acid and, 106:555–c, 106:1137–tmig, 106:1284, 108: 1470, 108:1592–e, 110:1330–tmig, 110:1515

Primary biliary sclerosis (PBS), ursodeoxycholic acid in, 106:134

Primary dual defect, in intrahepatic calculi, 108:1534

Primary sclerosing cholangitis
antineutrophil cytoplasmic antibodies and, 108:1159
autoantibodies and, 106:1–tmig, 106: 160, 106:185
carbonic anhydrase antibodies and, 108: 1802
cholangiocarcinoma in, serum tumor markers for, 108:865
colchicine and, 108:1199
colon cancer and, 110:432, 110:628–e
colonic dysplasia in, 110:331, 110:628
concomitant with ulcerative colitis, and colorectal cancer risk, 115:236–ss
genetics of, 106:1676–srr
HLA class II and, 108:870, 108:937–e
HLA DR4 and, 106:1–tmig, 106:160
mast cell cholangiopathy and, 109:1677–cr
methotrexate for, 106:286–tmig, 106:494
neutrophil antibodies in, 107:328–tmig, 107:532
nonsmoking and, 110:1496, 110:1503, 110:1658–e
pulse: methotrexate for, 107:1570–c
superficial thrombophlebitis, dysplasia, and cholangiocarcinoma in, 107: 537–cr
ursodeoxycholic acid in, 106:134

Primary transport proteins, recruitment of, 109:1706–e

Primers, PCR in Whipple's disease and, 110:1735

Principle component analysis, irritable bowel syndrome/dyspepsia and, 109:671

Progastrin
colon cancer and, 109:1142, 109:1384–e
glycine-extended, regulation of growth of gastric cancer, 113:782
phosphorylation, and prohormone cleavage, 115:1154

Progesterone
oral, treatment of retractile mesenteritis, 114:1313–cr
pretranslational down-regulation of CYP 2C11 and 3A2 and (rat), 109:198

Programmed cell death
familial adenomatous polyposis and, 109:994–rc
Fas-mediated and intestinal immunology, 113:345–e

Prohormone convertase, colon cancer and, 109:1384–e
Proinflammatory cytokine(s)
inflammatory bowel disease and, 108:21, 108:284–e, 108:1338–tmig, 108:1434
polymorphonuclear leukocyte margination and (rat), 108:393
Proinflammatory cytokine synthesis, CGP 47969A and (rabbit), 109:669–tmig, 109:812
Proinflammatory mediators
alcohol-induced liver injury and (rat), 108:1–tmig
intestinal permeability and, 106:35
Prokinesia, motility disorders and, 106:1112–e
Proliferating cell nuclear antigen (PCNA)
familial adenomatous polyposis and, 109:994–rc
protein kinase C during colon tumor development and, 110:1753
quiescence in intestinal stem cells and (rat), 107:1319
TGF-β and, 108:1963–c
Proline
DNA mismatch repair and, 109:1691–srr
esophageal secretion and, 106:973
intestinal absorption in chronically catheterized rats (rat), 113:865
toxic oil syndrome and, 106:691
Prolithogenic factors, octreotide and (prairie dog), 108:1547
Promethazine, mast cell regulation of esophageal blood flow and (opossum), 110:121
Pronase
biliary low-density particle and, 110:1936
ethanol-induced damage in gastric mucosal cells and (rat), 107:907
resistance, of cholesterol pronucleators, 110:1926
Pronase/collagenase perfusion, transin secretion and (rat), 109:889
Pronucleators, cholesterol, pronase resistance of, 110:1926
Prooxidants, liver cell necrosis and, 108:255–srr
Propidium iodide
bone marrow micrometastases in colorectal cancer and, 109:1535
fluorometry, glycine cytoprotection and (rat), 106:168
Propionate
acute colitis and (rat), 106:1190
butyrate inhibition of urokinase secretion and, 107:410
colonocyte metabolism of (rat), 106:423
intracellular pH changes and (rabbit), 107:347
lactate-anion exchanger and (rat), 106:559
Propionibacteriaceae, colonization of cholesterol gallstones, 108:624–tmig, 108:860
Propranolol
apolipoprotein A-IV and (rat), 109:1583
colonic relaxation and (dog), 106:606
increased portal blood flow in cirrhosis and (rat), 107:460
versus isosorbide-5-mononitrate effects on long-term survival and first bleeding in cirrhosis, 113:1632
plus isosorbide-5-mononitrate, combination therapy in cirrhosis, 115:116, 115:230–e
plus prazosin
combination therapy in cirrhosis, 115:116, 115:230–e
for portal hypertension, 109:1028–tmig, 109:1257
Proprogastrin mRNA, gastric acid control of mRNA translation (rat), 111:1224
Prostacyclin, portal hypertension and (rat), 110:1529
Prostaglandin(s)
age-related reductions in (rat), 107:1746
apolipoprotein A-IV and (rat), 109:1583
cells in gastrointestinal tract that produce, 111:277–tmig
cryptosporidiosis and (piglet), 106:1418
and dextran sodium sulfate-induced epithelial injury (mouse), 115:807–tmig, 115:856
eicosanoid production and (dog), 106:297
food protein-induced anaphylaxis and (rat), 106:1505
gastric acid secretion and, 107:1680
gastric emptying and (rat), 106:1568
gut and, 109:285–srr
hyperglycemia-evoked gastric slow-wave dysrhythmias and, 108:727
interleukin 1 and (rat), 106:1493
in liver transplantation, 111:819–e, 112:670–c
misoprostol and, 106:658
nicotine and, 107:864–srr
and nicotine effects on EGG and antral motility, 110:1–tmig, 110:3
peptide YY inhibition of intestinal secretion induced by is sensitive to haloperidol, 112:1520
PGE_1, administration after orthotopic liver transplantation, 111:710
PGE_2
Brunner's glands and bicarbonate secretion (rabbit, rat), 109:1160
colonic permeation of inulin and (rat), 108:12
duodenal HCO_3^- secretion and, 108:102
GI-safe derivative of NSAIDs and (rat), 107:173
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
and increased gland luminal pressure in gastric mucosa (rat), 114:1276
ischemia-reperfusion injury and (dog), 107:1125
ischemia-reperfusion injury and (rat), 109:505
lower esophageal sphincter and, 106:1397–c
NANC neurotransmission and (rabbit), 110:129
nucleation, in postmenopausal women, 112:1278
P_2 purinergic receptors and (rabbit), 106:1485
radiation-induced ion transport dysfunction and (rat), 106:324
salivary esophagoprotection and, 110:675
uremia and (rat), 107:1382
phospholipids in adaptive cytoprotection and (rat), 107:720
platelet-activating factor receptors and (guinea pig), 108:1666
produced by endotoxin-induced COX-1 in stomach during endotoxemia (rat), 113:195
Prostaglandin E receptors
EP_2 and EP_3, on gastric ECL-like cell carcinoid (African rodent), 109:341
role of subtypes in gastric and duodenal bicarbonate secretion (rat), 113:1553
Prostaglandin synthase
1 and 2
characterization of in gastrointestinal tract (rat, dog, monkey, human), 111:445
role prostaglandin synthesis, 111:277–tmig
endoperoxide, gut and, 109:285–srr
food protein-induced anaphylaxis and (rat), 106:1505
Prostanoids
endogenous, duodenal mucus and alkali secretion and (rat), 109:1526
in enteric cryptosporidiosis, 106:28
gallbladder contractility and (prairie dog), 106:1662
Protease(s)
bombesin and, 107:1627
calpain activation during oxidative stress and (rat), 110:1897
cholecystokinin and, 107:1627
hypercalcemia-induced pancreatitis and, 109:239
mitochondrial membrane permeability transition and (rat), 110:558

Protease inhibitors
mitochondrial membrane permeability transition and (rat), 110:558
in proteolytic activity and CCK release, 110:567
refrigerated donor livers and, 108:1337–tmig, 108:1510
Protectin, complement-regulatory protein expression in liver and, 107:505
Protein(s)
amylase inhibition and (dog), 108:1221
anaphylaxis induced by (rat), 106:1505
CCK-A receptor in pancreatic growth and (rat), 107:1135
dietary, heterozygous ornithine transcarbamylase deficiency and, 109:282–cr
diffusion, into cholesterol gallstones, 106:749
eosinophilic esophagitis and, 109:1503
genetic hemochromatosis and, 108:208
hypolactasia and, 107:1–tmig, 107:54
increased synthesis of, mucosal proliferation in sepsis and (rat), 107:121
and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
jejunoileal resection and (rat), 106:94
leakage, ethanol-induced damage in gastric mucosal cells and (rat), 107:907
metabolism, octreotide and, 107:328–tmig, 107:379
microvascular leakage of, *Helicobacter pylori* and (rat), 107:70
mitochondrial toxicity of tacrine and (human, rat), 110:1878
neutrophil-mediated endothelial cell injury and, 110:21
octreotide and (prairie dog), 108:1547
regulation of turnover in cirrhosis, 111:127
secretion, into bile (mouse), 109:1997
synthesis

Pulmonary vascular dilatation, hepatopulmonary syndrome and, 109:1011–e
Pulse/chase experiments, mucin biosynthesis and, 107:1352
Pulse therapy
of interferon for hepatitis C, 107:328–tmig, 107:479
methotrexate, for primary sclerosing cholangitis, 107:1570–c
Purified protein derivative, intraepithelial leukocyte response to bacterial antigens and (rat), 109:748
Purine analogues
and Crohn's disease, 111:1774–ss
low-dose, in inflammatory bowel disease, 107:1905–ss
Purine metabolites, free radicals and (cat), 106:629
Purinergic receptor agonists, ATP-activated conductances in biliary cells and, 107:236
Putrescine, hepatocyte proliferation and (rat), 106:1024
Pyloric glands
antral, pancreatic secretory trypsin inhibitor and, 106:735
HB-EGF in gastric mucosa and, 109:1051
Pyloric ligation, apolipoprotein A-IV and (rat), 109:1583
Pyloric motor response, to duodenal distension, 106:583
Pyloric muscle, inhibitory effect of erythromycin (rabbit), 111:682
Pyloric pressure events, antropyloric moducation of transpyloric flow and (pig), 107:37
Pyloric sphincter, inhibitory neurotransmission in, interstitial cells of Cajal and, 115:314
Pyloric stenosis
abnormality of cells of Cajal, 111:277–tmig
infantile hypertrophic
interstitial cells of Cajal in, 111:279
Pylorus, nitric oxide synthase in dorsal motor nucleus of vagus and (cat), 109:1484
Pylorus-ligated conscious rats, apolipoprotein A-IV and, 107:1861–rc
Pyogenic granuloma, in Barrett's esophagus, 108:1894–cr
Pyridoxal-5′-phosphate, long-term hemodialysis and, 109:1028–tmig, 109:1295
Pyrilamine
GABA-induced ileal electrolyte transport and, 110:498
histamine ileal vasodilatory mechanisms and (guinea pig), 108:712
radiation-induced ion transport dysfunction and (rat), 106:324
Pyritinol, pancreatitis caused by, 115:452–cr
[^{14}C]Pyruvate, FK506 and (rat), 109:107
Pyruvate, lactate-anion exchanger and (rat), 106:559
Pyruvate dehydrogenase, primary biliary cirrhosis and, 108:1802, 113:1727
5q-LOH, in esophageal carcinoma, 110:52

Quadruple therapy, eradicating *Helicobacter pylori* and, 109:327–ss
Quality of life
health-related, after ileoanal pull-through, 113:7
home parenteral nutrition and, 108:d1302–e
polycystic liver disease and, 108:487
Quality-of-life index, for Crohn's disease, 106:286–tmig
Quantification techniques, GI tract endocrine cells and (db/db mice), 108:967
Quantitative autoradiography, substance P receptors in IBD and, 109:850
Quasispecies, of hepatitis C virus, 108:623–tmig, 108:789
Quiescence, induction of an intestinal stem cells (rat), 107:1319
Quinolinic acid, in hepatic encephalopathy, 108:818

RIII reflex, spinal nociceptive, gastric distension and, 107:985
Rab protein(s)
3D, on gastric chief cell zymogen granules (rat, rabbit), 110:809
membrane vesicles and, 109:1708–e
Radiation enteritis
ion transport dysfunction and (rat), 106:286–tmig, 106:324
role of leukocyte-endothelial cell adhesion in, 114:1066–srr

Radiation enteropathy, late, enteric colonization with Gram-negative bacilli in, 109:1078
Radiation/radiation therapy
abdominal
chronic pancreatitis and, 107:632–c
microflora and, 109:1078
for colon cancer, 109:984–vidd
generation of free radicals in mesenteric microcirculation by neutrophils after (rat), 111:981
killing bacteria in red meat, 114:4–gn
microcirculation and (rat), 108:1761
mucosal hemorrhage induced by, 106:544–ss
photodynamic therapy for esophageal cancer and, 108:310–tmig
whole-body, ion transport dysfunction and (rat), 106:286–tmig, 106:324
Radical detoxification, MnSOD induction in acute colitis and (rat), 109:801
Radioactive nested polymerase chain reaction, HPV in esophagus squamous cell carcinoma and, 107:128
Radioenzymatic assay, carcinoid flush and, 108:743
Radiograph crystallography, and pancreatic triglyceride lipase and colipase, 107:1524–srr
Radiography
Crohn's disease positive for pANCA and, 110:1810
HIV-associated necrotizing cholangitis and, 108:247–cr
intraductal papillary-mucinous tumors of pancreas and, 110:1909
sphincter of Oddi dysfunction and, 108:242–cr
Radioimmunoassay (RIA)
anti-asialoglycoprotein receptor autoantibodies and, 107:799
atrial natriuretic peptide in cirrhosis and (rat), 108:1496
cytokines in longitudinal muscle myenteric plexus and (rat), 107:691
eicosanoid production and (dog), 106:297
EM523 and (dog), 110:241
epidermal growth factor stability in gastric juice and, 108:92
gastrin and, 106:1263
hepatitis B virus and, 106:664
H_3 receptors and (dog, human, rat), 109:1566
interleukin 1 and (rat), 106:1493
pancreastatin and (rat), 108:1445
Radioimmunoprecipitation, α_6-integrin in pancreatic cancer and, 108:523
Radioisotope assay, Gräsbeck-Imerslund disease and, 108:1622
Radiolabeled chelates, intestinal permeability and, 108:1569–srr
Radiolabeled protein, HISM cell collagen increased by steroids and, 109:1457
Radioligand(s), somatostatin receptors and, 106:951
Radioligand binding
assays, bombesin receptor gene expression in pancreatic acinar cells and (rat), 107:208
CCK-A receptor abnormality and, 109:1375
Radiology
alimentary tract and, 109:2047–br
evidence of recurrent Crohn's disease, 113:1823
foregut duplication cysts and, 109:838

vitamin E reduction of toxicity of in hepatocytes (rat), 114:164
Taurocholate
[^{3}H], organic anion transport protein and, 109:1274
bilirubin transport in endotoxemia and (rat), 107:1075
in calcium absorption (rat), 106:866
calcium binding in model bile and, 107:831
cholestasis and (rat), 107:255
cholesterol 7α-hydroxylase and (rat), 108:533
cold ischemia/reperfusion injury and (rat), 109:189
fatty acid uptake during starvation and (rat), 107:1415
and hepatic cytoprotection by biliary cholesterol and phospholipid (rat), 107:244
increased portal blood flow in cirrhosis and (rat), 107:460
intestinal absorption of bile acids and (rabbit), 110:459
leukotriene C_4 synthesis and (rat), 108:1793
signal transduction and (rat), 110:858
Taurocholic acid
colonic permeation of inulin and (rat), 108:12
hydroperoxides and bile acid toxicity (rat), 109:1249
trefoil peptides and (rat), 109:516
Taurodeoxycholate, cholesterol-rich membranes and, 106:1333

Tauroursodeoxycholate
[^{3}H], organic anion transport protein and, 109:1274
acid metabolism and (rat), 109:564
cholesterol-rich membranes and, 106:1333
kinesin inhibition by (rat), 108:824
mitogen-activated protein kinases mediate stimulation of bile acid secretion by in liver (rat), 113:1306
Tauroursodeoxycholic acid
activates PKC in isolated hepatocytes (rat), 110:1553
ethanol-induced hepatotoxicity and, 109:555
T-cell antigen receptor. *See* T lymphocytes (T cells), receptors
T-cell lymphoma, gastrointestinal
angiocentric, 110:985
bowel ischemia and, 110:985
resembling multiple lymphomatous polyposis, 111:778–cr
T cells. *See* T lymphocytes (T cells)
Tea, heartburn and, 108:125
Team approach, to managing hepatobiliary and pancreatic diseases, 110:649–br
Tear production, methotrexate pneumonitis and, 107:266–cr
Technetium-99m-albumin colloid, 45 MBq, [^{13}C]acetate breath test for gastric emptying and, 108:1048
Technetium-99m-DTPA, intestinal permeability and, 108:1569–srr
Technology assessment, in laparoscopic general surgery and gastrointestinal endoscopy, 110:915–srr
Telomerase, activity in hepatocellular carcinoma and chronic liver disease, 112:493
Telomere length, in hepatocellular carcinoma and chronic liver disease, 112:493
Temperature
calcium transport in colon and, 109:876
pharyngeal swallow and, 107:396
Tenascin
fetal colonic integrin expression and, 110:58
in mucosal regeneration and maintenance of intestinal tissue architecture (mouse), 115:1205
Terlipressin, for acute variceal hemorrhage, 111:1291
versus somatostatin, 112:1777–c
Terminal differentiation, of zymogenic cells (transgenic mice), 108:447
Testes, organic anion transport protein and, 109:1274
Testicular cancer, pyogenic granuloma in Barrett's esophagus and, 108:1894–cr
Testosterone, pretranslational down-regulation of CYP 2C11 and 3A2 and (rat), 109:198
Tetanus toxoid, and interleukin 4 in IBD and mucosal immune reactivity, 110:1683
Tetracycline
bile duct paucity and, 107:1844–cr
resistance, in *Helicobacter pylori*, 115:1272–vidd
Tetratriacontapeptide, gastrin, colon cancer and, 109:1384–e
Tetrodotoxin
chronically denervated LES in achalasia and (opossum), 109:789
colonic hypersecretion and (rat), 109:483
colonic myoelectric complexes and (mouse), 108:1371
GABA-induced ileal electrolyte transport and, 110:498
histamine ileal vasodilatory mechanisms and (guinea pig), 108:712
histamine in duodenal bicarbonate secretion and (rabbit), 108:1676
ileal motility patterns and (pat), 106:649
interleukin 1 and (rat), 106:1493
mast cell regulation of esophageal blood flow and (opossum), 110:121
mucosal secretory reflexes and, 110:2021–ss
TF antigen, in colonic proliferation, 106:117
Thalidomide
for *Enterocytozoon bieneusi* infection, 112:1781–tmig, 112:1823
for microsporidiosis, 112:1823
Thapsigargin
ileal crypts and (mouse), 108:1345
nitric oxide in gastric chief cells and (guinea pig), 109:1214
T helper cell 1 phenotype, lymphocytes in gastric mucosa during *H. pylori* infection, 114:471
Theophylline
bicarbonate transport and (rabbit), 106:1562
cirrhosis and (rat), 108:1504
cryptosporidiosis and (piglet), 108:1030
cystic fibrosis rectal mucosa and, 106:890
PGE_2 in NANC neurotransmission and (rabbit), 110:129
radiation-induced ion transport dysfunction and (rat), 106:324
Thermostable direct hemolysin enterotoxicity, calcium-dependent chloride secretion and (rabbit), 109:383
Thin-layer chromatography
gastric phospholipids and, 107:362
intestinal permeability and, 108:1569–srr
overlay binding, *Helicobacter mustelae* and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Thiobarbituric acid-reacting substances (TBARS), hydroperoxides and bile acid toxicity (rat), 109:1249
Thiol, metabolism, acute pancreatitis and, 107:888–e
Thioperamide
histamine ileal vasodilatory mechanisms and (guinea pig), 108:712
histamine receptors in intestinal repair and (rat), 107:1297
H_3 receptors and (dog, human, rat), 109:1566
This Month in GASTROENTEROLOGY
Abnormal gastric reflexes in functional dyspepsia, 107:1258
Abnormal intestinal T cells in refractory sprue, 114:428
Acetaminophen-induced liver failure, 109:1725
Acid antidote, 111:1
The acid trap, 111:277

oxygenation in hepatopulmonary syndrome and, 109:978, 109:1009–e
patency, Duplex ultrasonography in predicting, 115:1305–c
placement, occlusion or stenosis after, 106:1138–tmig, 106:1277, 106:1384–e
portal hypertension after, 112:889
prediction of malfunction, 114:868–tmig

protein-losing enteropathy caused by portal hypertension, 111:1679–cr
for refractory ascites, 110:956–ss
versus sclerotherapy plus propranolol treatment for variceal bleeding, 113:1623
stent, procedure, for variceal bleeding, 107:591–ss, 107:593–ss
versus surgical decompression of portal hypertension, 112:1768–ss
survival, 108:957–tmig, 108:1143
treatment
in treatment of gastric varices, 115:1606–c
for variceal bleeding, 108:954–c, 108:957–tmig, 108:1143
vegetative infection of, 115:110
vs. sclerotherapy, in variceal bleeding, 110:658–tmig, 110:832

Transjugular venography, TIPS and, 108:1143

Translation factor eIF 4E, and CCK-stimulated protein synthesis by pancreatic acini (rat), 115:520–tmig, 115:733

Translocation
bacterial, urinary nitrate reflects (rat), 107:47
DNA mismatch repair and, 109:1685–srr
EGF inhibits parietal cell function via PKC and, 110:469
gut, 109:1022–c
nuclear, APRF/Stat3 in liver regeneration and (rat), 110:1854

Transmembrane glycoprotein, in colorectal cancers and adenomas, 110:362

Transmembrane potentials, HCl and (rabbit), 108:662

Transmembrane regulator, in cystic fibrosis, 106:890, 109:630–ss

Transmission electron microscopy, calpain activation during oxidative stress and (rat), 110:1897

Transmucosal electrical nerve stimulation, irritable bowel syndrome and, 108:636, 108:927–e

Transmucosal electrical potential difference, duodenal HCO_3^- secretion and, 108:102

Transmural perivascular mononuclear cell infiltrates, Crohn's disease and, 109:1029

Transneuronal passage, of pseudorabies virus, 107:728

Transpapillary endoscopic cholecystectomy, acute calculous cholecystitis and, 106:1718–ss

Transplantation
bone marrow, hepatitis B immunity and, 106:1388–ss
heart, liver failure due to hepatitis C and, 106:248–cr
heart-lung, hyperammonemia after, 112:2161–c
intestinal
diagnosis of cytomegalovirus enteritis occurring after with DNA amplification, 112:1121
for microvillus inclusion disease, 106:771–cr
pathology of, 110:1820, 110:2009–e
in Japan, 113:373–gn
kidney
fibrosing cholestatic hepatitis after, 107:1514–cr
infection outcome and, 109:1719–c
liver, 112:288–aga
acute hepatitis C after, 110:2–tmig, 110:167
Alagille's syndrome and, 106:1068–cr
albumin mRNA in, 106:239
cryoglobulinemia presenting after, 110:265–cr
gallbladder volume/emptying and, 107:636–tmig, 107:847
graft-vs.-host hemolysis in, 110:1891
hepatitis B virus and, 107:1774
hepatitis C and HGV infection in patients undergoing, 111:1569
hepatitis C virus and, 106:994, 106:1672–cr
hepatocellular carcinoma and, 107:1257–tmig, 107:1425
hepatopulmonary syndrome and, 109:978
HLA antigens and, 106:1684–srr
immunology for, 107:1211–br
Kupffer cell erythrophagocytosis in, 110:1891
primary biliary cirrhosis and, 106:1138–tmig, 106:1284
role of prostaglandins in, 112:670–c
lung, fatal hyperammonemia following, 112:236–cr
marrow, diarrhea after, 107:1398
organ, oral hairy leukoplakia and, 106:506–cr

Transplantation biology, 113:2013–br

Transport
calcium, in colonic apical membrane vesicles, 109:876
impaired intestinal sugar, in cirrhotic rats, correction by low doses of insulin-like growth factor I (rat), 113:1180
lymphocyte migration in Peyer's patches and (rat), 109:1113
mechanisms, fructose, 113:1171
nutrient, Na^+-coupled, 109:1391
organic anion transport protein and, 109:1274
paracellular transport of six-carbon sugars and (rat), 109:1207
vesicle targeting to apical domain and (rat), 109:1600

Transport assays, cholestasis and (rat), 107:255

Transpyloric fluid movement
antropyloric modulation of (pig), 107:37, 107:302–e
in diabetes, 107:403

Transsynaptic retrograde tract tracing, of nitric oxide synthase in brainstem (rat), 108:367

Transversion mutations, K-*ras*-2 in colon cancer and, 108:1040

Transwell monolayers, trefoil peptides and (rat), 109:516

Trauma formulas, role of, 108:1296–aga

Trefoil peptides
expression of (rat), 106:336
gastric injury and (rat), 110:330–tmig, 110:489, 110:632–e
intestinal epithelium and (rat), 109:516

Tremor, in Alagille's syndrome, 106:1068–cr

Triacylglycerol feeding, immunolocalization of duodenal proteins and (rat), 110:478

Trichinella spiralis
interleukins and, 107:993
intestinal smooth muscle and (rat), 108:1720
in longitudinal muscle myenteric plexus (rat), 107:691
nerve damage in colitis and (rat), 109:718
neuroimmune communication in colonic submucous plexus and (guinea pig), 107:1602
role of T helper 2 cells in intestinal goblet cell hyperplasia in mice infected with (mouse), 113:542

Trichloroacetic acid
anoxic injury of hepatocytes and (rat), 106:168
Saccharomyces boulardii and, 106:65

Trichrome staining, congenital esophageal stenosis and, 109:275–cr

Triglycerides
β-oxidation of Reye's syndrome and (rat), 107:517
HepG2 cells and, 108:515
ketogenesis impairment in cirtullinemia and, 107:1154–cr
pancreatitis and, 106:742, 106:810–e

Trihydroxymethylaminomethane buffer, taurocholate and (rat), 106:866

Trimethoprim-sulfamethoxazole (TMP-SMX), for Whipple's disease, 106:782–cr

Trinitrobenzenesulfonic acid
2,4,6-
colitis and (rat), 108:644
epidermal growth factor in experimental colitis and (rat), 107:12
platelet-activating factor receptors and (guinea pig), 108:1666
butyrate and cancer in colitis and (rat), 110:1727
inflammatory bowel disease and, 109:1348–srr
nerve damage in colitis and (rat), 109:718
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
reduces colonic hydrophobicity (rat), 110:780
Tripalmitin, phospholipids in adaptive cytoprotection and, 107:720
Trisaccharide Galα1-3Galβ1-4GlcNAc, anti-gal IgG and (rat), 110:1704
Triton X-100, MnSOD/NAD diaphorase colocalization in gut and (rat), 109:1429
Trituration, prolonged, gastric emptying and (rat), 106:1505
Troleandomycin, for herbal tea hepatitis (mouse), 106:464
***Tropheryma whippelii,* PCR in Whipple's disease and,** 110:1735
Trophic factor, glutamine as, 107:429
Trophozoite load, small intestinal injury in giardiasis and (rat), 109:766
Tropical sprue, intestinal permeability and, 108:1575–srr
Tropomyosins
production of autoantibodies to in ulcerative colitis, 114:912
ulcerative colitis and, 109:3, 109:307–e
Truncal vagotomy, gallbladder dilatation and, 107:636–tmig, 107:847
Truncation
colon cancer and-rc, 109:1368
DNA mismatch repair and, 109:1691–srr
Trypan blue exclusion, thanol-induced damage in gastric mucosal cells and (rat), 107:907
Trypsin
activation in hereditary pancreatitis, 115:796–c
amino acid consumption test and, 106:488
duodenogastric reflux and, 108:1903–srr
and hereditary pancreatitis, 112:3–gn
hydrolysis, *Saccharomyces boulardii* and, 106:65
pancreatic hyperamylasemia and, 110:1905
Trypsinogen
pancreatic, liver development and, 108:1236
in vitro cerulein-induced activation, cysteine protease inhibitor and, 115:802–c
Trypsinogen activation
acute necrotizing pancreatitis and (rat), 110:232
hypercalcemic pancreatitis and, 110:324–c
mediated by cathepsin B in pancreatic acini (rat), 113:304
Trypsinogen activation peptides
in acute pancreatitis (rat), 106:207
hypercalcemia-induced pancreatitis and, 109:239
Tryptic cleavage, gastrin in colorectal carcinoma and, 109:1143
Tryptophan, quinolinic acid and, 108:818
***Ts458* gene,** immortalized murine biliary epithelial cells and (transgenic mice), 109:1308
Tube feeding
guidelines for use of, 108:1280–aga
technical review, 108:1282–aga
Tuberculosis peritonitis, and laparoscopy, 113:687–ss
Tubules, aminopeptidase N in small intestine and (fetal pig), 109:1039
Tubulovesicles, gastric H^+,K^+-ATPase turnover and (rat), 109:1134
Tufting enteropathy, cell adhesion molecule distribution in infants with, 113:833
Tumor bed, neuropeptide receptors in peritumoral vessels and, 110:1719
Tumor cell kinetics, inhibition by octreotide in colorectal cancer, 113:767
Tumorigenesis
colorectal
in compound mutant of *Dpc4 (Smad 4)* and *Apc* genes (mouse), 115:1598–ss
NSAID-mediated inhibition of, mechanism underlying, 115:1599–ss
enterochromaffin-like cell, role of gastrin, 114:1114–c
Tumor invasion, α_6-integrin in pancreatic cancer and, 108:523
Tumor markers
mucin expression in villous adenoma and, 110:84
serum, for cholangiocarcinoma in primary sclerosing cholangitis, 108:865
Tumor necrosis factor
CGP 47969A and (rabbit), 109:812
Crohn's disease and, 109:1–tmig, 109:129
cytotoxicity, ethanol-induced mitochondrial glutathione depletion and, 115:1541
Helicobacter pylori infection and, 108:65
and IL-1, effects during acute pancreatitis (mouse), 113:1741
IL-10 in pancreatitis and, 108:1917–rc
mediates apoptosis in hepatocytes, 114:1035
in mediation of Con A-initiated liver injury (mice), 111:455
microsatellites, Crohn's disease and, 110:974–tmig, 110:1053
NSAID gastropathy and (rat), 108:393
T-cell-dependent liver injury and (mouse), 109:1–tmig, 109:166
TNF-α
and AIDS-associated CMV-induced esophagitis, 114:77
antibody, controlled trial for Crohn's disease, 113:1042–ss
antral G-cell function and (rabbit), 110:147
and *cagA* gene and cytokine mRNA, 110:1744
CGP 47969A and (rabbit), 109:812
and collagen α_1(I) gene expression in hepatic stellate cells (rat), 113:625
and development of experimental colitis (mouse), 115:1312–tmig, 115:1464
gene, prediction of disease behavior in ulcerative colitis, 112:1845
gene transfer and regression of hepatocellular carcinoma (murine), 112:501
hepatitis B virus and, 108:1337–tmig, 108:1453
HT-29 cells and, 108:653
immortalized murine biliary epithelial cells and (transgenic mice), 109:1308
induction of apoptosis during hepatotoxins poisoning (mouse), 112:923
inflammatory bowel disease and, 108:21, 108:284–e
inflammatory disease and, 106:1404–tmig, 106:1455
interleukin 10 in IBD and, 108:1338–tmig, 108:1434
localization in regenerating liver (rat), 112:2089
longitudinal muscle myenteric plexus and (rat), 107:691
modulation of T-lymphocyte activation by intestinal smooth muscle cells, 112:1986
monocyte chemoattractant protein 1 and (rat), 110:1870
mucosal proliferation in sepsis and (rat), 107:121
murine autoimmune gastritis and (mouse), 110:1791
portal hypertension and (rat), 108:761

pretranslational down-regulation of CYP 2C11 and 3A2 by (rat), 109:198
production, with gluten exposure in celiac disease, 115:519–tmig, 115:551
production dependent on mast cells, in allergic gastric inflammation (mouse), 113:1560
regulation of epithelial permeability during hypoxia, 114:657
regulation of hepatocyte bile salt transporters (rodents), 111:193
regulation of intestinal cell line proliferation (mouse), 112:1231
soluble receptor, carbon tetrachloride liver injury and (rat), 108:1616–tmig, 108:1849
staphylococcal enterotoxin B and (mouse), 106:450
toxicity, in hepatocytes, modulation by glutathione (mouse, rat), 115:1229
ulcerative colitis and, 106:557–tmig, 106:637

Tumor progression, and CD44-mRNA in colorectal cancers and adenomas, 110:362

Tumor rejection antigens, *MAGE* genes in gastric carcinoma and, 109:1522

Tumor size, stool decay-accelerating factor in colorectal cancer and, 109:826

Tumor staging
colon cancer and, 109:984–vidd
esophageal cancer and, 108:337
and genetic alterations in gastric cancer, 112:1457
Helicobacter pylori in gastric cancer subtypes and, 109:885
hepatocellular carcinoma and, 108:617–c
hereditary nonpolyposis colorectal cancer and, 108:1405
hypergastrinemia in colon cancer and (rat), 108:1068
malignant colorectal polyps and, 108:1657
tamoxifen in hepatocellular carcinoma and, 109:917
TGF-β1 in colon cancer and, 110:375

Tumor suppressor gene
and allelic loss and α-fetoprotein level in HCC, 110:184
cancer and, 109:1685–srr
colon cancer staging and, 106:2–tmig, 106:42
Dpc4 (Smad 4). See Dpc4 (Smad 4)
DPC4 in colorectal cancers, 111:1369–rc
p16. *See* p16
p53. *See* p53
in pancreatic carcinoma, 106:1645
5q-LOH in esophageal carcinoma and, 110:52
role in Peutz-Jeghers syndrome, 114:429–gn

Turcot's syndrome, DNA mismatch repair and, 109:1693–srr

Turnover index, postprandial gallbladder motor function and, 109:582

Twin studies, genetic aspects of alcoholism and, 107:572–vidd

Two-compartment sleeve, calcitonin gene-related peptide and (rat), 109:701

Two-dimensional gel electrophoresis, keratin polypeptides and, 106:1326

Tylosis esophageal cancer locus, deletion on chromosome 17q25.1 in sporadic esophageal cancer, 114:1206

Tyrosine
anoxic injury of hepatocytes and (rat), 106:168
colon cancer and, 109:1385–e
DNA mismatch repair and, 109:1691–srr
GI tract endocrine cells and (db/db mice), 108:967
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475

Tyrosine kinase
EGF receptor, Shc and (rat), 109:1845
premalignant colon lesions and, 108:117, 108:291–e
Src, role in growth control of intestinal cells, 114:1335–e

Tyrosine kinase inhibitor
EGF inhibits parietal cell function via PKC and, 110:469
IL-2 effects on cytochrome P450 and (rats), 109:1589

Tyrosinemia, hereditary, in children, 108:1263–srr

Tyrosine phosphorylation, and ontogenic regulation of phospholipase C-γ1 (rat), 107:109

Tyrosine sulfation, colon cancer and, 109:1384–e

UC. *See* Ulcerative colitis

UDCA. *See* Ursodeoxycholic acid

U50488H, colorectal distension and (rabbit), 110:139

Ulceration
gastric, pancreatic secretory trypsin inhibitor and, 106:735
gastroduodenal, nonsteroidal anti-inflammatory drug-associated, treatment and maintenance with famotidine, 112:1817
multifocal stenosing, vasculitis and, 110:1628–cr

Ulcerative colitis (UC)
acute, effectiveness of balsalazide versus mesalamine treatment, 114:15
antineutrophil cytoplasmic antibodies and, 108:423, 108:597–e, 108:1159
appendectomy and, 106:1251, 106:1382–e, 107:1570–c, 113:377
autoantibodies from mucosal lymphocytes in, 109:3, 109:307–e
budesonide for, 110:1682–tmig, 110:1713, 110:2000–e
butyrate and (rat), 106:399
butyrate metabolism and colonic permeability in, 115:584
cancer surveillance in, 106:278–c, 106:1129–c, 107:906–tmig, 107:934, 107:1196–e, 108:1361, 109:1027–tmig, 109:1188, 109:1388–e, 109:1720–c
CD95 in, 113:150
chromosomal alterations in, 114:624–c
chromosomal alterations in neoplastic progression related to, 113:791
ciprofloxacin for, 115:1072, 115:1289–e
colon cancer and, 108:1321–ss
colon cancer associated with, family history as risk factor (cotton-top tamarin), 114:669
colon cancer marker and, 109:339–tmig, 109:490
colonic dysplasia in, 110:331, 110:628–e, 110:657–tmig, 110:694
colorectal cancer and, 107:2–tmig, 107:117
colorectal cancer in
familial predisposition for, 115:1039–tmig, 115:1079
sialyl-Tn antigen as marker of risk for, 115:1312–tmig, 115:1395
concomitant with primary sclerosing cholangitis, and colorectal cancer risk, 115:236–ss
correlation of appendectomy with, 114:618–c
and cross-reactive peptide in colon and ocular and joint tissue, 107:103
dexamethasone-β-D-glucuronide and (rat), 108:1688
distal, budesonide enema for, 115:525
dysplasia in, c-*src* tyrosine kinase and (rat), 107:1565–ss
effectiveness of enemas of short-chain fatty acids, 114:218–ss
Epstein-Barr virus-induced gene 3 upregulation in, 115:307
etiology and pathogenesis of, 115:182–srr
expression of inducible nitric oxide synthase in epithelial cells in, 111:871
factor XIII and (rat), 106:399
folic acid supplementation and risk for cancer or dysplasia, 112:29

glucocortoid prodrugs for (rat), 106:405
heterogeneity and, 108:597–e
HLA-B27 in, 106:557–tmig, 106:637
HLA-DR2 and, 108:423, 108:597–e
Hsp60 expression and, 108:75
ICAM-1 gene and, 109:440
IL-10 in, 108:1434
IL-1ra gene in, 106:557–tmig, 106:637
integrins and, 107:1364
itis-associated neoplasms and, 107:420
left-sided, cyclosporine enemas for, 106:1429
leukotrienes in, multicenter trial of leukotriene biosynthesis inhibitor MK-591, 112:725
Listeria monocytogenes and, 108:1338–tmig, 108:1396
low bone density in Crohn's disease and, 107:1031
low-grade dysplasia and, 108:1610–c
maintenance of remission, trial of zileuton versus mesalazine or placebo, 112:718
malignant transformation of pelvic pouch in, 112:1432–tmig
mesalamine and, 106:399, 108:1889–cr
methotrexate for, 110:1329–tmig, 110:1416, 110:1652–e
monocyte-chemoattractant protein 1 and, 108:40
multifocal neoplasia in colon and appendix in, pathological and molecular features, 115:1566–cr
mutation of TGF-βI type II receptors in neoplasms associated with, 112:40
neoplasia, human *MSH2* germline substitution in, 109:151
neoplasia in, mismatch repair function and, 110:1322–c
neoplastic transformation of pelvic pouch mucosa in, 112:1487
neutrophil antibodies in, 107:328–tmig, 107:532, 107:586–e
oral hairy leukoplakia in, 106:506–cr
osteopenia and, 108:417
PAF acetylhydrolases and, 109:1826
pANCA in, 110:1810
parenteral nutrition and, 106:1368–vidd
pathogenesis of, 115:519–tmig
platelet-activating factor in, 115:1311–tmig, 115:1340
peanut lectin and, 106:117
pediatric, serological assays in, diagnostic accuracy of, 115:822
pelvic ileal pouch and, 107:435, 109:1090
p53 gene mutations in, 107:369
platelets in, 106:827–tmig, 106:840
precancerous marker in, 115:1312–tmig, 115:1395
prediction of disease behavior with genetic markers, 112:1845
primary sclerosing cholangitis and, 106:1–tmig, 106:185
production of autoantibodies to tropomyosin isoforms in, 114:912
prognosis for, long-term, 107:1–tmig, 107:3, 107:300–e
prophylactic colectomy for, 109:1027–tmig, 109:1188, 109:1388
quantification of placebo response, 112:1854
relapse, 107:3
remission, 107:1, 107:3
role of hydrogen sulfide and bismuth subsalicylate in pathogenesis, 114:867–tmig
search for pathogenic antigens, 114:1099–e
serum thrombomodulin as marker of disease activity, 113:107
sialosyl-Tn antigen and, 109:339–tmig, 109:490
smoking and, 106:558–tmig, 106:807, 108:1683
substance P receptors and, 109:850
therapeutic placebo in, 113:2021–c
toxic megacolon and, 109:1497
transglutaminase activity and (rat), 106:399
treatment, trial of platelet-activating factor antagonist in, 115:1311–tmig, 115:1340
treatment of, 115:519–tmig
tumor necrosis factor α and, 106:1455
ultrastructure of interstitial cells of Cajal at colonic submuscular border in, 111:1447

Ulcerative colitis-like disease, gene-targeted immunologic knockouts and (mouse), 107:312–ss

Ulcerative esophagitis, endoscopy compared to fluconazole in AIDS and, 110:1803

Ulcerative proctitis, budesonide enema for, 115:525

Ulcerogenic pancreatic tumor syndrome, 113:1057–tmig

Ulcers
bFGF-CS23 for (rat), 106:1106–rc
colonic sarcoidosis and, 108:1556–cr
Crohn's disease and, 108:1396
duodenal
Helicobacter pylori and, 109:670–tmig, 109:681
Helicobacter pylori and (rat), 107:1563–ss
treatment of *Helicobacter pylori* infection provokes reflux esophagitis, 112:1442
gastric, growth factors and (rat), 109:1068
gastroduodenal, recurrent bleeding, 114:846–ss
GI-safe derivatives of NSAIDs and (rat), 107:173
healing, nitric oxide-releasing NSAIDs and, 109:340–tmig, 109:524, 109:614–e
human spasmolytic polypeptide and, 108:108
lack of somatostatin receptors in (rat), 107:339
Listeria monocytogenes and, 108:1338–tmig, 108:1396
microscopic, epidermal growth factor in experimental colitis and (rat), 107:12
NSAID, prevention with high-dose famotidine, 112:2143–e
peptic, vaccination for (mouse), 107:906–tmig, 107:1002
porcine model, 113:366–c
role of aspirin in postsurgical recurrence, 114:867–tmig
stress ulcer prophylaxis not for everyone, 107:1560–ss
transient LES relaxations and, 109:1704–e

Ultrafast computerized tomography, esophageal bolus transit imaged by, 110:1422

Ultrasound (US)
atrial natriuretic peptide in cirrhosis and (rat), 108:1496
cholangiocarcinoma in primary sclerosing cholangitis and, 108:865
choledocholithiasis and, 106:1062
detection of macroregenerative nodules in cirrhosis, 112:1617
for diagnosis of TIPS malfunction, comparison with venography, 115:1603–c
donor gallbladder in liver transplantation and, 107:847
duplex, in predicting patency of TIPS, 115:1305–c
endoscopic. *See* Endoscopic ultrasonography (EUS)
gallbladder emptying and, 108:1882
hepatocellular carcinoma and, 107:1257–tmig, 107:1425, 108:624–tmig, 108:812, 108:1778
high-frequency esohageal, manometry and, 109:832
HIV-associated necrotizing cholangitis and, 108:247–cr
hydrocolonic, in colonic polyp and tumor detection, 109:1014–ss
insulin autoimmune syndrome and, 109:1673–cr
liver failure due to hepatitis C and, 106:248–cr
mast cell cholangiopathy and, 109:1677–cr

pancreatic hyperamylasemia and, 110:1905
postprandial gallbladder motor function and, 109:582
pyogenic granuloma in Barrett's esophagus and, 108:1894–cr
three-dimensional, assessment of intragastric distribution and gastric emptying, 113:38
transducer/manometry probe, esophageal motility and, 109:832

Ultrastructure, small intestinal, cholera and, 109:422

Umbilicus, carcinoma of pancreas with metastasis to, 114:632–im

Unilamellae, biliary, hepatic cytoprotection and (rat), 107:244

Unilamellar vesicles, ursodeoxycholic acid and, 106:1333

Unipolar cells, retrogradely labeled myenteric neurons and, 109:866

United Kingdom
Helicobacter pylori in dyspepsia and, 107:1671
transaminase values in subclinical Addison's disease and, 109:1324–cr

United States
digestive diseases in, 108:947–br
hepatitis B core promoter sequence analysis and, 109:1618
home parenteral and enteral nutrition therapies in, 109:355
precore mutation in hepatitis B virus and, 106:243–cr

U.S. Preventative Services Task Force, recommendations for colorectal cancer screening, 111:1381–aga

University of Wisconsin preservation solution
cold ischemia/reperfusion injury and (rat), 109:189
complement-regulatory protein expression in liver and, 107:505
free radical production after cold storage and (rat), 108:1167
refrigerated donor livers and, 108:1337–tmig, 108:1510

Unsaturated fats, in mucosal adaptation (rat), 106:94

Upper esophageal sphincter (UES)
esophageal achalasia and, 109:1328–cr
pharyngeal water stimulation inhibits peristalsis and, 110:419
relaxation, oral-pharyngeal dysphagia in Parkinson's disease and, 110:383

Upper gut function, intraileal carbohydrate and (dog), 109:1977

Up-regulation
neuropeptide receptors in peritumoral vessels and, 110:1719
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
of TGF-α binding sites in colitis (rabbit), 109:24

Urea, intestinal permeability and, 108:983

Urea cycle, heterozygous ornithine transcarbamylase deficiency and, 109:282–cr

Urease
and acid resistance of *Helicobacter pylori,* 114:58
B subunit, *Helicobacter pylori,* immunization therapy and (mouse), 109:2–tmig, 109:115
Helicobacter felis, gastritis (mouse), 113:1118
Helicobacter pylori
(rat), 108:309–tmig, 108:320
gastritis, 111:277–tmig
in immunization against *Helicobacter felis* infection (mouse), 107:906–tmig, 107:1002
pH and, 115:628
stimulates mononuclear phagocyte activation and inflammatory cytokine production, 111:419
sucralfate and, 110:717, 110:947–e
therapeutic immunization against *Helicobacter mustelae* and, 110:1770

Urease-independent mechanism, of omeprazole, 107:636–tmig, 107:738, 107:1573–correction

Uremia
intestinal permeability and, 108:1576–srr
prostaglandin E_2 and (rat), 107:1382

Urethane
medullary TRH in adaptive cytoprotection and (rat), 109:861
pancreatic polypeptide and (rat), 108:1517

Urgency, Crohn's disease positive for pANCA and, 110:1810

Uridine diphosphate (UDP)-glucuronic acid, in liver microsomal vesicles (rat), 108:183

Uridine-diphosphate glucuronosyltransferase (UGT)
liver injury and, 108:1464
lobular distribution in liver (rats, human), 111:472
microsomal autoantibodies in viral hepatitis and, 108:455

Uridine triphosphate, ATP-activated conductances in biliary cells and, 107:236

Urine
nitric oxide-derived nitrate excretion in, bacterial translocation and (rat), 107:47
output, FK506 and (rat), 109:107
specimen collection, 24-hour,paracellular transport of six-carbon sugars and (rat), 109:1207

Uroguanylin
diarrhea and zinc deficiency, 114:221–ss
expression by enterochromaffin cells in gastrointestinal tract (rat), 113:1007
and guanylin, 113:736–tmig
pattern of mRNA expression in intestine (mouse), 113:1000–rc

Urokinase
for mesenteric venous thrombosis, 110:1633–cr
secretion of, butyrate and, 107:410

Urokinase plasminogen, enhanced activation and pathogenesis of chronic pancreatitis, 113:904

Urokinase-type plasminogen activator (u-PA), colorectal cancer liver metastasis, 107:1449, 107:1555–e

Urosepsis, sulindac and, 108:1083

Ursodeoxycholate
Cl^- currents activated by, 109:965
effect on liver disease in FVB mice with *mdr2* gene knockout, 111:165
intestinal absorption of bile acids and (rabbit), 110:459
kinesin inhibition by (rat), 108:824
sulfate conjugates and (rat), 109:1835, 109:2036–e
tauroursodeoxycholate and (rat), 109:564
unconjugated, cholesterol-rich membranes and, 106:1333

Ursodeoxycholic acid
for bile abnormalities in microlithiasis, 115:124
in cholestatic liver disease, 106:134
cholesterol-rich membranes and, 106:1333
dietary, and enterohepatic cycling of bilirubin (mouse, rat), 115:724
effectiveness in reducing cholestasis in TPN-treated infants (pigs), 111:843–tmig
ethanol-induced hepatotoxicity and, 109:555
6-fluoro analogue of (hamster, rat), 108:1204
gallbladder emptying and, 107:1496
intestinal permeability and, 108:1576–srr
MHC class I and (rat), 107:781
primary biliary cirrhosis and, 106:555–c, 106:1137–tmig, 106:1284, 108:1470, 108:1592–e, 110:1330–tmig, 110:1515
randomized controlled trials, 113:884
for primary sclerosing cholangitis, 107:537–cr
reduces bile proteins, 110:1225

reduces cholestasis in TPN (pig), 111: 1111
site-specific delivery to colon (rat), 109: 1835, 109:2036–e
treatment of PBC, 113:735–tmig

Ussing chambers
acute colitis and (rat), 106:1190
cryptosporidiosis and, 106:28, 106:1418
eicosanoid production and (dog), 106:297
FK506 and (rat), 109:107
GABA-induced ileal electrolyte transport and, 110:498
modified, bicarbonate secretion from distal colon and (rat), 107:329
radiation-induced ion transport dysfunction and (rat), 106:286–tmig, 106: 324
techniques, cryptosporidiosis and (piglet), 108:1030
tumor necrosis factor α and, 106:1514

Uterine cervix, tumors of, HPV in, 107: 1–tmig

utr1 monoclonal antibody, antral G-cell function and (rabbit), 110:147

***vacA* gene,** *Helicobacter pylori,* clinical and pathological importance, 112:92

Vaccination
DNA, and viral hepatitis, 112:1410–e
gastrointestinal cancer and, 109:1414–tmig
Helicobacter pylori therapy and, 109:2–tmig, 109:115
hepatitis B virus, immunodominant epitopes within recombinant hepatitis B virus surface antigen as candidates for design of, 112:2017
modified tumor cells and (rat), 109:1414–tmig, 109:1555
for peptic ulcer (mouse), 107:906–tmig, 107:1002
role for against *Helicobacter pylori,* 113:S149
therapeutic, for *Helicobacter mustelae* (ferret), 110:1681–tmig, 110:1770, 110:2003–e

Vacuolar-type H^+-adenosine triphosphatase, pancreatic H^+/HCO_3^- secretion and (pig), 108:850

Vacuolating cytotoxin gene (*vacA*), *Helicobacter pylori,* clinical and pathological importance, 112:92

Vacuoles, aminopeptidase N in small intestine and (fetal pig), 109:1039

Vacuuming, for congested blood, in hepatitis C virus transmission, 106: 1596

Vagal afferents
in gastric acid-induced c-fos transcription in brainstem (rat), 115:649
pathway, cholecystokinin and (rat), 107: 327–tmig, 107:525

Vagal dysfunction, cisapride and, 106: 916

Vagal inhibition, phase III activity and (dog), 106:1533

Vagal innervation, GI tract, 114:559–srr

Vagally induced inhibitory responses, PGE_2 in NANC neurotransmission and (rabbit), 110:129

Vagal reflexes, gut distension and, 108: 680

Vagal tone, pancreatic polypeptide and (rat), 108:1517

Vagotomy
acute, cholecystokinin-stimulated pancreatic enzyme secretion and (rat), 107: 525
acute bilateral subdiaphragmatic, medullary TRH in adaptive cytoprotection and (rat), 109:861
apolipoprotein A-IV and (rat), 109:1583
cholecystokinin-stimulated pancreatic enzyme secretion and (rat), 107:525
pancreatic polypeptide and (rat), 108: 1517

Vagovagal reflex
capsaicin in colonic activity and (conscious dog), 109:1197
phase III activity and (dog), 106:1533

Vagus nerve
adaptive gastric protection and (rat), 109: 861
apolipoprotein A-IV and (rat), 109:1583
capsaicin in colonic activity and (consious dog), 109:1197
central, activation, and gastric mucus gel thickness and surface cell intracellular pH (rat), 112:409
esophageal EMG modulation and, 109: 1437
gallbladder emptying and, 107:636–tmig, 107:847
and inhibition of gastrin secretion in antrum (pig), 111:925
mast cell degranulation in colonic motility and (rat), 107:976
migrating motor complex and, 107:1912–c
neuronal pathways and transmission to LES (guinea pig), 115:661
nitric oxide synthase in dorsal motor nucleus of (cat), 109:1484
in rectal distention-induced colonic net water secretion (rat), 112:1596
swallowing and, 109:1700–e

Valerate, lactate-anion exchanger and (rat), 106:559

Valine, *ras* mutations in biliary tract tumors and, 107:1147

Valinomycin
calcium transport in colon and, 109:876
Na^+ transport in proximal colon and, 106:125

Valsalva maneuver, swallowing and, 109:1701–e

VAMPs. *See* Vesicle-associated membrane proteins

Vanishing bile duct syndrome, acute drug-related, in pediatric patient, 115:743–cr

Variceal bleeding/hemorrhage
anorectal, 107:1165–cr
in cirrhosis, primary prophylaxis, 112:473
endoscopic prophylaxis, 114:1102–ss
incomplete septal cirrhosis and, 106:459
physical exercise increases risk of in cirrhosis and portal hypertension, 111: 1300
prevention
in cirrhosis, 112:473
in esophagus, 112:1781–tmig
with pharmacological portal pressure reduction, 112:1770–ss
and splanchnic blood flow and portal pressure in portal hypertension (rat), 111:1103
terlipressin and somatostatin therapy for, 111:1291, 112:1777–c
TIPS for, 107:591–ss, 107:593–ss, 108: 954–c, 108:957–tmig, 108:1143, 111:1–tmig, 111:139
versus sclerotherapy plus propranolol, 113:1623

Varicella zoster virus (VZV), esophageal infections and, 106:520–srr

Varices
in cirrhosis, volume, endoscopic assessment of, 113:1640
cirrhotic patients with and without, portal pressure response to β-blockade in, 112:2012
esophageal
portal hypertension and (rat), 110:549
sufficient treatment of, 110:329–tmig, 110:529, 110:635–e
TIPS vs. sclerotherapy for, 110:658–tmig, 110:832
gastric, treatment, TIPS in, 115:1606–c

Vascular adhesion molecule 1 (VCAM-1)
in chronic viral hepatitis, 108:231
expression of mRNA gene for in small intestinal cell cultures, 111:8

Vascular adhesion protein 1 (VAP-1), T cell binding to hepatic endothelium and, 110:522

Vascular ectasias, mucosal, 109:333–c

Vascular endothelial growth factor (VEGF), angiogenesis in pancreatic cancer and (Syrian hamster), 108:1526

Vascular hyporeactivity, endothelin 1 in cirrhosis and (rat), 107:1085, 107:1201–e
Vascularity, angiogenesis in pancreatic cancer and (Syrian hamster), 108:1526
Vascular malformations, multiple focal nodular hyperplasia of liver and, 108:1256–cr
Vascular occlusion, inflammatory bowel disease and, 108:1011, 108:1305–e

Visceral afferents, rectoanal inhibitory reflex and, 108:1700
Visceral analgesia, for management of functional gastrointestinal disease, 115:1023–ss
Visceral angiography, multiple focal nodular hyperplasia of liver and, 108:1256–cr
Visceral hyperalgesia, basic and clnical aspects of, 107:271–srr
Visceral noxious information, modulation by exogenous opioids (rabbit), 111:78
Visceral noxious stimulation, intrathecal opioid receptor agonist affects on (rabbit), 110:139
Visceral pain
irritable bowel syndrome, kapping, 111:531–ss
regional cerebral activity in normal and pathological perception of, 112:64
Visceral sensitivity, mediators and pharmacology, 112:1714–srr
Visceromotor response, colorectal distention and (rabbit), 110:139
Viscerosensitive response, neurokinin 1 and 2 receptors in (rat), 107:94
Viscerosomatic referral, irritable bowel syndrome and, 108:636, 108:927–e
Viscerovisceral reflexes, colonic injection of glycerol in IBS and, 110:351
Viscosity
salivary esophagoprotection and, 110:675
tongue force modulation and, 108:1418
Visual analogue scales, satiety effects of cholecystokinin and, 106:1451
Visual function, Whipple's disease and, 106:782–cr

Vitamin A
alcoholic liver disease and, 106:1085–srr
β-carotene conversion to (ferret), 108:719
Vitamin B_6, long-term hemodialysis and, 109:1028–tmig, 109:1295
Vitamin B_{12}
absorption, IDS-related cryptosporidiosis and, 108:957–tmig, 108:1075
and barium in IBD, 113:371–tmig
deficiency after gastric surgery, early detection, 111:1151–ss
plasma, normalization by intranasal hydroxocobalamin, 113:430
Vitamin D
celiac disease and, 109:122
malabsorption, low bone density in Crohn's disease and, 107:905–tmig
osteopenia and, 108:417
Vitamin D_3 analogue, role in isoforms of PKC in chemopreventative effects of in colonic tumorigenesis (rat), 111:118
Vitamin E
alcoholic liver disease and, 106:1095–srr
β-carotene absorption and (ferret), 108:719
for cirrhosis (rat), 110:974–tmig, 110:1150
fructose-1,6-biphosphate and (rat), 108:1785
reduction of hepatocyte injury and oxidant damage to mitochondria caused by TCDC (rat), 114:164
V_m, HCl in esophageal cells and (rabbit), 108:662
VNB3 strain, small intestinal injury in giardiasis and (rat), 109:766
VNCC epithelial cells, eicosanoid production by (dog), 106:297
Vocal cord closure
during deglutition, dynamic magnetic resonance imaging of, 109:843
deglutitive, 108:1357
Volitional control, tongue force modulation and, 108:1418
Voltage-gated current, in carcinoid cells of gut, 113:90
Volume, tongue force modulation and, 108:1418
Volume expansion
in cirrhosis, 109:1726–tmig, 109:1917
in treatment of hepatorenal syndrome, 115:503–ss
Vomiting, functional dyspepsia and, 107:1258–tmig
von Willebrand's disease, inflammatory bowel disease and, 108:1011, 108:1305–e
$V_\beta 6^+$ T-cell receptors, self-superantigens in autoimmune gastritis and (mouse), 107:924
Wakefulness
colonic motility and, 107:1372
as prerequisite for swallowing, 107:650, 107:879–e
Wall motion, esophageal, HRES/manometry and, 109:832
Wall tension, endoscopic assesment of in cirrhosis, 113:1640
Walsh, John H., 106:1139–aga
Warm ischemia, preoperative, liver allografts and, 107:1094
Warthin-Starry stain, *Helicobacter pylori* diagnostic tests and, 109:136
Water
absorption
glucose-induced, 107:389
small intestinal injury in giardiasis and (rat), 109:766
cellular volume, increased portal blood flow in cirrhosis and (rat), 107:460
cerebral, after hepatectomy (rat), 108:1097
colonic transport of, cholera toxin and (rat), 108:2–tmig, 108:34
extract, of *Helicobacter pylori* (rat), 107:70
fecal consistency in diarrhea and, 108:1729
flux
colonic permeation of inulin and (rat), 108:12
octreotide and (prairie dog), 108:1547
gustatory stimulation during sleep and (dog), 107:650, 107:879–e
Helicobacter pylori found in, 110:973–tmig, 110:1031
injection, in pharyngeal stimulation, 110:419
jejunal, absorption promoted by gum arabic from oral rehydration solutions in diarrhea (rat), 112:1979
pharyngeal stimulation, lower esophageal sphincter tone and, 108:441
retention
prazosin and, 109:1257
RU 51599 and, 109:217
secretion, colonic, role of tachykinins, capsaicin sensory and vagus nerves, 112:1595
stimulation of pharynx with induces relaxation of lower esophageal sphincter, 111:378
swallow, deglutitive vocal cord closure and, 108:1357
Water load, in cirrhosis, plasma arginine vasopressin response to, 106:678
WB strain, small intestinal injury in giardiasis and (rat), 109:766
Weakening injury, upper endoscopy and, 106:789–srr
Weaning
down-regulation of lactase, 112:1506
T-cell activity and dependence of intestinal epithelial growth on (rat), 111:37
WEB-2086, eosinophil migration and, 108:409
Webs, congenital esophageal stenosis and, 109:275–cr
Weight
colon cancer risk and, 106:1121–ss
gain
fermentation and (rat), 107:637
FK506 and (rat), 109:107
preascitic cirrhosis and, 108:1820
loss
AIDS and, 110:1316–ss
amylase inhibition and (dog), 108:1221
chronic diarrhea in HIV infection and, 110:30
colonic sarcoidosis and, 108:1556–cr
Enterocytozoon bieneusi infection, thalidomide therapy for, 112:1781–tmig
rumination syndrome and, 108:1024
Western blot analysis
Ancylostoma caninum and, 106:1–tmig, 106:3
antiphosphotyrosine, epidermal growth factor receptor kinase and (rat), 107:1278
calpain activation during oxidative stress and (rat), 110:1897
carbonic anhydrase and, 108:1802
α-5(IV) collagen chain in fetal small intestine and, 107:957
epidermal growth factor receptor kinase and (rat), 107:1278
glutamine synthetase and, 106:1312
microsomal autoantibodies in viral hepatitis and, 108:455
MnSOD induction in acute colitis and (rat), 109:801
mucin and, 106:353
NHE-1 isoform of Na^+/H^+ antiport and (rat, rabbit), 109:1421
peroxynitrite and nitric oxide in IBD and (guinea pig), 109:1475
spasmolytic peptide and (rat), 106:336
transin secretion and (rat), 109:889
Western societies, *Helicobacter pylori* acquisition and, 107:899–ss
WF(RT1^u) splendocytes, primed T cells and (rat), 107:1537–rc
Wheat amylase inhibitor, carbohydrate digestion and (dog), 108:1221
Wheat bran
dietary, diacylglycerols and, 106:883
suppresses aberrant crypts (rat), 110:508
Wheat germ agglutinin (WGA), in colon cancer cell growth, 106:85
Whipple procedure
for severe chronic pancreatitis, 107:897–ss
update on status, 113:983–srr
Whipple's disease, 113:371–tmig
bacterium, PCR assay and, 110:1735
central nervous system and, 106:782–cr

defects of humoral immunity, 113:442
defects of monocyte IL-12 production, 113:442
staging and monitoring of, 113:434
White blood cells (WBCs)
cytochrome P4502E1 and (rat), 107:1430
DNA, peripheral, CYP2E1/GSTM1 genotypes in HCC and, 109:1266
mesalamine for Crohn's disease and, 110:688
peripheral, opioid binding in cholestasis and (rat), 108:1479
Sandhoff disease and, 106:775–cr
significance of differential when leukopenia is induced by 6-MP for IBD, 113:1810–c
White matter, cerebral, Whipple's disease and, 106:782–cr
Whole-body hyperthermia, ischemia/reperfusion injury and (rat), 109:505
Whole-body irradiation, ion transport dysfunction and (rat), 106:286–tmig, 106:324
Whole cell bacterial adhesion assay, *Helicobacter mustelae* and *Helicobacter pylori* adhesion to eukaryotic cells in vitro and, 109:692
Whole-cell patch clamp techniques, ursodeoxycholate and, 109:965
William Beaumont Prize, 112:2114–aga
Wilson's disease, 113:345–e
acute rhabdomyolisis in, 108:885–cr
asymptomatic, diagnosis in siblings, 109:2015–c
changing diagnosis, 113:1–tmig
childhood, 108:1268–srr
diagnosis, 113:350–e
DNA linkage analysis of, 110:2025–c
gene, rat homologue of, 107:1189–rc
genetic analysis of, 109:2015–cr
intrahepatic transplantation of normal hepatocytes prevents in Long-Evans cinnamon rats, 111:1654
liver cell necrosis and, 108:264–srr
oxidant injury to hepatic mitochondria and (dog), 107:1788
in patients with liver disease, 113:212
PET as diagnositic tool, 114:227–c
premature oxidative aging of hepatic mitochondrial DNA in, 113:599
prevention of liver dysfunction in, 111:1405–tmig
and sunflower cataract, 112:6–im
Wine, heartburn and, 108:2–tmig, 108:125
Women
adult polycystic kidney disease/adenoma of ampulla of vater in, 109:2007–cr
celiac disease/alopecia areata in, 109:1333–cr
duodenal brake and, 110:740
endoscopic sphincterotomy and, 110:894
functional bowel disorders in, 109:1017–ss
gastric toxoplasmosis in AIDS and, 110:258–cr
intestinal permeability in, 108:1575–srr
ischemic hepatitis due to obstructive sleep apnea in, 109:1682–cr
jejunal sensorimotor dysfunction in IBS and, 110:393
late radiation enteropathy in, 109:1078
mast cell cholangiopathy in, 109:1677–cr
multiple focal nodular hyperplasia of liver in, 108:1256–cr
onion consumption and reduced stomach cancer risk in, 110:12
postmenopausal, nucleation of biliary cholesterol, arachidonate, prostaglandin E_2, and glycoproteins in, 112:1278
rumination syndrome in, 108:1024
sexual abuse of, 108:1945–ss
smoking in Crohn's disease and, 110:424
transient LES relaxations in, 109:1704–e
upper esophageal sphincter (UES)/esophageal achalasia in, 109:1328–cr
X-linked urea cycle defect in, 109:282–cr
Wood chuck hepatitis virus (WHV), hepatitis B virus and, 106:828–tmig, 106:1006
Wooden chest phenomenon, fentanyl in, 106:820–c
Working capacity, maintaining, ulcerative colitis course and, 107:1–tmig, 107:3
World Wide Web, and gastroenterology, 114:5–ce
Wounded monolayer assay, human spasmolytic polypeptide and, 108:108
Wound healing, and cyclooxygenase 2 in stomach, 112:645–e
Wounding, intestinal epithelial cells, and TGF-alpha activation of MAPK, 114:697 (rat)
Ws/Ws rats, c-*kit*—expressing cells and (rat), 109:456

Xanthine amine congener, ATPactivated conductances in biliary cells and, 107:236
Xanthine oxidase
circulating, during liver transplantation, 114:1009
free radical and (cat), 106:629
Xenobiotics
alcoholic liver disease and, 106:1093–srr
hepatic glucuronidation and (rat), 108:183
Xenografts, retinoids in pancreatic cancer and, 109:1646
***Xenopus laevis* oocytes,** organic anion transport protein and, 109:1274
Xenotransplantation, development and future of, 115:811–ce
X-linked urea cycle defect, parenteral nutrition and, 109:282–cr
X-ray microanalysis, altered cell ions in cystic fibrosis jejunum and, 110:411
X region deletion mutants, hepatitis B virus and, 108:1810
Xylose
AIDS-related cryptosporidiosis and, 108:957–tmig, 108:1075
bacterial overgrowth and, 106:557–tmig, 106:615
hypothermic cardiopulmonary bypass and, 106:318
intestinal permeability and, 108:983, 108:1569–srr
L-Xylose, absorption of, glucose-stimulated, 107:389
[^{14}C]D-Xylose breath test, late radiation enteropathy and, 109:1078

Yamada, Tadataka, M.D., 110:1331–aga
Yamaguchi 73 virus, premalignant colon lesions and, 108:117
Yeast
cholera toxin inhibition by, 106:2–tmig, 106:65
DNA mismatch repair and, 109:1685–srr
Yellow phenolphthalein, in fecal Na^+ and K^+ excretion, 108:752
***Yersinia enterocolitica,* acute colitis and (rat),** 106:1190
Yes kinase activity, in colonic adenomas, 108:117, 108:291–e
Yohimbine, apolipoprotein A-IV and (rat), 109:1583

ZES. *See* Zollinger—Ellison syndrome
Zileuton, versus mesalazine or placebo, maintenance of remission of ulcerative colitis, 112:718
Zinc, deficiency of, diarrhea, and uroguanylin, 114:221–ss
Zollinger-Ellison syndrome
detection of lesions in with Octreoscan scintigraphy, 111:845
interrelation with *Helicobacter pylori* and proton pump inhibitor therapy, 112:84
metastatic rate and survival in, 108:1637
primary cardiac gastrinoma causing, 112:567
prognosis, use of p53 serum antibodies against p53 for predicting, 114:37
serum antibodies to p53 in, 114:1–tmig, 114:37
somatostatin receptor scintigraphy, 112:321–tmig
surgery and, 108:1600–ss

Zonula occludens
ileitis and (rabbit), 109:13
toxin, role of paracellular pathway in enterotoxic effect of on small intestine (rabbit), 112:839
ZO-1 protein, pancreatitis and (rat), 108: 1863
Z scores, low bone density in Crohn's disease and, 107:1031
Zwitterionic phospholipids, trinitrobenzenesulfonic acid and (rat), 110:780
Zymogen-enriched fraction, lysosomal enzymes in pancreatitis and (rat), 109:573
Zymogen granule(s)
gastric chief cell, rab3D protein on (rat, rabbit), 110:809
membranes, myosin I association with in pancreatic acinar cells (rat), 113:649
protein, in acute pancreatitis (rat), 107: 1819
Zymogenic cells, TGF-α in terminal differentiation of (transgenic mice), 108:447
Zymography, transin secretion and (rat), 109:889
